Clipping. The clipping feature allows users to tag, or clip, specific areas (zones) on a page for recognition in a batch. This feature often works in conjunction with the deferred processing feature.

Deferred Processing. With deferred processing, users can scan pages and save them for processing (recognition) later. When used with the clipping feature, users can clip different zones from scanned pages, such as different articles from business journals or scientific reports, and then send them through the recognition process all at once. Users simply choose "batch mode" from the menu, thus saving time and keystrokes.

Multiple Zone and Special Zone Recognition. The multiple zone capability lets users select up to 99 recognition zones per page. The zones can be specified for text, numbers or images, and saved into separate files. Users can build personal knowledge bases, and with a single click of their finger, save only graphics or specific text references or numbers.

In addition, users can define valid characters for a zone. For example, many legal codes or part numbers use only certain characters or numbers. If a zone employs characters or numbers not defined for that field, the zone is flagged for user verification.

Multiple File Recognition. Users can process multiple jobs and create separate files for each by simply inserting a blank sheet of paper between them as they are scanned. This feature is extremely useful for those who process many documents of a similar nature, such as contracts or expense reports. The documents can be batched together, yet filed separately.

Column (or Block) Selection. Although OmniPage has always automatically divided columns appropriately, this column selection feature lets users override the automatic capability and redefine columns. The feature is useful when dealing with tabular material of related matter, which can be recognized as blocks of columns rather than individual columns.

Interactive Mode. When scanning in documents with selected zones, the system automatically makes a template of that scan setting for consecutive pages. Interactive mode lets users override this automatic ability and change the scan settings after each page. This allows them to collect only the images or text desired.

Fax Support. OmniPage Professional supports all popular fax file formats. More importantly, it allows fax files to be opened, recognized and reformatted in a single step. Support for proprietary formats, such as those from Intel, Panasonic and others, is also available.

OmniSpell(TM) and OmniDraft(TM) Now Included. OmniSpell and OmniDraft, which were previously available only as add-on options for OmniPage, are now built-in features of OmniPage Professional. OmniSpell is an advanced 100,000-word spell checker that flags standard as well as OCR-related spelling errors. OmniSpell works either automatically or interactively, suggesting corrections and letting users create customized dictionaries.

OmniDraft lets OmniPage read draft-mode dot-matrix characters with nearly the same speed and accuracy possible with printed or typed characters. System Requirements

OmniPage Professional requires MS-DOS, version 3.1 or above; Windows, version 3.0; and a Windows 3.0-compatible 80386 system with 4 megabytes of RAM, a hard disk with 8 megabytes of storage space, and a Windows-compatible pointing device, such as the Microsoft Mouse(TM).

OmniPage Professional supports scanners from Hewlett-Packard, Microtek, Ricoh and most other scanner manufacturers. It indirectly supports additional scanners through black-and-white TIFF files. Pricing and Availability

OmniPage Professional has a suggested retail price of $995. The program will be available this month from personal computer dealers. Caere will reduce the price of all existing versions of OmniPage, the company's popular page recognition program for Macintosh(R), IBM and IBM-compatible computers to $695.

OmniPage Professional is featured in Caere's exhibit (booth No. 2826) here at Comdex, along with five other company products: OmniPage 3.0 page recognition software, which was the first 32-bit program to be developed for Windows 3.0; OmniPage for the Macintosh; two models of the Typist, a hand-held scanner for MS-DOS and Macintosh users; and the Parallel Reader, a sophisticated OCR system for high-volume use.

Caere Corp., based in Los Gatos, Calif., is the industry's leader in the design, manufacture and sale of information recognition software and systems products. These products provide an economical, accurate means of converting text, numeric and bar-code data into computer-usable form.

#90317p6209 11/13/1990 ~PR Newswire

PHILADELPHIA (NOV. 13) PR NEWSWIRE - Consolidated Rail Corp. (NYSE: CRR) today announced the selection of Uniland Development Co. of Amherst, N.Y., as its prospective partner in the development of a 250- acre business park in Cheektowaga, N.Y., just outside Buffalo.

Negotiations toward a final agreement are under way. The development will focus on rail-served businesses. Potential tenants include consumer and industrial goods distributors, food processors and light manufacturing companies. Primary candidates for locating at the developed site will be Greater Buffalo area businesses looking to expand or replace current operations and Canadian companies seeking U.S. locations within easy access of their Canadian facilities.

"Conrail's continued commitment to economic and industrial development efforts in the Greater Buffalo area is demonstrated by this investment," said James A. Hagen, Conrail's chairman, president and chief executive officer. "The development of this property enhances the area's economy and Buffalo's tradition of supporting rail-served industries."

A recent division of the former freight car classification yard by Conrail and Norfolk Southern provides Conrail with approximately 250 acres available for development. While the primary development focus will be on rail-served industries, the location also offers excellent access to other modes of transportation; it is located about one mile south of exit 52 of the New York State Thruway (I-90), and less than four miles southwest of Buffalo International Airport.

Uniland is the largest full-service industrial and office developer in the Western New York area. The company was founded in 1976 for the purpose of developing real estate, primarily for its own portfolio. A privately held organization, Uniland has developed nearly 5 million square feet of property.

Conrail operates a rail freight transportation network in 14 Northeastern and Midwestern states, the District of Columbia, and the Province of Quebec.

#90317p6219 11/13/1990 ~PR Newswire

LONDON (NOV. 13) PR NEWSWIRE - London International Group plc (NASDAQ-NMS: LONDY), the consumer products and services group, today announced pre-tax profits of 18.8 million pounds sterling (1989: 16.2 million pounds), an increase of 16 percent, for the six-month period ended Sept. 30, 1990.

Operating profit was 23.6 million pounds (1989: 20.8 million pounds), up 13.5 percent on sales of 185.8 million pounds (1989: 172.9 million pounds), an

increase of 7.5 percent. Interest costs are almost unchanged, and are covered 4.9 times.

Earnings per ordinary share were 9.40 pence (1989: 8.27p), up 13.7 percent.

The directors have approved an interim dividend of 3.00p per ordinary share, an increase of 11.1 percent.

Commenting on the interim results, Alan E. Woltz, chairman and chief executive said, "We performed in line with our expectations, which is particularly pleasing in the face of a continuing economic downturn in many of our major markets. The strengths of our brands in the marketplace will enable us to meet the challenges presented by the current trading environment."

Health and Personal Products

The Health and Personal Products division achieved operating profit of 11.1 million pounds (1989: 10.2 million pounds), up 8.8 percent on turnover of 111.1 million pounds (1989: 105.8 million pounds), an increase of 5 percent.

The condom market continued to expand in Europe and market share increased in most countries. The opening of what was previously the East German market further improved volume growth in Germany.

North American profits improved over the corresponding period last year, in spite of a condom market that showed no growth.

The U.K. vending operations were franchised in September, as part of an overall strategy aimed at the youth market. In the U.S., the recently acquired Protex brand will strengthen retail share and enable the group to exploit the underdeveloped vending sector.

The surgeons' gloves business continued to achieve good rates of conversion to Biogel. The brand's U.S. introduction continued on track and the construction of the new Biogel manufacturing facility in Malaysia is on schedule.

Household and industrial gloves showed volume growth in what were very competitive trading conditions.

Photoprocessing

The photoprocessing division, ColourCare, achieved operating profits of 12.5 million pounds (1989: 10.8 million pounds), up 15.7 percent on sales of 74.7 million pounds (1989: 66.6 million pounds), an increase of 12.2 percent.

The U.K. photoprocessing market experienced volume decline during the first half, but market share gains enabled ColourCare to achieve continued volume growth.

In view of the disappointing results from the Spanish wholesale

photoprocessing operations and the worsening economic outlook, a decision has been taken to negotiate an exit from this business, while retaining the growing mail order business in this market. Net assets are approximately 5 million pounds. Any loss arising from this decision will be treated as an extraordinary item in the full year accounts.

Growth opportunities in developing the mail order businesses in Europe, including the mail order business in Spain, remain strong. First half progress was good in these businesses.

NASDAQ

In October, London International Group plc was listed on NASDAQ's National Market System for its American Depositary Receipts.

Dividend

The dividend is payable on April 8, 1991, to shareholders on the register at the close of business on March 11, 1991.

London International is a world leader in its core businesses of health and personal products and photoprocessing services. It is the global leader in branded condoms, and holds leading positions in latex gloves for surgical, dental, household and industrial use as well as in health and beauty aids. It is the largest independent photoprocessor in Europe.

TEL-AVIV, ISRAEL (NOV. 13) PR NEWSWIRE - Mair Laiser, president of ECI Telecom Ltd. (NASDAQ: ECILF) today reported sales and earnings for the third quarter and nine-month period ended Sept. 30, 1990.

Sales for the quarter increased by 44 percent to $19,350,000, compared with $13,448,000 for the comparable period in 1989. Gross profit increased by 71 percent to $10,208,000, compared with $5,979,000 in the same period of 1989. Net income rose to $3,919,000 compared with $1,380,000 in the corresponding period last year, a 184 percent increase. Fully-diluted earnings per share were $.56 compared with $.24 in the third quarter of 1989.

Sales for the nine months ended Sept. 30, 1990 were $54,299,000, an increase of 40 percent over sales of $38,745,000 in the first nine months of 1989. Gross profit for the period increased 62 percent to $27,656,000, compared with $17,088,000 in the same period of 1989. Net income for the period was $11,142,000, compared with $3,671,000 in the corresponding period of 1989, up 203 percent. Fully-diluted earnings per share were $1.64, compared with $.65 in the first nine months last year.

The company's results continued to be favorably affected by strong sales of its Digital Circuit Multiplication Equipment (DCME), close monitoring of overhead expenses and continually improving production efficiency. The company's sales were strongest in the United States where sales grew by 80 percent compared with the parallel 1989 period. Sales in Europe rose 44 percent.

The company's position as a world leader in the area of DCME was further emphasized last month at a meeting in Frankfurt of ECI equipment users from 15 countries including the United States, Japan, Germany, Britain and Australia, wherein product development and applications were discussed and ideas exchanged.

ECI Telecom designs, develops and markets telecommunications and

communications systems employing digital speech processing, switching technologies and technologies compatible with ISDN (Integrated Services Digital Network). These systems are designed to increase the conversation, data and facsimile carrying capacity of telecommunications networks operated by domestic and international long-distance carriers, PTT's and private line users. Other systems manufactured by the company are designed to improve command, control and communications networks.

WORCESTER, MASS. (NOV. 13) PR NEWSWIRE - Alpha-Beta Technology, Inc. announced today that it has entered into a non-exclusive agreement with Pierce Chemical Company to market one of Alpha-Beta's proprietary adjuvants for use in biomedical research. Pierce will market the adjuvant under the name Adjuprime(tm).

Based on a yeast-derived carbohydrate called PGG, Adjuprime has been shown in animal studies to increase the immune (antibody) response to levels comparable to the most effective research adjuvants now available. However, Adjuprime lacks the toxicity associated with other available adjuvants. Currently, the multi-million dollar market is dominated by Freund's Complete Adjuvant. The beneficial and unique properties of Adjuprime combined with Pierce's market presence should gain a significant market share for the new product.

"The agreement with Pierce Chemical, one of the world's leading distributors of immunology research products, will provide Alpha-Beta with a near-term revenue stream as we continue the development of our carbohydrate-based therapeutics and other human health care products," said David Easson, Sc.D., executive vice president of Alpha-Beta. "We believe our initial carbohydrate-based therapeutics, now undergoing preclinical development, have major potential in the multi-billion dollar infectious and cardiovascular disease markets."

Alpha-Beta Technology, Inc. is developing patentable carbohydrate- based products for the health care industry through the application of carbohydrate engineering. In addition to the vaccine adjuvants, a form of which is also being developed for human use, Alpha-Beta's major products in development include Fibercel(tm), a cholesterol-lowering agent and fat substitute, and Betafectin(tm) for the treatment of hospital infections. Alpha-Beta's headquarters, laboratory and pilot production facilties are located in Worcester, Mass.

CONTACT: David Easson, Sc.D., executive vice president of Alpha-Beta Technology, Inc., 508-798-6900 or Robert Gottlieb, vice president of Peter Feinstein, Inc., 617-577-8110, for Alpha-Beta Technology, Inc.

#90317p6222 11/13/1990 ~PR Newswire

GUILDERLAND, N.Y. (NOV. 13) PR NEWSWIRE - Intermagnetics General Corporation (IGC) (NASDAQ: INMA) announced today that it has delivered the key components of an Electromagnetic Thruster Laboratory to the Naval Underwater Systems Center (NUSC), Newport, R.I. The equipment will be used to test a novel underwater propulsion system that the company believes may lead to designs that are quieter and more efficient than the conventional rotating propellers currently in use for naval vessel propulsion.

The propulsion system is based on a phenomenon known as Magnetohydrodynamics, or MHD, in which a powerful magnetic field produced by a superconducting magnet interacts with an electric current induced directly into seawater to create a force on the seawater. The equipment configured to achieve this is referred to as a superconducting electromagnetic thruster, and it exerts a force on seawater passing through its core, driving water out the back, thereby creating forward motion. There are no moving parts -- no propellers, no gears and no drive shaft.

IGC supported NUSC personnel with development of the specifications for the laboratory and its equipment, and then designed and built the superconducting electromagnetic thruster. In addition, IGC provided training to government personnel at NUSC for operation of the equipment.

The laboratory will be used to simulate seawater MHD propulsion and experiment with the various parameters of the phenomenon to develop optimized performance design criteria.

Carl H. Rosner, president of IGC, noted that a similar superconductor-based propulsion system for an ocean-going vessel has been designed and built in Japan. The hull for the ship has been named Yamato I," and the 185-ton vessel is scheduled to be operational for tests early next year.

"We are pleased to assist the U.S. Navy in its multi-year program to develop this technology, and we look forward to participating further in the effort," Rosner said.

IGC is a leading manufacturer of superconducting wire and superconducting magnet systems, especially those used in MRI medical diagnostic imaging systems. The company also produces cryogenic equipment, permanent magnet systems and material separators.

NEW YORK (NOV. 13) PR NEWSWIRE - Sanmark-Stardust Inc. (AMEX: SMK) today

reported results for the first quarter of fiscal year 1991.

For the three months ended Sept. 30, 1990, sales totaled $38,322,000, as compared to sales of $36,270,000 during the three months ended Sept. 30, 1989. Income from operations during the recently ended first quarter was $1,817,000 vs. $1,693,000 in the prior year's first quarter. Net income during the first quarter of fiscal 1991 totaled $1,244,000, or $.08 per share, vs. net income of $1,093,000, or $.07 per share, during the same period last year.

Commenting on the company's results, Mark M. David, chairman of Sanmark-Stardust, said, "We are extremely pleased with the company's performance during the recently ended first quarter, especially in light of the current retail climate. Considering current conditions, it is also gratifying to be ahead of last year's pace. As well, our performance during the recently ended quarter serves to illuminate those positive factors which we believe Sanmark-Stardust has working in its favor. Namely, diversity of products, sound financial condition, efficient operations, improved profitability at the manufacturing level, weakening competition and stronger than ever relationships with retailers.

"However, while we are obviously pleased with these results and the company's current direction, we also intend to continue with our ongoing program directed at further streamlining and strengthening our operations so that we may remain competitive despite any continued weakness in the retail sector and the economy in general," David concluded.

Sanmark-Stardust Inc. designs, manufactures, markets and sells an extensive line of ladies sleepwear, robes, leisurewear, loungewear, panties and daywear; men's work and leisure shirts; children's clothing; and also operates 27 retail outlet stores.

CONTACT: Saul Pomerantz of Sanmark-Stardust Inc. 212-679-7260; or Barry A. Rothman of Profile Communications, Inc., 305-742-2086, for Sanmark-Stardust Inc.

#90317p6225 11/13/1990 ~PR Newswire

CITY OF INDUSTRY, CA (NOV. 13) PR NEWSWIRE - Stor Furnishings International Inc. (NASDAQ: STOR) has completed arrangements for the financing and construction of the company's fourth supercenter, which will be in Houston and should open in the Spring of 1991, James D. Stadlander, president and chief operating officer, announced today.

The newest Stor will be on interstate 10 one exit west of the 610 Loop and like the company's stores in Southern California will have approximately 150,000 square feet offering a broad range of affordable home furniture, furnishings, housewares and accessories.

This new supercenter, however, will be the prototype for further expansion of the chain, reflecting the company's latest research on store design and layout as well as its years of experience with its Southern California supercenters.

Stadlander commented: "We are pleased and excited to be taking Stor outside Southern California. Over the last several years, we have been fine tuning the Stor concept in this highly competitive market and we believe we have excellent prospects for growth in Houston and other markets."

In order to facilitate this project in a difficult real estate financing market, Stor and the developer have agreed to proceed without third party financing. Stor will provide $2.5 million toward the cost of leasehold improvements by contributing its previously announced $2.5 million loan, with a commensurate reduction in its rent. The developer will provide the remainder of the funds necessary to complete the shopping center. Stor will be responsible for any cost overruns on its building. He added: "Expansion of our supercenter base remains a central element in Stor's operating strategy and we have identified a number of new sites in large metropolitan markets. Our efforts to proceed with these new locations, however, have been complicated by the current unsettled state of the real estate financing market."

Stor Furnishings International Inc. operates high volume supercenters offering a large selection of high quality, affordable home furniture and furnishings, as well as housewares and accessories, available in-stock for customers to take home the same day. It currently operates three 150,000 square foot supercenters in Southern California.

BINGHAMTON, NY (NOV. 13) PR NEWSWIRE - Resource Recycling Technologies, Inc. (AMEX: RRT) announced today that its board of directors had approved a stock repurchase plan pursuant to which the company will from time to time in the open market repurchase up to 5 percent (up to 135,000 shares) of the company's common outstanding stock. The company will use its own funds to make the purchases. The plan will remain in effect for a period not to exceed sixty (60) days, commencing today.

Lawrence J. Schorr, president and chief operating officer of RRT, stated, "We believe that RRT is currently priced significantly below its current and potential value." The company has cash and cash equivalents of over $2.00 per share.

Resource Recycling Technologies, Inc. is a vertically integrated organization dedicated to the advancement of recycling programs and technologies, and the development of new markets for secondary materials.

NEW YORK (NOV. 13) PR NEWSWIRE - NYMAGIC, INC. (NASDAQ: NYMG) reported today the results of consolidated operations for the quarter and nine months ended Sept. 30, 1990. John N. Blackman, Jr., chairman, announced that total revenues for the third quarter of 1990 were $20,537,645, a decrease of approximately 14 percent over the third quarter of 1989 revenues which were $23,825,122. For the nine months ended Sept. 30, 1990 total revenues were $65,384,555, a decrease of approximately 6 percent over the nine months ended Sept. 30, 1989 revenues of $69,786,465. Realized investment gains in the third quarter of 1990 were $1,387,751 as compared to $1,610,642 for the third quarter of 1989. Included in total revenues were realized investment gains of $4,063,274 for the nine months ended Sept. 30, 1990 as compared to $4,208,353 for the nine months ended Sept. 30, 1989.

Net premiums earned for the three months ended Sept. 30, 1990 were $14,634,566 as compared to $18,238,332 for the three months ended Sept. 30, 1989, for a decrease of approximately 20 percent. For the nine months ended Sept. 30, 1990 net premiums earned were $48,041,352 as compared to $53,942,107 for the nine months ended Sept. 30, 1989, for a decrease of approximately 11 percent. Net investment income for the three months ended Sept. 30, 1990 was $4,361,171

an increase of approximately 12 percent over the third quarter 1989 net investment income of $3,888,895. For the nine months ended Sept. 30, 1990 net investment income was $12,756,497 as compared with $11,389,932 for the nine months ended Sept. 30, 1989, an increase of approximately 12 percent.

Net income for the three months ended Sept. 30, 1990 was $4,876,183 as compared to $5,244,568 for the third quarter of 1989, a decrease of approximately seven percent. Net income for the nine months ended Sept. 30, 1990 was $15,695,021 as compared to the nine months ended Sept. 30, 1989 net income of $15,276,921. Net income per share for the third quarter of 1990 was $.55 compared to $.60 for the same period a year ago and $1.78 for the nine months ended Sept. 30, 1990 as compared with $1.75 for the same period of 1989.

Net income in the third quarter and nine months ended Sept. 30, 1990 included tax benefits of $51,000 and $153,000, respectively, as a result of the "Fresh Start" provision under the Tax Reform Act of 1986. Prior year tax benefits for the third quarter and nine months ended Sept. 30, 1989 were $61,000 and $153,000, respectively.

NYMAGIC, INC. is a holding company whose property and casualty insurance subsidiary specializes in ocean marine, inland marine, aircraft and non-marine liability insurance.

EAST BRUNSWICK, NJ (NOV. 13) PR NEWSWIRE - Chemical Bank New Jersey (CBNJ) has joined the New York Cash Exchange (NYCE), one of the nation's largest regional automated teller machine (ATM) networks.

"By including NYCE among our 24-hour ChemBankCard network options, we've greatly enhanced banking convenience for our customers within New Jersey and as they travel interstate," noted Neil F. Hall, executive vice president of Consumer Banking. "Chemical Bank in New York is a founding member of NYCE. Our expansion into the system is another step in integrating our Chemical services and products, thus broadening the scope of our consumer banking activities."

Said Alan P. Pohlman, president of NYCE, "Chemical Bank New Jersey's participation in NYCE is a significant expansion of our coverage of the New Jersey market. Like CBNJ, NYCE is headquartered in New Jersey, and this region has always been very important to all of the financial institutions in our network."

With the addition of CBNJ's ATMs, NYCE now has 821 machines in New Jersey. NYCE's 16.3 million cardholders, including CBNJ's customers, have access to 3,499 NYCE ATMs in the tri-state area and a total of 9,082 NYCE ATMs in 25 states, the District of Columbia and Puerto Rico.

CBNJ, headquartered in East Brunswick, is a subsidiary of the multi- bank holding company, Chemical Banking Corporation. CBNJ has 129 banking locations and 110 24-hour ChemBankCard machines throughout New Jersey.

The NYCE ATM Network is owned by nine Northeastern banking organizations, including Chemical Bank in New York. NYCE is operated by the New York Switch Corporation, headquartered in Hackensack, N.J.

TEMPE, ARIZ. (NOV. 13) PR NEWSWIRE - Symbion Inc. (NASDAQ: SYMB) announced today its results of operations for the third quarter ended Sept. 30, 1990. Largely as a result of the U.S. Food and Drug Administration's (FDA) withdrawal of the Investigational Device Exemptions (IDEs) for Symbion's Total Artificial Heart (TAH) and Acute Ventricular Assist Device (AVAD), sales in the first three quarters of 1990 were down significantly from the comparable period of the prior year. The company has not sold any of these products during 1990. Third quarter sales in 1990 were $338,000, compared to $512,000 in the same quarter last year. Sales for the first three quarters of 1990 were $759,000, compared to $2,451,000 for the same period last year.

Sales of the MITROFLOW valve (the only product currently sold by Symbion) have increased by 38 percent in the first three quarters of 1990, despite the company's decision in May 1990 to voluntarily discontinue sales of the product in the United States. The MITROFLOW valve is currently being sold primarily in Europe.

The net earnings reported in 1989 included a $5.8 million second quarter gain realized on the sale of Symbion's Centrifugal Pump Technology and a $193,000 third quarter gain realized on the sale of Symbion's INERAID artificial ear technology. In 1990 Symbion has recognized an additional $750,000 gain ($375,000 in the second quarter and $375,000 in the third quarter) as a result of additional cash payments received pursuant to the sale of the Centrifugal Pump Technology. The impact of this gain on net earnings in 1990 was offset by a $752,000 inventory writedown ($100,000 in quarter two and $652,000 in quarter three).

ALLENDALE, NJ (NOV. 13) PR NEWSWIRE - Kentek Information Systems, Inc. today announced that Ricoh Company, Ltd., of Tokyo, and Nippon Paint Company Ltd., of Osaka have made equity investments in Kentek.

The Ricoh investment represents less than 10 percent ownership of Kentek. It is associated with an agreement between the two companies to cross license patents in the electrophotographic and printing technologies.

The Nippon Paint investment is also less than a 10 percent ownership. With this investment, Nippon Paint expands its commitment to support Kentek's development program in the areas of electrophotographic toners and developers.

According to Kensuke Fukae, chairman of Kentek, "the backing of Ricoh and Nippon Paint significantly improve Kentek's credibility worldwide. Both companies are international in scope, each has vertically integrated manufacturing and is a worldwide leader in office automation and coatings respectively."

Ricoh Company, Ltd. is a vertically integrated developer, manufacturer, and marketer of a wide range of office automation products with sales and production facilities worldwide.

Nippon Paint Company, Ltd. is a fully integrated developer, manufacturer and marketer of industrial and commercial paints, specialized coating and coating processes, and fine chemicals.

Kentek Information Systems, Inc., headquartered in Allendale, has R&D facilities in Boulder, Colo.; sales offices in Allendale; Bedford, Mass.; Kendall, Fla.; Covina, Calif.; and Frankfurt, Germany; and engineering facilities in Nagano and Tokyo, Japan. The company is one of the world's leading producers of mid-volume page printers and markets worldwide through OEM and distributor channels.

DOMINGUEZ, CALIF. (NOV. 13) PR NEWSWIRE - Len Williams, 53, a veteran retail executive, has been elected president and chief executive officer of Pic 'N' Save Corporation (NASDAQ: PICN), the nation's leading close-out retailer. His election came at a meeting of the company's board of directors yesterday, and is effective immediatley Williams succeeds Lewis B. Merrifield III, who announced his resignation on July 31, 1990.

Williams was also elected to Pic 'N' Save's board, replacing Merrifield who resigned his board seat yesterday.

Williams is a former president of Caldor, a division of Associated Dry Goods, and a former chief executive officer of Gold Circle, a division of Federated Stores. He also served as chief executive officer of Lion-Nathan's retail operations in New Zealand.

"The search committee of the board, and ultimately the entire board of directors of Pic 'N' Save, was extremely impressed with Williams' consistent ability to increase sales, reduce costs and refocus merchandise in his various retail management assignments," said Peter S. Willmott, chairman of Pic 'N' Save's board and the head of its executive search committee.

"We are delighted that Len Williams has accepted our offer to lead the company's management team. We are confident that under his leadership the company will achieve its goals in the months and years ahead," he said.

Williams said that he feels Pic 'N' Save has significant potential. "Pic 'N' Save has always been the market leader in close-out retailing and is well-positioned for an exciting future," he said.

Williams and his wife currently live in Westport, Conn., but will be relocating to the Los Angeles area soon. They have two grown children.

The company, through its subsidiary PNS Stores Inc., operates a chain of 186 retail stores in the West and South. These stores all specialize in new, close-out, general merchandise which is sold at substantial reductions from original retail prices. Last year the company posted $475 million in sales.

CONTACT: Michael S. Sitrick or David S. McAdam of Sitrick and Company, 213-208-1108, for Pic 'N' Save Corp.

#90317p6252 11/13/1990 ~PR Newswire

DENVER (NOV. 13) PR NEWSWIRE - MinVen Gold Corp. (AMEX: MVG) announces today its financial results for the three and nine months ended Sept. 30, 1990.

MinVen recorded a third quarter consolidated earnings of Cdn$263,340 or

Cdn$0.01 per share, compared with consolidated earnings of Cdn$1,111,447 or Cdn$0.05 per share in the corresponding 1989 quarter.

Consolidated revenues for the quarter were Cdn$14,038,008 on sales of 31,561 ounces of gold and 112,119 ounces of silver compared to Cdn$14,830,700 on sales of 30,980 ounces of gold and 52,423 ounces of silver in the third quarter of 1989. Consolidated revenues do not include proceeds of Cdn$1,623,136 realized on the sale of 3,421 ounces of gold and 15,000 ounces of silver which reduced the cost of developing the Golden Reward Mine into commercial production.

MinVen recorded a nine-month consolidated loss of Cdn$3,839,324 or Cdn$0.13 per share compared with consolidated earnings of Cdn$193,826 or Cdn$0.01 per share in the corresponding period of 1990. Consolidated revenues for the first nine months were Cdn$32,666,664 on sales of 69,543 ounces of gold and 254,903 ounces of silver compared to Cdn$34,698,603 on sales of 71,745 ounces of gold and 139,798 ounces of silver in the first nine months of 1989.

Consolidated cash flow from operations amounted to Cdn$3.4 million during the third quarter of 1990 compared to Cdn$4.6 million in the comparable period of 1989.

"While nine-month results for 1990 were affected by lower gold prices and higher costs at several of MinVen's mines during the early part of the year," said James A. Anderson, president and chief executive officer, "the third quarter results, both income and cash flow, reflect the progress MinVen has made in surmounting its operating problems at the Gilt Edge Mine, progressing in the start-up of the Golden Reward Mine, and strengthening its financial position."

MinVen Gold is a publicly held, Denver-based mining company with interests in five operating mines in the U.S. and Canada. Its shares are traded on the American, Toronto and Vancouver stock exchanges under the symbol MVG.

NEW YORK (NOV. 13) PR NEWSWIRE - The American Stock Exchange announced that 2,789,920 common shares of Environmental Tectonics Corporation of Southampton, Pa., began trading today. As the only company with a proven ability to simulate conditions and effects experienced in a variety of environments, Environmental Tectonics specializes in the technology of environmental simulation in the air, on land and under sea. The company previously traded in the NASDAQ National Market System under the symbol ENVT.

Trading under ticker symbol ETC, the common stock opened on 100 shares at

3-1/4.

Environmental Tectonics uses advanced technologies that relate to pressure, heat flow, vacuum, stress and fluid flow to design, manufacture, install and support systems which simulate, modify, control and measure environmental conditions and their effects. The company's high technology equipment simulates the conditions and effects experienced by temperature, humidity pressure, gas content, gravitational forces and disorientation illusions.

Environmental Tectonics serves customers worldwide in the aeromedical aviation training system/flight simulator, pharmaceutical, medical device, hospital, hyperbaric medicine, automotive and industrial sterilization industries.

The company reported unaudited net income of $747,000, or $.26 per share, on revenues of $10,737,000 for the six months ended Aug. 24, 1990, compared with net income of $442,000, or $.16 per share, on revenues of $9,808,000 for the comparable period in 1989.

EAST HILLS, NY (NOV. 13) PR NEWSWIRE - At a time when the United States' stature in science and technology and its global competitiveness are being questioned, the White House paid tribute to a group of scientists and engineers who have excelled in applying their scientific acumen to advances in technology which have been successfully commercialized.

Dr. David B. Pall, founder of Pall Corporation (AMEX: PLL), was awarded the National Medal of Technology by President George Bush, at a ceremony held at the White House today.

The medal, America's highest honor in technology, is awarded annually by the president of United States to recognize those who have made exceptional contributions to the well-being of the nation, through the development and application of technology.

The award was granted to Pall for successfully coupling inventive scientific research on the fundamentals of filtration with engineering technology, to provide a 40-year series of products which have significantly improved safety, efficiency, and economy across a wide spectrum of industrial and health activities.

These include filters and other porous devices used in medicine, biotechnology pharmaceuticals, microelectronics, food processing, aircraft, chemical processing, and many other industries.

Pall had been granted 108 U.S. patents. His most recent project has resulted in a filter, now in use in several thousand hospitals, which is highly beneficial to patients receiving blood transfusions.

Pall Corporation, now with sales of almost $600 million a year, has a global reach and is the leading fine filter company in Europe and Japan as well as in the United States.

Pall Corporation is headquartered in Glen Cove, N.Y. The company is the international leader in the design, manufacture, and marketing of filters and other fluid clarification devices which serve the health care, aeropower, and fluid processing markets. The company employs 6,300 people at offices and manufacturing facilities throughout the world.

DENVER (NOV. 13) PR NEWSWIRE - Atlas Corporation (NYSE: AZ) announced today that its Board of Directors has appointed Richard J. Kehmeier vice president of exploration. Kehmeier will direct the company's domestic and international exploration efforts.

"Dick Kehmeier has been a valuable member of our exploration team for over seven years and has demonstrated considerable technical skill and strong leadership ability. I firmly believe that Dick has the capability both to direct our exploration efforts and to continue developing Atlas' precious metal reserves," said Richard R. Weaver, president and chief executive officer of Atlas Corporation.

Dick Kehmeier joined Atlas in 1983, most recently serving as manager of U.S. exploration. He has been instrumental in building the company's 1.5 million ounces of proven and probable mineable gold reserve. He played an important role in the discovery of the Goldstone, Gold Ridge and Gold Pick satellite deposits as well as the key role in the discovery of the 995,900-ounce Grassy Mountain gold and silver deposit in Malheur County, Ore.

Prior to working for Atlas Corporation, Kehmeier was a geologist with Union Carbide Corporation, the Anaconda Company and the Midwest Oil Company. He earned a B.S. in Geological Engineering and an M.S. in Geology from the Colorado School of Mines in Golden, Colo. Kehmeier is a native of Colorado, where he resides with his wife and three children.

Atlas Corporation is a mining company whose primary business is gold exploration and production. The company has exploration efforts underway in several western states, with significant gold discoveries in Nevada and Oregon. The company currently produces 80,000 ounces of gold per year from its Gold Bar Mill in Nevada and is planning to produce an additional 100,000 ounces of gold per year from its Grassy Mountain deposit, beginning by mid-1993.

#90317p6265 11/13/1990 ~PR Newswire

HUTCHINSON, KS (NOV. 13) PR NEWSWIRE - Doskocil Companies Incorporated (NASDAQ: DOSKQ) today announced a net loss of $5,760,000 for the third quarter ended Sept. 29, 1990, compared to a net loss of $6,407,000 for the quarter ended June 30, 1990. However, the company recorded an operating profit of $2,817,000 in the third quarter of 1990 compared with an operating profit of $2,042,000 in the second quarter of the year, continuing the improvement trend

noted in the second quarter.

Doskocil's loss from continuing operations before reorganization items for the third quarter was $2,316,000 compared to a loss of $3,233,000 in the second quarter of 1990. The results of continuing operations for the third quarter of 1990 included a non-cash charge of $750,000 as a provision for loss on sale of its subsidiary, Golden Harbor Seafoods, Inc. For the third quarter of 1990 special reorganization charges totaled $3,444,000 and increased the net loss to $5,760,000. In the second quarter, the net loss of $6,407,000 included reorganization charges of $3,174,000.

Net sales in the third quarter of 1990 totaled $99.1 million for a 4.6 percent increase over the second quarter's net sales. The third quarter of 1989 posted net sales of $134.0 million, but those results included sales of $34.9 million from Anderson Meats, a subsidiary which was sold in the fourth quarter of 1989.

Ted Myers, senior vice president and chief financial officer, said "The improvement in operating profit continues to reflect the company's cost cutting programs and operating efficiencies which were implemented earlier this year. This favorable trend in operating efficiencies is expected to continue for the remainder of the year." Myers also stated, "In addition, shortly after the quarter ended, we signed a letter of intent for the sale of the Oklahoma City edible fats and oils refinery and yesterday announced the closing of one redundant meat processing facility."

Myers added that the company expects to incur further net losses during the period of restructuring because of costs related to the company's Chapter 11 filing. "However," Myers said, "the favorable trend in operating profits demonstrates the soundness of the company's core business."

Doskocil and 18 of its subsidiaries, including Wilson Foods Corporation, filed for protection under Chapter 11 of the United States Bankruptcy Code on March 5, 1990. As had been previously announced in July, the United States Bankruptcy Court for the District of Kansas granted the company an additional period of exclusivity to Jan. 11, 1991, for which it may propose a plan of reorganization and an additional 60 days, until March 12, as the period to solicit consents for such a plan.

Doskocil and its subsidiaries specialize in formulating, processing, marketing and distributing specialty pre-cooked value-added meat, meat toppings, pepperoni and other "deli" specialty meats. The company is a leading supplier of beef and pork toppings and pepperoni to the pizza foods service market. In addition, Doskocil and its subsidiaries supply products to grocery and independent delicatessens, numerous restaurants, food processors and institutional customers.

BLOOMINGTON, MINN. (NOV. 13) PR NEWSWIRE - Discus Corporation (NASDAQ: DISC), a Bloomington, Minn.-based restaurant company, reported today a net profit of $106,103 or $.05 per share for the third quarter ended Sept. 30, 1990, compared with a net profit of $82,767 or $.04 per share during the third

quarter of 1989. Sales decreased 7.6 percent to $4,078,427 during the third quarter of 1990 from $4,410,929 in the year ago period.

For the first nine months of 1990, the company lost $132,892, or ($.06) per share compared to a net profit of $101,166 or $.05 per share in the year ago period. Sales were $12,242,561 during the first nine months of 1990 (39 weeks), off 3.3 percent from $12,656,111 in the year ago period (40 weeks).

During the quarter Discus benefited from a $144,200 reduction in marketing expenditures versus last year. Mike Platt, Discus president, said that, "This lower level of couponing and promotion activity is the primary factor responsible for the third quarter's lower sales compared to last year."

Discus Corporation operates nine Fuddruckers restaurants in Minneapolis and St. Paul, Minn.; Milwaukee, Wis.; St. Louis, Mo.; and Omaha, Neb. The company's common stock is traded over-the-counter under the NASDAQ symbol DISC.

Flakt Alpha, has been awarded a contract to build a new automotive paint facility at Ford of Canada's Oakville Assembly Plant. The project value is estimated at more than $200 million.

Fluor Daniel's Industrial Sector will provide engineering, procurement, construction and project management for the 750,000- square-foot paint plant to be built adjacent to Ford's car assembly plant in Oakville, Ontario, Canada 25 miles west of Toronto. The Oakville Assembly Plant, with an annual capacity of 226,000 vehicles, produces Ford Tempo and Mercury Topaz models for the Canadian and U.S. markets.

Ford has contracted Fluor Daniel and ABB Flakt Alpha to provide design, fabrication, installation, start-up, training and maintenance program development for paint process equipment, conveyors, automation and facilities.

Engineering is under way in Fluor Daniel's Greenville, S.C., and Toronto offices and at Flakt Alpha's Detroit offices. The construction and equipment installation workforce is expected to reach 900. Project completion is scheduled for early 1992.

The project is a joint venture between Fluor Daniel and ABB Flakt Alpha, a member of Zurich-based Asea Brown Boveri Group. ABB Flakt provides products and services for automotive paint finishing systems in 35 countries worldwide.

Fluor Daniel Inc., Fluor Corp.'s (NYSE: FLR) principal subsidiary, is an international engineering, construction, maintenance and technical services company with more than 50 offices around the world.

IRVINE, CALIF. (NOV. 13) PR NEWSWIRE - Fluor Daniel announced today that it has been awarded a contract by Netherlands-based Nederlandse Aardolie Maatschappij B.V. for a major North Sea oil production complex. The value of the contract is approximately $14 million.

Fluor Daniel's Hydrocarbon Sector will provide detailed engineering and procurement for an oil and gas production platform complex to be located 160 miles offshore on the Dutch Continental Shelf in the North Sea. The scope of work consists of a single lift 6,000-ton drilling and production platform deck connected by bridge to a separate platform with living quarters, control room and helideck. Gas production rates are expected to reach 125-million-cubic-feet-per-day and 24,000-barrels-per-day. The complex will utilize the latest North Sea safety standards and technology.

Engineering is under way in Fluor Daniel's Haarlem, The Netherlands, offices with engineering completion scheduled for late 1991. Manpower is expected to peak at 110 personnel.

The produced oil will be stored in a concrete gravity base substructure on the ocean floor for transport via submarine pipeline to a shuttle tanker mooring located 1.5 miles from the platform. NAM is a Dutch oil company equally owned by Shell and Esso Europe (Exxon).

Fluor Daniel Inc., Fluor Corp.'s (NYSE: FLR) principal subsidiary, is an international engineering, construction, maintenance and technical services company with more than 50 offices around the world.

#90317p6281 11/13/1990 ~PR Newswire

OMAHA, NEB. (NOV. 13) PR NEWSWIRE - Pamida Holdings Corporation (AMEX: PAM) today reported fiscal 1991 third-quarter net income of $463,000, compared to fiscal 1990 third-quarter net income of $1,187,000. Pamida's current fiscal year ends on Feb. 3, 1991.

Sales for the quarter totalled $159,468,000, a 4.1 percent increase over sales for the third quarter of last year. Operating income before non-recurring expense was $7,947,000, or $385,000 less than that reported for the same

period last year. Net income available for common stock for the third quarter of fiscal 1991 was $151,000, or 3 cents per common share, compared to fiscal 1990 third-quarter net income available for common stock of $877,000, or 18 cents per common share.

For the first nine months of the year, Pamida Holdings Corporation posted net income of $2,249,000 on sales of $468,560,000. This compares to last year's nine-month net income of $2,459,000 on sales of $439,248,000. Net income available for common stock for the first nine months of fiscal 1991 was $1,314,000, or 26 cents per common share, compared to net income available for common stock for the first nine months of fiscal 1990 of $1,529,000, or 31 cents per common share.

Richard W. Ramm, executive vice president and chief financial officer of the company, said that the lower earnings during the third quarter of this year resulted in part from non-recurring expenses of $428,000 incurred by the company in connection with a public offering of Pamida Holdings Corporation common stock owned by Citicorp Venture Capital, Ltd. Ramm said that the non-recurring expenses also stemmed in part from a previously proposed public offering of common stock by the company. He also noted that unusually warm weather during the third quarter had an adverse effect on sales of many seasonal items.

Pamida currently owns and operates under the "Pamida" name 174 general merchandise discount department stores in 12 Midwestern, North Central and Rocky Mountain states. The company believes that it is the leading discount store operator in 64 percent of the communities it serves and the second-leading discount store operator in 30 percent of these communities. Pamida stores provide one-stop family shopping convenience for a wide variety of national brand name and other general merchandise.

#90317p6282 11/13/1990 ~PR Newswire

SYDNEY, AUSTRALIA (NOV. 13) PR NEWSWIRE - During August, Monoclonal Medical, Inc. (NASDAQ: MEMOA) successfully undertook preliminary phase I clinical trials in humans with the proprietary monoclonal antibody designated WM66.

A 59-year-old male with advanced refractory lymphocytic lymphoma was selected for treatment with WM66. The antibody was infused intravenously over two hours daily in increasing dosages up to 30 milligrams, given in five days. No significant toxic side effects were detected. The peripheral blood white cell count fell by up to 50 percent immediately after each infusion. At the conclusion of the therapy, peripheral blood white cell count had declined by 50 percent. During the five days of therapy the patient's spleen size had

reduced by more than 25 percent.

Monoclonal Medical, Inc. has been awarded or applied for international patents in respect of WM66.

The initial phase I trial has concluded that WM66 produces cytroreduction when infused intravenously in a patient with Non-Hodgkins Lymphoma (NHL), without evidence of toxicity. The company has proceeded to refine further pharmaceutical quality monoclonal antibody, WM66 to undertake further phase I clinical trials before proceeding to a multicenter phase II trial with this antibody.

The company has obtained regulatory approval to undertake a further three phase I patient trials in December 1990 and January 1991.

The success of this initial phase I trial opens a number of options to the company in the development of effective therapeutic monoclonals for the treatment of adult leukemia and lymphoma. Amongst these options is the application of leading scientific technology to produce "humanized" therapeutic monoclonal antibodies.

The company has commenced a program of publicizing the results of its initial phase I clinical trial through scientific literature and medical networks. The company proposes to actively pursue further trials with the unconjugated monoclonal WM66 given its demonstrated efficacy.

SOMERVILLE, NJ (NOV. 13) PR NEWSWIRE - UNIMED, Inc. (NASDAQ: UMED) announced today that, effective Jan. 1, 1991, Dr. Harold J. Tenoso has been elected chairman and chief executive officer and Charles P. Harrison has been elected president and treasurer. Paul V. Bollenbacher, who will retire from his position as chairman, will continue to serve as a consultant to the company and remain on UNIMED's board of directors as chairman emeritus.

Dr. Tenoso, president since 1986 and chief executive officer since 1989, joined UNIMED in 1985 as executive vice president. Prior to joining the company, he was general manager of a division of Organon Inc., serving previously in senior management positions in operations, research and development, and technical marketing.

Harrison, executive vice president since 1989 and treasurer since April 1990, joined UNIMED in 1986 as vice president sales, marketing and business development. He previously served in senior sales and marketing positions with SmithKline Beckman and Organon Inc.

"Mr. Bollenbacher has been a major influence in the growth of UNIMED and we are grateful for his contributions," said Dr. Tenoso. "His retirement as chairman will allow him more time to spend with his family and to pursue other interests. We are pleased that he will continue to serve the company."

Dr. Tenoso went on to say, "Fiscal 1990 was a year of accomplishment for UNIMED with successes in our development programs, the sales growth of Marinol (R) (dronabinol) and the introduction of Marinol outside the United States. Our financial objective is to achieve breakeven performance during fiscal 1991 and, as our products continue to advance, establish key alliances to accelerate the development of our business."

UNIMED, Inc., specializes in the development and marketing of new pharmaceuticals, with emphasis on cancer therapy and supportive care of cancer patients. The company has already brought two pharmaceuticals to market and has a portfolio of drugs in various stages of development.

STURBRIDGE, MASS. (NOV. 13) PR NEWSWIRE - SpecTran Corporation (NASDAQ: SPTR) today announced completion of an agreement with Allen and Company Incorporated to convert SpecTran's $600,000 unsecured 9 percent note payable to Allen into 342,857 shares of SpecTran voting common stock.

Also as part of the agreement, Allen's previously existing warrant to purchase 250,000 shares of SpecTran voting common stock at an exercise price of $4.74 per share until Aug. 14, 1993, was amended to increase the number of shares by 100,000, for a total of 350,000 shares, with adjustments in the exercise price to $2 and the life of the warrant to Aug. 14, 1999. Based on the market value of the stock at the early September date on which all major terms were agreed to, the stock conversion price was at a 47 percent premium to market and the exercise price was at a 68 percent premium to market. After the conversion shares are issued, Allen will own 9.5 percent of the company's outstanding stock, and if the entire Allen warrant were exercised, Allen would own approximately 15.5 percent.

Also as part of the Allen agreement, two warrants totaling 50,000 shares originally held by Allen and obtained by a present and a former director as a result of an earlier agreement between Allen and its then appointees to SpecTran's board, were also amended to a $2 per share exercise price and to a life of the warrants to Aug. 14, 1999, with no increase in the number of shares. The original terms of these warrants were the same as the Allen

warrant.

Commenting on the agreement, SpecTran's president and chief executive officer, Raymond E. Jaeger, said, "As a result of this conversion, SpecTran's balance sheet has been further strengthened, eliminating the $600,000 cash payment previously scheduled for 1993 as well as three annual interest payments of $54,000 each, for a total cash savings of $762,000. The company has had a longstanding relationship with Allen which began in 1981 when Allen provided the company's start- up private placement financing. We are pleased with the confidence shown by Allen in SpecTran's future by converting this debt to an equity position."

SpecTran Corporation develops, manufactures and markets glass optical fibers.

#90317p6289 11/13/1990 ~PR Newswire

CINCINNATI (NOV. 13) PR NEWSWIRE - The Penn Central Corporation (NYSE: PC) announced that it has reached an agreement in principle with American Financial Corporation ("AFC") for the purchase by Penn Central of AFC's non-standard automobile insurance group (the "NSA Group") for $335 million in cash, subject to certain closing adjustments. The purchase price is subject to further modification in 1995, based on actual 1991-94 pre-tax earnings of this business, by a reduction of up to $20 million or an increase of up to $40 million, in each case plus interest.

AFC's previously announced purchase price proposal of $408 million had included the sale of the NSA Group's excess and surplus lines business. The transaction has now been restructured to exclude the excess and surplus lines business without reducing the book value of the automobile insurance business to be purchased. The book value of this business at Sept. 30, 1990, was approximately $210 million.

A special committee of independent Penn Central directors, which had been appointed to review and negotiate the transaction, recommended approval of the terms of the transaction after completion of its negotiations. The special committee relied in part on an opinion of Morgan Stanley & Co. Incorporated that the financial terms of the transaction are fair to the shareholders of Penn Central (other than AFC, which owns approximately 42 percent of Penn Central's common shares).

Under the proposed terms of the transaction, all non-investment grade securities and real estate interests and all equity securities (other than shares of Chiquita Brands International, Inc., an AFC affiliate) in the investment portfolios of the NSA Group will be replaced prior to closing with cash and marketable securities without additional cost to Penn Central. After

the closing, investment decisions with respect to the approximately 915,000 Chiquita shares remaining in the portfolios, representing approximately 2.25 percent of the Chiquita shares outstanding, would be vested in the independent directors on Penn Central's executive committee.

In addition, AFC, through its insurance affiliate, will provide stop-loss protection which, in effect, guarantees the adequacy of all reserves of the NSA Group (net of reinsurance and salvage recoveries) related to events occurring prior to 1991 under policies written by the NSA Group.

The NSA Group being purchased consists principally of Atlanta Casualty Company Windsor Insurance Company and the automobile insurance business of Stonewall Insurance Company. These companies insure risks not typically accepted for standard automobile insurance coverage because of the applicant's driving record, type of vehicle, age, or other criteria. AFC estimates that the NSA Group is the fifth largest writer of non-standard automobile insurance in the United States.

Net premiums earned by the NSA Group's non-standard automobile insurance business have grown at an annual rate of 17 percent over the past three calendar years. The NSA Group reported net premiums earned for this business of $318 million for the full year 1989 and $314 million for the first nine months of 1990. Including results expected for 1990, the NSA Group's non-standard automobile insurance business will have earned an underwriting profit in each of the past four years other than 1988, when its combined ratio was 100.2 percent. Pre-tax income attributable to this business is estimated to have been $39.5 million in 1989 and $31.3 million for the first nine months of 1990. At Sept. 30, 1990, the total cash and invested assets of the NSA Group relating to its non-standard automobile insurance business were approximately $400 million.

Penn Central operates businesses primarily in the areas of industrial manufacturing, defense services, insurance and energy.

CHICAGO (NOV. 13) PR NEWSWIRE - McCormick Capital, Inc. (NASDAQ: MKOR) announced today the results of the third quarter and nine months ended Sept. 30, 1990. Revenues for the third quarter ended Sept. 30, 1990 were $2,054,879 compared to $2,590,954 during the same period last year. Net income for the three-month period was $100,023 ($.07 per share) compared to $205,503 ($.08 per share) for the third quarter last year.

Revenues for the nine months ended Sept. 30, 1990 were $5,714,565 compared with $7,883,673 for this period in 1989. There was a net loss of $23,885 (-$.02 per share) compared to income of $396,145 ($.16 per share) for the nine month period ended Sept. 30, 1989.

Peter Dauchy, president of McCormick Capital, Inc., said, "We are gratified that our efforts to refocus the company from any retail orientation to the more credit stable aspects of futures investment limited partnerships appear to be coming to fruition. We have structured our organization to provide the company with better control and economy in bringing commodity pool offerings, and expect that our subsidiary, McCormick Futures Management, Inc., will be bringing a new fund early in 1991."

Dauchy went on to say, "We continue to pursue lower interest payments through our buyback program of McCormick Capital subordinated notes and during the third quarter purchased in the open market $151,000 in par value of these notes brining our total for the nine months ended Sept. 30, 1990 to $318,000. We also announced, during the third quarter, approval by the United States District Court for the Northern District of Illinois, Eastern Division, for McCormick Futures Management, Inc. to become the general partner and commodity pool operator for seven commodity funds previously associated with Stotler

Funds, Inc. Under the terms of the transaction approved by the district court McCormick Futures Management, Inc. will subscribe for units of general partnership and will pay a premium based on the net asset value of the funds at the closing, which is expected prior to the end of the year and is subject to certain conditions.''

McCormick Capital, Inc. is engaged in various aspects of the commodity futures and securities industry, including futures brokerage and organization and management of futures investment limited partnerships.

MIAMI (NOV. 13) PR NEWSWIRE - Eastern Airlines today said it flew 1.15 billion revenue passenger miles and had a 55.02 percent load factor in October. Capacity was 2.09 billion available seat miles; passenger boardings were 1.60 million.

Eastern said that while October traffic results reflect the traditional seasonal slowdown, yield per revenue passenger mile was 28 percent higher than in October, 1989 due to an increase in traffic from business flyers.

In October 1989 Eastern flew 1.30 billion revenue passenger miles, with capacity of 2.05 billion available seat miles and a 63.14 percent load factor. Passenger boardings were 1.8 million.

Easten currently operates about 800 daily flights to more than 70 cities.

#90317p6313 11/13/1990 ~PR Newswire
BRENTWOOD, NY (NOV. 13) PR NEWSWIRE - Allou Health & Beauty Care, Inc. (AMEX: ALU), a premier distributor of health and beauty aids on the Atlantic Seaboard today announced record operating revenues and earnings for the second quarter and first half ended Sept. 30, 1990.

"Second quarter earnings from operations were up 43 percent on a 36 percent rise in revenues. The company achieved these increases as a result of expanding its core business, making faster than anticipated gains in its newly added packaged food division and further extending its nationwide sales of its higher margin cosmetic items through catalog marketing to chains. In addition the products we distribute are basic items which are unaffected by recessionary pressures. We expect this trend to continue and to report record revenues and earnings for the year," Herman Jacobs, president, said.

Sales for the second quarter ended Sept. 30, 1990, increased 36 percent to $23,665,028 from $17,418,235 in the same period last year. Operating earnings for the quarter were up 43 percent to $326,773, or $0.13, an increase of 44 percent per share, on 2,580,000 shares outstanding, from $228,445, or $0.09 per share, on 2,580,000 restated shares outstanding in the same quarter a year ago. Due to an award of $610,000, which was reduced by legal fees and other expenses, in its suit against Computer Associates International, overall net profit for the second quarter was $586,727, or $0.23 per share.

Sales for the first half were $43,653,883, an increase of 23 percent, compared to sales of $35,365,491 in the first six months of last year. Operating profit for the first half was $595,511, or $0.23 per share, on 2,580,000 shares outstanding, an increase of 28 percent, against $463,882, or $0.18 per share, on 2,580,000 restated shares outstanding in the same period last year. Due to an award of $610,000, which was reduced by legal fees and other expenses, in its suit against Computer Associates International, overall net profit for the first half is $855,465, or $0.33 per share.

Allou is in its strongest financial position with a credit line today of $28,000,000 and minimal long-term debt.

FARMINGDALE, N.Y. (NOV. 13) PR NEWSWIRE - Medical Action Industries, Inc. (NASDAQ: MDCI) reported its results for the second quarter of fiscal 1991.

MEDICAL ACTION INDUSTRIES
(Unaudited; in thousands)

Periods ended Sept. 30	Three months 1990	Three months 1989	Six months 1990	Six months 1989
Net sales	$6,655	$7,143	$13,246	$13,188
Inc. before taxes	86	167	133	22
Net income	99	151	133	14
Earnings per share	$.02	$.03	$.03	$.00
Wtd. avg. number of shares outstanding	5,021	5,038	5,021	5,102

Sales for the second quarter were $6,655,000 which were 6.8 percent lower than last year's second-quarter sales of $7,143,000. For the six months ended Sept. 30, 1990, the net sales were $13,246,000 which were .5 percent higher than the six months ended Sept. 30, 1989, of $13,188,000. The company continued to experience strong unit growth and sales price stability in its laparotomy sponge line partially offset by reduced operating room towel sales due to import quota restrictions.

Net income for the second quarter was $99,000, or $.02 per share, compared to $151,000, or $.03 per share, for the second quarter of last year. Net income for the six months ended Sept. 30, 1990, was $133,000, or $.03 per share, compared to $14,000, or $.00 per share, for the six months ended Sept. 30,

1989.

At Sept. 30, 1990, the company was not in compliance with certain financial covenants in its bank loan agreements which necessitated the classifying of the loans as short term instead of long term and in default. The company is in discussions with the bank and anticipates obtaining waivers from the bank for the non-compliance.

Medical Action Industries Inc. is a leading domestic supplier of medical disposable lap sponges and markets a variety of surgical-related products.

DOWNSVIEW, ONTARIO (NOV. 13) PR NEWSWIRE - ALM Antillean Airlines this week introduced the 50-passenger Dash 8 Series 300 from Boeing Canada, de Havilland Division, to its scheduled services from Curacao to Bonaire, Aruba and the Venezuelan cities of Valencia and Caracas.

ALM becomes the first airline to offer Dash 8 Series 300 service into South America and third in the Caribbean to modernize its fleet with the Canadian-built turboprop airliners. The fuel-efficient Dash 8s provide pressurized, air conditioned cabin comfort with four-abreast center-aisle seating, overhead bins, galley and lavatory facilities.

ALM has leased two Series 300s from the AGES group of companies (the second scheduled to enter service by month's end). The Dash 8s replace F-27s on the airline's regional route structure and complement ALM's three MD82s which provide services throughout the rest of the Caribbean and to North America.

Worldwide, there are orders for 341 Dash 8s among 47 operators in 18 countries. To date, 231 (203 37/39-passenger Series 100s and 28 50/56-passenger Series 300s) have been delivered.

OKLAHOMA CITY, OK (NOV. 13) PR NEWSWIRE - The Phoenix Resource Companies Inc. (PSE: PHN) today reported income of $1.6 million, or 10 cents per common share for the third quarter ended Sept. 30, 1990, on revenues of $7.8 million. For the same period of 1989 the company reported a loss of $1 million on revenues of $5.8 million. On a pro forma basis, adjusting for the effects of the reorganization which became effective in April 1990, the loss for the third quarter of 1989 would have been $1.1 million, or 7 cents per share.

For the nine months ended Sept. 30, 1990, income of $2.5 million on revenues of $17.3 million was reported, compared to a loss of $4.3 million on revenues of $20.6 million for the same period of 1989. On a pro forma basis, income for the nine months ended Sept. 30, 1990, would have been $0.2 million, or 1 cent per common share, compared to a loss of $4.5 million, or 27 cents per common

share, for the same period of 1989.

The Phoenix Resource Companies Inc. is an oil and gas exploration and production company headquartered in Oklahoma City, Okla., with its primary producing properties in the Western Desert of the Arab Republic of Egypt. It is the successor to Texas International Co. by reorganization which became effective in April 1990.

JERSEY CITY, N.J. (NOV. 13) PR NEWSWIRE - Siggi B. Wilzig, chairman and president of The Trustcompany Bancorporation (NASDAQ: TCBC) parent company of The Trust Company of New Jersey, announced that the bank's net income for the nine months and quarter ended Sept. 30, 1990 was $15,498,000 and $3,908,000 respectively.

Wilzig further announced "In the third quarter even though we increased the provision for possible loan losses due to the continuing softness of New Jersey's economy, the bank's earnings continued to be strong."

Wilzig stated, "Our earnings performance can be attributed to the bank's conservative investment and loan policies. We have never held any "junk bonds" nor have we made any foreign loans or entered into real estate joint ventures."

The board of directors declared the regular quarterly dividend of $.14 per share payable Dec. 3, 1990. The annual dividend was increased 17 percent in August of this year.

In the third quarter the bank instituted a program to repurchase up to 400,000 shares of its own stock in the open market. The board considers this to be an opportune time to purchase shares of the bank since the overall industry climate has brought the market price of the stock below book value.

#90317p6337 11/13/1990 ~PR Newswire
ANDREWS, S.C. (NOV. 13) PR NEWSWIRE - Phoenix Medical Technology, Inc. (NASDAQ: PHNX) reported sales of $3,343,000 for the quarter ended September 23 1990, a decrease of 3 percent from the third quarter of 1989. A net loss of $1,166,000, $.59 per share, was incurred as compared with a net loss of $734,000, $.37 per share, for the prior year quarter. The prior year quarter included an income tax credit of $130,000.

Net sales for the nine-month period ended September 23, 1990 were $11,047,000, a decrease of 2 percent from the first nine months of 1989. A net loss of $2,848,000, $1.45 per share, was incurred as compared with a net loss of $1,577,000, $.80 per share, for the first nine months of the prior year.

Because of continuing severe market conditions, it is unlikely that the Company will be able to recover its original cost of machinery, equipment, buildings, improvements and land. The Company is in the process of restructuring its operations to accommodate current market conditions. As a result, the Company expects to record write-downs of asset values and other restructuring charges in excess of $5,000,000. The amounts of the write-down and restructuring charges are dependent on an appraisal of certain of the Company's assets as well as a final determination of the Company's business plans. The amounts will be charged to earnings in the fourth quarter of 1990.

On October 5, 1990, the Company announced that it had entered into a letter of intent with a California company, QRP, Inc. for the sale of 2,000,000 shares of the Company's stock at a price of $1.10 per share. QRP processes, markets and distributes specialty products, including protective hand covers, for the electronics, bioscience, pharmaceutical, precision clean and aerospace industries. The completion of the transaction is subject to the completion of QRP's due diligence, successful negotiation of final agreements and obtaining necessary regulatory approvals and approval of the Company's bank. While the company is continuing to discuss the transaction with QRP, the completion of the transaction appears doubtful. If a transaction is completed it may be on different terms than those contained in the letter of

intent. There can be no assurance that such a transaction will be completed.

#90317p6344 11/13/1990 ~PR Newswire

NORWOOD, MA (NOV. 13) PR NEWSWIRE - Analog Devices (NYSE: ADI) today announced a series of major organizational changes to make the company more competitive and responsive in the '90s.

In making this announcement, Ray Stata, chairman of the board and president, said, "The highly-decentralized organizational structure that has served the company well for so many years is no longer appropriate. The redundant costs associated with this structure are not competitive, and the fragmented organization has impeded our ability to respond quickly and effectively to changing customer requirements, especially when inter-organizational cooperation is required. We have therefore made three major organizational changes -- effective today -- designed to make us more efficient, and therefore more competitive.

"First, we have combined several divisions into a single Industrial Electronics Division to be headquartered in Norwood. IED will focus on industrial automation, automatic test equipment, industrial controls and motion control systems. The new division is made up of what were formerly the Industrial Products Division in Norwood; the Microelectronics Division in Wilmington, Mass.; the Computer Labs Division in Greensboro, N.C.; and the Memory Devices Division in the United Kingdom. IED is headed by J. B. Archinard, who was general manager of CLD.

"Second," continued Stata, "the Digital Signal Processing Division, headquartered in Norwood, and the Mixed-signal ASIC group, with resources in both Wilmington, Mass. and the United Kingdom, are being joined to form the Systems IC Products Division. This division will focus on VLSI to meet the needs of customers who require IC's with high levels of functional integration on a single chip. Dave French, who was general manager of the DSP division, will be responsible for this new division. "Mr. Archinard and Mr. French will continue to report to Executive Vice President Jerry Fishman," noted Stata. "The bipolar IC division in Wilmington, Mass.; the CMOS IC division in Limerick, Ireland; and the recently- acquired Precision Monolithics Division in Santa Clara, Calif. will continue reporting to Jerry Fishman.

"Our third major organizational change is the formation of a European headquarters based in Germany," continued Stata. "All of our European sales affiliates and sales representatives will be part of this organization, as will the European warehouse and distribution center currently under development in Switzerland. By centralizing many functions that were

previously managed at the country level, we will not only have a lower cost structure, but will also be in a better position to respond to customer requirements in the Tborderless' Europe of 1992. Brian McAloon, who was general manager of the CMOS IC division in Limerick, Ireland, has been promoted to vice president-european sales and marketing to head up this organization, reporting to Doug Newman, corporate vice president for sales and marketing.

"The organizational changes announced today follow our earlier announcement of a centralized IC manufacturing organization under the leadership of Tom Urwin, vice president of manufacturing. Already," concluded Stata, "Tom has identified a number of significant changes and improvements we can make to our manufacturing operations that will help us to lower costs and further improve customer service."

Analog Devices' sales for the fiscal year ended Nov. 3, 1990 are estimated at $485 million. This estimate includes fourth quarter revenues from Precision Monolithics Inc., which was part of Analog for the last 12 weeks of the fiscal year. The company plans to announce its fiscal 1990 results on December 11th.

The company is a leading manufacturer of precision high-performance integrated circuits used in analog and digital signal processing applications. The company also manufactures board-level products used in computerized data acquisition and measurement and control applications. Analog employs approximately 5,700 people worldwide, and has manufacturing facilities in Massachusetts, California, North Carolina, Ireland, Japan, the Philippines and the United Kingdom.

RED BANK, NJ (NOV. 13) PR NEWSWIRE - The trustees of North European Oil Royalty Trust (NYSE: NET) released the unaudited results for the final three months of the fiscal year ending Oct. 31, 1990 and for the full year as follows:

NORTH EUROPEAN OIL ROYALTY TRUST

Periods Ended	Three Months		Year	
Oct. 31,	1990	1989	1990	1989
German royalties received	$3,336,888	$2,533,467	$12,191,660	$9,192,237
Net income	3,238,974	2,458,997	11,706,277	8,801,545
Net inc. per unit	$.39	$.29	$1.41	$1.06

The information released by the trustees is subject to audit verification and

will be reflected in the annual report to unit owners of the trust and the Form 10-K to be filed for the trust.

In announcing the results, John H. Van Kirk, managing trustee, stated that the 33 percent increase for the quarter was attributable mainly to higher prices received for gas sales within Germany and secondly to higher conversion value for the Deutsche mark. Actual gas sales from the Oldenburg area were 7 percent lower than the prior year period.

The annual meeting of the trust will be held in New York City on Feb. 13, 1991. The record date for unit holders entitled to vote will be Jan. 2, 1991. It is anticipated that the annual report and proxy material will be mailed to unit holders early in January.

#90317p6347 11/13/1990 ~PR Newswire

ATLANTA, (NOV. 13) PR NEWSWIRE - T2 Medical Inc. (NASDAQ-NMS: TSQM) today reported record revenues and earnings for its fiscal year which ended Sept. 30.

Revenue for the fiscal year increased 64 percent to $73,070,000 compared with $44,594,000 restated for fiscal year 1989 for the mergers accounted for by the pooling of interests method. Net income for fiscal year 1990 was $15,416,000 or $1.13 per share compared to $9,591,000 or 90 cents per share restated for fiscal year 1989. This represents a 26 percent increase in earnings per share.

The significant increase in annual revenues and earnings represents our strong internal growth and the positive impact from the acquisition of previously managed companies and Intracare, acquired this past February. T2 weighted average common shares outstanding for the fiscal year ended Sept. 30 increased to 13,604,098 from 10,601,437 for the same period ended Sept. 30, 1989, as a result of the managed center acquisitions and public offerings of stock.

"This continued record growth reflects well on our innovative approach to home infusion therapy and the strategic direction in which the company is headed," said Thomas E. Haire, chairman.

T2 Medical Inc. is a leading provider of home infusion therapy in the United States. Infusion therapy is the administration to a patient of nutrients, antibiotics and other drugs and fluids, either intravenously or through a feeding tube. T2 Medical is located in Alpharetta, Ga.

RED BANK, NJ (NOV. 13) PR NEWSWIRE - De Tomaso Industries, Inc. (NASDAQ: DTOM) reported results today for the third quarter and first nine months of 1990. The company and its consolidated subsidiaries had a net loss of $8,956,522 or ($4.35) per common share for the three months ended September 30 1990, on sales of $43,674,334, as compared with a net loss of $4,957,375 or ($2.41) per share on sales of $78,159,420 in the third quarter of 1989. For the nine month period ended September 30, 1990, the company and its consolidated subsidiaries had net income of $44,400,682 or $14.52 per common share on sales of $224,799,659. This compares with a net loss of $9,495,311, equal to ($4.62) per share on sales of $273,244,672 for the first nine months of 1989.

Howard E. Chase, vice-president and general counsel of the company, expressed the view that economic recession, the crisis in the Gulf, and higher oil prices would continue to have a negative impact on the auto industry generally. However, he expressed the hope that production of Innocenti minis, resumed in November, and production of "Pandas" for Fiat, expected to reach a 30,000 unit annual rate by year end, would help the company resist the trend.

De Tomaso Industries, through its consolidated Italian subsidiaries, manufacturers Moto Guzzi motorcycles, Innocenti minicars, Maserati luxury cars and "Pandas" for Fiat. Through its Maserati Automobiles Incorporated subsidiary, the company imports Maserati Automobiles and Moto Guzzi motorcycles into the United States.

NEW ORLEANS (NOV. 13) PR NEWSWIRE - The administrative committee of the Avondale Industries Inc. (NASDAQ-NMS: AVDL) Employee Stock Ownership Plan announced today that the committee had authorized the ESOP Trustees to purchase up to 1.15 million shares of Avondale Industries Inc. common stock or approximately 8 percent of its 14.4 million shares outstanding.

All stock purchases under this program will be made in privately negotiated transactions, with the timing of purchases, number of shares purchased and the prices paid under the program to be at the discretion of the administrative committee, based upon prevailing market conditions and legal limitations.

Within the past nine months, the board of directors of Avondale has authorized Avondale's management to repurchase up to 1.5 million shares of its stock, both in privately negotiated transactions and in open market purchases, of which 1.2 million had been repurchased to date.

The ESOP is the record holder of approximately 6.7 million shares, or 46.3 percent, of Avondale's common stock, and if both Avondale and the ESOP acquire all of the shares authorized to be purchased, then the ESOP will own 55.3 percent of the outstanding common stock.

CANANDAIGUA, NY (NOV. 13) PR NEWSWIRE - Canandaigua Wine Company, Inc. (AMEX: CDG.A CDG.B) today reported net income for the fiscal year ended Aug. 31, 1990.

Net income was $4,435,580 or $1.04 per share as compared to a net income of $2,350,827 or 52 cents in fiscal 1989. Net sales for fiscal 1990 were $179,844,511, an increase of 9.5 percent from net sales of $164,261,439 last year.

Net sales for the fourth quarter and year increased as a result of the growth in the company's sales of its principal wines, grape concentrate, and newly-acquired brands. The improvement in net income resulted primarily from the growth in sales. The company made further reductions in the advertising expenses for its "Sun Country" brand, consistent with lower sales volumes, but such cost reductions were largely offset by higher costs related to the company's acquisition activity.

Marvin Sands, the company's chairman of the board, said: "We are pleased with the growth in sales and profits. Wine brand volume growth was impressive, Newly-acquired products such as "Chateau Luzerne", "Italian Swiss Colony" and "Jacques Bonet" also added to our overall business growth. We continue to maintain tight control over all expenditures and the results in increased net income."

Canandaigua Wine Company, Inc. is the fourth largest wine producer in the United Sates. The company owns and operates seven wineries in New York, California and South Carolina. Its principal brands are "Wild Irish Rose", "Manischewitz", "Sun Country", "J. Roget", "Marcus James", "Cisco" and "Widmer".

KING OF PRUSSIA, PA (NOV. 13) PR NEWSWIRE - International Mobile Machines Corp. (NASDAQ: IMMCC) announced today that Southwestern Bell Telephone, a wholly owned subsidiary of Southwestern Bell Corp. (NYSE: SBC) has purchased an Ultraphone digital radiotelephone system to provide telephone service to contractors engaged in constructing the mammoth Supercollider project.

The Ultraphone provides immediate telephone service because it can be moved from construction site to construction site. The Supercollider will be built in sections over a nine-year period.

Plans are to serve other construction sites in the south Dallas area. When completed, the superconducting Supercollider will be a 53 mile, oval-shaped, underground particle accelerator beneath and around the town of Waxahachi, Texas, south of Dallas. The collider is expected to create 4,500 construction jobs with its estimated multibillion-dollar capital expenditure and its $270 million-a-year operating budget. It also promises to attract international researchers, high-tech companies, hotels and restaurants.

By purchasing the Ultraphone system, Southwestern Bell is providing rapidly installed phone service to this highly sophisticated construction project without having to install and maintain extremely expensive buried cable once the construction is complete.

SEATTLE, (NOV. 13) PR NEWSWIRE - In response to recent questions concerning the decline in the market value of Plum Creek Timber Co., L.P.'s ("Plum Creek") (NYSE: PCL) partnership units, the company stated that it was unaware of any developments that would explain the decline other than third quarter earnings that were below the same period in 1989. However, the company noted that it continues to generate cash flow sufficient to sustain the distribution at the 80 cents per unit level.

Consistent with this level of financial performance, the company announced on Nov. 6 that it would pay a distribution of 80 cents per unit for the third quarter ending Sept. 30. The 80 cents per unit distribution represents a 33 percent increase above the intended minimum quarterly distribution of 60 cents per unit. The company will distribute 80 cents per depositary unit on Nov. 29 to unitholders of record as of Nov. 16. Accordingly, the units began trading ex-dividend on Friday, Nov. 9.

MINNEAPOLIS (NOV. 13) PR NEWSWIRE - Apertus Technologies Incorporated (NASDAQ: APTS) today announced a net profit of $103,000 on revenues of $5,277,000 for the second quarter, ended Sept. 30, 1990. This represents Apertus' second consecutive quarter of profitability since its restructuring last March, when Lee Data Corporation became Apertus Technologies Incorporated in connection with the sale of Lee Data's commercial and international business.

Net income for the second quarter included a non-recurring benefit of $800,000 resulting from the favorable settlement of an accounts receivable claim. Net income for the six months ended Sept. 30, 1990 totals $126,000, and revenues for the same period total $11,718,000. The company's cash reserves at the end of the second quarter are up slightly form the first quarter to $21,244,000.

Said Apertus Chairman and Chief Executive Officer Robert D. Gordon, "We are pleased with the progress Apertus is making with its focus on telecommunications services. With two consecutive quarters of profitability, coupled with a positive outlook for the third quarter, we are well on our way to achieving Apertus' goal of profitability in its first year."

Apertus Technologies Incorporated serves the data communications needs of the Regional Bell Operating Companies, independent telephone companies, and other closely related telecommunications companies with its Datastar 5000 Communications Systems, IBM system-compatible windowing terminals, intelligent workstations, printers, and extensive application software. The company is headquartered in suburban Minneapolis and has sales and service offices in Atlanta, Birmingham, Boston, Chicago, Cleveland, Dallas, Denver, Detroit, Houston, Indianapolis, New York City, Omaha, Philadelphia, St. Louis, San Francisco, Tampa, and Washington, D.C.

Apertus common stock is traded on the NASDAQ National Market System under the ticker symbol APTS.

CINCINNATI, (NOV. 13) PR NEWSWIRE - Jacor Communications, Inc. (NASDAQ: JCOR) Cincinnati, announced today an agreement to sell radio stations WMJI-FM (Cleveland) and WYHY-FM (Nashville, Tenn.) to Legacy Broadcasting, Inc. (formerly LBI Holdings, Inc.) subject to certain modifications to their original agreement.

Under an amended agreement, Jacor will receive approximately $29,750,000 in cash for these stations, as well as retain certain other assets. Legacy has deposited $3,000,000 with the closing escrow agent in partial payment. This deposit is non-refundable, except under limited circumstances. The sale of these stations will result in a gain of approximately $12,400,000.

Jacor Communications, Inc., headquartered in Cincinnati, currently owns 13 radio stations, a cable television system, the Georgia Network and Critical Mass Media, Inc. The company's stations are located in Cincinnati, Atlanta, Cleveland, Denver, Nashville, Knoxville, Jacksonville and Tampa.

Legacy Broadcasting, Inc., headquartered in Los Angeles, was formed by Carl E. Hirsch and Robert F.X. Sillerman. Legacy recently announced its intention to acquire through merger Command Communications, Inc., owner of KJQY in San

Diego, KODA in Houston, KRLD in Dallas and the Texas State Networks.

ST. LOUIS (NOV. 13) PR NEWSWIRE - The May Department Stores Co. (NYSE: MA) today reported fully diluted earnings per share from continuing operations of 67 cents for the third quarter of fiscal 1990, the 13 weeks ended Nov. 3, a 3 percent decrease from 69 cents per share in the same year-ago quarter. Net earnings from continuing operations for the third quarter were $90 million compared to $97 million in the similar 1989 period. For the third quarter, net retail sales from continuing operations were $2.4 billion, a 5.3 percent increase over $2.3 billion in the same 1989 quarter.

Fully diluted earnings per share from continuing operations for the first nine months of fiscal 1990 were $1.83, up 12 percent over $1.64 in the same 1990 period. Year-to-date net earnings from continuing operations were $248 million compared to $232 million last year. Net retail sales from continuing operations for the nine-month period totaled $6.8 billion compared to $6.2 billion a year ago.

May opened seven new department stores and 52 net new Payless ShoeSource stores during the third quarter. Lord & Taylor, Foley's, Filene's, May Company in Ohio, and May D&F opened one store each, while May Company in California opened two stores during the quarter.

Also during the quarter, May announced that an agreement had been signed to purchase the Thalhimers department store company for $325 million, subject to certain adjustments. The closing is expected to be completed this year. Additionally, the spin-off of Venture to May shareowners was completed on Nov. 3 with the distribution of 0.13 Venture shares per share of May common stock. The operations of Venture and Caldor (Caldor was sold in October 1989) comprised the company's discount store segment and are reported as discontinued operations.

The May Department Stores Co. is one of the largest retailers in the United States, operating 302 department stores and 2,869 specialty shoe stores at the end of the third quarter.

DOWNSVIEW, Ontario (NOV. 13) PR NEWSWIRE - Tyrolean Airways, based in

Innsbruck, Austria, today announced a follow-on order for Dash 8 aircraft with Boeing Canada, de Havilland Division.

The announcement comprises two 37-passenger Dash 8 Series 100s and two 50-passenger Series 300s previously ordered for Tyrolean's own use, plus one Series 100 and one Series 300 for Tyrolean's leasing business. Approximate value of today's announced orders is more than $51 million (U.S.).

With this contract, Tyrolean becomes the launch customer for the uprated PW123B engine option on the Dash 8 Series 300A. This new version of the PW123 offers a five-per-cent increase in take-off power, allowing higher payloads and greater flexibility when operating from airfields with difficult terrain.

One Series 100 from the new order is to be leased to Interflug, the Berlin-based former East German flag carrier. Scheduled Interflug Dash 8 service -- utilizing Tyrolean flight and maintenance crews -- will begin the week of Nov. 12 from Berlin to Warsaw, Prague and Copenhagen.

Interflug becomes the first airline of the former Eastern Bloc nations known to offer new-technology turboprop service and is the 10th European carrier to select the Dash 8 family of regional airliners. The Interflug agreement is through Tyrolean Airways using one Dash 8 Series 100 of Tyrolean's leasing arm Elveden Investments based in Dublin, Ireland.

Tyrolean was the first airline in Europe to introduce the Dash 8 Series 100 and currently operates six -- one of which is on lease to Germany's Contact Air. The airline also operates two Dash 7s, including serial no. 113, the last Dash 7 built.

Tyrolean this year celebrated its 10th anniversary of scheduled service from Innsbruck. The carrier launched Dash 7 service in May 1980, bringing frequent, comfortable and reliable service to the city which had been without regular air transport for several years. The airline's first Dash 8 entered service in April, 1985.

Worldwide, there are orders for 341 Dash 8s among 47 operators in 18 countries. To date, 231 have been delivered (203 Series 100s and 28 Series 300s).

NEW YORK (NOV. 13) PR NEWSWIRE - USLIFE Corporation (NYSE: USH) today announced the extension of its stock repurchase program. The board of directors has extended the current program through November of 1991 and authorized the purchase of up to one million common shares and/or other

outstanding equity securities. This action was announced by Gordon E. Crosby, Jr., chairman of the board, president and chief executive officer of USLIFE.

Excluding treasury stock, USLIFE Corporation has 15,421,219 common shares issued and outstanding.

Since the inception of the stock repurchase program in 1981, USLIFE repurchased approximately 10.4 million shares of its common stock at a cost of approximately $329.8 million which equates to an average price of $31.67 per share as compared to book value as of Sept. 30, 1990 of $58.81 per share.

Subject to prevailing market conditions and other factors, repurchases will be made in the open market or through negotiated transactions.

USLIFE Corporation is a life insurance-based holding company whose principal subsidiaries engage in the life insurance business. With nationwide operations, USLIFE has four ordinary life insurance companies and a credit insurance group with $98 billion of life insurance in force as of Sept. 30, 1990. Additionally, there are five other subsidiaries that furnish the life insurance companies with investment advisory, broker-dealer, real estate, data processing and administrative services.

#90317p6391 11/13/1990 ~PR Newswire

CLEVELAND (NOV. 13) PR NEWSWIRE - The Standard Products Co. (NYSE: SPD) announced today that it is hoping to break even in its fiscal 1991 second quarter, depending on the extent of start-up costs on the 1991 Ford Crown Victoria and Mercury Grand Marquis Program.

Speaking in New York today to auto analysts of the New York Society of Security Analysts, James S. Reid, Jr., Standard Products chairman and chief executive officer, said that launch costs including training, tool tryout and scrap are being incurred at the company's Silent Channel subsidiary in England in preparation for these models. These costs, combined with a continuing soft economy that is affecting the company's primary business segments both domestically and in Europe, are expected to result in a break-even performance for the fiscal 1991 second quarter, which will end Dec. 31, 1990. He noted, however, that the company's North American operations continue to show improvement over last year's comparable period, particularly the South Carolina plants. This improvement occurred despite the softness in the automotive market.

Losses at Silent Channel accounted for the company's net loss of $1,665,000 or 16 cents per share, in the fiscal 1991 first quarter. In the year-ago second quarter, Standard Products reported net income of $3,615,000, equal to 36 cents per share.

Reid said the outlook for the third quarter is dependent on the costs of the launch in England as well as on the car build of the American "big three" automakers. He said the directors will be reviewing the dividend level at the next meeting in December.

Cleveland-based Standard Products manufactures rubber and plastic parts for the automotive original equipment industry, rubberized track for military vehicles and plastic and magnetic door seals for home appliances. Its Oliver Rubber subsidiary is a major producer of tread rubber for truck tire retreading.

#90317p6394 11/13/1990 ~PR Newswire

NEW YORK (NOV. 13) PR NEWSWIRE - Ralph J. Cargiulo, CLU, has been elected to the board of directors of The United States Life Insurance Company and

promoted to executive vice president of this wholly owned subsidiary of USLIFE Corporation (NYSE: USH). At the same time, Edward H. Goodstone, CLU, has been appointed executive vice president-life insurance field marketing.

In making these announcements, Robert J. Casper, president and chief executive officer of United States Life, commented: "The promotion of Mr. Cargiulo and the appointment of Mr. Goodstone allow United States Life to continue building on the excellent results achieved over the last several years. Both veteran USLIFE executives are seasoned life insurance professionals with an ability to make significant contributions."

Ralph J. Cargiulo joined United States Life as an underwriter in 1960 and was elected an officer of the company in 1968. He was promoted to assistant vice president-underwriting in 1971 and, then, second vice president in 1973. In 1975 he was named vice president-chief underwriter and, in 1982, he was elected senior vice president- individual insurance services. Cargiulo earned his bachelor of science degree at Fairfield University and received his Chartered Life Underwriter (CLU) designation in 1972. He is a Marine veteran and a member of the Institute of Home Office Underwriters.

Cargiulo and his wife, Dolores, and their family reside in Massapequa, N.Y.

Edward H. Goodstone has been appointed executive vice president-life insurance field marketing. In this position, he will coordinate the United States Life field marketing and marketing support activities. Previously, he served as executive vice president-life insurance field marketing with USLIFE Corporation. Goodstone originally joined United States Life in 1975 as second vice president-field management and, subsequently, was named second vice president-advanced underwriting and pension sales. He was promoted to vice president in 1976 and named vice president-marketing in 1978.

In 1979, he joined USLIFE as vice president-marketing and was then promoted to senior vice president-marketing support in 1980. He was named executive vice president for USLIFE in January 1984.

Goodstone is a graduate of Brooklyn College where he earned his B.A. degree. He received his Chartered Life Underwriter (CLU) designation in 1964 and LIMRA Agency Management Certificate in 1970. Goodstone and his wife, Harriet, reside in Neponsit, N.Y.

#90317p6397 11/13/1990 ~PR Newswire

WORCESTER, MA (NOV. 13) PR NEWSWIRE - Cambridge Biotech Corporation (NASDAQ: CBCX) today reported third quarter 1990 revenues of $6,034,481, compared to $6,027,634 for the same period a year ago. For the first time, third quarter

figures for both 1989 and 1990 represent the combined results of the former Cambridge BioScience Corporation and Biotech Research Laboratories Inc. as a result of the merger consummated Sept. 7, 1990.

Total expenses for the period were 4 percent lower than those of the same period in 1989, in spite of inflation and increased spending in sales and marketing, both in domestic and international.

While total revenues and product sales for the quarter were essentially the same as the previous year, there were some significant shifts in mix. Sales of products outside the DuPont and subsequently Ortho distribution agreements grew from 18 percent to 53 percent of the total. Royalty income rose to approximately $500,000, while interest and research grant income fell by a similar amount.

Commenting on the quarter's results, company President and CEO Patrick J. Leonard said, "It was too early to see the impact of sales of the recently-approved HIV-1 EIA and FeLV vaccine products. These together with projected market introduction, in the fourth quarter, of three new products (HTLV-I/II EIA, HTLV-I Western blot, and HIV-2 Western blot) made possible by the merger should enable a steady growth in sales revenues. Coupled with continued cost containment this should lead to a downward reduction in losses from the third quarter loss of $0.10 per share."

Leonard continued, "The company's ongoing program of cost controls, the building of sales by expanding the market penetration for existing products and the introduction of key new products, should ensure a steady reduction in losses toward our overall goal of profitability."

Cambridge Biotech Corporation is a leader in the development of recombinant technology and a major producer of viral diagnostic screening and confirmatory products. The company utilizes recombinant technology in the development and production of antigens. The company also develops adjuvants and monoclonal antibodies as the basis for diagnostic, vaccine and therapeutic products for humans and animals.

PARSIPPANY, N.J. (NOV. 13) PR NEWSWIRE - A study presented today at the American Heart Association meeting in Dallas provides the first evidence from humans to suggest that beta carotene, a powerful anti- oxidant, may be useful

in treating cardiovascular disease, according to Dr. Charles H. Hennekens, professor at Brigham and Women's Hospital and at Harvard Medical School, who was the senior author of the report describing the study.

In the study, those patients with documented coronary disease who took a 50-milligram Lurotin(R) beta carotene capsule every other day experienced almost half as many "major events" in coronary arteries and other blood vessels as those taking a placebo. The Lurotin beta carotene was produced by BASF AG in Ludwigshafen, Germany. It was provided for the study by BASF Fine Chemicals of Parsippany. Lurotin is a registered trademark of BASF AG.

The results of the study were revealed at the 63rd Scientific Sessions of the American Heart Association in Dallas. Dr. J. Michael Gaziano, a cardiology fellow at Brigham and Women's Hospital in Boston, presented the report. Gaziano said that the "major events" referred to were strokes, heart attacks, and sudden cardiac deaths, as well as "revascularization" procedures to open or bypass clogged coronary arteries.

Hennekens directs the Physicians' Health Study, a national research project that involves more than 22,000 male physicians, age 40 to 84. Half of the physicians have been taking BASF's Lurotin beta carotene for an average of six years, while the other half has been receiving placebos.

The current report focused on 333 patients who had evidence of coronary artery disease when they entered the larger study group. Those taking the Lurotin beta carotene experienced 44 percent fewer major coronary events and 49 percent fewer major vascular events compared to patients taking the placebo.

These results, while considered preliminary and requiring further study, indicate a strong reason for continuing investigations to firmly establish the role that beta carotene plays in the prevention of heart disease.

The National Cancer Institute recommends diets that are rich in beta carotene, which is the primary building block of vitamin A found in many vegetables and fruits. Carrots, sweet potatoes, apricots, peaches and cantaloupes are particularly rich in beta carotene, which gives these vegetables and fruits their orange color.

In addition to having made Lurotin available to the Physicians' Health Study, BASF continues to support scientific research with its other beta carotene products.

BASF, a leading manufacturer of vitamin products, is also a major diversified producer of basic, intermediate and specialty chemicals, colorants, dispersions, fiber raw materials, fibers, automotive coatings, printing inks, urethane specialties and chemicals, plastics, advanced composite materials, antifreeze, crop protection products, pharmaceuticals, flavors, fragrances and audio, video and computer recording media.

DALLAS (NOV. 13) PR NEWSWIRE - Grace Energy Corporation (NYSE: GEG) today announced that its Oklahoma-based Grace Petroleum Corporation subsidiary has agreed in principle with Grand Rapids, Mich.-based Wolverine Gas and Oil Co., Inc. to extend their joint venture exploration in the state of Michigan through Dec. 31, 1993. Grace Petroleum Corporation began exploring for gas reserves with Wolverine on July 15, 1981 and has participated in the discovery of over 100 billion cubic feet of gas.

Grace Petroleum Corporation has also acquired Wolverine Gas and Oil Co., Inc.'s working interests in 27 gas wells and 8 stripper wells in 12 fields in Michigan, together with its interests in two pipelines and a gas plant serving these fields. Prior to this acquisition Grace Petroleum owned a 31 percent average working interest in the 27 gas wells, so its working interest now averages 41 percent. Of the total estimated reserves acquired from Wolverine 95 percent are classified as proved developed.

Grace Petroleum explores for, develops, and produces oil and natural gas onshore, primarily in the U.S. Grace Energy Corporation, headquartered in Dallas, is a diversified energy company whose subsidiaries are also engaged in supplying services and equipment to the petroleum industry and in coal mining.

Wolverine Gas and Oil Co., Inc. is a family-owned corporation which explores for, develops, and produces oil and natural gas exclusively in the state of Michigan. Wolverine was founded in 1948.

Both Grace and Wolverine look forward to a continued business relationship in Michigan and the discovery of additional reserves over the next three years.

SAN DIEGO (NOV. 13) PR NEWSWIRE - FHP Health Care, multi-state health maintenance organization, has introduced FHP Senior Plan to San Diego County Medicare beneficiaries.

FHP Senior Plan, the largest Medicare alternative program in the Western United States, is the only zero-premium health care plan for San Diego's senior citizens, according to Clem Scharwath, FHP Regional vice president.

"An independent survey shows that San Diego seniors want what FHP offers; quality health care at an affordable price," he added.

FHP Senior Plan offers comprehensive benefits -- including hospitalization, physician care, optometry services, and prescription drugs -- at no additional monthly premium beyond Medicare (parts A and B required). Medical office visits and prescription drug units are $7.

Through a contract with the federal government, FHP provides comprehensive health care at a cost that is 95 percent of what the Medicare program pays in the traditional, fee-for-service sector.

"Senior Plan is a win-win situation," said Scharwath. "The federal government receives a five percent discount and the Medicare beneficiary receives more benefits at less cost."

Senior Plan members will receive care through existing community hospitals, physicians, dentists, pharmacies and other medical service providers on contract. All services will be administered from the San Diego regional headquarters in Mission Valley.

FHP expects to enroll about 10,000 seniors within the next two years. "We're not attempting to be the largest HMO in San Diego," said Scharwath. "Our goal is to be the best."

Senior Plan is part of the FHP family of products, which includes HMOs and preferred provider organizations (PPOs), and workers' compensation and indemnity insurance.

FHP serves more than 566,000 members in California, Utah, Arizona, New Mexico and Guam. It is the second largest Medicare risk contractor in the nation, with 180,000 Senior Plan members. The company is a wholly owned subsidiary of FHP International Corp. (NASDAQ: FHP) based in Fountain Valley, Calif.

For more information on FHP Senior Plan call 800-225-4347.

#90317p6415 11/13/1990 ~PR Newswire

CAMPBELLTOWN, PA. (NOV. 13) PR NEWSWIRE - Nuclear Support Services Inc. (NASDAQ: NSSI) today announced that it has signed a letter of intent involving the sale of certain operations of NSSI's wholly owned subsidiary, HENZE-MOVATS Incorporated to Westinghouse Electric Corp. (NYSE: WX) in exchange for cash and certain staff augmentation operations which are currently part of Westinghouse's Nuclear Services Division (NSD).

In addition, NSSI will become a primary supplier of staff augmentation services to Westinghouse, including those staff augmentation services which are part of Westinghouse's integrated outage program for the nuclear utility industry.

Subject to certain conditions, Westinghouse will contract a minimum percentage of its staff augmentation needs over the next four years with NSSI. Completion of the transaction is subject to negotiation of mutually acceptable definitive agreements and approval by NSSI and Westinghouse.

NSSI will sell to Westinghouse the valve diagnostic and actuator operations of MOVATS together with Henze's nuclear valve maintenance operation. The non-nuclear valve and actuator operations of Henze, however, will remain a part of NSSI. NSSI will also be entitled to certain earn-out payments on the operations being sold if sales meet specified objectives over the next four

years.

NSSI will purchase both Westinghouse's NUMANCO business which supplies radiation protection management services, and Westinghouse's WISCO nuclear operations, which provides instrumentation, electrical and mechanical staff augmentation services.

Based on historic revenue levels, the revenues of the staff augmentation businesses acquired by NSSI exceed, by approximately $10 million, the revenues of those HENZE-MOVATS' operations sold by NSSI.

Joe C. Quick, chairman, president and chief executive officer of NSSI, said, "The board considers the proposed transaction to be a very positive step which will greatly strengthen NSSI's financial position and liquidity. In addition the purchase of NUMANCO and the WISCO nuclear operations dramatically increases both the revenue base of NSSI's traditional businesses and, because of the nature of the work, its profit margins. NSSI was originally founded to provide staff augmentation services to the nuclear power generating industry and has always been among the industry leaders. Weare now in the position to focus again on what we have done best in the past."

Quick noted, "Nuclear power utilities have been moving to a single source supply for maintenance and support work because of the increased efficiencies and cost savings. Westinghouse has been the leader in this concept. NSSI, by becoming part of this integrated work force, is provided with important new opportunities as we support Westinghouse in an area where we are particularly strong."

Earlier in 1990 NSSI had announced the formation of a Special Committee of its outside directors to explore various options for enhancing shareholder value. As part of this effort, NSSI had retained the Middle Market Group in Philadelphia as its investment bankers.

Quick stated, "The board believes that by the actions taken with Westinghouse, NSSI will achieve the two objectives under that Committee's charter, that is, NSSI will broaden its base of operations with higher margin business and will greatly strengthen its balance sheet to provide the financial support needed for growth in NSSI's basic business."

Nuclear Support Services Inc. is a leading company providing support and maintenance to the nuclear power, fossil fuel and processing industries.

NEW YORK (NOV. 13) PR NEWSWIRE - Commodore Environmental Services, Inc. (NASDAQ: COES) today announced results for the third quarter and nine months ended Sept. 30, 1990.

For the three months ended Sept. 30, 1990, as compared to the three months ended Sept. 30, 1989, revenues from continuing operations (as restated to reflect the discontinuance of asbestos abatement activities) increased from $288,000 to $303,000. The net loss from continuing operations was $69,000 and $14,000 for three months ended Sept. 30, 1990 and 1989, respectively. The overall net income for the quarter ended Sept. 30, 1990 was $2,931,000 or $.064 per share, compared to an overall net loss of $297,000 or $.006 per share for the three months ended Sept. 30, 1989. During the third quarter of 1990, the company reported a gain on sale of discontinued subsidiaries of $3 million. In the third quarter of 1989, $283,000 of the net loss related to the discontinued operations.

For the nine months ended Sept. 30, 1990 revenues from continuing operations (as restated to reflect the discontinuance of asbestos abatement activities) were $881,000, as compared to $887,000 for the nine month period ended Sept. 30, 1989. The net loss from continuing operations was $83,000 and $23,000 for the nine months ended Sept. 30, 1990 and 1989, respectively. The overall net income for the nine month period ended Sept. 30, 1990 was $2,917,000 or $.063 per share compared to overall net income of $51,000 or $.001 per share for the nine month period ended Sept. 30, 1989. During the nine month period ended Sept. 30, 1990, the company reported a gain on sale of discontinued subsidiaries of $3 million. In the nine months ended Sept. 30, 1989, $74,000 of income related to discontinued operations.

CLEVELAND (NOV. 13) PR NEWSWIRE - E. Michael Moone has been named president and CEO of Stouffer Foods Corporation, succeeding David H. Jennings, who has been named chairman. The announcement was made today by James M. Biggar, chairman and CEO of Nestle Enterprises, Inc., the parent company of Stouffer Foods.

Moone has been president of Wine World Estates, another Nestle company, since 1984. For the past two years he has also been a vice president of Nestle Enterprises, Inc., responsible for both Wine World and Sunmark Inc.

Wine World Estates, headquartered in St. Helena, Calif., produces and markets the Beringer, Chateau Souverain, Meridian and Napa Ridge brands and also imports wine from Europe. It has part ownership in Maison Deutz Winery which produces a sparkling wine in Santa Maria, Calif. Sales and vineyard acreage have tripled in size under Moone. Before joining Wine World, Moone spent 11 years with Procter & Gamble.

Jennings is a 21-year veteran of Stouffer's. He joined the company in 1969 as a salesman, was elected vice president of sales in 1980, and then president and CEO in 1986.

Stouffer Foods Corporation was established in Cleveland in 1954 and has grown to be the nation's leading producer and marketer of fine, frozen prepared foods. The company now markets more than 150 products, including entrees, side dishes, French bread and traditional pizza, Lean Cuisine calorie-controlled dishes, a complete line of foodservice products and the newest line, Right Course, aimed at health-conscious consumers looking for low-fat, low-cholesterol and low-sodium entrees.

Walter T. Klenz, senior vice president of finance and operations at Wine World succeeds Moone as president of Wine World Estates.

ST. PAUL, MN (NOV. 13) PR NEWSWIRE - Empi, Inc., a major medical device manufacturer, announced today that it has given notice that the company intends to terminate its joint venture agreement with C.R. Bard. Empi plans to finalize design for a urinary incontinence system in- house, conduct marketing clinical trials and prepare to market the product. Empi is currently negotiating the provisions of a termination agreement with Bard.

Empi Chairman and Chief Executive Officer Donald Maurer said, "Based on our development work to date, we feel that Empi can offer an excellent solution for the serious and growing problem of female incontinence. We have given Bard notice that we are terminating our relationship because Bard has taken far longer than promised on the electrode development effort, which is critical to the completion of the incontinence device. Empi wants to bring a system to market as soon as possible, and there is no assurance this will occur if the agreement with Bard is continued. We want to have control of our own destiny."

Maurer added that in taking the project in-house, Empi expects to have a market-ready product by the fourth quarter of 1991. "Completing the design of this system will be the top priority of our R&D staff," he said. "Concurrent with finalizing the development work, we will be analyzing the marketplace to determine if we will sell this product direct, thereby creating a new distribution system, or if we will seek a marketing partner."

Concluded Maurer, "Empi's sales and income have increased significantly in 1990, and the company is on track for a record fiscal year. We continue to focus on building revenues from our core pain control and rehabilitation products. Developing a urinary incontinence product will greatly enhance our future diversification efforts into emerging, high-growth medical markets."

For the first nine months of 1990, Empi reported a 28 percent rise in sales of $11.6 million from $9.0 million in the year-earlier period. Net income year-to-date in 1990 more than doubled to $647,000, or $.34 per share, versus $307,000, or $.17 per share, last year.

Empi develops, manufactures and distributes biomedical devices, computer-based diagnostic systems and accessories for the physical medicine, orthopedic, rehabilitation and neurology markets. The company's shares are traded on the NASDAQ national market system under the symbol EMPI.

MINNEAPOLIS (NOV. 13) PR NEWSWIRE - FSI International, Inc. (NASDAQ: FSII), a supplier of capital equipment for the semiconductor industry, announced today that the company is terminating approximately 15 people due to a larger than anticipated loss for the first quarter of fiscal 1991.

Richard Jackson, FSI president and chief executive officer, said, "We had earlier projected a loss for the period ending Nov. 24, 1990. However, low orders in the 1990 fourth quarter and some slippage of shipments from our first quarter into the second have combined to increase the loss, making this action necessary.

"We are currently seeing," continued Jackson, "stronger incoming orders compared with the fourth quarter and with the year-earlier period. While we expect our second quarter to be much-improved over the first quarter, the semiconductor market remains uncertain. Therefore we feel it is prudent to further streamline our organization and lower the company's breakeven point."

The termination includes two corporate officers: Alan Shuler, senior vice president and chief financial officer, and Truman Porter, vice president and general manager of megasonic and drying technologies. Shuler's responsibilities will be assumed by Benno Sand, vice president of finance. Wayne Hubin, vice president of operations, will be responsible for Porter's duties.

"We very much regret this step but it is necessary, as we go through this difficult cycle in the semiconductor industry," said Jackson. He also noted that other cost-control measures remain in effect, including a wage freeze for all employees, a reduction in officer salaries, and curbs on travel and other expenses. "Despite this workforce reduction, we are continuing with high priority product development and with aggressive sales and support programs," Jackson concluded.

In last year's first quarter, the company reported sales of $14.0 million and net income of $510,000, or $.12 per share. The loss in the 1991 first quarter will include the cost of severance packages and outplacement services for the affected workers. FSI currently has approximately 340 employees.

FSI International, Inc. is a leader in producing automated surface conditioning equipment for processing silicon wafers. The company develops, manufactures, markets and services centrifugal spray processing systems, photoresist processing equipment, gas processing systems, and chemical management and delivery systems for use in the fabrication of advanced semiconductor integrated circuits. FSI's customers include semiconductor manufacturers located throughout North America, Europe, Japan and the Far East.

#90317p6426 11/13/1990 ~PR Newswire

MINNEAPOLIS (NOV. 13) PR NEWSWIRE - Lund International Holdings, Inc. (NASDAQ: LUND) announced sales and earnings for the first quarter ended Sept. 30, 1990. Net sales for the first quarter were $2,967,815 compared to $2,822,527 for the same period last year. Net income was $91,408 or $.02 per share compared to $472,317 or $.10 for the same period in 1989.

The 5 percent increase in sales is primarily attributed to two new products (MoonVisor and Interceptor) which were released late in fiscal year 1990. Management attributes the flat performance of existing products to the sluggish new vehicle market during the quarter ended Sept. 30, 1990.

The reduction in net income is attributed to increased expenditures resulting from start-up costs involving the Canadian operation, a patent infringement suit Lund has filed against a former director, and additional marketing costs related to the introduction of five new products.

One hundred percent of the sales came from Lund Industries, Inc., a subsidiary of Lund International Holdings, Inc. Lund Industries, Inc. is a manufacturer of add-on accessories for trucks and vans. Its product line is marketed through various automotive warehouse distributors throughout the United States and Canada.

HAMILTON, BERMUDA (NOV. 13) PR NEWSWIRE - Nord Pacific Limited (NASDAQ: NORPF) announced today that its net loss for the third quarter ended Sept. 30, 1990, was $1,131,000, or $.38 per share, and its net loss for the three quarters ended Sept. 30, 1990 was $4,972,000, or $1.67 per share.

Comparatively, for the third quarter of 1989 the net loss was $312,000, or $.11 per share, and for the first three quarters of 1989 the loss was $1,186,000, or $.40 per share. Lower gold prices, fewer ounces of gold produced and increased production costs at the Kurara Gold Mine contributed to the higher losses for the respective periods, though losses were lower in the third quarter than in each of the previous two quarters of 1990.

Nord Pacific Limited is incorporated under the laws of Bermuda and is engaged in gold mining in Australia and in exploration for precious metals, base metals and strategic minerals in Australia, Papua New Guinea and North

America. At the Kurara gold mine in Western Australia, Pacific has an open pit mine in operation in which it has a 65 percent interest. In Eastern Australia, Pacific owns 100 percent of a promising copper project (Girilambone) in the final feasibility stage, which is advancing toward anticipated production in 1992. On the Tabar Islands located in Papua New Guinea, drilling and feasibility studies are continuing on several gold deposits, which are 30 percent owned by Pacific. Pacific also owns a 72.35 percent interest in a major deposit of the strategic minerals chromite, cobalt and nickel located near the Ramu River, Papua New Guinea. A U.S. subsidiary company, Hicor Corporation, based in Albuquerque, N.M., conducts North American exploration.

NORD PACIFIC LIMITED

A summary of the consolidated statement of earnings follows:

	QUARTER ENDED SEPTEMBER 30,		THREE QUARTERS ENDED SEPTEMBER 30,

TORONTO (NOV. 13) PR NEWSWIRE - Agnico-Eagle Mines Limited (TSE, ME: AGE; NASDAQ: AEAGF) reports income from production for the three- month period ended Sept. 30 1990 was $17.5 million, an increase of $8.8 million over the same period in 1989. For the nine months ended Sept. 30 1990, income from production was $56.4 million compared to $27.9 million for the comparable 1989 period. The increase in revenue was due principally to increased gold production from the recently acquired LaRonde Mine. In the 1990 third quarter gold production at the LaRonde Mine amounted to 25,100 ounces. Total 1990 third quarter, gold production was 39,603 ounces compared to 18,438 in the 1989 third quarter. For the first nine months of 1990 the company produced 126,680 ounces of gold compared to 52,247 ounces for the corresponding 1989 period.

Despite the substantially increased gold production, the company recorded a loss from continuing operations for the first nine months of $4.7 million or $0.18 per share compared to a loss of $1.8 million or $0.12 per share for the 1989 nine month period. For the third quarter ended Sept. 30 1990, the loss from continuing operations was $2.6 million or $0.09 per share compared to $0.2 million or $0.01 per share for the 1989 third quarter. Contributing to the loss was substantially increased amortization charges related to the cost

of acquiring the LaRonde mining property and greatly increased exploration costs. Additional amortization charges amounted to approximately $5.2 million or $0.20 on a per share basis for the first nine months of 1990.

GREENVILLE, S.C. (NOV. 13) PR NEWSWIRE - Carolina First Corporation (NASDAQ: CAFC) announced today the election of William R. Timmons, Jr., as Chairman of its Board of Directors, filling the vacancy created by the recent death of A. Foster McKissick, Jr. Mr. Timmons, a lifelong Greenville resident, is First Vice President of Canal Insurance Company and President of Central Realty Corporation, both Greenville businesses.

Mack I. Whittle, Jr., President and Chief Executive Officer of Carolina Fisrt Corporation, said, "We are exceptionally pleased to have someone of Bill Timmons' experience and stature in the community as our new Chairman. As a founding director and member of the executive committee of Southern Bancorporation; a former board member of First Union of South Carolina, and a founding director of Carolina First, Bill brings enormous experience to the position. His broad business background and leadership qualities will be an added asset in guiding Carolina First in its growth over the coming years. Bill is also very familiar with the Georgetown County area having spent much time there, benefitting Carolina First's Litchfield office and First Federal of Georgetown as they expand."

Mr. Timmons attended the University of South Carolina and Furman University. He has been an active supporter of Furman, is currently serving a fourth term as a member of the Board of Trustees and is a former Chairman of the Board. He is a past President of the Greenville Sertoma Club and Greenville Insurance Agents Association, a member of Greenville Association of Realtors and First Baptist Church of Greenville.

In addition, the Carolina First Bank Board named Mack I. Whittle, Jr. its Chairman replacing A. Foster McKissick. Mr. Whittle will also continue to serve as President and Chief Executive Officer of Carolina First Bank. Charles B. Schooler will continue in his capacity as Chairman of First Federal Savings and Loan Association of Georgetown and Joseph E. Johnston as its President.

Carolina First Corporation is a $335 million asset financial company consisting of Carolina First Bank, a state-chartered bank headquartered in Greenville, and of First Federal Savings and Loan Association of Georgetown, a federally chartered savings and loan. Both are full-service, community-oriented financial institutions offering a broad range of commercial and consumer banking services. The Company operates, through its subsidiaries four offices in Greenville County and five in Georgetown County. The Company was organized in 1986 following an October initial public offering of stock. Through this offering, $15 million in capital was raised, earning Carolina First the distinction of being the largest bank holding company created in South Carolina. Its stock is traded on the over-the-counter market under the NASDAQ symbol CAFC. Market makers of Carolina First Corporation include J.C. Bradford, Interstate/Johnson Lane Securities and Robinson-Humphrey Company, Inc. It is a widely traded stock with over two million shares and over 2,500 outstanding shareholders.

ARLINGTON, TEXAS (NOV. 13) PR NEWSWIRE - Technology Development Corp. (NASDAQ: TDCX) announced 1990 third quarter earnings of $140,973 or 7 cents per share of common stock, on revenues of $7.8 million.

Revenues more than doubled over the prior quarter and are up 44 percent as compared to the same period in 1989, as a result of the acquisition of Kaizen Corp., dba ComputerLand Metroplex, which became a wholly owned subsidiary of the company during this reporting period. Both the parent company and its subsidiary contributed to profitability, reversing losses which had been reported by TDC for the prior three quarters.

The company reported that new orders with agencies of the Department of Defense continue to be slow and backlog declined to $8.5 million, while both orders and deliveries for the microcomputer reseller market remained strong. The third quarter revenues include $4.5 million in sales from ComputerLand Metroplex, and $3.3 million in support of DoD programs. The company will continue to place increasing emphasis in the commercial sector.

Technology Development Corp. is the nation's largest independent developer of test software and related products and services for use by commercial, aerospace, and federal government organizations. Through its subsidiary, ComputerLand Metroplex, the company sells microcomputer systems and services to industries and businesses in the Dallas/Fort Worth Metroplex.

ST. PAUL, MINN. (NOV. 13) PR NEWSWIRE - Two new directors were elected to the 3M board of directors Nov. 12.

They are Harry A. Hammerly, executive vice president, Industrial and Electronic Sector and Corporate Services, 3M, and Jerry E. Robertson, executive vice president, Life Sciences Sector and Corporate Services, 3M. Their elections increase the size of the 3M board to 17 directors.

During his 35-year career with 3M, Hammerly previously served as vice president, Finance, and vice president, Europe. He was named to his present position in May 1989. Hammerly, 56, joined 3M in 1955 in the Controller's organization and has held various financial and international management positions.

Robertson, 58, has been head of the Life Sciences Sector since 1984. Previously, he was group vice president, Health Care Products and Services Group. He joined 3M in 1963 as a senior medicinal chemist and has held various management positions in the company's health care businesses.

3M is a diversified manufacturer with operations in 52 countries. Its 1989 worldwide sales were $11.990 billion.

VIENNA, VA (NOV. 13) PR NEWSWIRE - United Financial Banking Companies, Inc. (NASDAQ: UFBC) reported losses for both the third quarter and nine month period ending Sept. 30, 1990. A loss of $199,887 was reported for the quarter compared to last year's third quarter earnings of $801,018. The nine-month loss was $25,140, as compared to the $1,182,081 reported earnings for the same period last year. Earnings per share also suffered losses of 20 cents for the quarter and 2 cents for the nine months, compared to 1989 earnings of 79 cents and $1.17, respectively.

The continuing slump in the region's real estate market, as well as the prolonged weakness in the economy are the primary reasons for the company's current performance. Earnings from real estate and other earning assets were $173,286 for the quarter, a decline of 87 percent from the $1,333,949 for third quarter 1989. This slowdown in earnings is attributed to the absence of bonus interest earned in 1989 on certain loan arrangements. Added expenses in the form of shifts from interest-free to interest-bearing deposits have also had an adverse effect on the company's earnings.

UFBC's capital position is still strong, with capital amounting to over 20 percent of assets. On Aug. 30, 1990, the company paid a 10 percent stock dividend.

RALEIGH, N.C. (NOV. 13) PR NEWSWIRE - Durham Corporation (NASDAQ: DUCO) reports consolidated net income for the nine months ended Sept. 30, 1990, of $11,917,000 or $1.41 per share compared to $4,405,000 or $0.52 per share in 1989. Income from continuing operations was $11,917,000 compared to $9,529,000 last year, $1.41 per share compared to $1.13 per share. Included in these earnings are realized gains on sale of investments -- these were $1,275,000 or $0.15 per share in 1990 and $5,541,000 or $0.66 per share in 1989.

On September 30, 1990, the consolidated assets of Durham Corporation totaled $844 million. The quality of the Company's bond, stock, mortgage loan and real estate portfolios is excellent. No bonds are in default and only 2 percent are below investment grade. There are no problem mortgage loans or real estate properties. Shareholders' equity at September 30, 1990 was $232 million, or $27.43 per share. Total revenues for the first nine months are $191 million which is a reduction of 20 percent from revenues of $240 million reported in the first nine months of the prior year. This reduction is primarily due to the contraction of the Group Division. The elimination of unsatisfactory accounts and the repricing of retained accounts have produced a significant improvement in the Group operations. Productivity in the individual lines continues to exceed the prior year. The Credit Insurance

Division is having another good year with revenues and profits exceeding 1989. Revenues from the Broadcasting subsidiary were down 6 percent, $9.6 million versus $10.2 million in 1989. Broadcasting profits are slightly higher than last year.

The Board of Directors of Durham Corporation at its meeting today, Nov. 13, 1990, declared a regular quarterly dividend of $0.23 per share payable on December 11, 1990, to shareholders on November 27, 1990.

Durham Corporation is a Raleigh-based holding company which through its subsidiaries has interests in life, accident and health insurance, broadcasting and real estate.

#90317p6459 11/13/1990 ~PR Newswire

CAMBRIDGE, MASS. (NOV. 13) PR NEWSWIRE - In a paper delivered at the American Heart Association Conference in Dallas today, Dr. Irving Fox of Biogen, Inc. (NASDAQ: BGEN) presented positive results from Phase I clinical trials of hirulog, a potent and specific direct inhibitor of thrombin. Hirulog was developed through rational drug design by a Biogen team lead by Dr. John Maraganore and is based on the structure of the natural anticoagulant found in the medicinal leech.

Thrombin is a leading factor in clot formation. Direct thrombin inhibition by hirulog is a novel mechanism of anticoagulation that differentiates hirulog from heparin, the standard anticoagulant drug. Hirulog may solve the existing need for more effective anticoagulation therapy.

Hirulog was found to be well-tolerated and of considerable promise as an anticoagulant for human use. This drug may have broad potential therapeutic use in a number of conditions including myocardial infarction, unstable angina and deep vein thrombosis.

In a clinical trial of 60 healthy volunteers led by Biogen collaborator Dr. Paul Morrison at Guy's Drug Research, Ltd. in London, researchers found hirulog to be an effective anticoagulant when administered either subcutaneously or intravenously. The dose- dependent anticoagulant effect of the drug was also firmly established. An important finding showed that there was no evidence of bleeding or antibody formation following administration of the drug.

Since many patients who would benefit from hirulog treatment are also treated

with aspirin, the same researchers examined the anticoagulant effect of hirulog when administered to individuals taking aspirin. The study showed that aspirin-hirulog was well tolerated and resulted in no increases in bleeding times that could be attributed to hirulog. In addition, the anticoagulant effect of hirulog was not altered as a result.

Biogen's Phase I findings that hirulog is a well-tolerated and effective anticoagulant set the stage for further studies aimed at establishing hirulog's efficacy as an antithrombotic. Phase II trials with this goal are currently underway.

Biogen is a leading biotechnology company principally engaged in developing genetically engineered pharmaceuticals. As a result of its early research, Biogen now derives revenues from five products being sold by its licensees in various countries. Biogen currently directs its research in areas where the company has particular strength -- AIDS, inflammation, cardiovascular and selected cancers.

SAN FRANCISCO (NOV. 13) PR NEWSWIRE - AT&E Corp. (AMEX: ATW), a development stage company, reported today that for the third quarter ended Sept. 28, 1990, the company had total revenues of $632,000 and a net loss of $12,260,000, or $1.11 per common share, compared to total revenues of $708,000 and a net loss of $5,701,000, or 68 cents per common share, for the same period in 1989.

AT&E also reported that for the nine months ended Sept. 28, 1990, the company had total revenues of $1,670,000 and a net loss of $28,498,000, or $2.67 per common share, compared to total revenues of $2,523,000 and a net loss of $14,962,000, or $1.60 per common share, during the comparable period in 1989.

AT&E also stated that as a result of unanticipated delays in consummating financings, the company's expenditures in connection with the development of the RECEPTOR (i) Personal Communications System (PCS) and associated business development activities, including technical testing and market trials, have materially adversely affected the company's cash position and financial condition.

At Sept. 28, 1990, AT&E had approximately $8.4 million in cash and $2 million in short-term investments, which short-term investments are pledged as collateral for capital leases.

The company stated that without further reductions in its operating expenses, the company will require an additional cash infusion to continue operations beyond December, 1990.

AT&E stated that it is pursuing a variety of measures to conserve its cash resources and preserve the value of its proprietary technology and other assets. AT&E is currently negotiating with Seiko Corp. and several potential joint venture partners to raise additional debt or equity capital in private financings.

In addition, the company is exploring the sale of the company and other merger or business combination opportunities with third parties. The company has also determined to further reduce its operating expenses.

Measures will include an additional workforce reduction and other options such as negotiating deferred payment terms with certain of its vendors. There can be no assurance, however, that AT&E will obtain additional capital, enter into a business combination or negotiate deferred payments to vendors on terms which are acceptable or favorable to the company.

A complete description of AT&E's third quarter results is contained in the company's quarterly report on form 10-Q for the quarter ended Sept. 28, 1990.

ST. LOUIS (NOV. 13) PR NEWSWIRE - In a continuing effort to streamline its military training services, McDonnell Douglas (NYSE: MD) has consolidated the training activities of McDonnell Douglas Helicopter Co. in Mesa, Ariz., into McDonnell Douglas Training Systems (MDTS). MDTS is a division of McDonnell Aircraft Co., based in St. Louis.

Consolidation of the helicopter training systems, services and support group with the rest of the corporation's military training efforts will further focus the resources and talents of the training organization, according to Dennis Behm, MDTS vice president and general manager. "This consolidation strengthens the overall training organization and provides a focal point for our customers," said Behm.

The helicopter training group, which includes approximately 50 employees, will remain in Mesa. The group provides training support for the AH-64 Apache helicopter program, including upcoming program upgrades for the current fleet and the Apache Longbow. Other potential programs include training support for the MD 500 series commercial helicopter program and the U.S. Army's advanced light attack helicopter.

"Another advantage in this consolidation is the additional training resources and expertise that can be brought to bear on the integrated training system for the LH (light helicopter) proposal," Behm added. McDonnell Douglas is

teamed with Bell Helicopter Textron in a competition for the U.S. Army's LH program against a team from Boeing Helicopter and Sikorsky Helicopter companies. MDTS is integrating the LH training system for the McDonnell Douglas team.

"The consolidation is a very positive step in ensuring a high-quality, best-value training system for the Army's future light attack helicopter," Behm said.

MDTS provides a full spectrum of total training systems capabilities. Services include high-quality analysis of training needs, courseware and curriculum development, training management systems tailored to customer requirements, computer-based training, interactive video disks, advanced-technology aircrew and maintenance training devices, classroom, simulator and flight instruction, and maintenance and logistics support.

MDTS provides training systems for the U.S. Air Force, Army, Marine Corps and Navy. Current programs include training systems for the C-17, T-1A, AH-64, T-45, A-12, F-14D/A-6E, AV-8B, KC-10 and E-6A, and Tactical Air Command instruction for the F-15, A-10, OV-10, OA-10, F-4 and F-111.

#90317p6474 11/13/1990 ~PR Newswire

UPPER SADDLE RIVER, NJ (NOV. 13) PR NEWSWIRE - Western Union Corporation (NYSE: WU) today announced the final extension of its current exchange offer, in which the company is proposing to issue new notes and common shares in exchange for up to $530 million of its presently outstanding 19-1/4 percent senior secured notes and 16 percent notes. The exchange offer, which had been scheduled to expire at midnight on Nov. 19, has been extended to midnight on Wednesday, Nov. 28.

This extension represents the last opportunity for Western Union noteholders to tender their securities under the terms of the exchange offer. Unless at least 95 percent of the outstanding principal amount of the 19-1/4 percent notes and 80 percent of the 16 percent notes are tendered by Nov. 28, the exchange offer will expire and will not be completed.

In that event, the corporation will promptly return all notes that have been tendered, and all consents to the proposed amendments to the 19-1/4 percent note indenture will be voided.

If the current exchange offer is not completed, Western Union intends to initiate, as soon as practicable after Nov. 28, a cash tender offer for a minimum of $250 million and a maximum of $350 million principal amount of the outstanding 19-1/4 percent and 16 percent notes at a purchase price of $500

per note.

The cash required to fund the tender offer would be obtained from the net proceeds of the company's pending sale of most of its Business Services unit to AT&T, which would, by mutual agreement, be conditioned upon Western Union's completion of either the exchange offer or the tender offer.

In the tender offer, the company would solicit consents from holders of the 19-1/4 percent notes to remove all restrictive covenants from, and release all collateral under, the 19-1/4 percent note indenture, as a result of which untendered 19-1/4 percent notes would become unsecured after completion of the tender offer.

AT&T has agreed to extend the termination date of the Business Services sale agreement to Dec. 31, 1990, in order to allow sufficient time for the final extension of the exchange offer or, if necessary, the completion of the proposed cash tender offer. It is expected that the closing of the Western Union/AT&T transaction and the completion of the tender offer would occur simultaneously.

Preliminary figures indicate that, as of 9 a.m. today, $345,794,000 aggregate principal amount of the 19-1/4 percent notes and $1,436,000 aggregate principal amount of the 16 percent notes had been tendered in Western Union's current exchange offer (including securities as to which delivery has been guaranteed).

CONTACT: Warren R. Bechtel of Western Union, (201) 818-5790, or (212) 868-8888.

#90317p6480 11/13/1990 ~PR Newswire

ST. LOUIS (NOV. 13) PR NEWSWIRE - Thermadyne Holdings Corp. and its wholly owned subsidiary, Thermadyne Industries Inc., announced today that sales for the three months ended Sept. 30, 1990, totaled $114.1 million of 101 percent of the prior year's third quarter sales levels. Thermadyne's sales volume continues to be impacted by the weakened domestic economic environment, while experiencing growth in the international markets in which it participates. Earnings before interest, taxes, depreciation and amortization (EBITDA) amounted to $23.3 million for the three months ended Sept. 30, 1990, or 104 percent of the comparable 1989 levels. Sales and EBITDA for the nine months ended Sept. 30, 1990 were $352.4 million and $74.5 million or 99 percent and 103 percent of the comparable 1989 levels. Thermadyne has enjoyed EBITDA growth in 1990 despite the low growth in sales volume, primarily due to the cost reduction efforts implemented in the second half of 1989 along with additional cost containment efforts implemented in 1990.

Thermadyne's number one priority, given the difficult economy it presently finds itself in, is to continue to manage costs in 1990 while planning for a

potential recession in 1991. The company's strategy for 1991 falls into three main areas: market share gains, pricing, and continued cost reductions. The company believes the combination of the correct marketing plan with products that already enjoy the number one market positions will be a powerful formula in a soft market to further strengthen and increase its market shares. More importantly, it is also developing an aggressive pricing strategy for each product line to properly benefit from the present inflation mentality. Three price increases have already been announced with all pricing actions to be announced by January, 1991.

The cost reduction strategies for 1991 are well under way. Thermadyne has recently announced the relocation of its Stoody manufacturing facility from its present location in Industry, Calif. to a newly constructed leased facility in Bowling Green, Kentucky. In addition, Thermadyne has recently indentified and implemented further headcount reductions at a number of its locations. These efforts, coupled with the completion of the previously announced Marison/Coyne consolidation, should be a solid beginning to Thermadyne's 1991 cost reduction strategy.

Thermadyne's sales for the three months ended Sept. 30, 1990, were $114.1 million which was a slight increase over the sales for the three months ended Sept. 30, 1989 of $113.3 million. Sales for the nine months ended Sept. 30, 1990 were $352.4 million compared to sales of $354.4 million in the comparable period in 1989. EBITDA for the three and nine month periods ended Sept. 30, 1990 was $23.4 milion and $74.5 million compared to $22.5 million and $72.5 million in the comparable periods in 1989.

Operating income for the three and nine months ended Sept. 30, 1990, was $13.0 million and $44.9 million compared to $12.9 million and $32.7 million for the three and nine months ended Sept. 30, 1989. In the first quarter 1989, the company incurred a non-recurring charge related to stock option cancellation payments and additional amortization of intangibles, both the result of the April 12, 1989, transaction.

The company reported a net loss of $11.1 million for the three months ended Sept. 30, 1990 compared to a loss of $10.5 million for the three months ended Sept. 30, 1989. For the nine months ended Sept. 30, 1990, the company's net loss was $26.6 million compared to a net loss of $69.4 million for the nine months ended Sept. 30, 1989. Additional interest expense, transaction related costs and amortization of intangibles and deferred costs created as a result of the April, 1989, transaction increased the company's net loss in 1989 compared to 1990.

Thermadyne is a manufacturer of products and accessories used in connection with cutting and welding metal, powered cleaning equipment used in connection with the care and maintenance of floors, and wear resistant products.

IRVINE, CA (NOV. 13) PR NEWSWIRE - Medstone International Inc. (NASDAQ: MSHK) announced today that it has indefinitely suspended its efforts to secure FDA approval for gallstone lithotripsy.

The expense associated with a new protocol, the time to enroll the required number of patients, the unknown outcome regarding the relabeling of CIBA-Geigy's Actigall and eroding demand prompted this action.

Medstone's President, Richard Ferrari said, "Although we are disappointed, this action will allow us to focus our lithotripsy marketing efforts on kidney stones where we have full approval."

The Medstone board of directors is currently exploring new growth opportunities in the health care industry. Internal projects and strategic joint ventures are being evaluated.

Medstone International Inc. manufactures shockwave lithotripsy systems. Approximately 6,000 kidney stone patients per year are being treated successfully on Medstone machines.

TORONTO/ST. LOUIS (NOV. 13) PR NEWSWIRE - PCL Industries Limited today announced results for the third quarter ended Sept. 30, 1990. All figures are in Canadian dollars.

The third quarter and nine month year to date results were prepared to reflect the ongoing plastics operations of PCL Industries Limited and to exclude the operations of the furniture and equipment rental businesses which were divested effective Dec. 31, 1989, in a transaction which closed July 31, 1990. The 1989 comparative results have been restated to disclose separately the results of the divested operations.

Results for the third quarter ended Sept. 30, 1990, indicated consolidated sales of $22,596,000 compared with 1989 restated sales of $27,585,000 and operating income of $702,000 versus a 1989 restated total of $2,696,000. 1990 net income was $14,000 or 0 per common share compared to $1,468,000 or 21 per share in 1989. 1989 net income includes net earnings of the divested businesses of $403,000.

For the nine months ended Sept. 30, 1990, consolidated sales were $67,989,000 with operating income of $2,502,000 and net income of $1,591,000 or 22 per common share including net gains on divestiture of $2,048,000. The comparable restated 1989 figures were sales of $79,043,000 and operating income of $5,911,000. Net income of $2,785,000 for 1989 or 41 per common share includes net earnings of the divested businesses of $1,124,000 for the period.

PCL Industries Limited is a management operating company, listed on the Toronto Stock Exchange, involved in the plastics and packaging businesses through its subsidiary and affiliated companies, PCL Plastics Corp., Uniplast Industries Inc., Plasti-Fab Ltd. and British Polythene Industries plc (formerly Scott & Robertson plc). Toronto-based Smurfit Papertube Limited, an affiliate of Smurfit International B.V. and St. Louis, Missouri-based Jefferson Smurfit Corp., owns approximately 38 percent of the common shares of PCL Industries.

HOUSTON (NOV. 13) PR NEWSWIRE - Continental Express announced today a 30 percent increase in seat capacity between Jackson, Miss., and Houston's Intercontinental Airport effective on Nov. 15. The airline will replace the

30-passenger Embraer Brasilia with the 46-passenger Aerospatile/Aeritalia ATR-42 on all flights.

Continental Express began operating from Jackson in June of 1990 and has reported an average load factor of 52 percent. Connie Lanker, vice president of the Houston Hub for Continental Express, said, "Although Continental Express has been serving the Jackson community for only five months, we have developed a significant traffic base which allows us to support the local community with additional seat capacity."

Continental Express customers departing from Jackson can make quick connections to flights on Continental Airlines in Houston and take advantage of advance seat selection, one time check-in and baggage handling as well as low connecting fares. From Houston's Intercontinental Airport, there are more than 280 Continental and Continental Express departures to destinations throughout the world.

Continental Express will provide service between Jackson and Houston with leading technology in commercial aviation. The Aerospatile/Aeritalia ATR-42 aircraft features state-of-the-art avionics, full weather radar and complete passenger amenities. Customer conveniences include overhead storage for carry-on items, fold-down work tables and inflight snack service.

Reservations and further scheduling and fare information may be obtained from local travel agencies or by calling Continental Airlines toll free at 800-525-0280. The following is the Nov. 15 schedule between Jackson and Houston:

JACKSON TO HOUSTON INTERCONTINENTAL

Flight	Departure	Arrival	Frequency
2689	7:05 a.m.	8:45 a.m.	Except Sunday
2687	11:15 a.m.	12:55 p.m.	Daily
2685	3:15 p.m.	4:50 p.m.	Daily
2683	6:35 p.m.	8:10 p.m.	Except Saturday

HOUSTON INTERCONTINENTAL TO JACKSON

Flight	Departure	Arrival	Frequency
2688	9:20 a.m.	11:00 a.m.	Except Sunday

CHANTILLY, VA. (NOV. 13) PR NEWSWIRE - Bridgestone Corporation, based in Tokyo, and Banner Industries, Inc. (NYSE: BNR), with headquarters in Chantilly announced today that the companies have signed an agreement for the acquisition by Bridgestone of the foreign operations of Banner's Thompson Aircraft Tire Corporation for a purchase price (including non-competition agreement consideration) of approximately $28 million.

Involved in the purchase are Banner's indirect, wholly owned subsidiaries Thompson Aircraft Tire Corporation Belgium, S.A. and Thompson Aircraft Tire Corporation (U.K.) Limited, as well as the company's 45 percent equity interest in Thompson Aircraft Tire Company (Asia) Limited.

The transaction is scheduled to close in January 1991, pending approval by both companies' boards of directors.

Bridgestone will continue to sell new aircraft tires to Banner's operation in the United States. The parties have entered into certain arrangements which could facilitate Bridgestone's entry into the U.S. aircraft tire retreading market in the future.

Banner Industries is a leading supplier of aerospace and industrial products and communications services.

Bridgestone Corporation is a leader among the world's tire manufacturers.

TORRANCE, CA (NOV. 13) PR NEWSWIRE - NDE Environmental Corporation (NASDAQ: NDEC) today reported increased revenues of almost 200 percent in the third quarter and almost 90 percent for the nine months, as it announced financial results for the periods ended Sept. 30, 1990.

Quarterly revenues increased to $780,950 from $271,409 in the prior year's third quarter. The company sustained a net loss of $529,874 or 21 cents per share versus a loss of $176,869 or 12 cents per share in the fiscal 1989 quarter. Nine-month revenues rose to $2,023,788 versus $1,076,340 in the same period last year. Net loss for this year's nine months was $828,830 or 35 cents per share compared with a loss of $392,253 or 21 cents per share in the 1989 fiscal period.

John R. Mastandrea, president, attributed the revenue increases largely to underground fuel tank testing sales by the company's wholly owned subsidiary,

NDE Testing & Equipment, Inc, formerly Pan Am Environmental Systems, which it bought in March 1990.

He pointed out that increased marketing and administration costs invested in this subsidiary contributed to the increased losses. "However, NDE expects this continuing investment to accelerate sales and improve financial performance," he stated.

Mastandrea also noted that, if the acquisition of Pan Am Environmental had occurred as of Jan. 1, 1989, pro forma results for the first nine months of fiscal 1990 would show significantly reduced losses. Pro forma 1990 nine-month loss would have been $968,000 or 39 cents per share compared with a pro forma 1989 nine-month loss of $1,607,000 or 85 cents per share.

NDE's patented VPLT System for testing underground tanks was judged by the Environmental Protection Agency, at its Edison, N.J., tests from 1987-1990, to be the only periodic lead detection system that meets EPA regulations for underfilled tank testing, and it was one of four systems to meet overfilled tank testing regulations.

NDE also provides such services as testing and leak pinpointing for pipelines, underwater hoses and spacecraft; impact testing on materials and a variety of other technical and consulting services.

DAYTON, OHIO (NOV. 13) PR NEWSWIRE - Nord Resources Corp. (NYSE: NRD) announced today a net loss for the third quarter ended Sept. 30. of $1,314,000 or $.09 per share on revenues of $27,124,000.

For the same period in 1989, Nord reported net earnings of $3,513,000 or $.23 per share on revenues of $22,182,000.

For the nine months ended Sept. 30, net earnings totalled $123,000 or $.01 per share, compared to net earnings of $10,021,000, or $.66 per share for the same period in 1989. Revenues for the nine months ended Sept. 30, were $74,196,000 compared to $67,928,000 for the same period of 1989.

Net operating results continue to be adversely affected by higher costs associated with the introduction and marketing of Nord's proprietary kaolin pigment, Norplex(TM) to paper manufacturers worldwide. The operating loss from the kaolin segment for the third quarter of 1990 was $1,966,000 or $.13 per share compared to an operating loss of $736,000 or $.05 per share during the third quarter of 1989. The operating loss for the nine months ended Sept. 30, 1990 and 1989 was $6,442,000, or $.42 per share, and $2,106,000, or $.14 per share, respectively. It is anticipated that the operating losses will continue at the kaolin segment at least through the first half of 1991, but will decrease as increased orders for Norplex(TM) are received.

Operating earnings for the rutile segment were $3,813,000 and $5,427,000 for the third quarter of 1990 and 1989, respectively. For the nine months ended Sept. 30, 1990 and 1989, operating earnings were $14,190,000 and $16,427,000, respectively. Although the rutile segment realized increased prices and revenues in 1990 compared to 1989, increased costs associated primarily with mining a new ore deposit, costs associated with supplemental mineral processing programs and higher depreciation expense as a result of prior years' capital expenditures resulted in lower operating earnings in 1990 compared to 1989. Increased prices and higher operating costs are expected to continue for the rutile segment during the remainder of 1990.

Borrowings associated primarily with capital expenditures resulted in additional interest expense of $650,000 or $.04 per share in both the third quarter and in the nine months of 1990 compared to 1989.

Nord Resources Corp. is a major producer of natural rutile (a premium titanium dioxide mineral), kaolin and perlite, and holds a significant interest in Nord Pacific Limited, a company engaged in the exploration for and development of precious, strategic and base metals.

MILWAUKEE, WIS. (NOV. 13) PR NEWSWIRE - American Medical Buildings, Inc. (AMEX: A) announced today its results for the three months ended Sept. 30, 1990.

The company had a net loss of $305,000 ($.02 per share) in the three months ended Sept. 30, 1990, compared with net income of $25,000 ($.00 per share) in the comparable quarter of 1989. On Aug. 15, 1990, the company filed for reorganization under Chapter 11 of the Federal Bankruptcy Code. Until Dec. 13, 1990, the company has the exclusive right to propose a plan of reorganization. The company is currently seeking additional capital to make such a plan of reorganization possible.

The company's backlog of final contracts totaled approximately $20,000,000 at Sept. 30, 1990.

DALLAS (NOV. 13) PR NEWSWIRE - TeleCom Corporation (NYSE: TEL) today reported a net loss of $297,000 (8 cents per share) with revenues of $13.3 million for the third quarter ended Sept. 30, 1990 compared to net income of $77,000 (2 cents per share) with revenues of $13.0 million for the third quarter ended Sept. 30, 1989.

The primary cause for the loss was TeleCom's decision to write down the carrying value of a real estate asset which had been held for sale as a result of a new appraisal on the property. The loss for the third quarter of 1990, as compared to the net income reported in the same period in 1989, was also impacted by increased losses in TeleCom's wholesale distribution operations as increased losses at Comfort Supply Inc., were only partially offset by increased net income at Allen-Lewis Manufacturing Co. Overall, the manucfaturing operations reported a slight improvement in results due to a strong increase in Meyer Machine Co.'s results which were offset by lower income at Meyer Conveyair Inc., and losses reported by Meyer Vi-Tech Ltd., and Meyer Tempco Inc.

For the nine months ended Sept. 30, 1990, TeleCom Corp. reported net income of $398,000 (11 cents per share) with revenues of $41.6 million compared to net income of $1,106,000 (30 cents per share) with revenues of $41.8 million for the same period in 1989.

For the nine months ended Sept. 30, 1990, in addition to the above mentioned items, the reduction in net income was also attributable to "other income and expense" items. "Other income" declined as a result of lower interest income

earned on lower average invested funds, reduced royalty income earned by Meyer Conveyair and the absence in 1990 of certain insurance refunds as well as engineering charges on canceled orders reported in 1989 by Meyer Machine.

TeleCom Corp. has interests in the manufacture of conveying and processing equipment for the food, beverage, can manufacturing and chemical industries and the wholesale distribution of air conditioning and heating products as well as souvenir, novelty and gift items.

MT. KISCO, N.Y. (NOV. 13) PR NEWSWIRE - Trans World Airlines Inc. (TWA) today reported an operating profit of $58.8 million for the 1990 third quarter and $1.9 million for the nine months ended Sept. 30, 1990, compared to operating profits of $60.7 million and $110.3 million, respectively, for comparable periods in 1989. The principal reasons for the reduced operating profit in 1990 compared to 1989 are: (a) higher prices for fuel (approximately $99 million increase for the first nine months of 1990 over the comparable 1989 period); and (b) a general increase in the price to TWA of services and materials purchased, including certain contractual increases in labor rates; and (c) additional personnel employed to improve and maintain TWA's quality of service.

For the third quarter and nine months ended Sept. 30, 1990, TWA reported a net loss of $14.7 million and $54.3 million, respectively, compared to a net loss of $29.9 million and $117.3 million, for the comparable periods in 1989. The reduced amount of net loss for the first nine months of 1990 is principally attributable to $166.8 million of net gains from sales of assets including: (a) $83 million from the sale of certain airport facilities at Chicago; (b) $47 million from the sale of aircraft; and (c) $37 million from sales of a portion of TWA's interest in WORLDSPAN, the passenger reservation system owned principally by TWA, Delta and Northwest.

In addition, the loss was reduced by an extraordinary gain of $29 million from the repurchase of $332 million principal amount of TWA's long-term debt securities, some of which was repurchased at a discount.

ORLANDO, FL (NOV. 13) PR NEWSWIRE - As part of its ongoing commitment to higher education, Harris Corporation (NYSE: HRS) today donated a $500,000 real-time computer system to the University of Central Florida that will help

students and researchers develop a simulator network.

Harris Computer Systems Division donated the Night Hawk computer system to UCF's Institute of Simulation and Training, which conducts research for government and industry. It also serves as a clearinghouse for technology transfer and as a hub for academic research conducted by universities across the country.

The institute placed the system at the center of a network linking multiple tank simulators, flight simulators and graphics platforms. The new system enables researchers to generate a greater number of very sophisticated simulations.

The high-performance Night Hawk system will serve as a research tool for both the U.S. Army and the Defense Advanced Research Projects Agency. The system also will support student education by allowing students to write software and run simulations.

Harris Computer Systems Division produces real-time computer systems and software for simulation and related real-time markets. The division is part of Harris' Electronic Systems Sector.

Harris Corporation, with worldwide sales of more than $3 billion, is focused on four major businesses: Electronic systems, communications, semiconductors and office equipment.

LOS ANGELES (NOV. 13) PR NEWSWIRE - At a time when many banks are trimming dividends or eliminating them altogether, Charter Pacific Bank announced the first cash dividend in its nearly 10-year history. Charter Pacific, which was recently ranked the top bank in Los Angeles and Ventura counties based on Return on Assets (ROA), said its 10 cents per share dividend is payable on Dec. 5, 1990 to shareholders of record Nov. 15, 1990.

Allen Blum, president and chief executive officer of the three branch bank said that his board of directors believes the bank has reached a level of maturity where this action is both appropriate and timely. Blum also noted that the cash dividend would enable certain institutions that only invest in companies that pay cash dividends, to now become shareholders in Charter Pacific. Said Blum: "We look at this cash dividend as a declaration of our financial strength and our confidence in the future. In fact, we're far ahead of the basic capital requirements and substantially exceed the risk-based capital guidelines that become effective at year end."

Charter Pacific Bank, with $70 million in assets, earned a Super Premier quality rating from The Findley Reports (an independent agency that monitors the performance of California banks) and is headquartered in Agoura Hills, with branch offices in Calabasas and Beverly Hills.

#90317p6542 11/13/1990 ~PR Newswire

OAKLAND, CALIF (NOV. 13) PR NEWSWIRE - East Bay Municipal Utility District General Manger, Jerome B. Gilbert today announced his retirement effective April 1, 1991, ending 10 years as head of the regional water and wastewater agency.

Gilbert said he made his decision several weeks ago, and submitted a letter of intention to EBMUD Board President Sanford M. Skaggs on Nov. 6. He said he delayed a public announcement to avoid having any effect on the outcome of the election of four board members that day.

Skaggs expressed regrets about Gilbert's retirement plans, calling him "A national and international water expert who will be very difficult to replace. His leadership has moved the district forward on a lot of fronts."

Under Gilbert's leadership, EBMUD was successful in obtaining the right to divert water from the American River while protecting the river's environment, making improvements to the district's water treatment system with ozone and carbon treatment at two sites, constructing a new office building, adding numerous employee benefits and improving the district's retirement system. A new training unit was set up during his tenure, and employees were brought into planning processes on such projects as the new administration building. Gilbert added minorities and women to the district's management team and expanded opportunities for participation by minority and women-owned businesses in EBMUD contracts.

Gilbert cited improvement in the EBMUD Wastewater Department as one of his major accomplishments. A creative intergovernmental program with cities to control wet weather overflows to San Francisco Bay promises to eliminate a major source of pollution from the East Bay. He praised the EBMUD staff as, "A fine group of professionals with an organization known worldwide for its technical excellence and professional dedication."

The EBMUD general manager said his retirement decision reflects his personal objectives after 10 years of service to the district. Before coming to EBMUD, Gilbert was an officer and owner of a consulting engineering company, executive officer of the State Water Resources Control Board, and manager of

the North Marin County Water District.

MEXICO CITY, MEXICO (NOV. 13) PR NEWSWIRE - Grupo Carso, S.A. de C.V. today announced it has teamed with subsidiaries of France Telecom and Southwestern Bell Corp. to prepare for a bid for Telefonos de Mexico (TELMEX), the nation's telecommunications company. The parties are actively studying the financial position, regulatory climate and technological needs of Telmex, with every intention of developing a bid.

To modernize and expand its country's telephone system, the Mexican government invited Mexican investors to join international telecommunications companies in submitting proposals to buy control of Telmex. Bids are due by Nov. 15, and the government is expected to name a purchaser in late December.

The Grupo Carso team members will benefit from a synergy of each firm's important strengths:

Grupo Carso, headed by leading Mexican entrepreneur and industrialist Carlos Slim, is a diversified business group with holdings throughout Mexico. Grupo Carso brings a keen interest in the advancement of the economic and social conditions of Mexico as well as an intimate knowledge of the nation's business environment. Grupo Carso has a proven reputation for improving the production

and financial performance of the businesses it acquires.

France Cables et Radio, S.A., is a subsidiary of France Telecom, which brings a unique expertise and interest in the modernization of telecommunications networks. France Telecom rapidly developed its nation's system from 4 million access lines in 1971 to 28 million access lines today. France Telecom's network has the widest deployment of digital technology in the world, and the company has become a global leader in information services. France Telecom is one of the largest telecommunications companies in the world, with approximately $20 billion in annual revenue.

Southwestern Bell International Holdings Corp. is a subsidiary of Southwestern Bell Corp., which has a 100-year history of meeting its customers' communications needs. Southwestern Bell has vast experience in delivering affordable, state-of-the-art telecommunication products and services in rural regionals as well as major metropolitan areas such as Dallas and Houston. Recognized worldwide, Southwestern Bell's subsidiaries have a broad international presence and are ranked among the largest U.S. providers of directory services, cellular and paging services. "I feel very confident in the strength of our group," said Carlos Slim, president of Grupo Carso. "The consortium has the desire, the experience and the technological expertise to develop the Mexican network to a world-class system. And I believe that telecommunications infrastructure will be the backbone of Mexico's economic growth and prosperity."

WASHINGTON (NOV. 13) PR NEWSWIRE - The Washington Real Estate Investment Trust (AMEX: WRE) (WRIT) increased its annual dividend rate by 7.4 percent from $1.08 to $1.16. This is the 24th increase reflecting an 867 percent increase over the last 20 consecutive years at a 12 percent compound annual rate of increase from 1970 thru 1990. The Trust's increased income this year can be ascribed primarily to important large leases and improvements at Pepsi Cola Business Center, the Capitol Freeway Center for the District of Columbia Police, the Concord Shopping Center and the 444 N. Frederick Office Building.

WRIT completed capital improvements in excess of $1 million for Pepsi-Cola, including expansion of offices, computer center and paved parking facilities; Pepsi moved into their 69,000 square foot center. The 10-year, triple-net lease represents a 50 percent increase over the prior rent.

The District of Columbia Police Department moved into WRIT's 145,000 square foot Capitol Freeway Center under a 10-year lease. Just south of the U.S.

Capitol and a new Metro station, the Center is near Washington's downtown office building core, the Freeway and Interstate Highway System. Recent major improvements by WRIT include an attractive facelift to the facade, greatly expanded and improved offices, and 75 additional adjacent paved, lit, landscaped and fenced parking spaces.

Reinvestment and improvements increase rents: The restaurant and the last two remaining stores in the new 19,500 square foot addition to the Concord Shopping Center have been leased. The recent expansion and renovation cost WRIT approximately $2,100,000 with a pay back of three years.

WRIT also has completed major capital improvements at the 444 N. Frederick Office Building in the I-270 Corridor in Gaithersburg, Md., which it purchased a year ago for $4,600,000 all cash; and then rebuilt elevators, air conditioning and public areas. The tenants on short leases a year ago have renewed and leasing of then vacant space is proceeding well; now as a Class A building. At the Trust's $68 cost per square foot, high investment yields and WRIT's very low cost of capital should provide a leveraging of cash equity (not debt).

Low, declining debt and liquidity: Only six of WRIT's 29 properties are mortgaged, and those mortgages are all with long-term, amortizing, low fixed interest rates; and the Trust has no other significant debt. In addition, WRIT's cash, cash equivalent and very short-term prime investment paper of $15 million hopefully will continue to give the Trust a competitive advantage in the months ahead.

MINNEAPOLIS (NOV. 14) PR NEWSWIRE - The Metropolitan Transit Commission (MTC) voted today not to renew its contract-management agreement with Cincinnati-based ATE Management and Services Company, Inc. (ATE).

The current ATE contract expires Dec. 31, and will not be renewed, according to Carole M. Faricy, chairman of the Metropolitan Transit Commission. After that date, the commission will directly employ all of its managers.

ATE has been providing management services and contract-management personnel to the MTC since 1970. Under the terms of the current contract, three ATE employees are assigned to the MTC: Chief Administrator John Capell, Assistant Chief Administrator for Transit Operations Jerrold Olson and Equipment Maintenance Director Steve Morris.

Under MTC Bylaws and Minnesota Statutes, the Metropolitan Transit Commission

is granted authority to contract with a management company for its managers and management services, but it is also required to periodically evaluate overall performance and the viability of contract- management relationships.

To aid in its most recent evaluation, the MTC employed Public Administration Service (PAS) of Washington, D.C., which recommended that the commission end its agreement with ATE when it expires in December.

"The commission believes that the consultant's report makes a number of compelling arguments for bringing MTC management in-house," said Chairman Faricy. "Although we are not dissatisfied with the performance of ATE's assigned managers, we feel, in the final analysis, the local community will be better served by people directly employed by the transit company."

She added that the commission soon will appoint an acting chief administrator and will begin the process of recruiting and selecting permanent replacements for those key positions immediately.

The consulting firm concluded that contract management is approximately 25 percent more expensive than the expected cost of MTC employing its own management. The report also noted that there could be a perception that contract managers have two masters and, thus, have potentially divided loyalties.

The Metropolitan Transit Commission is the region's primary provider of regular-route public transit service and coordinates the activities of Minnesota Rideshare throughout the Twin Cities metropolitan area.

#90317p6560 11/13/1990 ~PR Newswire

BEAVERTON, ORE. (NOV. 14) PR NEWSWIRE - Epitope Inc. (AMEX: EPT) today reported a 58.3 percent increase in product revenues and a loss of $2,904,000, (44 cents per share), for the year ended Sept. 30. The loss compares to a loss of $2,603,000, (47 cents per share), in the prior year.

Product revenues for the year ended Sept. 30 rose to $2,808,000 from $1,774,000 due to increased volume and higher average selling prices. This 58.3 percent increase more than offset a decline in clinical service revenues due to the phase-out of parentage testing. The improvements in product sales volumes and prices also resulted in a gross margin of 27.3 percent, up from 1.4 percent in the prior year. Total revenues for the year reached a record $3,562,000 in fiscal 1990, an increase of 10.5 percent over the prior year.

Research and development expenses for the year were higher than in the prior year due to increased activity on Epitope's saliva-based diagnostics,

antiprotozoal therapeutic drug, and grape micropropagation projects. Selling, general and administration also increased as a result of intensified business development activities, together with a one-time $341,000 third-quarter charge incurred in settlement of employment contract obligations to two former officers.

For the quarter ended Sept. 30, Epitope reported a loss of $415,000, (6 cents per share), after giving effect to a favorable year-end inventory adjustment which was partially offset by the write-off of certain previously capitalized licensure costs. The fourth quarter was a significant improvement over the $1,144,000 loss experienced in the third quarter of the fiscal year and comparable to the loss of $374,000, (6 cents per share), for the same period in the prior year. Improved product sales volumes produced a 28 percent increase in product sales as compared to the prior year fourth quarter, but the phase out of parentage testing resulted in an overall decline of revenues for the quarter. Fourth-quarter product sales of $681,000 were 14.8 percent higher than the third quarter of fiscal 1990.

(NOV. 13) UPI - President Bush has called a meeting of bipartisan congressional leaders at the White House tomorrow. The session comes amid mounting pleas that Bush order a special session of Congress to debate increased U-S involvement in the Persian Gulf.

Senate leaders, pending a decision on a special session, today ordered a series of hearings into the crisis. But the White House insists that a special session is NOT necessary at this point and that any talk of a declaration of war by Congress is premature.

A U-S-A Today poll says President Bush is losing public support on his handling of the Persian Gulf crisis. The poll of 615 Americans found Bush's approval rating has slipped 31 percentage points to 51 percent since August 20th.

Seattle authorities have charged five civilians and an Air Force airman with in the Veterans Day pipe bombings of two cars and an office at McChord Air Force Base. The civilians are being held without bond and the airman is being held in the stockade at Fort Lewis.

Entertainer-turned-mayor Sonny Bono says he's considering running for the U-S Senate in 1992. The 50-year-old Palm Springs, California, mayor says recent events in the state have convinced him the time is right.

The American Automobile Association says the average price of regular unleaded

gasoline has jumped by more than 11 cents a gallon since Labor Day weekend... and 31 cents since August 1st, the day before Iraq invaded Kuwait.

(NOV. 13) UPI - The head of the Gulf Cooperation Council says war is the only way to force Iraq to withdraw from Kuwait. G-C-C General Secretary Abdullah Bishara told reporters in Saudi Arabia Monday that Iraqi forces ''will NEVER withdraw through diplomatic niceties.'' And he says he doesn't believe the conflict can be resolved by the Arab world.

A San Diego-based veterans' group is preparing gift packages for American troops in the Persian Gulf region for the holiday season. The non-profit organization Help Hospitalized Veterans says the holiday treats- which consist of candy, dried fruit, cookies and other snacks- should arrive before Christmas.

In South Africa, the African National Congress is being accused of plotting to assassinate the president of the nominally independent tribal territory of Bophuthatswana, northwest of Pretoria. The territory's police commissioner says authorities detained 32 A-N-C members and supporters after the plot was discovered.

A survey of small business owners shows most are owned by men. The National Association for the Self-Employed surveyed more than 20- thousand small business owners and found that men far and away outnumber women in terms of ownership... 72-point-nine percent. Women accounted for 27-point-one percent.

Country music singer Willie Nelson is having his share of trouble with the Internal Revenue Service. Nelson's golf course and recording studio near Austin, Texas, were padlocked Monday after the I-R-S seized his properties in six states to satisfy six-point-five Million dollars in back taxes.

Hollywood is mourning the death of one of its own. Actress Eve Arden died Monday of heart failure at the age of 82. Arden was perhaps most noted for her role as the wisecracking English school teacher of television's ''Our Miss Brooks.'' Her personal manager says the actress had been in declining health for the past year.

#90317u0088 11/13/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (NOV. 13) UPI - Police in the nominally independent tribal territory of Bophuthatswana have accused the African National Congress of plotting to assassinate the territory's president, Lucas Mangope, and detained 32 ANC members and supporters.

The actions coincided with a mass ANC-backed work stayaway and consumer boycott by blacks in the nation's capital of Pretoria to protest alleged political intolerance in nearby Bophuthatswana and a cutoff of electricity to strife-torn black townships of the city.

Bophuthatswana Police Commissioner Maj. Gen. P.J. Seleke said Monday police detained 32 ANC members and supporters in the territory northwest of Pretoria ''following the unearthing of evidence of a plot to assassinate'' Mangope. He said more detentions were imminent.

Mangope said in a statement, ''In the interests of all ... the government of Bophuthatswana regrettably has no alternative but to take steps to neutralize this despicable and unconstitutional threat.''

An ANC official in Johannesburg immediately denied the allegation, calling it ''ridiculous and outrageous.''

''They have never tolerated any opposition and are looking for an excuse to kick us out,'' the spokesman said.

The ANC has long accused Mangope of being a puppet of the white minority government. Mangope is the only leader of the four apartheid- created ''independent'' territories - recognized as sovereign only by South Africa - who has refused to accept the ANC's counsel in affairs of state.

ANC Deputy President Nelson Mandela said Bophuthatswana is ''not a major ally of our struggle.''

The ANC also said South African police had detained up to five organizers of the Pretoria stayaway over the weekend, but police would not comment on the allegation.

The protest action, by tens of thousands of people, left the city's streets almost devoid of black shoppers, and businesses drafted white staff into jobs held by blacks.

''The response to the stayaway is almost 100 percent,'' said a stayaway organizer, Ronnie Momoepa.

A poll by the daily Pretoria News had businessmen and transport officials putting the stayaway figure in the ''tens of thousands.'' ''This is as good as a blanket demonstration ... there aren't blacks anywhere in town,'' store owner Harold van Rensburg said.

The ANC-affiliated United Democratic Front and Congress of South African Trade Unions organized the action last week to highlight ANC allegations of civil rights abuses and political intolerance of opposition in Bophuthatswana and to demand the territory's reincorporation into South Africa.

The stayaway was also called to protest against the cutoff of electricity to Pretoria's Atteridgeville, Zithobeni, and Bronkhorstspruit townships by authorities reacting to politically motivated non-payment of service dues.

Rioting sparked by the cutoffs left two people dead and 25 injured by late Saturday before Law and Order Minister Adriaan Vlok imposed emergency regulations giving police sweeping powers and a 9 p.m.-to-4 a.m. curfew on Atteridgeville and neighboring Saulsville.

Police said factional fighting Monday between two groups with guns and machetes killed five people in the black township of Katlehong east of Johannesburg, police said.

An unknown number of Zulus and Xhosas clashed in Katlehong's Zonkwezizwe squatter camp, Police Capt. Ida van Zweel said, noting two people were fatally shot and three hacked to death.

''This unrest started when one of the sides demanded the other take part in a rent boycott,'' van Zweel said. She said police reached the scene only after the battle ended but were patrolling the ''tense'' area in force.

#90317u0118 11/13/1990 ~United Press International

(NOV. 13) UPI - An unofficial envoy from New Zealand has returned from Iraq after securing the release of all his country's hostages. Former Labor Prime Minister David Lange says he negotiated the immediate release of all 16 New Zealand hostages being held in Iraq and Kuwait. And he says United States' criticism of his private visit to Baghdad probably helped him succeed in his mission.

Israel says it's ready to receive a U-N envoy but NOT under the auspices of a U-N Security Council resolution condeming the Jewish State for the bloody Temple Mount riots. Under the compromise offer, Israel reportedly would cooperate with U-N envoy Jean Claude Aimee as he investigates the situation of the Palestinians in the territories. But the accord calls for NO links to be made between Aimee's visit and the U-N resolution on the Temple Mount riots.

A magazine survey says many women think there should be limits on some first amendment rights. According to the Glamour magazine poll of 17-hundred women, 43 percent said that certain forms of expression- especially pornography and racist or anti-gay attacks- should NOT be protected by the First Amendment. The survey also shows 35 percent believe that violent or sexually explicit

song lyrics or scenes on television should NOT have First Amendment protection.

Cable News Network says it'll stop airing sensitive tapes of telephone conversations between deposed Panamanian strongman Manuel Noriega and his attorneys, pending a Supreme Court ruling on the matter. The agreement was hammered out during an emergency hearing in the chambers of U-S District Judge William Hoeveler in Miami. C-N-N had defied a temporary injunction prohibiting it from airing any of the tapes. Noriega is in federal prison awaiting trial on drug- trafficking charges.

Police in Jersey City, New Jersey, say a 12-year-old boy is safely back home after being abducted from a park by a homeless man who attempted to rape him in a remote, wooded area of the park. Police say officers interrupted the attack just after the boy had begun to remove his clothes. The youth was shaken, but unharmed. A police official says officers ''were in the right place at the right time.''

ASPEN, CO (NOV. 13) UPI - Four Southern Californians were killed Monday when their single-engine plane crashed into a hillside while taking off from the Aspen airport.

The Pitkin County Sheriff's Department said the Cessna 210 crashed across from the airport tower shortly after taking off about noon under clear skies. There was no fire.

The dead were identified as Lawrence C. Barrett, 43, his wife, Karolyn, 45, both of Huntington Beach, and Russell G. Lind, 52, of Newport Beach. A Santa Ana man was the fourth victim, but authorities witheld his name until his relatives could be notified.

-30- 797

#90317u0138 11/13/1990 ~United Press International

GUATEMALA CITY (NOV. 13) UPI - Former military government official Jorge Serrano Elias was set for a runoff against favorite Jorge Carpio Nicolle, having garnered nearly a quarter of the votes for president.

With nearly 70 percent of the votes counted Monday, Carpio, of the National Center Union, led with 276,253 votes, or 25.4 percent. Serrano, of the Solidarity Action Movement Party who had taken the lead in early returns, was second with 267,722 votes, or 24.6 percent.

If no candidate wins a clear majority of the votes, the top two contenders face each other in a second round ballot Jan. 6, and the new president begins a five-year term Jan. 14.

Alvaro Arzu of the center-right National Party of Advancement trailed with 202,641 votes, or 18.6 percent, and Alfonso Cabrera Hidalgo of the ruling Christian Democratic Party was fourth with 177,338 votes, or 16.3 percent.

About 43 percent of the country's 3.2 million registered voters abstained.

Serrano, a 45-year-old evangelical protestant who has actively promoted peace talks with guerrilla forces operating in Guatemala, surged in 11th-hour campaigning, apparently picking up votes from supporters of former military ruler Efrain Rios Montt, whose candidacy was rejected less than a month before the election.

Serrano was a top government official under Rios Montt, who took power in a military coup in March, 1982 and was ousted by the army in Aug., 1983.

''We are not surprised by the results because our strategy was to make our campaign short and very intensive,'' Serrano told a group of reporters at his campaign headquarters.

Serrano, who in 1985 finished third behind President Vinicio Cerezo and Carpio was considered a long-shot two months ago, and National Center Union legislator Edmond Mulet said he had seriously considered running for vice-president with Carpio earlier this year.

Serrano's running mate, Gustavo Espinosa, said Serrano was a man ''with no vengeance, who has no problems with other people.''

None of the candidates would comment on possible alliances for the runoff election, although observers said Carpio's attacks on the third- and fourth-placed candidates in the run-up to Sunday's election could limit his leverage for negotiations.

''We are open to negotiations and we hope to speak with all groups,'' Carpio said at a news conference. ''This will be a peaceful campaign.''

In a concession speech lined with indirect references to Carpio, Arzu said his party had fallen victim to ''a black campaign, a dirty campaign.''

Cerezo, who took office in 1986 as the country's first civilian president in 16 years, conceded defeat for the Christian Democrats, whose candidate fell ill with an inflamed pancreas weeks before the election and is receiving treatment in Houston, Texas.

''The democratic process has been reaffirmed. We are now living in a regime of political parties,'' Cerezo told reporters.

Cerezo said the Christian Democrats were especially hurt by urban voters who

have grappled with rising prices during the election year. Inflation in the capital rose 42 percent from January to October, compared to 10.5 percent in 1989.

Electoral authorities said the votes for congressional deputies and mayors in 90 percent of Guatemala's 330 townships reflected trends in the presidential vote, but that official results were incomplete.

Early Monday, unidentified assailants shot dead the Christian Democratic mayor of an eastern Guatemalan town. Manuel Jordan Triguero, 40, was gunned down in Comotan, about 125 miles east of the capital, according to Treasury Police spokesman Conrado Monroy.

It was the only reported incident of violence during the election, capping a campaign tarnished by the killings of dozens of political party activists and several elected officials in the weeks leading up to the balloting.

An estimated 100,000 people have been killed and another 40,000 kidnapped in nearly 30 years of political violence in the Central American nation, and both Carpio and Serrano have pledged to work for peace with country's guerrillas.

#90317u0144 11/13/1990 ~United Press International

PHILADELPHIA (NOV. 13) UPI - The combination of the Philadelphia Eagles' most impressive defensive effort of the season and Heath Sherman's most productive game as a professional overwhelmed the Washington Redskins Monday night.

Philadelphia's defense forced three turnovers that resulted in touchdowns and Sherman ran for a career-high 124 yards Monday night to give the Eagles a 28-14 victory over Washington, their third straight victory.

''It feels real good,'' Eagles defensive tackle Jerome Brown said. ''It feels like old times. Turning the ball over and giving it to the offense. It reminds me of the old Eagles. I knew it was just a matter of time until we started to take advantage of opportunities.''

Sherman scored on a 9-yard pass from running back Keith Byars and on a 2-yard pass from Randall Cunningham. He became the first Philadelphia runner to gain more than 100 yards in two straight games since Wilbert Montgomery did it three consecutive times in 1981.

Sherman, a two-year pro, ran for 113 yards against New England last week.

''It means a lot that I got 100 yards and that we won too,'' Sherman said. ''It wouldn't be fun if we didn't win. You feel tired while you're doing it but you feel good afterwards.''

The Eagles, 5-4, also scored on a 30-yard interception return by William Frizzell and an 18-yard fumble return by Clyde Simmons. The first interception of Reggie White's career also set up Sherman's second touchdown.

The Eagles' defense, which forced 56 turnovers last year, managed only 14 in the first eight games of this season. In a 13-7 loss to Washington earlier this year, the Eagles failed to produce a turnover or a quarterback sack.

''The defense played one of its best games since I've been here,'' Philadelphia Coach Buddy Ryan said. ''The entire defense played well.''

Washington, 5-4, scored on a 8-yard pass from Jeff Rutledge to Don Warren and a 1-yard run by emergency quarterback Brian Mitchell.

Both Rutledge (sprained thumb) and his backup, Stan Humphries (sprained knee), were injured and knocked out of the game. The Redskins were forced to use the rookie Mitchell, who directed a 56-yard drive late in the game thatproduced the Redskins' second touchdown.

''It was a tough day for us,'' Washington Coach Joe Gibbs said. ''I have to give them credit but what I worry about most is that we got a lot of guys hurt. It's going to take a lot of people to regroup and bounce back. We've had tough luck with our quarterbacks. It's hard to explain.''

The Eagles broke the game open with three touchdowns in the last 3:51 of the third quarter, two of them coming after turnovers.

''We went out with a different attitude,'' White said. ''We were going to be more intense. Of course, it's easy to be intense on Monday Night Football against the Redskins. But we've got to continue this.''

Byars took a pitch from Cunningham and tossed a 9-yard scoring strike to Sherman to give the Eagles a 14-7 lead with 3:51 to play in the third quarter, capping a seven-play, 33-yard drive.

Washington's Ralf Mojsiejenko managed only a 37-yard punt from his own 7 and Anthony Edwards returned the ball 11 yards to give the Eagles possession at the Washington 33.

Cunningham hit Sherman for six yards on a fourth-and-4 play, then scrambled for 12 yards and a first-and-goal from the 9. The Eagles scored on the next play.

Three plays later, Philadelphia went ahead 21-7 when Wes Hopkins sacked Rutledge, forcing a fumble that was recovered by Simmons and returned for a touchdown with 2:41 to play in the third.

''We had opportunities to make plays in the first half and didn't get it done

'' Rutledge said. ''Then they just came after us.''

Hopkins said: ''He didn't see me. If you hit a quarterback on the blind side, the chances are he's going to cough it up.''

Humphries replaced Rutlege on Washington's next possession and moved the Redskins to midfield before disaster struck.

Byron Evans tipped Humphries' pass and the ball was intercepted by White, who returned it 33 yards to the Washington 9.

Three plays later, Cunningham hit Sherman from 2 yards out to give the Eagles a 28-7 lead.

''I can catch the ball too,'' Sherman said.

Rutledge threw to Warren for an 8-yard touchdown five seconds into the second quarter to tie the score 7-7, two plays after a botched punt by the Eagles.

Washington's Sidney Johnson got in the backfield quickly against Philadelphia punter Jeff Feagles, who tried to run, then threw a desperation pass. Feagles was penalized for intentional grounding and the Redskins took over at the Philadelphia 12.

A Washington mistake enabled the Eagles to take a 7-0 lead with 3:32 left in the first quarter.

On a third-and-1 play, Mike Golic hit Rutledge as he threw and Frizzell darted in front of Ricky Sanders to pick off the ball and race 30 yards into the end zone untouched.

TOKYO (NOV. 13) UPI - U.S. Vice President Dan Quayle and Singapore Prime Minister Lee Kuan Yew, citing the need for continued U.S. military presence in South East Asia, signed an agreement Tuesday giving the U.S. Navy and Air Force greater access to facilities in Singapore.

The agreement, which grew out of a discussion on how to deal with a possible withdrawal of U.S. forces from the Philippines, will permit the U.S. Air Force to send aircraft to Singapore several times a year on training missions and will increase the duration and number of U.S. Navy ships allowed to visit Singapore.

The two leaders also agreed to increase the number of U.S. Air Force and Navy personnel assigned to Singapore on a year-round basis to about 95 from about 22 at present.

''This will facilitate, along with our other arrangements in the area, a continued robust American presence in the Pacific,'' Quayle said in a brief signing ceremony at a Tokyo hotel where Quayle was staying for the enthronement of Japan's Emperor Akihito.

''This presence reflects our determination that America will continue to play an active role in fostering the stability and economic development of Asia,'' Quayle said.

U.S. officials have been seeking a range of options to broaden military access in the western Pacific in case negotiations with the Philippines on the future of U.S. military bases results in a complete or partial U.S. withdrawal.

''This complements rather than replaces what is in the Philippines,'' said a senior U.S. administration official traveling with Quayle.

The official pointed out the small size of the planned U.S. presence in Singapore could not replace the large U.S. bases in the Philippines.

To dramatize the point, he said the size of the original U.S. Clark Air Base in the Philippines alone is larger than the country of Singapore.

Nevertheless, Lee said the agreement grew out of a discussion he had with U.S. Sen. Richard Lugar of Indiana two years ago on how to deal with the possibility of the Philippines asking the United States give up its Subic Bay Naval Base and Clark Air Field.

Lee said he told Lugar he wanted America to ''steer the course, stay out here and do what the United States has done since 1945.''

Lee said he offered to share the ''political burden'' of allowing a greater U.S. military presence in Singapore if it would help the United States remain strong in Asia.

Lee's offer to host more U.S. military personnel sparked outcries among Singapore's neighbors, particularly Malaysia and Indonesia.

But Prime Minister Mahathir Mohamad of Malaysia and President Suharto of Indonesia have said recently they do not object to the U.S. using facilities in Singapore as long as no permanent base is established.

The agreement will permit the U.S. Air Force to send training missions of several weeks duration to Singapore several times each year.

U.S. Navy ships will use Singapore's port for repairs, said a U.S. official, but he added it would not be on a scale large enough to replace the repair facilities at Subic Bay.

The increased use of Singapore facilities is expected to start within the next three to six months.

In his brief remarks, Quayle extensively praised Lee, who will step down from office this month after more than 30 years as prime minister of Singapore.

''It is a distinct honor for me to be here with one of the most respected wise men of Asia and indeed of the world, Prime Minister Lee Kwan Yew,'' Quayle said.

''Prime Minister Lee is not only a friend to the United States but a supremely insightful counselor to generations,'' Quayle said.

Lee is known not only for his successful economic development of Singapore but also his iron-fisted control and repression of dissent.

U.S. relations with Singapore hit a low point in 1988 when Singapore ousted American diplomat E. Mason Hendrickson for allegedly whipping up anti-government sentiment.

The U.S. State Department denied any wrongdoing and expelled Hendrickson's counterpart in Washington.

#90317u0177 11/13/1990 ~United Press International

TOKYO (NOV. 13) UPI - United Nations Secretary General Javier Perez de Cuellar told Japanese leaders Tuesday Iraq's adamant attitude has left little room for him to mediate a peaceful solution to the Gulf crisis, government officials said.

The veteran Peruvian diplomat made the remark in separate meetings with Japanese Prime Minister Toshiki Kaifu and Foreign Minister Taro Nakayama, who met with foreign guests invited to attend the enthronement of Japan's Emperor Akihito Monday.

''Iraq still shows a stiff attitude and there is little room now to mediate for a peaceful settlement (of the crisis),'' Perez de Cuellar was quoted as telling Kaifu.

He said he has been doing all he can and will continue to do so, the officials said. He added Iraq has refused to receive a special U.N. envoy ordered to Baghdad.

In his meeting with Nakayama, the U.N. chief hailed Japan's financial contributions to countries suffering economic difficulties caused by the crisis, the officials said.

Japan has pledged $2 billion in emergency aid to those countries, including frontline states in the Middle East.

Nakayama in meeting with representatives of six Gulf nations Monday said Japan firmly adheres to its policy of seeking the unconditional withdrawal of Iraqi forces from Kuwait, restoration of the legitimate government of Kuwait and the release of hostages held in Iraq, the officials said.

The six countries consisted of Qatar, Saudi Arabia, Kuwait, Oman, the United Arab Emirates and Bahrain, which form the Gulf Coast Conference.

Nakayama said Japan regards the GCC not only as its economic partners but as a force for regional stability, they said.

#90317u0179 11/13/1990 ~United Press International

BEIJING (NOV. 13) UPI - China has retreated from optimistic forecasts that its oil production would rise to a record level this year, indicating its oil industry may have to struggle even to make output match last year's total.

The state-run newspaper China Daily, quoting government statistics, reported Tuesday that total output for the first 10 months of 1990 rose just 0.6 percent from the same period last year, to 114.66 million tons.

Just two weeks ago, the government's Xinhua news agency quoted Chinese oil industry officials as saying crude output had steadily increased since 1982 and would surpass 138 million tons this year, a record, over last year's total output of 137.6 million tons.

But production capacity has in fact largely stagnated in the last few years. Western industry analysts say China remains unable to take substantial advantage of the jump in world oil prices caused by the Gulf crisis to boost its production and exports.

The China Daily indicated the industry had some doubts about even producing as much as last year.

''Experts said the oil industry now stands a very good chance of meeting the year's target of 137 million tons,'' the newspaper reported.

The newspaper said crude oil output actually declined 1.3 percent in October to 11.8 million tons, which it said was a record low on a month- to-month accounting period.

It said the dip was ''mainly due to heavy floods in major oil fields.''

Although China imports refined and partially refined petroleum products, it remains Asia's largest oil producer and a net exporter.

Exports are likely to show a small increase this year. China exported a total of 2.8 million tons of crude from January to September, higher than the 2.5 million tons exported all last year.

A senior Chinese trade official quoted by the state press last month said the country would only manage a ''modest rise in exports despite soaring prices because of the Gulf crisis,'' noting exports were ''largely restricted by increasing domestic demand.''

But state regulations keep domestic oil prices artificially low. Offshore exploration has failed to meet expectations and onshore production is hobbled both by the pricing system and by bureaucratic and cost problems facing foreign oil companies working in China.

The government has said it plans to invest more than $21 billion during its next five-year economic plan, beginning in 1991, in efforts to find new oil reserves.

China's most promising oil development base is the Tarim Basin project in the northwest province of Xinjiang. Government studies have estimated potential reserves at 12 billion tons of oil and natural gas.

Although Tarim has been so far closed to foreign firms, Premier Li Peng recently hinted that foreign oil companies may in some way be allowed to participate in the future.

The China Daily report Tuesday also said the country's coal production has slowed because of lower demand and that it would drop further in the last two months of the year because of swollen inventories.

Nationwide coal production in the first ten months of 1990 totaled 862.07 million tons, up 3.2 percent over the same period last year. The rate of increase in the first six months of the year was 6.1 percent, the report said.

#90317u0180 11/13/1990 ~United Press International

SAN DIEGO (NOV. 13) UPI - A man who used to train sea mammals to perform military operations for the Navy says the animals cannot be trusted in combat and the program puts U.S. servicemen and national security in danger.

David Reames, a civilian who trained sea mammals at the Naval Oceans Systems Center in San Diego in 1986-87, said Monday that sea lions and dolphins are intelligent, but cannot be counted on during combat.

"It would be just as ridiculous if the Army trained chimpanzees to shoot AR-15s," Reames said at a Veterans Day protest by Friends of Animals. "It's not just an animal issue - it's a human rights issue. The liberals can talk about the animals' rights. I'm concerned about human beings."

Reames, who trains sea lions at the Los Angeles Zoo, said that while working at the naval center he learned of several instances in which animals dropped or bumped into "potentially dangerous classified objects" or disappeared. He said the animals' natural instincts to resist captivity make them impossible to control.

Tom LaPuzza, spokesman for the center, said the Navy has complete faith in the reliability of its classified marine mammal program. In 30 years, he said, "only six dolphins have gone AWOL, five of them during storms when they lost contact with the trainer."

Dolphins were used in the Persian Gulf during U.S. tanker-escort operations in 1987. The Navy refuses to say exactly what the animals do in such operations, but animal rights activists have said they are fitted with bombs on their snouts.

Reames first made his opinion public last week in Chicago at a meeting of the International Marine Animal Trainers Association, saying he was concerned that the threat of war in the Persian Gulf means dolphins could be deployed again. "I don't want to see any animals I trained causing the deaths of American servicemen," he said.

"David Reames trained sea lions," said LaPuzza. He did not train dolphins, but he says he knows how the dolphin system works. I don't think he does."

#90317u0241 11/13/1990 ~United Press International

BEIJING (NOV. 13) UPI - A senior Chinese leader abruptly postponed a scheduled visit to Britain Tuesday less than a week after the trip was announced, with a government spokesman saying he was ill but Western diplomats citing possible political problems.

Wan Li, the chairman of the National People's Congress, China's rubber-stamp parliament, was scheduled to visit Britain from Nov. 17-24 at the invitation of leaders of the British parliament.

But the Chinese Foreign Ministry and the NPC said the visit had been postponed indefinitely because Wan, 74, also a member of the Chinese Communist Party's ruling Politburo, was ailing.

''Wan Li's health is not very good and according to his physicians, he needs a period of rest,'' said Zhou Chengkui, a spokesman for the National People's

Congress office.

''When he will visit will be decided through more consultations between China and Britain,'' Zhou said.

The trip was announced formally just last Thursday. A Chinese Foreign Ministry spokeswoman hailed the visit at the time as ''an important event'' in efforts to heal relations damaged by China's June 1989 crackdown on the pro-democracy movement.

Wan's trip, however, was in his capacity as a parliamentarian and was being played down by Britain as a parliamentary exchange. But Western diplomats in Beijing said the Chinese had attempted to turn the visit into a more official event.

The postponement caught even the NPC office by surprise. Earlier in the day, Zhou told reporters the trip was going ahead.

British Embassy officials said they had no further information than being advised of Wan's ill health. Wan had canceled out of a dinner Friday night with British Ambassador to China Sir Alan Donald, also because he was not feeling well.

The officials said they were unaware Wan was shown last weekend on state television at a meeting, looking hearty.

London has maintained economic and military sanctions against Beijing since the crackdown, although the European Community last month agreed to drop most economic measures.

Prime Minister Margaret Thatcher was slated to have met with Wan, but only as a parliamentarian. The Chinese, however, had tried to increase the significance of the visit as well as sharply boost the size of Wan's delegation, diplomats said.

''The Chinese were trying to make this as official and high profile as possible,'' a Western diplomat said.

Diplomats also cited the possibility that domestic politics had intruded. Wan is one of the few prominent moderates in the Chinese leadership and one of his allies, Politburo Standing Committee member Li Ruihuan, has been in political trouble recently.

The leadership is currently locked in a squabble over the economy before a scheduled economic planning conference and a major Communist Party meeting. The meeting, a plenum of the party Central Committee, has been put off until the disputes are resolved.

The diplomats did not rule out, however, that Wan may in fact be ailing.

''He's an old man, and it's November in London,'' one diplomat said. ''Maybe they just want to wait until the weather is better.''

#90317u0249 11/13/1990 ~United Press International

(NOV. 13) UPI - Winter weather swept off the Great Lakes into upstate New York Tuesday, bringing freezing temperatures and snow, while flooding continued in the Northwest and the eastern Rockies basked in warm weather.

An early season snowfall set a record in Newark, N.J., Tuesday, where flurries occurred on the date for the first time since 1984.

A lake snow advisory was posted for western New York state as a cold northwest wind carried between 2 and 4 inches of snow to the region.

A gale warning was in effect for Narragansett Bay in Rhode Island while weather cleared over much of northern New England, but remained frigid after winter storms Monday.

Flood warnings remained in effect for the Snoqualmie and Skagit rivers in Washington state as a frontal system moved in on the area from the eastern Pacific. Residents braced for the storm to push already swollen rivers further over their banks.

Near record high temperatures were predicted for Boise, Idaho, as warm weather with highs in the 60s stretched into western Montana, but cold temperatures were expected to return by the middle of the week.

In the South, a small craft advisory was in effect for Key Largo, Fla., with high winds and rough seas, while patchy fog covered the coastal bend of southeastern Texas.

Southern California enjoyed clear skies and lows in the upper 50s.

#90317u0268 11/13/1990 ~United Press International

SEOUL, SOUTH KOREA (NOV. 13) UPI - The Seoul government will provide $170 million this year for the multinational efforts against Iraq, to be followed by another $50 million next year, a published report said Tuesday.

The nationally circulated daily Dong-A Ilbo said a team of officials has been working on details of the support plan based on a government decision in September to contribute $220 million to help solve the Gulf crisis.

Of the total set for this year, the paper said, $100 million will be in support of military efforts and $70 million will be in economic assistance to five nations suffering from the crisis including Egypt, Turkey, Jordan, Syria and Bangladesh.

It said a government task force toured most of the five nations late last month and early this month and discussed with officials of the host governments on how to provide the aid.

As a result it has been decided that part of the assistance will be grants-in-aid and the rest ''tied loans'' allowing recipient nations to purchase Korean products on credit, the paper said.

Under the plan the government hopes to supply buses, trucks and other transportation equipment, medicines, and rice worth $10 million and other daily necessities, it said.

Terms of the proposed loans vary according to recipients but in general the loans will be repayable over 20 years after a five-year grace period, carrying an average annual interest of 3.5 percent, the report said.

While offering the economic aid, the government plans to push formal diplomatic ties with Egypt and Syria, it added.

#90317u0334 11/13/1990 ~United Press International

HONG KONG (NOV. 13) UPI - An immigration official said Tuesday that 111 boat people would be freed on bail, 24 hours after authorities defied a judge's order releasing them from 18 months of what he ruled was illegal detention.

Director of Immigration Lawrence Leung said he would immediately release the Vietnamese on their own recognizance and that the United Nations High Commissioner for Refugees would temporarily house them at a refugee camp.

Justice Raymond Sears granted the refugees a writ of habeas corpus Monday and condemned the government for confining them for 18 months in what he said was a violation of the International Covenant on Political and Civil Rights.

Sears ruled the boat people had made it known in May 1989 that they intended to sail on to Japan after accepting a government offer to repair and resupply their boat after it was halted by marine police in Hong Kong waters. He said the government reneged, destroyed their craft and illegally imprisoned the refugees.

But hours after his ruling freed them, authorities re-arrested the Vietnamese and transfered them to a Hong Kong prison as illegal immigrants.

Despite the bail, Hong Kong officials said the government still considered the 111 to be illegal immigrants and reserved the right to deport them pending the outcome of an appeal.

''If the court ruling is not overturned,'' a government spokesman said, ''Then at some stage action may be taken to remove all 111 from Hong Kong.''

Sears sharply criticized the government, claiming the re-arrests were a direct challenge to the authority of the court. He then granted the group permission to file a fresh writ against the government for unlawful detenion.

The Vietnamese were detained May 1, 1989, after sailing into the colony's waters on their way to Japan where under a policy since changed, they would have been granted automatic refugee status and resettled, unlike in Hong Kong.

About 54,000 boat people live in Hong Kong's squalid detention centers - most of whom have little chance of being resettled and face continued life in the camps or a one-way ticket to Hanoi.

(NOV. 13) UPI - Super typhoon Mike pounded the central Philippine islands today, killing at least eight people. Officials say at least eight vessels were damaged or sunk by the storm and more than 240-thousand residents were forced to evacuate. Communication lines to severely affected areas were knocked down and the extent of damage was NOT immediately known. It's feared

the death toll will rise.

United Nations Secretary General Javier Perez de Cuellar says there's little he can do to settle the Persian Gulf crisis because of Iraq's attitude. In meetings with Japan's prime minister and foreign minister, Perez de Cuellar said he has been doing all he can and will continue to do so. But he pointed out that Iraq has refused to receive a special U-N envoy ordered to Baghdad. .

A private visit to Iraq by New Zealand's former Labor Prime Minister apparently was successful. David Lange returned home and said he has negotiated the immediate release of all 16 New Zealand hostages being held in Iraq and Kuwait. Lange said New Zealand will join France as the only nations to win the release of all of their hostages.

Financial experts have a new stock market to track. The Soviet Union yesterday opened its first stock exchange since the Russian Revolution. The Moscow exchange was founded by 187 Soviet enterprises and banks. Officials say eventually, as many as 25 percent of the shares will be held by major joint-stock companies and banks in the country.

China's state-run newspaper says officials in Beijing have backed off from their optimistic forecasts that the nation's oil production would rise to a record level this year. The paper quotes government figures showing that total output for the first 10 months of 1990 rose just six-tenths of one-percent from the same period last year. The China Daily indicated that the oil industry had some doubts about producing even as much oil as last year.

Striking New York Daily News reporters and editors yesterday began handing out their own peper. One Million copies of the free eight-page publication were printed and distributed on street corners and in restaurants and bars. The stories were written by reporters who struck the News October 26th, one day after seven other unions went out on strike.

#90317u0570 11/13/1990 ~United Press International

DETROIT (NOV. 13) UPI - Art works belonging to the estate of Henry Ford II and his family fetched a disappointing $48.58 million at Sotheby's North America in New York in what was seen as a sign of an uncertain art market.

It had been hoped that the 23 works sold Monday would bring $65 million. However, one-third of the works offered for sale were pulled off the auction block because nobody bid even the minimum price.

''It was disappointing,'' said David Nash, senior vice president and expert in charge of the sale.

''The works were very desirable. But the market is in a state of change, and it is very difficult to anticipate how much it will change.''

The top price of $18.15 million was paid by a Japanese collector for Renoir's ''La Tasse de Chocolat'' (The Cup of Chocolate). It was the second-highest price paid for a Renoir at auction, with the highest being $78.1 million, also at Sotheby's.

The sale was precipitated by a feud over Ford's estate between his widow, Kathleen DuRoss Ford, and his son, Edsel II.

Proceeds from the auction will be divided among Kathleen Ford, Ford's grandchildren and the U.S. government.

Nash said he believes the art market is seeking a new level. Dealers are waiting to see where the market bottoms out and may be worried about selling inventory before buying more.

''This is a good time to have cash in hand,'' Nash said.

''The Japanese were clearly substantial supporters of the sale, the Europeans less than I had hoped,'' Nash said.

''Even the bidding from Japan was more sluggish than I had expected. I do believe the Japanese economy is on a little more uncertain grounds, too, than six months ago. Clearly the threat of oil prices skyrocketing and a war is affecting people all around the world.

''That a couple of paintings were bought by Americans were nice. There are still some who are avid collectors.''

#90317u0592 11/13/1990 ~United Press International

(NOV. 13) UPI - Spurred by positive external factors, the Tokyo Stock Exchange staged a major rally in post-holiday trading Tuesday, lifting the benchmark average more than 1,000 points.

The key Nikkei Average of 225 selected issues, which declined 38.01 points Friday, soared 1,041.87 points to close at 23,973.67.

The Tokyo Stock Price Index of all listed major shares also jumped 65.58 points to 1,773.02.

The market was closed Monday because of a national holiday in observance of Emperor Akihito's enthronement.

Trading was slow with volume estimated at 400 million shares, up from 326.84 million shares Friday.

Brokers said the market was supported by the dollar's decline against the yen, growing prospects for declining U.S. interest rates and Friday's advance on Wall Street.

''The charts said it was time to rise,'' said Masayoshi Yano, deputy general manager of the stock trading division at Nikko Securities. ''But I'm worried that the pitch is a little too steep.''

He said ''another problem is that volume is not picking up.''

Institutional buyers were buying back stock-index futures but would have little to do with the spot issues, Yano said.

Large-capital steels were generally higher. Heavy-duty electricals such as Hitachi and Toshiba advanced along with shipbuildings, constructions, securities and banks.

Natural resources-related issues such as minings and oils weakened.

Elsewhere around the region, stocks closed higher on the Hong Kong Stock Exchange. The benchmark Hang Seng Index gained 49.41 points - or 1.68 percent - to close at 2998.97 following a rise of 16.64 points Monday.

''The market was up more than 1.6 percent today and turnover was a little better than we have seen in the past few days,'' David Lavington, a broker at Morgan Grenfell, said. ''The rise was across the board among the leaders. It followed Wall Street, which was up yesterday. In the short term we will just be following other markets as there is little to move the market here.''

Prices firmed on the Singapore Stock Exchange, bolstered by the rally on Wall Street and improved performances on regional markets.

The Straits Times Industrial Index rose 13.81 to 1116.70.

The major impetus was the sharp rise in Tokyo, but trading in Singapore

remained light as many institutions were sidelined. Analysts expressed doubts the upturn was sustainable.

''The rally was a technical rebound on a grossly oversold market,'' a dealer said.

In Bangkok, Share prices edged down on the Thai stock market for the second consecutive day in response to uncertainty in domestic politics and in the Gulf.

The Securities Exchange of Thailand index dropped 2.46 points to close at 659.37.

''Investors were worried that the parliamant might be dissolved,'' said a representative from Mithai Europartners Finance and Securitites Co.

He said there was also concern after the Army commander said the military would act to stop political protests at the prime minister' s office.

Foreign buying helped the Sydney Sharemarket close higher, although interest again waned in the afternoon session, brokers said.

At the close of trading, the All Ordinaries Index was up 13.2 to 1348.8. But earlier in the day the index was up more than 23 points.

Rises occurred across the boards. The All Industrials Index rose 17.9 to 2013.9 and the All Resources Index closed 9.3 higher at 831.4.

Turnover, reflecting the overseas interest, was an above average 92.6 million shares.

Brokers said that despite the positive finish, which was largely a product of an extremely strong Tokyo market, the market remained extremely nervous.

#90317u0620 11/13/1990 ~United Press International

MANILA, PHILIPPINES (NOV. 13) UPI - Typhoon Mike battered the central Philippines Tuesday, killing at least 14 people and forcing nearly 240, 000 to flee homes damaged or flooded by the storm's torrential rains and 150 mph winds.

Mike trapped 17 people, including six Americans, on an offshore oil drilling platform. They were reported safe, however, and a helicopter was to carry them to land after the weather cleared.

After wreaking considerable destruction in the midsection of the nation of islands, the so-called ''super typhoon'' passed into the South China Sea in

the evening, sparing populous metropolitan Manila and U.S. military bases in the northern Philippines of its fury.

The most powerful typhoon to strike the Philippines in nine years, Mike smashed into Leyte from the Pacific Ocean with sustained winds of 150 mph.

The typhoon then raked rice, coconut and sugar farms in Cebu, Negros, Panay and Palawan islands. Its winds weakened to 100 mph on its overland trek, and then the storm moved out into the South China Sea.

Relief agencies said two people were killed in Panay island, seven in Negros and five in Leyte. Most of the fatalities were either drowning victims or were hit by flying debris. At least 16 people were reported as missing.

Officials said downed communications and power networks prevented a full assessment of damage and casualties, and they feared the death toll would go up.

Reports by the agencies and local officials said 239,727 people fled damaged or flooded homes in the disaster zone.

Radio news reports said the typhoon destroyed two private radio station transmitters, destroyed 5,420 houses, a bridge leading to Cagayan de Oro city and scores of government and military buildings. It also spawned a tornado that crushed 160 houses.

Philippine Navy spokesman Cmdr. Reuben Lista said powerful winds snapped 16 vessels, including four navy ships, from their moorings in the central city of Cebu and sank them. Six vessels were run aground and two others were damaged.

Lista said there were no reports of casualties in the sinking of the vessels which had sought shelter in the Cebu harbor. Another cargo vessel, the Dona Roberta, sank off Mindanao island and its 16 crewmen were reported missing.

Philippine and U.S. officials said at least 17 people were stranded on an oil drilling platform owned by the multinational oil drilling firm Alcorn. The platform is off Palawan island, southwest of Manila.

U.S. Embassy spokesman Stanley Schrager said an Air Force helicopter would pick up the 17 as soon as the weather cleared. Among the 17 were six Americans three Australians, four Britons, one New Zealander, one Malaysian and two Filipinos. Company officials said, however, the 17 were safe.

Leyte, Panay and Negros islands appeared to have suffered the brunt of the storm. Most of the evacuees were reported in the area.

Authorities suspended classes in areas along the path of the typhoon. Philippine Airlines suspended 22 flights to central and southern Philippines

but international flights remained normal. Domestic shipping services were canceled.

News reports said Mike caused considerable damage over the weekend to Palau, a group of islands east of the Philippines.

Mike was the most powerful typhoon to hit the Philippines since Irma and her 160 mph winds struck in November 1981, killing 470 people.

An average of 20 storms strike the Philippines annually. The super typhoon follows a series of natural calamities that has plagued the nation of islands in 1990, and taken a toll on President Corazon Aquino's government.

The disasters started with a drought, monsoon floods and an earthquake in July that killed more than 1,600 people and devastated wide areas of the northern Philippines.

BEIRUT, LEBANON (NOV. 13) UPI - Three children who found a cluster bomb left over from the Israeli invasion of Lebanon in 1982 were killed when the device exploded as they played with it, police said Tuesday.

Police said Mohammad Ghazawi, 10; his brother Saeed, 6; and Ammar Majdoub, 11, were killed while they were returning home from school in the village of Ghazza in the Bekaa valley in eastern Lebanon late Monday.

The three kids found the bomb near the schoolyard, police said. They started playing with the device and the charge blew up, police said.

Rescue workers said the bodies were mutiliated beyond recognition and thatpieces of their organs littered the ground, police said.

During Israel's invasion of Lebanon in 1982, Israeli warplanes dropped many anti-personnel cluster bombs.

At least 40,000 Lebanese children have died since the civil war broke out in 1975.

WASHINGTON (NOV. 13) UPI - Industrial production dropped 0.8 percent in October after growing slowly the month before, the Federal Reserve said Tuesday.

The Fed also reported a decline in the amount of industrial capacity used during the month. Capacity utilization declined 0.9 percent to 82.6 percent from 83.5 percent the month before.

Automobile production slipped 4.5 percent last month and accounted for one-fourth of the overall decline in industrial production. The Fed said production was off in most major market and industrial sectors.

The output of consumer goods, business equipment and materials slowed along

with declining automobile production, the Fed said.

Production of other big-ticket items, such as appliances and furniture, also continued to be weak during October.

Nondurable consumer goods output also declined, reflecting reductions in the production of electricity for residential use, gasoline and clothing, the Fed said.

Excluding motor vehicles, the production of business equipment fell slightly in October while production of industrial equipment showed ''widespread weakness,'' the Fed said.

Information processing equipment output slowed after growing at a robust pace during the third quarter. Construction supplies production was trimmed for the third consecutive month, reflecting continued weakness in real estate markets.

Manufacturing output dropped 0.8 percent during the month while factory utilization fell 0.8 percent to 81.7 percent, the lowest level since September 1987. The operating rate for utilities fell back to levels that prevailed earlier in the summer.

The utilization rate for mining also slipped in October despite an increase in coal mining.

Excluding motor vehicle and parts production, manufacturing production fell 0.6 percent in October after decreasing 0.4 percent the month before. The largest declines were posted by manufacturers of primary metals, lumber, stone clay and glass products, petroleum products and textiles.

(NOV. 13) UPI - Super Typhoon Mike devastated the central Philippines today. The storm arrived with winds of 150 miles an hour, destroying almost 55-hundred houses and killing at least 14 people. It also spawned a tornado that crushed 160 houses. Most of the victims either drowned or were hit by flying debris. Officials say almost 240-thousand people fled to safer ground as flood waters rose. The storm's winds reportedly sunk or damaged 25 vessels as it moved out into the South China sea in the evening. 16 crewmen aboard a sunken cargo ship are reported missing. .

Officials say at least 17 people, including six Americans, were stranded by the storm on an oil drilling platform owned by the multi- national oil drilling firm, Alcorn, off an island southwest of Manila. They are reported safe and will be picked up by a helicopter when the weather clears.

Boris Yeltsin says he has asked Soviet President Mikhail Gorbachev to join him in forming what he called a ''coalition government of national unity'' to solve the country's problems. Yeltsin said he suggested to Gorbachev that the

Russian Parliament be given the right to choose the Soviet government's premier, defense minister and finance minister.

Arab-Israeli violence continues. A gunman who crossed the border from Jordan killed an Israeli soldier today. He was the second soldier killed in less than a week during an infiltration attempt in the Jordan Valley. An Arab stabbed two police officers in Jerusalem's walled Old City. One of the officers was seriously wounded.

A senior Chinese leader suddenly postponed a scheduled visit to Britain today, less than one week after the trip was announced. A government spokesman said the official was ill, but Western diplomats say the postponement may mean the chairman of the National People's Congress is having political problems in China.

Authorities in South Africa today discovered the bodies of five men in a squatter camp in an eastern black township, raising the death toll in a two-day outbreak of factional fighting to 10. Radio reports say the fighting began when one of two groups refused to take part in a rent boycott.

Actor Marlin Brando says his daughter tried to hang herself in Tahiti just a few days after she took a drug overdose. Brando said that it isN'T known yet whether his daughter suffered brain damage. Prosecutors in Los Angeles have been trying to subpoena Cheyenne Brando to testify at the trial her half brother, who has admitted shooting her boyfriend May 16th.

Winter weather arrived in upstate New York today, with freezing temperatures and snow. A lake snow advisory was posted for western New York state as a cold northwest wind carried between two and four inches of snow to the region. Snow fell in Newark, New Jersey, today for the first time on this date since 1984.

#90317u0676 11/13/1990 ~United Press International

DALLAS (NOV. 13) UPI - The more television a child watches, the more likely the youngster is to have high levels of potentially artery-clogging cholesterol, a study showed Tuesday.

Researchers from the University of California-Irvine said their study of 1,066 young people ages two to 20 found an "amazing correlation" between how much time was spent watching TV and cholesterol levels.

"Watching two hours or more of TV daily turned out to be a stronger predictor of elevated cholesterol in children than any other factor we looked at," said Dr. Kurt Gold, co-author of the study which also examined family medical history, obesity, diet, and exercise.

About eight percent of the children surveyed had blood cholesterol levels of

200 milligrams per deciliter - one-tenth of a liter - or greater. Another 13 percent had levels between 176 milligrams and 199 milligrams per deciliter.

The American Academy of Pediatrics considers a cholesterol level greater that 175 milligrams per deciliter in children high enough to warrant dietary changes.

Children who watched two or more hours of TV daily were twice as likely to have cholesterol levels over 200 than those who watched less. The situation was even worse for those youngsters who watched four or more hours of TV per day - they had four times the risk of having cholesterol counts above 200 as those who watched less than two hours.

"Since cholesterol levels tend to rise somewhat as a child reaches adulthood, many of these children could have dangerously high levels later in life," said Gold, whose findings were presented at an American Heart Association meeting.

Excessive levels of cholesterol are associated with atherosclerosis, a narrowing of the arteries that greatly increases the risk of heart attack and stroke.

Researchers do not know precisely why greater amounts of TV watching were linked to higher cholesterol levels in young people. However, they speculated that heavy TV watchers tend to eat more high-calorie snacks, be exposed to more commercials for high-fat "junk" foods and exercise less than those who spend less time in front of the TV.

Gold conceded that it is also possible that TV watching may not play a direct role in boosting cholesterol levels, but may act as a good marker of children with a genetic tendency or other factors predisposing them to elevated cholesterol.

Whatever the association between TV watching and high cholesterol, Gold suggests that pediatricians routinely question parents about their children's TV viewing habits and run cholesterol tests on children who are heavy TV watchers.

"I think these findings give us an opportunity to make a real difference. We might be able to identify a lot more people with high cholesterol," said Gold, who thinks children should watch no more than two hours of TV daily and should be encouraged to exercise at least 15 minutes a day. The children surveyed had an average age of about 7 1/2 and lived in Orange County, Calif., an affluent suburban area near Los Angeles.

#90317u0707 11/13/1990 ~United Press International

BOSTON (NOV. 13) UPI - A lawyer for a woman who claimed she was raped in a former Harvard private club that once referred to women as "slobbering bovines" planned to appeal a judge's order not to discuss the case.

Jeffrey Newman declined to talk about the case because of the gag order issued by Suffolk Superior Court Judge Malcolm Graham, The Boston Globe said Tuesday.

Newman represents a New Jersey woman who is suing Pi Eta, a private club formerly affiliated with Harvard, because she said a guest at the club raped her there two years ago.

Graham issued the gag order at the request of Lee S. Macphee, a lawyer representing the corporation that operates the club, whose members are Harvard undergraduates and graduates. The club was affiliated with Harvard until 1984 when the university cut its ties to all-male clubs.

Pi Eta came to public attention that year when students picketed the all-male club, charging that its literature promoted violence against women. A letter distributed to club members referred to women as "pigs" and promised those members attending the club's parties "a bevy of slobbering bovines fresh for the slaughter." A copy of that letter wound up in the mailbox of a female Harvard student.

Newman said he planned to file this week a petition to set aside the gag order with the state Appeals Court. The case is expected to go to trial Dec. 3.

#90317u0708 11/13/1990 ~United Press International

LONDON (NOV. 13) UPI - Stock prices were higher at midday Tuesday on the London International stock exchange.

The blue-chip Financial Times 100-stock index was up 13.3 points to 2065.2. The narrower top 30 industrial average was up 9.1 points to 1598.8.

Volume at midday amounted to around 239.4 million shares.

A strong markup of stock prices in London after Monday's surge on Wall Street soon lost ground as the market focused on the weakness of the pound, traders said.

Among the most widely traded stocks, Merchant Bank Warburg fell 3 cents to $1.54 after posting a 35 percent slump in pretax profit and an unchanged dividend at 2.29 cents for the half year to Sept. 30.

Sedgwick group rose 3 cents to $1.09 after reporting a slightly better-than-expected 2.8 percent rise in pretax profit for the six months ending Sept. 30.

De La Rue, a printing technology company, edged a fraction of a cent higher to $1.37 after reporting a 71 percent leap in pretax profit for the six months ending Sept. 30.

Elsewhere, stock prices on the Frankfurt Stock Exchange closed mixed.

The closely watched German Stock Index closed up 0.67 points to 1, 402.91.

Traders said re-emerging worries about increasing chances for war in the Persian Gulf, as well as news that chemical group Hoechst AG's earnings fell 22 percent in the first nine months of 1990, helped lead the market lower after prices peaked around midday.

#90317u0733 11/13/1990 ~United Press International

(NOV. 13) UPI - The known death toll from Typhoon Mike in the Philippines has risen to at least 14. Before heading out to sea today, the storm took a heavy toll on the central Philippines. The most powerful typhoon to strike the Philippines in nine years smashed into the island of Leyte from the Pacific Ocean with sustained winds of 150 miles an hour. Radio news reports said the typhoon destroyed two private radio station transmitters, more than 54-hundred houses, a bridge, and scores of government and military buildings. It also spawned a tornado that crushed 160 houses. Officials said downed communications and power networks prevented a full assessment of damage and casualties, and they fear the death toll will go up.

A published report says Indiana Republican Senator Richard Lugar is expected to urge President Bush to call Congress into special session to debate war declaration policy. Lugar reportedly will hold a news conference to call for the debate. Lugar is the senior Republican on the Senate Foreign Relations Committee.

A new poll appears to show that President Bush is losing public support for

his Persian gulf policy. Of 615 Americans interviewed yesterday, 51 percent said they approve of how Bush is handling the crisis. However, the 51-percent is down from 82 percent in an August 20th poll. As for the recent deloyment of additional troops, 38 percent said they approved, down from 51 percent in August.

Egyptian President Hosni Mubarak left Cairo today for a surprise visit to Libya to talk with Moammar Gadhafi about the gulf crisis. A spokesman gave no details of Mubarak's visit to neighboring Libya, which restored diplomatic ties with Egypt two years ago. Mubarak's visit to Libya comes two days after King Hassan of Morocco called for an emergency Arab summit on the gulf crisis.

An immigration official in Hong Kong says that 111 boat people will be freed on bail, 24 hours after authorities defied a judge's order to release them from 18 months of what he ruled was illegal detention. The director of immigration said he would immediately release the Vietnamese on their own recognizance and that the United Nations High Commissioner for Refugees would temporarily house them at a refugee camp.

Radio, television and motion picture veteran Eve Arden died yesterday of heart failure at the age of 82. Arden was best known for her role as the school teacher on ''Our Miss Brooks.'' She won an Emmy in 1953 for best female personality. She also appeared in more than 70 motion pictures, including ''My Reputation'' with Barbara Stanwyck, and ''Mildred Pierce'' with Joan Crawford.

Officials say art works belonging to the estate of Henry Ford the Second and his family brought in a disappointing 48-point-58 Million dollars at Sotheby's North America in New York yesterday. The lower- than-expected amount was seen as a sign of an UNcertain art market. It was hoped that the 23 works would bring in 65 Million dollars. One-third of the works offered for sale were pulled off the auction block because nobody bid even the minimum price.

-30- 3275

#90317u0751 11/13/1990 ~United Press International

LAHORE, PAKISTAN (NOV. 13) UPI - Transport workers reached an agreement with the government Tuesday to end an 8-day-old strike that had brought life in much of the country to a standstill.

Buses, taxis, trucks and oil tankers resumed operating Tuesday evening in the country's most populous province of Punjab following announcement of the settlement.

The drivers began the strike Nov. 6 to protest an Islamic law under which they must pay the equivalent of $7,700 in compensation to the families of anyone they kill in a road accident or risk imprisonment or execution. Drivers in other parts of the country staged a one-day work stoppage Monday in sympathy.

Officials said a settlement to the dispute was reached Tuesday during talks between a government team led by federal Law Minister Fakhre Imam and representatives of transport owners and workers.

They said that under the agreement, half the compensation would be paid by the government while the remainder would be split between the drivers, owners and insurance companies.

On Monday, the Punjab government said it had reached an agreement with transport representatives to end the protest. But transport leaders denied the claim and drivers continued to observe the strike until Tuesday's announcement.

''Our buses began plying again at 5 p.m. today,'' said the manager of one private bus company in the Punjab capital of Lahore.

The strike has paralyzed life in much of the country, with many schools, colleges, government offices, banks and private businesses closed. Gangs enforcing the protest have attacked strike breakers with stones and oil.

Long lines continued in towns and cities in Punjab and in the capital at the few gas stations where gasoline was still available. Some station owners instituted their own rationing systems. Authorities had predicted acute shortages of essential foodstuffs if the strike continued.

The stoppage presented Prime Minister Nawaz Sharif, a former industrialist from Punjab, with his first major challenge since taking office last week. Sharif's right-wing Islamic Democratic Alliance defeated ousted Prime Minister Benazir Bhutto's populist Pakistan People's Party in the Oct. 24 elections.

Analysts say the government could face more unrest if it introduces a massive hike in gasoline prices called for by the International Monetary Fund and necessitated in part by Iraq's invasion of Kuwait.

PAPEETE, TAHITI (NOV. 13) UPI - Marlon Brando's daughter tried to commit suicide for the second time in two weeks, but was saved from death by her mother, family members said Tuesday.

Cheyenne, 20, tried to hang herself at her mother's house in Tahiti, the family said. The woman has been charged with complicity in the May 16 murder of her boyfriend Dag Drollet in Los Angeles. Her half-brother, Christian Brando, has been charged with killing Drollet.

It was the second suicide attempt by Cheyenne in two weeks, following an earlier attempt to end her days by swallowing a massive dose of anti-depressants that plunged her into a 48-hour coma.

The family said Cheyenne had managed to escape from the constant guard of relatives who feared she would again try to take her life. She was discovered Sunday by her mother, the former actress Tarita Teriipain. The young woman was not breathing but heart was beating. She was taken to the hospital, and was said to be out of danger, according to a family spokesman.

Drollet's family believes Cheyenne, who gave birth to her boyfriend's child in June, is the only one who can describe the circumstances leading to the murder.

Prosecutors from the Los Angeles County District Attorney's Office have been trying to subpoena Cheyenne to testify at the trial.

But Marlon Brando says his daughter has given investigators six contradictory versions of the story and argues her testimony would not be credible in any courtroom.

Christian Brando says the shooting was an accident that happened during a fight that started after Cheyenne accused Drollet of beating her up while she was pregnant with Drollet's child.

She returned to Tahiti after telling police the shooting was not an accident. The victim's father filed a complaint against her, resulting in the Tahitian charges of being an accessory to the murder.

She has since given birth to the child.

District Attorney's Office spokesman Mike Botula said prosecutors will continue its attempts to force Cheyenne back to California to testify.

''She could be perfectly healthy by the time she is needed to testify,'' he said. ''We have no choice but to proceed as we have in trying to secure her return to the United States to testify.''

Brando said he wants to be with his daughter, whom he calls ''the most precious thing in the world to me,'' but that he does not dare go to Tahiti because he fears local authorities will arrest him and keep him on the island to testify against his daughter.

Christian Brando's trial, originally scheduled to begin Nov. 5 in Los Angeles, was postponed. A new date is to be set Nov. 19.

NEW YORK (NOV. 13) UPI - Latest metal market prices as quoted Tuesday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 76.50-80.00 c- lb.

Antimony, domestic, refined in alloy, $2.00 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 120.63-123.00 c-lb.

Lead, common, U.S. primary producers 40.00-52.00 c-lb.; U.S. non- primary (secondary) producers 45.00-52.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $210.00-$240.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $4.50-4.75 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $94.00-$96.50 per troy ounce.

Platinum, soft, 99.5 fine, producer - $418.50-$425.00; dealer- approx., $421.00-$450.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $109.00-$111.83 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $105.67 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 295.50 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $7.80-9.59 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.00-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 80.00 c-lb.

#90317u0841 11/13/1990 ~United Press International

WASHINGTON (NOV. 13) UPI - The Supreme Court Tuesday let stand a ruling that in some circumstances, a state can legally consider costs incurred by a union in communicating issues about an election to its members as campaign contributions.

The Wisconsin Education Association Council, a union representing some of the state's teachers, had asked the high court to reject the interpretation, claiming it would restrict the freedom of speech of union members

Under Wisconsin law, some organizations are limited as to how much money they can spend in promoting a particular candidate under campaign finance laws. The teachers' union claims by its very nature it should not fall under those restrictions.

"If these opinions are permitted to stand, the members of every voluntary association in Wisconsin will be unable to converse effectively within their own association about many of the very issues that brought them together in the first place," the union wrote in asking the high court to hear the case.

The dispute began in May 1988 when the WEAC announced it would pay some union

members to mobilize others in support of specific candidates for the state legislature.

The Wisconsin State Elections Board warned the union that such activity might constitute campaign contributions under state law if undertaken after contact with candidates or their representatives.

WEAC then agreed not to meet with candidates, but the elections board proceeded to inform the union that certain expenses incurred for communicating exclusively with other union members would still be deemed contributions under the Wisconsin Campaign Finance Act.

The union claimed its actions were protected in all cases by the First and 14th Amendments from being housed under campaign restrictions.

The board said the protection depended on the content of each political communication. A circuit court dismissed the case without looking at the constitutional issues, and the Wisconsin Court of Appeals deemed the case moot.

The Wisconsin Supreme Court then adopted the view of the board, agreeing that each case would depend on the "nature and scope" of the political communications even within a union.

The high court's refusal to become involved in the case does not grant it precedent, but allows the case in question to stand in Wisconsin.

DALLAS (NOV. 13) UPI - A building block of vitamin A commonly found in many fruits and vegetables has shown promise for treating heart and blood vessel disease, researchers reported Tuesday.

A study of 333 patients with coronary artery disease but who had not suffered heart attacks found those who took beta carotene pills for about five years experienced about half as many heart attacks, strokes and seriously clogged arteries as those who got phony pills.

The study provides the first evidence to suggest vitamins like beta carotene may be useful in treating cardiovascular disease in humans. However, the researchers cautioned their study only looked at people already stricken by coronary artery disease, and did not examine effects of the vitamin building block on healthy people.

"We don't yet know whether beta carotene will really benefit people who don't have coronary artery disease," said Dr. Charles Hennekens of Brigham and Women's Hospital in Boston, co-author of the study presented at an American Heart Association meeting.

The patients studied were drawn from a larger group of 22,000 male doctors involved in the nationwide Physicians' Health Study. They were originally given beta carotene to see if it would protect against cancer.

Researchers theorized beta carotene may slow the progress of coronary artery disease by preventing oxidation of bad cholesterol, a process thought to boost cholesterol's power to damage blood vessels.

The findings come on the heels of another study showing heart patients given large doses of another anti-oxidant, vitamin E, before coronary bypass surgery apparently suffered less oxidation damage to the heart during the operation.

"The message of these reports is that we think it is time for anti-oxidants to come out of the lab and go into clinical trials," Hennekens said. "But right now, they have no relevance to the general public."

Vitamin A is a group of compounds essential to vision, cell growth and immune function. Beta carotene and other natural precursors of vitamin A, called carotenoids, are found in carrots, sweet potatoes, apricots, peaches, and cantaloupes.

Patients in the study received 50 milligrams of beta carotene every other day and reported no side effects. The recommended daily intake of beta carotene for adults is about three to four milligrams, Hennekens said.

Researchers want to continue the study to see if beta carotene can help guard against heart disease in healthy people, and if it can also help ward off malignancies like lung and colon cancer. Results of that work are not expected for three to five years.

The same study originally included an aspirin component, but that was stopped early after results showed a 44 percent reduction in risk of first heart attack among men taking one aspirin every other day. About 90 percent of the participants now take aspirin.

Hennekens said he thinks beta carotene will not have as dramatic effect as aspirin in lowering heart attack risk. "There's nothing extreme going on like there was for aspirin," he said. "But the most plausible benefit is small to moderate, and such a reduction in a common and serious disease such as heart disease or cancer would have an enormous public health benefit."

Aspirin is thought to lower heart attack risk by reducing the chance blood will clot and block narrowed arteries. Since beta carotene appears to work by a different mechanism, Hennekens said the two medications may complement each other. He noted none of the approximately 80 subjects who received both aspirin and beta carotene suffered heart attacks, although if heart attack deaths were spread evenly among the 333 subjects that sub-group should have

experienced seven such deaths.

#90317u0869 11/13/1990 ~United Press International
WASHINGTON (NOV. 13) UPI - The Supreme Court Tuesday set aside the order of a Louisiana court that a mentally ill convicted murderer can be forced to take anti-psychotic drugs so that he is legally sane long enough to be executed.

The court vacated the ruling of the 19th Judicial District Court of Louisiana in the case involving Michael Owen Perry and ordered a new hearing in light of a separate ruling last term that prison officials can force mentally ill inmates to be treated with mind altering drugs for medical - not punitive - reasons.

The high court held last February in a case involving the state of Washington that the 14th Amendment permits a state to treat a prison inmate who has a serious mental illness with anti-psychotic drugs against his will, if the inmate is dangerous to himself or others and the treatment is in the inmate's "medical interest."

The decision appeared to be a victory for Perry and a number of human rights groups that had protested Louisiana's attempt to execute him. But the outcome of the case still hinges on the lower court's interpretation of the Supreme Court's February decision.

The decision to send the case back to the lower court was released Tuesday in a one-sentence order. Justice David Souter was not on the bench when the case was argued Oct. 2, and so took no part in the decision.

Perry, who suffers from schizoaffective disorder, a major psychotic illness, has regular hallucinations and delusions. He had spent time in state mental hospitals prior to the 1983 murder of his mother, father, nephew and two cousins, for which he was convicted.

The American Psychiatric Association is urging that Perry receive medication for treatment of his mental illness, but that his sentence be commuted to life in prison so he can be properly cared for.

#90317u0872 11/13/1990 ~United Press International
PARIS (NOV. 13) UPI - Opposition politicians criticized President Francois Mitterrand's government Tuesday for its handling of a huge demonstration by high school students that degenerated into violence.

Police said 83 people still were being held Tuesday following arrests made during and after the demonstration Monday afternoon and evening, many of them

caught red-handed looting shops on the fringes of the march from the Place de La Bastille to the Pont de L'Alma.

But opposition Rally for the Republic leader Jacques Toubon in the National Assembly accused the government of ''having chosen to let things happen.''

Television footage showed that riot police did not immediately intervene when radical demonstrators converged on the C and A store on the ground floor of the Tour Montparnasse shopping center on the Left Bank and made off with dozens of dresses, suits and coats.

''The incidents of yesterday are in large part the result of instructions given to the forces of order,'' Toubon contended.

Opposition leaders accused the government of wanting to see incidents provoked in order to tarnish the image of the great majority of peaceful demonstrators demanding reforms of the education system, especially fewer classes, more teachers and better school security.

''The president of the republic is playing with public opinion, and more seriously still, with the youngsters,'' said Toubon.

According to figures furnished by independent police unions, 193 police officers were injured Monday and 34 of those were hospitalized, five of them in serious condition.

Interior Minister Pierre Joxe acknowledged there had been ''very serious events'' carried out by ''very aggressive, very violent youths.'' He also conceded authorities intervened 10 minutes after the trouble began at the Tour Montparnasse.

Joxe said, ''Each time that a large number of youths, without experience of such demonstrations gathers together, this creates serious risks.''

The high school students have called for another demonstration Friday in the capital to back their demands. Education Minister Lionel Jospin said Monday night the government would introduce urgent reforms to the education system but did not commit himself to any specific expenditure.

#90317u0882 11/13/1990 ~United Press International

(NOV. 13) UPI - Super Typhoon Mike is headed into the South China Sea after sparing Manila from the fury of 150-mile-an-hour winds. But the most powerful storm in nine years dealt a glancing blow to the Philippines, killing at least 14 people and forcing nearly 240-thousand others to flee their homes. It also trapped 17 workers aboard an offshore oil drilling platform. They are reported safe and helicopters will carry them to land once the skies clear.

Iraq has cut back on food rations allowed for civilians, cutting rice by one-third to two-point-two pounds a month for each person. The report says Iraqi troops will continue receiving rations at twice the levels given to civilians. And it says overall Iraqi food supplies remain adequate despite the U-N imposed sanctions.

This comes as Iraq's deputy premier heads to Morocco where King Hassan has suggested calling an Arab summit to obtain a peaceful settlement to the Persian Gulf crisis. That call has received a cool response from other Arab states.

Singapore has agreed to allow Washington to beef up the U-S military presence in the Asian country. Vice President Quayle and Singapore Prime Minister Lee Kuan Yew signed the agreement in Tokyo today. The new deal will let the U-S Air Force send aircraft to Singapore several times a year on training missions and will increase the duration and number of U-S Navy ships allowed to visit. And the number of U-S troops stationed year-round in Singapore will rise from 22 to almost 100.

Quayle also met with Phillipine President Corazon Aquino. A Quayle spokesman says Aquino strongly endorsed current U-S policy in the Persian Gulf.

Top aides to Soviet President Mikhail Gorbachev deny there is any government crisis within the country but they do report a heated weekend meeting with political rival Boris Yeltsin. Yeltsin is president of the Russian Federation, the largest political entity within the Soviet Union, and he has his own ideas of where the country should go. Yeltsin reportedly wants the Russian parliament to chose the premier, defense minister and finance minister of the umbrella Soviet government.

The countdown continues for the space shuttle Atlantis. The spaceplane is due to lift off Thursday night carrying a military satellite into orbit. However NASA skywatchers say weather may delay blastoff. The ground around Cape Canaveral did shake last night, as an UNmanned Air Force Titan 4 rocket carrying another military satellite thrust into space. There are reports that the rocket's payload is a missile early warning satellite.

Television may be hazardous to your child's health. A new study shows that the more t-v a child watches, the more likely the youngster is to have high levels of potentially artery-clogging cholesterol. Researchers from the University of California-Irvine say their study of more than one-thousand people age 2 to 20 found an ''amazing correlation.'' They speculate that heavy t-v watchers tend to eat more high-calorie snacks, be exposed to more commercials for junk food and exercise less than those spending less time in front of the tube.

#90317u0887 11/13/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (NOV. 13) UPI - Authorities in the nominally independent black homeland of Bophuthatswana hanged a convicted murderer Tuesday, ignoring a national moratorium to carry out the first execution in South Africa in a year despite President Frederik de Klerk's racial reform policy.

Alpheus Sekoboane, 33, was hanged at dawn at the homeland's Rooigrond Central Prison under what the independent Lawyers for Human Rights organization described as ''particularly tragic'' circumstances. He had been sentenced to death for the 1987 murder of his girlfriend.

Authorities in the homeland had no immediate comment, but human rights officials in Pretoria and in the homeland said Sekoboane had been denied the chance to exhaust all legal avenues to spare his life.

LHR National Director Brian Currin said Sekoboane had been unable to file a petition for clemency because he could not afford legal representation. LHR representatives then applied for an urgent stay of execution Monday but it was turned down by the Bophuthatswana supreme court.

The application for a stay was denied on the grounds homeland President Lucas Mangope had already decided not to grant clemency, even though a petition for clemeny had never been filed with him, Currin said.

''Tragically, South Africa has had to endure its first execution in a period of 12 months,'' Currin said.

Bophuthatswana, a constellation of seven tracts of land designated for blacks of the Tswana tribe, is one of four homelands recognized only by South Africa as sovereign under a decades-old apartheid policy that was intended to give blacks limited self-rule.

De Klerk ordered a moratorium on executions as one of his dramatic racial reform announcements on Feb. 2 that also included the unbanning of the African National Congress and the release of Nelson Mandela.

Although his order technically did not apply to the four homelands - once dubbed Pretoria's unruly offspring - only Bophuthatswana refused to follow suit.

The ANC has insisted on an end to executions as a condition to its participation in pending negotiations on a post-apartheid constitution.

In the wake of de Klerk's moratorium, laws have been changed giving judges greater flexibility in imposing the ultimate penalty and South Africa has begun to shed its reputation as one of the world's leading judicial executioners.

Excluding executions in homelands, 53 people were executed in South Africa last year. In 1988, 121 people were executed, including four in the homelands, and a record 181 were executed in 1987, helping to put South Africa third in such executions behind Iraq and Iran.

There are presently 326 prisoners on death row in South Africa and the homelands, including 50 political offenders, the Human Rights Commission said.

Tuesday's execution came a day after Mangope accused the ANC of plotting his assassination and rounded up at least 32 ANC officials in Bophuthatswana. The mass arrests coincided with an ANC-sponsored work boycott in the homeland to protest Mangope's rule.

Unlike the other three homeland leaders, Mangope has refused to negotiate with the ANC and remains firmly opposed to ''reincorporation'' into South Africa - a principal demand of the ANC.

BELFAST, NORTHERN IRELAND (NOV. 13) UPI - A gunman linked to an outlawed Roman Catholic paramilitary group was shot dead by British troops in Northern Ireland early Tuesday, the Royal Ulster Constabulary said.

Alex Patterson, a father of four, died when troops guarding the home of a member of the Ulster Defense Regiment opened fire on a group of gunmen at Victoria Bridge, near Strabane, 68 miles northwest of Belfast.

A police spokesman said Patterson died after the gunfight outside the home of a part-time soldier believed to be on an Irish National Liberation Army death list.

Friends of the family and neighbors have linked Patterson to the outlawed INLA a terrorist organization fighting to free Northern Ireland from British rule.

Media reports said three INLA gunmen had planned to attack the soldier's home when they were ambushed by troops. After a brief gunfight, Patterson's body was recovered, and a machine gun was found next to it, police said.

An undisclosed number of men were arrested shortly after the incident.

#90317u0950 11/13/1990 ~United Press International

ADDIS ABABA, ETHIOPIA (NOV. 13) UPI - Herman Cohen, U.S. assistant secretary of state for African affairs, arrived Tuesday in Ethiopia to pursue talks aimed at avoiding another disastrous famine and ending the east African country's two long-standing civil wars.

Cohen said on arrival his visit was a follow-up to talks with Ethiopian Foreign Minister Yesfaye Dinka in New York in September. These included prospects for peace talks with Eritrean rebels, the re-opening of the key northern port of Massawa and the question of allowing Ethiopia''s Jewish Falasha tribe to emigrate to Israel.

About 4 1/2 million people in the northern provinces of Eritrea and Tigray face starvation in next year, according to government and U.N. estimates, unless logistic blockages caused mainly by war can be overcome.

The chief obstacle at present is the refusal by the Eritrean People's Liberation Front, fighting a 30-year war for provincial independence, to re-open Massawa, 470 miles north of Addis Ababa, to relief food.

The rebels captured the Red Sea port - the only sea access point to the north - in February but did not win the road out of it. It has been closed ever since, despite a unique joint U.S.-Soviet bid to persuade government and rebels to allow humanitarian aid to pass.

Cohen, who said on arrival that ''relations (with Addis Ababa) are now very productive,'' was also due to discuss the departure of thousands of Falasha

tribesmen, centuries-long followers of the Jewish faith, for Israel.

Falasha emigration, interrupted by the Ethiopian government at one stage this year, has been widely reported linked to arms deliveries from Israel, including alleged shipments of lethal cluster bombs dropped on Massawa this summer.

Israel has firmly denied supplying weapons to Ethiopia.

#90317u0957 11/13/1990 ~United Press International

NEW YORK (NOV. 13) UPI - A disappointing auction of art from the collection of the late Henry Ford II cast gloom Tuesday over an upcoming sale boasting a Van Gogh flower study and other important Impressionist and modern paintings.

The Van Gogh, ''Vase With Cornflowers and Poppies,'' will go on the block at Christie's gallery Wednesday, carrying a pre-sale evaluation of $12 million to $16 million, along with a rare ink sketch by the Dutch master, ''Garden of Flowers,'' valued at $5 million to $7 million.

The Van Gogh floral is being sold for the benefit of the Albright- Knox Art Gallery in Buffalo, N.Y., where it has been exhibited since 1962 at the Buffalo Museum of Science and the University at Buffalo Foundation. A similar but more famous Van Gogh study of sunflowers sold in 1987 to a Japanese insurance company for $39.9 millin.

Although the Van Goghs, works of the world's most popular artist, are expected to fetch prices within Christie's evaluations, the results of the Ford auction at Sotheby's gallery Monday put salability of other works in the Christie sale in doubt.

These include a Monet study of waterlilies and major works by Degas, Chagall, Picasso, Giacometti, Miro, Mondrian and Leger.

Sotheby's sold Renoir's ''Cup of Chocolate,'' an elegant 1878 portrait acquired by Ford's father, Edsel, to an unidentified Japanese collector for $18.2 million, but 23 of the 37 Ford paintings and sculptures auctioned failed to find buyers.

The total for the sale was $48.6 million, dramatically below Sotheby's pre-sale estimate of $66 million to $85.8 million.

''It was disappointing,'' said David Nash, curator of fine arts sales at Sotheby's, after the show. ''The works were very desirable, but the market is in a state of change, and it is very difficult to anticipate how much it will change.

''There is no doubt that the events in the Middle East, combined with rather worrying economic predictions, have made people more cautious. Despite all this, there are people who really want to buy paintings at very strong prices and will compete for them.''

The paintings that went unsold received bids below the minimum reserve price decided on by the consignor and gallery experts. The sale was precipitated by a feud over the estate between Ford's widow, Kathleen DuRoss Ford, and his three children.

Proceeds from the auction will be divided among Kathleen, Ford's grandchildren and the U.S. government.

The price for the Renoir was the second highest ever paid for one of his paintings. The highest was $78.1 million, paid by a Japanese industrialist last May at Sotheby's for ''At the Moulin de la Gallette,'' a large dance hall scene that many critics consider Renoir's finest work.

The second highest price in the sale was $7.2 million by an unidentified bidder for Paul Cezanne's ''Le Jas de Bouffan.''

One of the major paintings that did not sell was a portrait of Amadeo Modigliani of American artist Morgan Russell, founder of the Synchronist movement. It carried an evaluation of $8 million to $10 million.

Nash said he believes the art market is seeking a new level. Dealers are waiting to see where the market bottoms out and may be worried about selling inventory before buying more. Even the bidding by Japanese was more sluggish than he expected, Nash said.

''This is a good time to have cash in hand,'' Nash said.

#90317u0969 11/13/1990 ~United Press International

TALLAHASSEE, FL (NOV. 13) UPI - The makers of Koala Springs fruit-flavored mineral water voluntarily recalled the drink Tuesday after Florida health officials found up to 18 times the acceptable level of the cancer-causing substance benzene.

Koala Springs International said it would pull the product from supermarket shelves nationwide and return the bottles to its distribution warehouses. The company scheduled a news conference for 1 p.m. EST at its headquarters in Fremont, Calif., to announce details.

A chemist for the Florida Department of Health and Rehabilitative Services said benzene had been found in all four flavors - lemon-lime, orange, apple, and passion fruit - and in bottles purchased at various locations.

"Everything we have tested has shown contamination with benzene," said HRS chemist Luis Benavides. "We have found 18 parts per billion. Benzene is a carcinogen. There should not be any."

Health officials have set one part per billion as the maximum allowable level in water. Benavides said the drink could pose a health threat "if someone were to drink this continuously."

The contamination was first discovered when a bottle of Koala Springs purchased at a Fort Lauderdale Publix store was subjected to random sampling Thursday. "We routinely sample food from the shelves," Benavides said.

When it showed benzene was present, HRS workers tested other bottles and found similar benzene concentrations then notified the manufacturer, Benavides said.

Denis Weil, Koala's marketing director, acknowledged the product exceeded Florida's standards for products classified as a "pure water" but said it posed no health risk. He said the state's standards for trace minerals in "pure water" are unusually strict and that the drink should have been judged differently.

"We are a mineral water with fruit juice. Anytime you add fruit juice, there's a chance of having materials that may not allow you to be in compliance with water standards," Weil said. "If our product was judged as an agriculture or food-type product, our beverage would have met the requirements," even in Florida, he said.

"Although there is no public health risk, we have voluntarily decided until we determine what is causing the additional contamination, that we will pull our product from all the supermarket shelves."

An HRS inspector mentioned the test results to a Publix official late last week, and Publix ordered its stores to take Koala Springs off the shelves even before the recall was announced, a spokeswoman at the grocery chain's headquarters in Lakeland said.

"We received word there was a possible benzene contamination and they (the manufacturers) may be issuing a recall. At that point, we felt for our customers' safety, we did make the decision to go ahead and pull the product off our shelves until further notice," spokeswoman Jennifer Bush said.

WASHINGTON (NOV. 13) UPI - The National Pork Producers Council wants to see prompt action to resolve a pork export dispute with Europe or it will file a

trade complaint against the European Community, the group said Tuesday.

Pork Producers President Mike Wehler said the group also might seek the use of export subsidies to encourage pork sales and was looking for new markets, such as the Soviet Union, for pork sales.

The European Community announced at the start of this month it was banning imports of U.S. pork on grounds U.S. packing plants did not meet its sanitation standards. Government and meat industry leaders have assailed the ban as a disguised trade barrier. Beef exports face a Dec. 31 ban.

''They have systematically delisted the entire U.S. meat industry from being able to sell'' to EC customers, Wehler said during a telephone news conference.

Members of the Pork Producers board of directors agreed during a meeting Monday to press for strong action against Europe, officials said. Wehler said the council would file a Section 301 trade complaint, which opens the door to U.S. retaliation, if a consultation between U.S. and European officials next week did not show results.

''We need indications of further meetings at high levels to resolve this, not a continuation of the consultation process,'' Wehler said.

The Pork Producers have urged trade ambassador Carla Hills to initiate a Section 301 complaint on her own. Agriculture Secretary Clayton Yeutter said last week that U.S. meat inspectors would tour European slaughterhouses to see if they meet U.S. standards.

According to the council, the European ban could cost hog farmers and the meat industry $40 million to $50 million in lost sales and lower prices.

THUNDER BAY, ONTARIO (NOV. 13) UPI - A Wisconsin man who helped convicted

murderer Lawrencia "Bambi" Bembenek escape from prison was ordered deported from Canada Tuesday.

The order was issued at an immigration hearing for Dominic Gugliatto, 35, of Milwaukee, the fiance of Bembenek, 32. Canadian officials are trying to expel both from the country. A deportation hearing for Bembenek will be held next Thursday.

Bembenek escaped July 15 from the Taycheedah Correctional Institution for women near Fond du Lac, Wis. She and Gugliatto were captured in Thunder Bay Oct. 17 after being spotted by a person who had seen their story on the television show "America's Most Wanted."

Bembenek was convicted of the 1981 slaying of Christine Schultz of Milwaukee. The victim was the ex-wife of Bembenek's husband at the time, Elfred Schultz, who has since divorced her.

A groundswell of sympathy for Bembenek grew up in the area and she became something of a folk hero, with some fans sporting bumper stickers calling for her release from jail.

Steve Csik, the Canadian immigration case presenting officer, said Gugliatto was ordered deported because he was working illegally in Canada and had "ceased to be a visitor in Canada." Gugliatto's lawyer can appeal to Canada's Federal Court within 72 hours.

Csik said he expected Gugliatto would be taken to Minnesota and handed over to officials there. He said he did not know how U.S. officials would handle the transfer of Gugliatto back to Wisconsin.

(NOV. 13) UPI - Republican Senator Richard Lugar of Indiana is urging President Bush to call Congress back to Washington to debate the growing U-S involement in Operation Desert Shield. Lugar says that ever since President Bush sent additional troops to the Saudi desert, there has been what Lugar calls ''an UNraveling of support around the country'' because of confusion about Washington's position. Lugar declined to call the vote he's seeking a declaration of war, but says it should have the same effect of showing an organized U-S resolve.

In a possible about-face, Iraq today sent envoys to Morocco and Libya to talk about setting up an Arab summit to discuss the Persian Gulf crisis. And Egypt's President Hosni Mubarak headed for Libya to sound out whether a summit may be possible.

In Texas, the wives of several Americans held hostage in Iraq say they've joined a newly formed national organization opposed to the massive U-S troop buildup in the Middle East. one of the women, Donnita Cole of Odessa, is making plans to accept Iraq's invitation to visit the captives.

Makers of a flavored mineral water are re-calling the product because of benzene contamination. Koala Springs International of Fremont, California, will hold a news conference later today to discuss the re- call. Tests by health officials in Florida found the carcinogenic substance in the water.

The Supreme Court today let stand a decision giving South Carolina death-row inmate Horace Butler a new trial. A lower court ruled Butler's constitutional rights against being compelled to testify against himself were violated when the judge said the jury might take a refusal to testify as an admission of guilt.

The high court also chose NOT to become involved in a case about what happens when a company that releases hazardous waste into the environment later goes out of business. The court in effect decided that state law, NOT federal law, controls what will happen to a Minnesota company asked to help pay for the cleanup.

Israeli authorities are holding a 17-year-old Jordian accused of slipping over the border today and killing an Israeli solder. The youth was overpowered by troops who arrived at the army outpost minutes later. And two off-duty policemen escaped serious injury today when attacked by an Arab in Jerusalem.

Providence, Rhode Island, officials meet later today to decide if former mayor Vincent Cianci was returned to the job by voters. He has a felony conviction for assaulting his wife's alleged lover and opponents claim state law requires a three-year wait before he can run again.

Police in Glen Rock, Pennsylvania, doN'T know if a member of a church choir from the Soviet Union is missing... or has defected to the United States. The choir of the Moscow Church of Evangelical-Baptists leaves for home tomorrow without the musician. He hasN'T been seen since a concert on Sunday.

PRAGUE, CZECHOSLOVAKIA (NOV. 13) UPI - Czechoslovakia, beset with separatist sentiment, is discussing a plan that would divide the nation into five republics, a senior official close to President Vaclav Havel said Tuesday.

The country presently consists of two republics. In an interview with United Press International, the senior official, who spoke on condition of anonymity, said a five-republic idea is gathering favor in federal government circles as Slovak nationalists seeking nearly total autonomy for their republic threaten the survival of Czechoslovakia as a federal state.

The Czech, Slovak, and federal premiers and other top politicians met in Prague Tuesday to attempt to hammer out a new compromise on autonomy that would avoid a crisis in the federal government.

None of them could be reached for comment on the five-republic proposition Tuesday.

A draft compromise reached by the three premiers a week ago was rejected by the federal government, whose ministers said it gave away too much power, especially in the areas of taxation and economic powers.

Czechoslovakia is a hybrid state, composed of 5.4 million Slovaks and 10.3 million Czechs who were thrown together with German, Hungarian, Polish and Ukrainian minorities after the fall of the Austro-Hungarian empire in 1918.

Under the plan, the five republics would be Bohemia, Moravia, and Silesia in the Czech lands, and Eastern and Western Slovakia.

Critics say Slovakia is causing problems with its excessive demands for autonomy. The five-republic plan is seen as a way to both satisfy Slovak nationalists and yet keep Czechs and Slovaks together in a functioning federal republic.

''Two republics don't make a workable federation, but five do. Frankly, there are scenarios out there that could break up the federation, so we must do something,'' the senior official said.

The official also said Czech Premier Petr Pithart had helped to push the situation to a crisis by his extreme views.

''Pithart very honorably tried to forge an extremist line of policy to balance the Slovaks,'' the source said. ''It was a mistake, but he is in too deep to pull back.''

Tuesday, government spokesman Zbynek Fiala said the premier's meeting was proceeding well.

Monday night, Prime Minister Marian Calfa, in a speech on national television, warned that Czechoslovakia could not function properly if the federal government yielded too much power to the two republics.

He compared the federation to a human body.

''Both kidneys work independently of one another, and each kidney can function independently. But the heart cannot be divided,'' he said.

''If we divide the brain in two, we can have only a human being who is very dull and incapable of normal living. This is the same with the state.''

#90317u1037 11/13/1990 ~United Press International

DETROIT (NOV. 13) UPI - General Motors Corp. confirmed Tuesday it has ended contracts with six health maintenance organizations and blocked 20 others from enrolling more workers in an attempt to curb soaring health care costs.

This is the first time the giant automaker has taken such action, said Baech Hall, GM's director of health care plans, adding that GM is ''sending a message'' to those organizations that it is not happy with their performance.

The affected health insurers provide medical care for about 12,600 of 140,000 GM households. About 3,100 hourly and salaried workers were covered by six

HMOs that were either terminated by GM or allowed their contracts to lapse rather than meet GM's demands.

HMOs are health insurers that offer prepaid medical services to workers who must visit doctors and clinics that are part of the HMO's plan. That allows HMOs to charge lower rates than traditional insurers, which let employees choose their own doctors. But in recent years, HMO insurance premiums have risen sharply.

Last year, GM's health care cost per worker was $1,530, up from about $1,000 in 1986. GM's total health care costs now total about $3 billion, and add over $600 to the cost of each new vehicle it builds.

GM and the United Auto Workers union recently formed a joint effort to find ways to reduce health care costs, including endorsing ''national policy solutions'' - something which UAW President Owen Bieber has made repeated calls for.

Earlier this year, Chrysler Corp. suggested that it, GM and Ford Motor Co. form a large consortium to pressure health care companies into lowering their premiums. But GM and Ford rejected the proposal.

The nation's Big Three automakers expect health care costs to rise about 12 percent a year, or nearly twice the current rate of inflation.

#90317u1041 11/13/1990 ~United Press International

ROME (NOV. 13) UPI - Ing. C. Olivetti and Co., the Italian computer maker, plans to lay off 7,000 workers because of a turndown in the communications industry in Western countries, Minister of Labor Carlo Donat Cattin said Tuesday

Donat Cattin said the company headed by Carlo De Benedetti would fire 4,000 workers in Italy and 3,000 from its installations abroad, starting in the first three months of 1991.

The Labor Minister made his prediction in an address to a conference of European industrialists in Rome.

He said Olivetti would announce the lay-offs later Tuesday from its headquarters at Ivrea, near Turin in northern Italy.

The Olivetti company said there would be a meeting with labor union leaders late Tuesday to discuss the company's ''strategic plan'', but refused to make any predictions on the outcome.

Donat Cattin is currently involved in negotiations with three metalworkers'

unions for renewal of their work contracts, which expired more than six months ago. Last Friday 250,000 metalworkers from all over Italy marched through Rome to press their claims.

#90317u1049 11/13/1990 ~United Press International

MOSCOW (NOV. 13) UPI - President Mikhail Gorbachev dispatched two senior diplomats to the Middle East on Tuesday to sound out Arab leaders on the chances of holding an Arab summit to avert war in the Persian Gulf.

The presidential mission coincided with Iraq's dispatch of envoys to Morocco and Libya, and Egyptian President Hosni Mubarak's trip to Libya to assess the possibility of persuading Iraq to leave Kuwait, which it has occupied since Aug. 2.

Izvestia, the official government newspaper, said that Alexander Belonogov and Vladimir Petrovsky, both deputy foreign ministers, left for several Arab capitals.

Belonogov, former Soviet ambassador to the United Nations, will visit Yemen, Egypt, Saudi Arabia and the United Arab Emirates while Petrovsky will go to Morocco and Tunisia, Libya and Algeria, Izvestia said.

Petrovsky's itinerary was to include meetings with leaders of the Palestine Liberation Organization, the newspaper said.

''The envoys are not planning to visit Iraq during the tour,'' it said.

Although the Soviet Union has lined up with the United Nations in imposing sanctions and condemning the Iraqi aggression, the key question of the use of military force against Baghdad has not been tested at the world body.

In Moscow last Friday, Soviet Foreign Minister Eduard Shevardnadze gave qualified approval to the use of force by conceding that it ''may become necessary'' to resort to arms to force Iraq to quit Kuwait.

The Soviet mission by Belonogov and Petrovsky was the second high- profile Kremlin diplomatic thrust into the Middle East in the past month.

Last month, Yevgeny Primakov, a Middle East expert and a member of Gorbachev's presidential council, twice met Iraqi President Saddam Hussein in a Kremlin shuttle that also took Primakov to other Arab states.

The Soviets retain close ties in the Arab world because of their past arming of Iraq in its war against Iran, their longtime backing of the Palestine Liberation Organization and even their ties with the area's pariah, Libya's Moammar Gadhafi.

But Gorbachev has openly called the gulf confrontation the first post-Cold War crisis and stressed that diplomacy, not military action, must be given full rein before force is used.

The Soviet Union has moved toward partnership with the United States during the conflict, with Secretary of State James Baker twice issuing policy statements on Iraq while in Moscow.

Under the ''new political thinking'' of Gorbachev and Shevardnadze, the Soviet Union has based its ties in the Middle East on diplomacy instead of military bullying and obstruction at the United Nations as in the past.

#90317u1067 11/13/1990 ~United Press International

BONN (NOV. 13) UPI - The government plans to cut spending, raise the public debt and reshuffle funds in next year's budget to pay for the rising costs of integrating the former East German state into the German economy, government sources said Tuesday.

Presenting the basic outline for the 1991 budget, Finance Minister Theo Waigel also reportedly told leaders of the government coalition parties that he expected Germany's gross national product to grow by 4 percent to 4.5 percent this year and by 3.5 percent in 1991.

The government's cabinet is expected to approve the budget outline Wednesday.

Chancellor Helmut Kohl's conservative-led government reiterated this week that taxes will not be increased to pay for the costs of rebuilding the shattered eastern German economy.

Sources close to budget talks held Tuesday said the government intends to cut public spending by $20 billion, borrow another $47 billion and shift money allocated for certain subsidies to cover other costs.

Since German economic and monetary union took effect July 1, eastern Germany has suffered skyrocketing unemployment, sinking productivity and general stagnation.

The government already has supplemented this year's budget three times, bringing it up to $260 billion with a record $44 billion in new government debt. Both figures are records.

In a move partly seen as a warning to the government to curb borrowing, the Bundesbank, the powerful central bank, recently raised the Lombard rate, a key German lending rate, half a percentage point.

With new federal borrowing seen coming in at $47 billion next year, the overall public-sector deficit, which includes borrowing by the 16 federal states and municipal governments, is expected to total between $93 billion and $100 billion.

At Tuesday's meeting, Kohl's Christian Democratic Union agreed with the Christian Social Union and the Free Democratic Party that next year's public debt should not exceed 5 percent of GNP.

#90317u1077 11/13/1990 ~United Press International

TORONTO (NOV. 13) UPI - Bayer AG will center its North American rubber business in Canada, the German-based international chemicals and health care company said Tuesday.

Bayer earlier this year acquired the Polysar Rubber Division of Nova Corporation of Alberta for $1.06 billion. The division, renamed Polysar Rubber Corp., is now part of Bayer's international rubber business group.

Polysar will be headquartered in Toronto with its main production and research facilities located in Sarnia, Ontario.

Global solid rubber capacities of Bayer and Polysar will add up to 836,000 tons a year.

Hermann J. Strenger, chairman of Bayer's board of management, said Polysar and Bayer were a perfect fit. He said Bayer is set to double its European market share, and make gains in North America and Asia.

Strenger said Bayer will invest $100 million in Polysar to further modernize the existing plants over the next three years, including improved process control and environmental protection measures.

''We are sure that it is to the benefit of both companies to join forces and we are convinced that our activities here will benefit Canada as well,''

Strenger said.

Bayer will concentrate all of its North American rubber chemicals, latices, adhesives and polymer additives business at Polysar.

Polysar employs 3,600 people at four plants - one in each Canada and the United States and two in Europe - where synthetic rubber is produced for use in tires, auto parts, footwear and industrial equipment.

Bayer is the fourth largest chemical company in the world with its international headquarters in Leverkusen, Germany. Global sales in 1989 were $23.21 billion.

#90317u1085 11/13/1990 ~United Press International

MADISON, WI (NOV. 13) UPI - A state appeals court on Tuesday ruled unconstitutional a state subsidy program to help low-income Milwaukee children attend private schools. The Wisconsin 4th District Court of Appeals reversed a lower court ruling that found the controversial program constitutionally sound.

The appeals court said the state law providing for the subsidy was a local bill enacted as part of a multi-subject bill and as such violated the Wisconsin Constitution.

The Choice program, pushed by Gov. Tommy Thompson and praised by President Bush, applies only to Milwaukee. The program allowed up to 1,000 low-income students to enroll in private, nonsectarian schools.

For each participating student, $2,500 in state funds were diverted from the Milwaukee Public Schools to the participating private schools under a formula set by the Legislature. The statute was enacted April 27 as part of the biennial budget adjustment bill. The budget adjustment bill covered many other subjects.

"That circumstance raises the issue whether the Parental Choice law was a 'private or local bill' and therefore enacted in violation" of the state constitutional requirement for local or private bills to be considered as separate legislation, the court said.

#90317u1109 11/13/1990 ~United Press International

IRVINE, CALIF (NOV. 13) UPI - Engineering giant Fluor Corp. said Tuesday its Fluor Daniel unit and a Swiss firm, ABB Flakt Alpha, won a joint venture contract worth more than $200 million to build an automotive paint facility in Canada.

Fluor said the 750,000-square-foot plant, to be completed in early 1992, will be built next to Ford's car assembly plant in Oakville, Ontario, 25 miles west of Toronto. The assembly plant, which has an annual capacity of 226,000 vehicles, produces Ford Tempo and Mercury Topaz models.

Fluor said the construction and equipment installation work force was expected to reach 900.

Fluor, of Irvine, Calif., earned $106.2 million on $5.48 billion sales for the first nine months of this year and had a $9.5 billion backlog as of June 30. ABB Flakt Alpha is a unit of Zurich-based Asea Brown Boveri Group.

In a separate announcement, Fluor Daniel said it won a $14 million contract by Netherlands-based Nederlandse Aardolie Maatschappij B.V. for an oil and gas production complex 160 miles offshore on the Dutch Continental Shelf in the North Sea.

The work is expected to be completed late next year and employ 110 workers at its peak.

#90317u1168 11/13/1990 ~United Press International

CAPE CANAVERAL, FL (NOV. 13) UPI - Keeping tabs on threatening weather, engineers breezed through the shuttle Atlantis's blacked-out countdown Tuesday rigging the ship for launch Thursday night to carry a secret spy satellite into orbit.

With work at the launch pad on or ahead of schedule, the shuttle's five-man all-military crew planned to wrap up training at the Johnson Space Center in Houston and fly to the Kennedy Space Center Tuesday evening for final preparations.

While no technical problems were being "worked" at launch pad 39A, Air Force meteorologists predicted a 70 percent chance of rain and high winds Thursday that would force a launch delay. The odds are 50-50 for weather conditions that would permit a Friday launch try.

But if all goes well, Air Force Col. Richard Covey, 44, the commander, Navy Cmdr. Frank Culbertson, 41, the co-pilot, Army Maj. Charles Gemar, 35, Air Force Lt. Col. Carl Meade, 39, and Marine Corps Col. Robert Springer, 48, will blast off on the 37th shuttle mission Thursday night.

Launch originally was scheduled for mid July, but Atlantis was grounded by an elusive hydrogen fuel leak. At least two such leaks grounded the shuttle Columbia in May and September, but both spaceplanes have since been repaired and cleared for flight.

Among the family members who flew to the Kennedy Space Center to witness Atlantis's pyrotechnic launching was Gemar's wife, Charlene, who is expecting the couple's first child. NASA officials said earlier reports that she was close to delivery were unfounded.

As usual with such military missions, Atlantis's exact launch time will not be revealed until nine minutes before liftoff, ostensibly to hamper Soviet efforts to monitor the flight and glean details about the payload's ultimate orbit.

But sources who requested anonymity said takeoff is planned for 6:46 p.m. EST Thursday and that the flight is scheduled to last three days, 23 hours and 55 minutes, resulting in a touchdown at Edwards Air Force Base, Calif., at 3:41 p.m. PST next Monday. The identity of Atlantis's hush-hush satellite payload is classified as well.

Aviation Week & Space Technology magazine reported last month that Covey and

company plan to launch a photo-reconnaissance satellite into an orbit that will allow Defense Department analysts to monitor activities in the Persian Gulf region.

Other space experts disputed that claim, saying Atlantis may be carrying an electronic eavesdropping satellite. Despite the uncertainty, the payload clearly is important and would appear to involve some sort of surveillance of the Persian Gulf.

NASA Administrator Richard Truly said in September that Atlantis was scheduled "to fly a crucial, particularly these days crucial, national security mission."

Atlantis's flight is the last fully classified Air Force shuttle mission left on NASA's launch manifest, a move that reflects a Pentagon shift away from the shuttle in favor of unmanned rockets like the Titan 4 that was successfully launched Monday night from the Cape Canaveral Air Force Station. The move also will save some $80 million a year that was being spent on shuttle security operations.

While two more military shuttle flights are scheduled in 1991, the payloads of both have been declassified. The shuttle Discovery will carry four payload bay experiment packages into space in February to learn more about infrared sensor technology that may prove useful for detecting enemy missile launches or aircraft in flight.

An Air Force spokesman said the payload of a military shuttle flight planned for next summer is an early warning Defense Support Program satellite equipped with a large infrared telescope capable of detecting enemy missile launches. The Titan 4 launched Monday night was widely reported to have carried a "DSP" satellite into orbit.

#90317u1176 11/13/1990 ~United Press International

(NOV. 13) UPI - President Bush has declined immediate comment on a call for Congress to debate a declaration of war in the Persian Gulf. The proposal comes from Indiana Republican Senator Richard Lugar who feels the debate might end what he feels is weakening world support for U-S policy in the gulf. Bush, questioned about the idea at the start of a Cabinet meeting, would only say- quoting now- ''We'll have more on that later.'' Lugar wants Bush to call Congress back from its current recess as a way of showing Iraq's Saddam Hussein that the U-S is serious about his getting out of Kuwait.

The Federal Reserve reports automobile production dropped four-point- five percent last month, making up about one-fourth of the overall decline for industrial production in October. The final reading was down eight-tenths of one percent with declines noted in the output of consumer goods, business equipment and materials. Production of big- ticket items, everything from

appliances to furniture, was also weak during October. And that's taken as another sign of a slowing economy.

Six Americans are among the 17 people who will be airlifted by helicopter from an offshore oil rig once Typhoon Mike pulls farther away from the Philippines. The storm is called the worst to hit the island nation in nine years. At least 14 people died and another 240-thousand were forced from their homes as winds up to 150 miles-an-hour hit parts of the Philippines. The winds eventually dropped to 100 miles-an-hour before Mike headed into the South China Sea.

The Supreme Court today let stand a ruling that in some circumstances, a state can legally consider as campaign contributions those costs incurred by a union in communicating election issues to its members. A teachers' union in Wisconsin had asked the high court to reject the interpretation, claiming it would restrict the freedom of speech of union members because the dollar amount that can be spent is limited.

On another issue, the Supreme Court vacated the order of a Louisiana court that said a mentally ill convicted murderer can be forced to take drugs to make him legally sane long enough to be executed. A new lower court hearing will take place in the case of Michael Perry, convicted of killing his mother, father, nephew and two cousins in 1983. The American Psychiatric Association feels Perry should NOT be executed, but should receive medication for treatment of his mental illness. And it wants his death sentence commuted to life in prison.

Family members say Marlon Brando's daughter tried to commit suicide for the second time in two weeks, but was found by her mother and taken to a hospital. The family says 20-year-old Cheyenne Brando tried to hang herself at her mother's house in Tahiti. The daughter has been charged with complicity in the murder of her boyfriend in Los Angeles. Prosecutors from the Los Angeles County District Attorney's Office have been trying to subpoena Cheyenne to testify at the trial. Her half- brother Christian Brando is charged with murder. A new trial date is to be set on Monday.

There are indications that beta carotene- a building block of vitamin A- may be useful in treating heart and blood vessel disease. Researchers in Boston studied 333 patients with coronary artery disease who had NOT suffered heart attacks. They found that those who took beta carotene pills for about five years experienced about half as many heart attacks, strokes and seriously clogged arteries as those who got phony pills. Beta carotene is found in many common fruits and vegetables... including carrots, sweet potatoes, apricots, peaches and cantaloupes.

#90317u1184 11/13/1990 ~United Press International

WASHINGTON (NOV. 13) UPI - The nation's Roman Catholic bishops considered a

proposed pastoral statement Tuesday urging more money for alcohol and drug treatment programs and criticizing the government's international anti-drug efforts.

"We are concerned that government at all levels exercise its responsibility for the coordination and provision of essential services to combat substance abuse," the proposed statement said.

"We commit ourselves to ongoing advocacy efforts to promote public policy and to enact legislation to ensure access to adequate, affordable and appropriate treatment and services for all those in need," it added.

The statement, "New Slavery, New Freedom," which was to be voted on late Tuesday afternoon, skirted the issue of legalizing drugs and remained silent on the Bush administration's much-touted effort to end drug abuse through harsher enforcement methods. Instead, the bishops's statement urged greater prevention and treatment efforts.

But the statement was critical of the federal government's interdiction efforts to reduce the flow of drugs from other countries, especially from Latin America.

"We share the deep concern of the (Catholic) church in the region over the increasing militarization of the U.S. drug program," the statement said. "Such programs may prove not only ineffective but counterproductive, potentially involving increasing U.S. military commitment within these countries.

"Rather than short-term, often futile, programs of crop eradication, which may do more harm to the peasant farmer and to a fragile environment than to the drug criminals, we favor effective programs of international cooperation for genuine economic development and other strategies to overcome the impact of drugs within both societies," the statement said.

Unlike the federal government's war on drugs, the bishops' statement linked abuse of both drugs and alcohol. It urged local Catholic churches to encourage responsible use of alcohol at all parish functions and activities.

"All parish efforts should flow from the faith-filled acknowledgement of our own sinfulness and from the healing power of the risen Christ mediated through the church community," the statement said. It argued that the whole nation is a casualty of substance abuse and chemical dependency.

"Besides the millions of individuals and families personally ruined by alcohol and drugs, the economic and social costs are immense," noting that besides the multibillion-dollar effort to eliminate illegal drugs and related street violence, about $100 billion is spent on medical treatment for complications arising from untreated alcohol and drug dependency.

The bishops also said the nation must address the root causes of drug abuse, citing a lack of jobs, poverty, inadequate education, a "lack of purpose and meaning" in people's lives, poor housing and powerlessness.

#90317u1205 11/13/1990 ~United Press International

WASHINGTON (NOV. 13) UPI - Yields declined on 13-week and 26-week T-bills Tuesday at the government's weekly auction.

The Treasury Department auctioned $10.08 billion of 13-week bills at an average discount of 7.05 percent, down from 7.07 percent last week and the lowest since Aug. 18, 1988, when the auction yielded 6.94 percent.

The Treasury also sold $10.01 billion of 26-week bills at an average of 7.02 percent, down from 7.05 percent last week and the lowest since July 11, 1988, when the yield stood at 6.99 percent.

The investment rate was 7.28 percent on the 13-week bills at an average price of $9,821.80 per $10,000 face value. The rate on the 26- week bill was 7.38 percent at $9,645.10.

#90317u1206 11/13/1990 ~United Press International

NEW YORK (NOV. 13) UPI - Men who take aspirin after a meal and then drink liquor increase the effects of alcohol, a study reported Tuesday.

Charles Lieber, director of the Bronx Veterans Affairs Medical Center, said researchers working with others from the Alcohol Research and Treatment Center of New York's Mount Sinai School of Medicine studied five healthy men between 30 and 45, who were given breakfast either with or without two aspirin tablets.

An hour later, the men drank small glasses of orange juice containing around an ounce of alcohol. "Our data show that use of aspirin increases blood alcohol concentrations in men who have eaten," Lieber said.

Lieber said although the increase was small, "its implication could prove significant for individuals driving cars, operating machinery or engaging in any activity requiring a high degree of mental or motor coordination."

#90317u1222 11/13/1990 ~United Press International

SAN SALVADOR, EL SALVADOR (NOV. 13) UPI - Rebel attacks left one policeman dead and several police and civilians wounded in sporadic fighting in the capital and the Salvadoran countryside, the armed forces said Tuesday.

An army spokesman said one policeman was killed and three were wounded Monday when rebels of the Farabundo Marti National Liberation Front ambushed a water truck in the town of El Congo, about 40 miles west of the capital.

Rebels bombed electricity transmission towers Monday night in San Salvador, wounding a civilian woman. Part of the capital was blacked out for hours after the bombings, the spokesman said.

Rebels also attacked security guards at a cafe in the town of Jucuapa, some 60 miles east of the capital. Three guards were wounded, the army said.

#90317u1241 11/13/1990 ~United Press International

BUDAPEST, HUNGARY (NOV. 13) UPI - Imre Pozsgay, the one-time Communist reformer and maverick who played a key role in the dismantling of authoritarian rule, said Tuesday he hopes to establish an alternative political party for Hungarians unhappy with the country's new democratic leadership.

Pozsgay made the comment in an interview with United Press International three days after his surprise defection from the Hungarian Socialist Party, which he helped found a year ago after the ruling Communist Party voted itself out of existence.

''The time had become ripe for me to resign,'' said Pozsgay, who had been his party's vice president and leader of its parliamentary caucus. ''I was in the wrong place.'' Pozsgay said he now wants to organize a new national party of the political center center, which he hopes would be able to compete with Hungary's newly formed democratic parties in the next parliamentary elections four years from now.

The new party would be geared for Hungary's emerging middle class, which he said is not adequately represented by the Hungarian Democratic Forum, the senior party in the center-right coalition government, he said.

Pozsgay said there was little hope for a comeback in the near future for the Socialist party, which is tainted by its association with the Communist Party that ruled Hungary for four decades.

''It (Socialists) should have tried to supress its inferiority complex and the avenging spirit which kept cropping up'' in the last election, he said.

Pozsgay, as leader of the Communist Party's radical wing, played a critical role in Hungary's transition from authoritarianism to democracy. He publicly supported the founding of the Democratic Forum in 1987, and in January 1989 he broke from the party line by declaring that the 1956 anti-communist revolt was a ''popular uprising,'' not a counterrevolution.

Pozsgay also participated in round-table talks in the summer of 1989 that paved the way for the multi-party elections in March and April, Hungary's first democratic balloting in 43 years.

#90317u1251 11/13/1990 ~United Press International

HOLLYWOOD (NOV. 13) UPI - A trio of potentially strong box-office performers - ''Rocky V,'' ''Home Alone'' and ''The Rescuers Down Under'' - are slated to open this weekend to kick off the start of the Christmas film season.

MGM/UA's latest - and supposedly the final - in the ''Rocky'' series has been backed by a strong advertising campaign and is sure to draw many of the same fans who have been faithful to the previous quartet of films. The original ''Rocky'' grossed $117.2 million domestically and its successors have taken in $79.2 million, $122.8 million and $127.9 million.

Twentieth Century Fox's ''Home Alone,'' the latest John Hughes comedy, has already received good reviews and performed well during two sneak preview showings Saturday night at 1,109 screens with 85 percent of the theaters reporting full houses.

''Home Alone,'' which involves an 8-year-old accidentally left home while his family goes on vacation, will open in 1,200 theaters Friday, then expand by 400 on Dec. 14.

''The Rescuers Down Under,'' Disney latest animated feature, will include a short Mickey Mouse feature, ''The Prince and the Pauper.'' It will face competition from Warner's animated ''The Nutcracker Prince,'' opening Nov. 21, but analysts believe there is room in the Christmas market for two animated films.

A total of 18 major releases - three more than last year - have been scheduled for the Christmas season, including Fox's ''Predator 2,'' Warner's ''Bonfire of the Vanities'' and ''The Rookie,'' Paramount's ''The Godfather Part III,'' Tri-Star's ''Look Who's Talking Too'' and Universal's ''Kindergarten Cop.''

Should the raft of films perform well, the nation's box-office total could near last year's $5.03 billion record.

Moviegoers had paid more than $4.12 billion as of last weekend at the domestic box-office, Daily Variety reported Tuesday. The total at the same point last year was $4.19 billion, while in 1988, the total was at $3.69 billion.

The top 10 movies of the weekend, led by the horror sequel ''Child's Play 2,'' brought in $35.8 million, up 15 percent from the previous weekend's $31.1 million and 9 percent ahead of the year-ago weekend's $329 million.

For the week, the total domestic box office reached $68 million, off from $75.7 million for the year-ago week. The same week in 1988 drew $63.4 million.

Romance-mystery ''Ghost'' leads all films this year with $186.1 million in 18 weeks for Paramount and has an excellent shot at topping the $200 million mark by year's end. Disney's ''Pretty Woman'' trails with $178.3 million, followed by New Line's ''Teenage Mutant Ninja Turtles'' at $133.1 million.

#90317u1280 11/13/1990 ~United Press International

(NOV. 13) UPI - An Army National Guard sergeant is suing the federal government, charging that his imminent deployment to the Middle East is in violation of the War Powers Act. 26-year-old Michael Ange lives in Boone, North Carolina, where he is studying criminal justice at Appalachian State University. He is assigned to a transportation unit at Fort Lee, Virginia, and is scheduled to ship out this week. But Ange's lawyers went to federal court in Washington today seeking a court order suspending his deployment until a hearing is held on the constitutionality of Operation Desert Shield.

A number of countries are mobilizing diplomats in a bid to arrange an Arab summit on the Persian Gulf. The latest is Soviet President Mikhail Gorbachev who today dispatched two senior envoys to the Middle East to sound out Arab leaders on the chances for an Arab summit. The Soviet move comes as Iraq sent envoys to Morocco and Libya, and Egypt's president traveled to Libya to assess the chances of convincing Iraq to leave Kuwait.

The chief economist for the American Petroleum Institute says gasoline prices have stabilized. A-P-I economist Michael Canes says gasoline demand is down about three percent and oil companies are reluctant to raise prices for fear of further reducing demand. Canes says gas prices will be relatively stable- as long war can be avoided- even though oil companies have NOT yet passed along the full effects of oil price increases resulting from the Persian Gulf crisis.

It is one down... and one to go... for what have to be two of the worst-kept secret military launches from Cape Canaveral this year. The evening skies were lit up last night as an Air Force Titan 4 roared off the ground with what's reported to be a missile early warning satellite in the nose-cone. The launch was called ''picture-perfect.'' And it was viewed by technicians working nearby on Thursday's launch of the space Shuttle Atlantis. It is set to carry a spy satellite into an orbit that reportedly will leave it gazing down on the Persian Gulf.

A Wisconsin appeals court has reversed a lower court ruling that backed a state subsidiary program aimed at helping low-income children in Milwaukee. The state program would have let one-thousand low-income students in the

Milwaukee Public Schools attend private, NON-sectarian schools if the parents approved. The appeals court ruled against the program on a procedural question of whether it was a ''private or local bill'' that had to be considered as separate legislation.

A nominally independent black homeland recognized only by South Africa has showed its independence by hanging a convicted murderer. It is the first execution in South Africa this year. The execution in Bophuthatswana came despite pleas by human rights officials that the man sentenced to death in the 1987 murder of his girl friend had NOT exhausted all legal avenues to get a new trial.

The hanging also comes despite a moratorium on executions ordered by South African President Frederik de Klerk as part of racial reforms he announced in February.

The economic slowdown apparently is hitting the high-end world of art. A Vincent Van Gogh painting will be auctioned at Christie's gallery in New York tomorrow... but collectors are wondering if it will fetch the pre-sale evaluation price of up to 16-Million dollars. Art from the collection of the late Henry Ford the Second was sold at Sotheby's gallery yesterday for lower than expected prices.

-30- 3687

#90317u1302 11/13/1990 ~United Press International

MIAMI (NOV. 13) UPI - Deposed Panamanian strongman Manuel Noriega's high-profile defense team may have to quit or agree to become lesser paid court-appointed attorneys if they don't find a method of payment by the end of the week, a federal judge said Tuesday.

The decision made by U.S. District Judge William Hoeveler following a hearing in Noriega's drug-trafficking case could result in the former general losing his defense team and being assigned public defenders Friday.

All but one of Noriega's attorneys said they could not stay on the case if they were paid by the government, which allows for court-appointed counsel to receive about $75 an hour.

"I can't afford it," lead defense lawyer Frank Rubino said after the hearing. "I can't pay my overhead on $13,000 a month. My overhead is approximately $25,000 a month."

New York lawyer David Lewis also said it would be impossible for him to stay on the case for $75 an hour. Prominent defense lawyers command upwards of $250 an hour for their services. "If you take where the government has us right now it's like a mouse trying to shoot an elephant in the butt with a cannon," Lewis said.

Jon May vowed to stay with the general, regardless of what happens. "I will not give the U.S. government the victory of having me removed," he said.

Noriega, who surrendered to U.S. authorities following the Dec. 20 invasion of Panama, is in federal prison awaiting trial on drug-trafficking charges. His defense team said they would spend time this week trying to find a viable alternative to going on the government's payroll. Rubino said he had a couple of possibilities, but refused to divulge them until Friday's hearing.

The defense for months has been attempting to have some of Noriega's assets unfrozen so they could adequately prepare his defense and be paid in the process. Rubino and the others say they have worked for ten months without pay and the burden of doing that is beginning to affect their financial well being.

One possibility mentioned in court was for the defense to get access to at least part of the $5.8 million that was found at Noriega's home during the invasion.

Assistant U.S. Attorney Michael Sullivan said, however, that the $5.8 million was thought to be Panamanian government money and therefore was never considered to be included in the general's assets.

"The question was asked, 'Is that your money?' and the response was, 'No it is the government of Panama's money,'" Sullivan said. Noriega's other funds remain frozen in overseas bank accounts, which are not under the jurisdiction of the U.S. government.

In other developments, Hoeveler held a private hearing with attorneys in chambers after the public hearing. Lawyers would not reveal what was to be discussed, but Lewis said it involved sensitive information the government wanted from the general. "Essentially, they want more information than they're entitled to," he said.

The proceedings also were to include a hearing on the broadcasting by Cable News Network of tapes of telephone conversations between Noriega and his lawyers.

That matter was cleared up during an emergency hearing Monday when CNN agreed to refrain from airing any more of the tapes. The hearing was called because CNN defied a temporary injunction issued by Hoeveler last week prohibiting the network from airing any of the tapes.

Indictments returned against Noriega in Miami and Tampa in 1988 charge him with marijuana smuggling and providing a drug-trafficking and money laundering sanctuary for South American drug smugglers. If convicted in the Miami indictment, which also named 15 other defendants, Noriega would face a maximum penalty of 145 years in prison and a $1.1 million fine.

#90317u1360 11/13/1990 ~United Press International

LONDON (NOV. 13) UPI - Former Deputy Prime Minister Sir Geoffrey Howe delivered a scathing criticism Tuesday of Margaret Thatcher, accusing the prime minister of risking the future of Britain with her ''nightmare vision'' of the implications of European unity.

Political analysts viewed the speech as devastating for Thatcher and crucial to bolstering the prospects of Michael Heseltine, a former defense secretary who is expected to deliver a leadership challenge Wednesday.

Thatcher resists key tenets of the 12-nation European Community's moves toward political and economic union as poorly thought out and involving the ceding of too many sovereign powers. She has refused to include Britain in plans to have a single European currency by the year 2000.

Howe resigned on Nov. 1, and in keeping with parliamentary tradition, was allowed to explain on the floor without interruption his full reasons for ending his 11-year-old Cabinet career because of fundamental objections over Thatcher's stance on Europe.

The 16-minute address inspired gasps as the normally mild-mannered Howe openly questioned Thatcher, and suggested a leadership challenge was now appropriate.

''The time has come for others to consider their response to the tragic conflict of loyalty with which I myself wrestled for perhaps far too long,'' he said.

Howe disputed Thatcher's view of a united Europe being a centralized superstate, saying this was a ''nightmare image sometimes conjured up by my right honorable friend, who seems sometimes to look out from a continent that is positively teeming with ill-intentioned people, scheming, in her words, to extinguish democracy, to disolve our national identities, to lead us through a back door into a federal Europe.''

''What kind of a vision is that, for our business people who trade there each day, for our financiers who seek to make London the financial capital of Europe, for all of our young people of today?'' he asked.

He warned that the other EC nations would proceed without Britain, which risked isolation.

''The prime minister's perceived attitude towards Europe is running increasingly serious risks for the future of our nation,'' he said. ''It risks miminizing our influence and maximizing our chances of being once again shut out. We have paid heavily in the past for late starts and squandered

opportunities in Europe. We dare not let that happen again.''

Howe said he and former Chancellor of the Exchequer Nigel Lawson had nearly resigned five years ago over Thatcher's refusal to join the exchange rate mechanism. Thatcher only relented in late September, linking pound sterling to the floating basket of European currencies, but Howe said the belated entry was the cause of Britain having its current 15 percent inflation rate.

Howe also challenged Chancellor of the Exchequer John Major's plans to have a European currency gradually introduced, while national currencies remained, inferring in a cricketing analogy that Britain was destined to lose in negotiations with European countries.

#90317u1366 11/13/1990 ~United Press International

CHICAGO (NOV. 13) UPI - Sharp losses in soybean oil futures carried over to the soybean pit Tuesday on the Chicago Board of Trade.

Closing prices were sharply lower throughout the soy complex, and grain futures were moderately lower.

Trading was slow in soybeans until about midday when professional and commission house selling triggered an increase in activity. Several contract lows were established in soybeans, with January bottoming out at $5.75 per bushel.

Contract lows also were set in soybean oil which fell to its lowest level since early this year, while soymeal prices declined on profit-taking and sluggish trading overseas.

Corn futures were fractionally lower at the final bell in sympathy with the collapse in soybean prices. There was underlying support from light country movement and rumors the Soviet Union had bought up to 300,000 tons of corn. Egypt and Spain are expected to be in the market later this week for 500,000 tons of corn.

Wheat was lower across the board in quiet trading.

At the close, corn was off 1/2 to 1, soybeans down 4 1/2 to 10 3/4, wheat off 1/2 to 3 and oats down 2 1/4 to 3 1/4.

#90317u1372 11/13/1990 ~United Press International

(NOV. 13) UPI - White House spokesman Marlin Fitzwater says there is NO need for Congress to re-convene to talk about the Iraqi invasion of Kuwait. Republican Senator Richard Lugar is urging that President Bush call lawmakers

back to Washington to talk about a possible declaration of war. But Fitzwater says any such declaration is- IN HIS WORDS- ''UNnecessary at this point. There is NO war.''

Lawyers for Army National Guard Sergeant Michael Ange are seeking a court order to prevent his deployment to the Middle East as part of Operation Desert Shield. Ange, of Boone, North Carolina, claims his scheduled deployment this week violates the War Powers Act because because President Bush has failed to notify Congress that U-S forces are entering hostile territory.

President Bush IS telling Congress that he has extended the legal authority for sanctions imposed against Iran 11 years ago to retaliate for the seizure of hostages at the embassy in Tehran. Recently, the administration has hinted that Iran could improve its U-S ties by helping to free American hostages in Lebanon.

A newspaper in Rome says branches of American universities in Florence and Bologna have received threats of terrorist attacks if U-S forces move against Iraq. The paper quotes UNidentified U-S Embassy sources who say they have asked Italian police to provide extra protection for students.

Czechoslovakia is discussing a plan that would divide the nation's two republics into five. A senior official close to President Vaclav Havel says the idea is gaining popularity as Slovak nationalists who want nearly total autonomy are threatening the survival of Czechoslovakia as a federal state.

Virginia state police have re-captured a convicted cop-killer and escape artist. Earlier this month in Florida, Merle Unger Junior made his eighth prison break in 15 years. Today he was caught after crashing a stolen car along Interstate 81 near Winchester, Virginia. He killed a Maryland officer in 1975.

Texas is reporting some good eonomic news. The state comptroller's office in Austin says the Longhorn State has chalked up its third straight year of economic growth since the oil bust recession of 1986. The figures show record high employment, with the most new jobs in Houston.

The U-S Geological Survey reports a light earthquake hit Charleston, South Carolina today... in the same area as a tremor that toppled the city more than a century ago. There are NO reports of damage or injuries from today's quake, measured at three-point-five on the Richter scale. It was centered just north of Charleston.

BOGOTA, COLOMBIA (NOV. 13) UPI - A cocaine cartel claimed responsibility Tuesday for two kidnappings, bringing to nine the number of people held hostage in an effort to pressure the government for an amnesty and an end of extradition.

The Extraditables, the kidnapping and murder gang linked to the Medellin cocaine cartel, admitted it kidnapped the head of the state film promotion agency and her assistant last week off a Bogota street.

The two former journalists were the latest in a wave of kidnappings that includes that of seven other journalists, two of them from prominent families.

The Extraditables, in a letter to the former mayor of the city of Medellin, Juan Gomez, who has been trying to win release of the journalists, said it also had kidnapped Maruja Pachon and her assistant, Beatriz Villamizar.

The two were snatched ''in response to the tortures and kidnappings carried out recently in Medellin'' by police, said the letter made public by Gomez.

The group has alleged police have carried out kidnappings and tortured suspects. Police deny the allegations.

The Extraditables want a constitutional reform assembly that is to meet next year to prohibit the extradition of suspected criminals to other nations. It also has been pressuring the government for an amnesty.

President Cesar Gaviria has repeatedly refused to negotiate with cocaine traffickers. But he has offered reduced prison sentences and no extradition to those who turn themselves in.

The Extraditables in its letter said ''the offer extended by the government

has been converted into looting, torture, murder and massacres.''

''We have been asking for peace for eight years,'' it said. ''A lot of violence could have been avoided but we cannot remain indifferent waiting for the harsh touch of death at the hands of the police.''

It said the hostages would not be released until the violence by police was halted.

Among the kidnapped are Diana Turbay de Uribe, daughter of former President Cesar Turbay, and Francisco Santos, son of El Tiempo newspaper publisher Hernando Santos.

The government has said a faction of the Medellin cartel is holding the journalists, who also include German correspondent Hero Buss.

WASHINGTON (NOV. 13) UPI - The Food and Drug Administration Tuesday approved the first attempt to use gene therapy to fight cancer, clearing the way for the pioneering experiments to start before year's end.

Dr. Steven Rosenberg of the National Cancer Institute said the FDA action will enable him to try gene therapy "within four to six weeks" on three adults suffering from a deadly type of skin cancer called melanoma. About 25,000 Americans are stricken by melanoma annually, and once the fast-spreading cancer travels beyond the skin it is considered incurable.

"I'm very anxious to get this effort started. It is the first attempt to apply gene therapy to a common type of disease and I think the promise for gene therapy is substantial," Rosenberg said.

"Hopefully, it is the start of a new direction in ways to treat disease, but at the same time we have an immediate chance to impact on patients who have no other hope."

Rosenberg's team plans to insert a gene that codes for a tumor necrosis factor - a substance that has dramamtically shrunk tumors in mice - into special tumor-fighting immune cells removed from cancer patients, multiplied in the test tube and then returned to the patients' bodies.

It is hoped the genetically altered cells will migrate to patients' tumors and produce the tumor-shrinking factor in that area only. Doctors cannot give cancer patients high doses of tumor necrosis factor by traditional means because the substance circulates throughout the body and causes severe side effects.

The intial gene therapy test is designed to look only at the safety of the approach, not its effectiveness. But Rosenberg, who eventually plans to expand his study to 50 melanoma patients, has said he hopes the treatment will be effective.

Patients will first receive an infusion of three billion genetically altered cells - about equal to the amount of fluid it takes to fill a coffee cup. If that dose is well tolerated, patients will receive increasingly higher doses every three weeks for about 3 1/2 months until they reach the goal of 300 billion cells.

Rosenberg said he should be able to determine within one to two months after the regimen ends whether it has helped the patients. But the researcher, who is now working on inserting genes for other anti-cancer substances like interferon and interleukin 2 into the tumor-fighting cells, emphasized: "Whether this approach will work or not, I do not know."

On Sept. 14, another NIH research team headed by Dr. W. French Anderson undertook the first official attempt at gene therapy. Everything went smoothly during the procedure involving a four-year-old girl afflicted by an extremely rare inherited immune disorder. But researchers said they will not know if the treatment is working for at least six months.

Gene therapy has been hotly debated, with critics fearing such work could lead to ethically questionable attempts at genetic engineering. Although both attempts at gene therapy are aimed at treating relatively uncommon diseases, the work could pave the way for a new breed of treatments for a wide variety of illnesses.

Every person has about 100,000 genes that carry the blueprint for everything from eye color to the risk of developing disease. Gene therapy uses crippled viruses to put healthy genes into cells that contain defective genes or insert new genes that code for disease-fighting substances.

Last year, Rosenberg and Anderson inserted genes with no treatment value into the special cancer-fighting cells, called tumor-infilitrating lymphocytes or TILs, to help track where the cells went in a patient's body. The foreign genes produced no ill effects in the patients and survived at least two months in the patients' bloodstream and tumors.

In past experiments using unaltered TILs to treat about 75 patients suffering from lethal melanoma, about 40 percent of patients had their tumors shrink at least 50 percent and about ten percent had tumors completely go away for a while, Rosenberg said. One female patient has been completely free of cancer for more than a year, he said.

#90317u1398 11/13/1990 ~United Press International

NEW YORK (NOV. 13) UPI - Amid tight security, the Egyptian-born man accused of assassinating militant Rabbi Meir Kahane at a Manhattan hotel was whisked from Bellevue Hospital to court Tuesday for a hearing on murder charges.

Some 20 supporters of El-Sayyid Nosair, 34, gathered in Manhattan Criminal Court to await his appearance on charges stemming from the Nov. 5 shooting at the midtown hotel.

The gunman fled the hotel after killing Kahane and was wounded in a shootout on the street with a U.S. Postal Service police officer. Suffering from a bullet wound to the chin, he was admitted to Bellevue Hospital. He was arraigned in his hospital bed last week on charges of murder, attempted murder unlawful imprisonment, criminal possession of a weapon, and defacing a weapon.

Nosair, who was born in Egypt and was employed by New York City as a boiler repairman, was cleared for transport Tuesday from his hospital bed to court for a hearing on a possible indictment in the case. "He is being moved to court," said Vito Turso, spokesman for the city Corrections Department.

Dozens of court officers were stationed in the courtroom and throughout the hallways as reporters and Nosair's supporters, many wearing skull caps and prayer shawls, milled about waiting for the arrival of defense lawyer Michael Warren of Brooklyn. At about noon, the supporters left the courthouse to pray at a nearby mosque on Warren Street.

Nosair, who is married and became a naturalized U.S. citizen in 1989, is accused of killing the radical Israeli who advocated driving all Arabs out of Israel. He is accused of pumping bullets into Kahane during a question-and-answer session at a conference on Zionism.

As the gunman fled the Marriot Marquis East hotel, an audience member, Irving Franklin, 73, tried to stop him and was shot in the leg. The gunman then commandeered a taxi driven by Franklin Garcia, then fled the cab and was wounded in a shootout with Postal Police Officer Carlos Acosta, who was shot in the arm.

#90317u1400 11/13/1990 ~United Press International

PASADENA, CA (NOV. 13) UPI - The world's fastest and most powerful computer, a custom-designed machine capable of 32 billion operations per second, will be housed at Caltech next spring, it was announced Tuesday.

Caltech, as the head of a consortium of 14 U.S. research institutions, said the computer, designed in a research project between Caltech and by Intel Corp., is known as the Touchstone Delta System.

The Concurrent Supercomputing Consortium plans to use the computer for a variety of projects, including modeling global climate changes and chemical reactions, visualization of data from spacecraft, and military research.

"The types of computational problems being tackled by consortium members led us to a unanimous decision," said Paul Messina, executive director of the consortium. "We needed more computing power than anyone has ever harnessed."

Specific projects could include better defining key environmental issues, such as deforestation, the greenhouse effect from carbon dioxide build-up and ozone layer depletion and the modeling of molecular processes in natural and contaminated systems to better understand the behavior of contaminants in the environment.

Thomas A. Prince, chairman of the policy board that will manage the computer, said, "This level of power gives us the ability to investigate some of today's most intriguing scientific questions."

The new machine, due to begin operations this spring at the Caltech campus in Pasadena, will use parallel processing, which links together high-speed computer chips through a communications network.

High-speed computers are key to the development of major research projects because they allow scientists to consider billions of pieces of data that may change from second to second.

The deal is a major triumph for Intel, which has been trying to make a name for itself in high-performance computers, an area dominated by other companies such as Cray Research Inc.

The basic research at Caltech and the development of the prototype systems at Intel, based in Santa Clara, Calif., were funded through the Defense Advanced Research Projects Agency.

Some of the other institutions involved in the consortium are NASA, the National Science Foundation, Lawrence Livermore National Laboratory, and Purdue University.

#90317u1407 11/13/1990 ~United Press International

WASHINGTON (NOV. 13) UPI - Senators are mounting a bipartisan call for a special session of Congress to debate U.S. involvement in the Persian Gulf, but the White House rejected as unnecessary a call by Sen. Richard Lugar, R-Ind., for what would amount to a declaration of war against Iraq.

Lugar, the No. 2 ranking Republican member of the Senate Foreign Relations Committee, contended there has been an erosion of support for U.S. policy in

the Persian Gulf because the U.S. position had not been clearly articulated.

Lugar declined to call the congressional vote he is seeking a declaration of war but said it should have the same effect. "It occurs to me what we really want is an authorization for the president to act. Other members of Congress may want to name it something else," Lugar told reporters.

But pressed again as to whether his desire was, in effect, a declaration of war, Lugar said, "That's correct. One outcome of this may be war. I think the best possibilities for peace come from certainty (and) clarity at this point of what we are doing as opposed to mistakes, miscalculation, stumbling into conflict - declared or undeclared, authorized or unauthorized - down the trail."

Lugar said a vote would show the world that Congress and the White House are of one mind for Iraqi President Saddam Hussein to withdraw from Kuwait.

"Our position is that this (a declaration of war) is unnecessary at this point. There is no war. We want to do everything to avoid it," White House press secretary Marlin Fitzwater said.

"We want consultations with Congress. We continue to rely on the economic sanctions and military pressure for convincing Saddam Hussein to leave Kuwait " Fitzwater said.

But Fitzwater said Lugar's viewpoint assumes military action. "It supposes a war we hope does not occur. We are working for the implementation of the sanctions. We want to resolve this matter peacefully. So the question he (Lugar) raises on a declaration of war is hypothetical at this point," Fitzwater said.

Senate Republican leader Robert Dole met with Bush at the White House and urged him to call a special session before the end of the year to hold a discussion and stop the free-lance criticism, according to a spokesman.

Senate Democratic leader George Mitchell, said, "If the president has made a decision to undertake offensive military action ... that would require a meeting of Congress to act ... to accept or reject." The Senate Democratic leader said the Constitution is "clear, implicit and unmistakable" in saying that only Congress can declare war.

Lugar said one of his objectives is to stem a perceived weakening of support around the world for the U.S. gulf policy. A USA Today poll published Tuesday indicated Bush is losing public support. Of 615 Americans interviewed Monday, 51 percent said they approve of how Bush is handling the crisis, down from 82 percent in an Aug. 20 poll. As for the recent deployment of additional troops, 38 percent said they approved, down from 51 percent in August.

Sen. Sam Nunn, D-Ga., on NBC's "Today" program, said Lugar's suggestion for congressional involvement has merit, but said Bush must answer three questions before Congress can make any decision about war.

"Before Congress is going to be able to make a decision, however, the president has to define why Kuwait is vital to our national interest," said Nunn, chairman of the Senate Armed Services Committee.

"He also must define why the embargo is not working in his view ... and he's got to explain to some of us on the defense committee how we're going to be able to sustain that large amount of manpower and still carry out our other missions around the world," the Georgia Democrat said.

Lugar conceded there was a chance, should Congress be called back from its recess, that members would reject any proposal to authorize military action in advance. But he said that "tragic" risk should be taken because "it's better to know that now" rather than have a political confrontation and debate in the middle of a military action.

Lugar's comments follow by a few days the announcement that additional forces are being sent to Saudi Arabia to put the United States in the position of being able to mount an offensive against Saddam if necessary. There are now more than 230,000 U.S. troops in the region and the newest additions are expected to swell the ranks to about 400,000.

#90317u1414 11/13/1990 ~United Press International

WASHINGTON (NOV. 13) UPI - Top Bush Administration trade and agricultural officials said Tuesday the ongoing round of global trade talks are mired in a stalemate over agriculture and warned the negotiations could end in failure.

''I am concerned at where we find ourselves. We have a stalemate as regards to agriculture,'' U.S. Trade Representative Carla Hills told reporters as she prepared to depart on a whirlwind lobbying trip to Bonn, Brussels and Geneva.

''I am prepared to talk and talk and talk,'' Hills said. ''These are difficult times and very difficult negotiations.''

The crucial trade talks, four years in the making, are scheduled to wind up early next month in Brussels, Belgium. But a stalemate over agricultural reform threatens to scuttle other aspects of the negotiations.

Agricultural talks at the Geneva-based General Agreement on Tariffs and Trade broke off over the weekend after negotiators from the United States and 14 other farm-exporting nations found a European Community agricultural offer unacceptable.

The 12-member EC had proposed to reduce agricultural subsidies and supports by 30 percent from 1986 levels. The United States, however, has called for a 75 percent cut in internal price supports and a 90 percent reduction in export subsidies.

Negotiators hope to hammer out an acceptable proposal before the Dec. 3 meeting of trade ministers in Geneva.

''The problem is not time. The problem is political will,'' Hills said. ''Clearly agriculture in Europe is a fortress with the thickest and highest walls you can imagine.''

In a strongly worded speech written for delivery to a London audience, Agriculture Secretary Clayton Yeutter said unless the European Community substantially improves its offer on agricultural reform, world trade talks will end in failure.

If that happens, Yeutter said, trade conflicts are bound to intensify as nations try to protect themselves and their farmers.

''Is this just a scare tactic by the Americans? No, it is a realistic appraisal of where the Uruguay Round now stands,'' Yeutter said. ''What will it take? A much improved EC offer on agriculture.

''Without substantial - much beyond the present EC proposition - ag reform, there will be no GATT agreement.''

Yeutter and Hills both reiterated the U.S. position that no agreement is better than a bad agreement.

In his remarks, prepared for delivery to the Royal Institute of International Affairs, Yeutter faulted the EC's proposal as a ''self- centered and timid approach'' to trade reform that failed to comprehend the mood of other exporting nations.

''We will not, we cannot, stand idly by as our farmers lose international markets and their share in global prosperity because of unfair barriers to trade and indefensible internal supports,'' Yeutter said.

#90317u1417 11/13/1990 ~United Press International

NEW YORK (NOV. 13) UPI - IBM Tuesday added to its line of enhancements for supercomputers with four ''extensions'' that it said resulted from the requirements of a limited number of technical customers.

The computer giant said the developments will include the ability to boost to 24 the number of processors that can work on the same problem at the same time

an operation known as parallel processing.

In addition, a development called Supercomputing Visualization Enhancement allows animation and rapid inspection of large, supercomputer-generated images.

A third enhancement provides large-capacity, high-performance disks matched to the requirements of technical computing, while the fourth development improves communications between large systems and work stations.

''These new extensions aim at the next generation of supercomputing,'' said David Wehrly, director of the high performance/supercomputing systems development laboratory at IBM's data systems division.

''Only a few users can use these capabilities right now. However, the collaboration process, based on real customer environments, will refine and shape our technology so that it supports the application requirements of our supercomputing customers as they evolve over the next two, three, four years.''

Supercomputers are used for scientific research and design and have been taken up in recent years by industries including pharmaceuticals, aerospace and petroleum.

They were formerly defined as simply the fastest processor of the moment, but IBM challenged that definition, saying in a statement that supercomputing has now developed into an environment of interrelated systems and applications composed of high-performance processors, high- speed communications, very fast memories, advanced workstations, and other features.

The industry is driven, IBM said, by major ''grand challenge'' scientific projects and by applications such as fluid dynamics and structural analysis in the design of aircraft and autombiles and seismic analysis for the oil industry.

#90317u1442 11/13/1990 ~United Press International

SEATTLE (NOV. 13) UPI - The U.S. Air Force has withheld $240 million in payments to The Boeing Co. because of problems on a contract to produce an air defense system for Saudi Arabia, according to a defense industry newsletter published Tuesday.

The Air Force also is ''seriously considering'' terminating Boeing's contract, which is three or four years behind schedule, according to the latest issue of Defense Week, published in Washington.

The U.S. government is overseeing the project for the Saudis, a common arrangement when a foreign government does business with a U.S. defense contractor.

Boeing spokesman Don Brannon acknowledged the troubled ''Peace Shield'' program is behind schedule, but said the company is discussing possible solutions with the Air Force.

''I'm not in a position to talk about what those solutions might entail,'' Brannon said. ''But we have made some definite progress and we've turned the corner on the technical problems.''

Brannon said ''the hardware aspect'' of the program is in ''pretty good shape'' but said problems with software were causing delays. He added that software problems are ''endemic'' throughout the defense industry.

Boeing is the prime contractor and has between 400 and 500 employees working on the $1.18 billion project, which also has about half a dozen major subcontractors, Brannon said.

The Boeing program is part of a larger $3.7 billion contract to produce a state-of-the-art defense system for Saudi Arabia, which Brannon said will be ''the most capable in the world'' when it is completed.

Boeing's contract entails building a ground-based network of 17 radar sites, five ''sector'' command centers and one central command headquarters for the Royal Saudi Air Force.

Problems with the system have no bearing on the current Desert Shield operation stemming from Iraq's invasion of Kuwait because the new system was not intended to be fully operational until April 1991.

MONTREAL (NOV. 13) UPI - Quebecor Inc. reported Tuesday third quarter earnings of $8.34 million, or 35 cents a share, up 80 percent from $4.63 million, or 20 cents a share, in the year earlier.

Revenues jumped to $519.2 million from $371.2 million in the third quarter of 1989.

The increases reflect the inclusion of results from last February's acquisition of printing plants from Maxwell Graphics in the United States.

Earnings for the first nine months increased to $56.3 million, or $2.39 a share, up from $15.5 million, or 65 cents a share, in 1989. Revenues increased to $1.48 billion from $1.10 billion in 1989.

Quebecor said increased earnings in its printing and publishing divisions more than offset losses at Mircor Inc., its forest products holding company.

Quebecor is a communications company with interest in printing, publishing and forest products. Quebecor Group Inc. publishes a number of daily newspapers in Canada including Le Journal de Montreal, The Winnipeg Sun and The Sherbrooke Record.

NEW YORK (NOV. 13) UPI - The mayors of 35 major cities wound up a three-day urban summit Tuesday, declaring the "fate of the nation is joined to the fate of its cities."

New York Mayor David Dinkins, who read a three-page statement on behalf of the mayors, called for a new era of cooperation between businesses and city governments to ensure the survival of the nation's urban centers.

With some 20 mayors standing on the podium behind him, Dinkins said their objective is to "reclaim the place of our cities as the center of our civilization (and to) forge new partnerships with business and labor, with our suburban neighbors and with government at all levels."

"Through the taxes our citizens pay, the ideas we offer and the problems we solve, America's cities provide our nation's vision and its opportunity," the mayor told the news confrence at the Sheraton Centre Hotel in midtown, where the meeting was held.

"We seek a fairer balance of resources and responsibilities," he said. The federal government has "burdened" cities with legislation that requires heavy municipal spending.

Dinkins said cities have "absorded the migration caused by the farm crisis, and restructured the economy to cope with the decline of our manufacturing industries."

A joint statement put out by the mayors said they will "convene a national summit meeting with business leaders in 1990 to identify key areas for cooperation" between the public and private sectors.

Other mayors joined in Dinkins' call for a new emphasis on promoting economic growth in the nation's urban centers. "We must focus on the strength of industrial cities and highlight how important they are to America's economy," said Raymond Flynn, mayor of Boston. He called for "competetive self-help proposals" including "tax laws for creating jobs."

Tom Bradley, mayor of Los Angeles, said the cities offer the nation "entertainment, culture, jobs." "Over time the role of the city has been forgotten," he said. "If we don't save our cities, we shall not save our nation."

John Norquist, Milwaukee's mayor, saidm "Cities in other countries in the world are more valued." He said the cities should be given greater consideration in this country because "they are the market place, the culture place, not suburban cultures like McDonald's and other fast food sellers."

New Orleans' Mayor Sidney Barthelmy, said, "There's enough money to fight drugs in the city but we're sending the money to state capitals." He scoffed

at recent claims the war on drugs had been won, declaring, "We haven't won it."

#90317u1562 11/13/1990 ~United Press International
WASHINGTON (NOV. 13) UPI - Iraqi President Saddam Hussein will have to tip his hand this week on how intensive his nuclear weapons ambitions are, administration officials said this week.

On Thursday, the U.N. International Atomic Energy Agency, is scheduled to make its annual inspection of the bombed-out Osirak nuclear reactor, destroyed in an Israeli bombing raid in 1981. In the wreckage of the reactor building are some fuel rods containing about 25 pounds of enriched uranium, enough for a small nuclear weapon.

Each year, Iraq has permitted IAEA inspectors to visit the site to make sure that the fuel rods are still there. They are due to inspect again on Nov. 15.

One official said, "If the inspectors are denied permission to enter, it will be a dramatic event, suggesting that Saddam is accelerating his project to build a nuclear weapon."

One former official, who has had access to intelligence information, said that the various agencies differ about when Saddam will have a nuclear weapon: in one year, two years or five years. But the intelligence assessments are agreed in believing that he is intent on developing his own nuclear weapon capability which would include ballistic missiles to deliver the weapons.

One expert, speaking on the basis of no attribution, said, "There is remarkably wide agreement in the world that Saddam Hussein can't be allowed to remain in control of weapons of destruction."

The official said, "That means we must be involved in a kind of discrimination denying Saddam the kinds of weapons that Israel has - acknowledging that Saddam with nuclear weapons is a scarier proposition than Israel is, even to the Arab world."

The official continued that the way to stop Saddam in the long run is an effective non-proliferation agreement, but that can't come about until there is some real progress in the Arab-Israeli dispute, which could take years.

Therefore, the expert said, "You are left with two alternatives: The Gerald Bull method, or taking Saddam out of power with tanks and planes."

Gerald Bull was the Canadian artillery expert who was killed by six bullets in the back of his neck in Brussels last year. Robbery has been ruled out as a motive, since nearly $20,000 in cash was found on his body and the gun that fired the shots was apparently fitted with a silencer. At the time of his

death, Bull was working on an Iraqi contract for a "super-gun," a huge cannon designed to fire projectiles hundreds of miles.

The expert said, "I assume most people would prefer another method, but that means the use of military power to remove him from power before Iraq becomes a nuclear power."

A recent publication by the Carnegie Endowment for Peace, "Nuclear Ambitions," by Leonard Spector, said, "There is growing consensus, based on strong circumstantial evidence, that the hidden objective behind Iraq's expansion of its nuclear sector in the 1970s was the gradual acquisition of a nuclear weapons capability.

"The capability was presumably intended to advance three primary objectives: To counter Israel's existing, but unacknowledged nuclear arsenal; to advance President Saddam Hussein's claim to Arab leadership; and to hedge against Iran's nuclear potential."

In the closing days of the eight-year war with Iran, Iraq set back the Iranian nuclear project indefinitely by repeatedly bombing the main Iranian nuclear research and power-generating installations.

Some of the circumstantial evidence mentioned in the Carnegie study is new evidence that Iraq has obtained 26 gas centrifuges, which can be used to enrich nuclear fuels to weapons-grade purity. There is new evidence that Iraq was trying to import the kind of special metals required for the centrifuges, suggesting that the Iraqis are planning to start building their own enrichment plant.

A rough rule of thumb is that 1,000 centrifuges, working for one year, can produce enough nuclear material for one bomb.

NEW YORK (NOV. 13) UPI - Sacramento Kings Coach Dick Motta was suspended without pay for one game and fined $500 Tuesday by the NBA for bumping an official.

Motta bumped referee Pete Quinn during Saturday night's 93-88 loss to the New York Knicks. He will sit out Sacramento's Thursday night home game against the San Antonio Spurs.

''Any time a player or coach intentionally bumps an official, it's an automatic suspension,'' said Rod Thorn, the NBA's vice president of operations.

The bumping incident came with 2:13 left in the third period after Sacramento's Lionel Simmons was called for a charging foul. Motta was ejected after arguing with Quinn.

#90317u1589 11/13/1990 ~United Press International

SANTA MONICA, CA (NOV. 13) UPI - The college enrollment rate of young blacks is stagnating, not slipping, as recent reports have suggested, a study has concluded.

The study released Monday by the Rand Corp. also found that if black youths are to regain the rapid and large enrollment strides they made before the mid-1970s, they must have special attention - in early schooling, when they get ready to decide whether to go to college and once they are there.

The study, titled "Trends in Postsecondary Enrollment of Minorities," was aimed at clarifying "seemingly inconsistent" research results about minority college enrollment, its author and Rand researcher Daniel Koretz said.

Some have seen a decline in black enrollment and attribute it to an array of social and economic problems that especially affect young black males. Other surveys and reseach data have failed to detect any such trend. In fact, according to Koretz, "the trend in the total number of black male students of all ages is simply unclear."

The most striking change in college enrollment rates over the past 15 years occurred among white women, the only group that has been enrolling in college at a continuously rising rate.

The study found that black youths, after increasing their numbers rapidly on college campuses in the years prior to the mid-70s, are currently stuck on an "extended, college entrance plateau."

The proportion of all 18- to 24-year-old blacks in college is currently the same - 20 to 22 percent - as it was in the mid-70s, with the rate for men remaining steady and rate for women one or two percentage points higher.

What is discouraging, the study said, is that more blacks are graduating from high school. Despite that, the proportion of young black high school graduates in college has dropped 3 percentage points since the mid-70s.

Several factors apparently contribute to the failure of black high school graduates, though better prepared than in early years, to enroll in college. For one, ethnic differences in academic performance are still quite large, though strides have been made, the study said. Also, not enough attention is being paid to difficulties facing minority students before, often well before, they get ready to enter college.

In addition, not enough information is known about why black high school students chose or chose not to attend college. "What happens to these 'able' minority students?" Koretz asked. "Do they just give up, is college too expensive? We just don't know enough about the decisions these kids are making."

Koretz said more study is needed to determine whether colleges and universities are making the same efforts at minority recruitment that they did prior to 1975, when black enrollment began leveling off.

Also, a rising number of black youths who attend college for a year are leaving before graduation. The attrition problem suggests a "pressing need for additional programs ... to support minority students once they begin their studies in college," the study said.

#90317u1641 11/13/1990 ~United Press International

MOSCOW (NOV. 13) UPI - Gennady Gerasimov, the glib ''voice of glasnost'' who as Foreign Ministry spokesman gave the Soviet government a human face, has been appointed ambassador to a European nation, Tass said Tuesday.

The official news agency said Vitaly Churkin, a close aide to Foreign Minister Eduard Shevardnadze, is slated to replace Gerasimov. The boyish looking Churkin is himself no mean master of the quick comeback.

Asked in May 1986 by a congressional panel in Washington to explain ''in layman's terms'' what went wrong in the Chernoybl disaster, Churkin shot back he would do so ''if you can explain in layman's terms what went wrong with the Shuttle Challenger.''

The delay in naming the country to which Gerasimov was being posted raised speculation whether he was being rewarded and promoted or being removed from the center stage in which he has reveled.

''There will be a change, but we don't know exactly what,'' an aide said for Gerasimov, who was not immediately available for comment.

If the English-speaking Gerasimov ends up as envoy to Great Britain, the transfer could be viewed as a promotion of sorts, but the aide could not confirm Gerasimov would be the envoy to London. Some other shift would have to be interpreted as a demotion of the droll Gerasimov.

Gerasimov has perceptibly chafed recently as Mikhail Gorbachev has chosen two relatively colorless figures, Arkady Maslenikov and Vitaly Ignatenko, as presidential press spokesman, bypassing Gerasimov, whose light-heartedness hides his intense preparation for his briefings.

Asked about Gorbachev's being awarded the Nobel Peace Prize, Gerasimov said acerbically ''Well it certainly wasn't the prize for economics.''

Similarly, Gerasimov sniffed at recent persistent rumors of a pending military coup against Gorbachev.

''If you talk about a military coup d'etat in advance, it's not much of a coup '' he said.

Whatever his diplomatic destination, Gerasimov in five years transformed Foreign Ministry briefings from exercises in stonewalling to forums of imparting information with his strict protocol requiring journalists' to announce their affiliations.

''How's that again?'' Gerasimov asked when a newcomer in the burgeoning Moscow press corps presented himself.

''Village Voice,'' came the reply.

''Welcome, Village Voice,'' Gerasimov said tiredly.

He devoted part of a recent briefing to complimenting the U.S. Defense Department's annual report, ''Soviet Military Power,'' for dropping bellicose assessments of the Kremlin, but said he was ''sending ''

Plucked from the anonymity of Soviet journalism by Gorbachev, Gerasimov shot to the limelight, and he used it to push his true passion: arms control and an end to nuclear weapons.

His briefings over five years saw the Soviet Union move from the Cold War, dating from the World War II Yalta Conference, to partnership with the United States.

Gerasimov, noting the new relationship that would be cemented at the superpower summit in Malta last December, summed up an entire era. ''From Yalta to Malta,'' he announced to reporters.

Tiring of journalists asking whether Soviet tanks would intervene under the ''Brezhnev Doctrine'' to prevent Eastern European nation defections from the Soviet fold, he said those nations were simply following ''the Sinatra Doctrine.''

''They are doing it their way,'' he shrugged.

A globetrotter in heavy demand because of his entertaining and incisive comments, Gerasimov used a recent trip to Utah to assess developments in his homeland.

''You know, there is talk of changing the name of our country,'' he began.

Noting that the Soviets had ordered cigarettes from the Phillip Morris tobacco company, Gerasimov added: ''Maybe it should be called Marlboro Country.''

MIAMI (NOV. 13) UPI - Eastern Airlines flew 1.15 billion revenue passenger miles and had a 55.02 percent load factor in October, the airline said Tuesday.

Eastern's capacity for the month was 2.09 billion available seat miles, and

passenger boardings were 1.60 million.

A revenue passenger mile equals one passenger flown one mile.

Eastern said the October traffic results reflected the traditional seasonal slowdown. However yield per revenue passenger mile was 28 percent higher than in October, 1989 due to an increase in traffic from business flyers. In October 1989 Eastern flew 1.30 billion revenue passenger miles, with capacity of 2.05 billion available seat-miles and a 63.14 percent load factor. Passenger boardings were 1.8 million.

Easten currently operates about 800 daily flights to more than 70 cities.

MIAMI (NOV. 13) UPI - A lawyer for religious leader Yahweh Ben Yahweh said Tuesday his client may be unable to get a fair trial on murder charges in Miami because of extensive media coverage.

At a news conference held about the time Yahweh, 55, arrived at Miami's Metropolitan Correctional Center, lawyer Ellis Rubin said the coverage of his client's indictment and arrest has been biased against the cult leader of black Hebrew Jews.

"Please stop taking what the government says as gospel," Rubin said. "I think the media in this case is trying to do what it can to rid Dade County of Yahweh Ben Yahweh and he has done some good things for this community."

Yahweh, also known as Hulon Mitchell Jr., was arrested at a hotel in New Orleans' French Quarter Nov. 7 on the Miami federal indictment that charges him and 16 others with 18 acts of racketeering including 14 murders, two attempted murders, arson, and extortion.

The arrest of the self-proclaimed son of God came about five weeks after Miami Mayor Xavier Suarez made Oct. 7 Yahweh Ben Yahweh Day for showing people "how to move from poverty to riches." A group of lawyers has asked the mayor to rescind the proclamation.

The suspects allegedly plotted to murder people as a rite of initiation into the ultra secret group, and to eliminate followers who dissented from Mitchell's leadership or the sect's practices. Authorities said Yahweh made his followers bring back body parts from the dead victims to prove they had carried out the murders he had ordered.

At a hearing in New Orleans Friday, Yahweh waived extradition to Miami. He arrived at MCC in south Miami at 2:25 p.m. Tuesday, a prison spokesman said.

Rubin, who has represented the sect during several past brushes with the law, said the indictment stemmed mainly from information volunteered by Robert Rosier, a former Yahweh member known as Nehriah Israel who confessed to four

murders in 1986. Rubin said Israel was, "Singing his head off to save his own life."

He claimed that Rosier had confessed to two other murders that he has not been charged with, and said the Royal Canadian Mounties have 32 fraud warrants against him. He also is wanted by police in St. Louis, New Jersey, North Carolina, and Washington, D.C., Rubin said.

Rubin said Rosier called himself the "Gorilla Pimp" in college. "Now he has a new name," he said. "It's called serial killer. ... Yet this is the government's main witness."

He said Yahweh would plead innocent at his arraignment and had decided that he wanted to be tried in Miami instead of attempting to get a change of venue. Rubin said he would also request that MCC officials not monitor or makes tape recordings of Yahweh's telephone conversations from the prison in fear they would wind up being acquired by the media.

Lawyers in the drug case against deposed Panamanian strongman Manuel Noriega have been fighting in court since last week to keep Cable News Network from broadcasting tapes the network obtained of telephone conversations Noriega's attorneys had with the general from his prison cell.

The Yahwehs, who wear flowing white robes and take the surname Israel, own millions of dollars in real estate and businesses in Dade and Broward counties including a fleet of white vehicles, a convention center, a school, grocery stores, motels, and a recording studio. The Temple of Love in Miami's Liberty City neighborhood is headquarters for the group, which claims to have about 10,000 members nationwide.

CHICAGO (NOV. 13) UPI - Increased military demand for jet fuel and loss of production from a major refinery in Kuwait have caused aviation fuel prices to increase more than crude oil prices, an oil industry economist said Tuesday.

But he said consumers can expect relatively stable gasoline prices in coming months, provided war can be averted in the Persian Gulf.

Michael Canes, the American Petroleum Institute's vice president and chief economist, said the airline industry has borne the brunt of the economic hardships caused by the Persian Gulf crisis.

This much has been illustrated by the financial losses most major carriers recently reported in their quarterly results.

''Jet fuel prices were up more than crude prices at their peak and are still

up more (than crude) even since crude prices have begun to drop,'' Canes told reporters at the industry group's annual meeting.

Canes said demand for jet fuel is up and production capacity down.

''You've lost production of 750,000 barrels a day of sophisticated refining capacity in Kuwait,'' and refineries in Saudi Arabia that produce jet fuel are directing their output toward ''military use,'' Canes said.

''With the military buildup, you've got increased military demand for jet fuel so while September production of jet fuel reached an all-time high ... stronger demand has kept prices high,'' he said.

There is also a seasonal factor in jet fuel demand. He noted jet fuel - kerosenind naa .. bc-api

WASHINGTON (NOV. 13) UPI - Senate Democrats and Republicans re-elected Sen. George Mitchell, D-Maine, and Sen. Robert Dole, R-Kan., as party leaders Tuesday but GOP conservatives ousted the lone liberal in their hierarchy, Sen. John Chafee, R-R.I., by one vote.

Meeting in a morning session, the Democrats elected Mitchell and the other members of the leadership by acclamation for the 102nd Congress that convenes Jan. 3. None of the candidates were opposed.

The Republicans elected Dole and his top deputy, Sen. Alan Simpson, R-Wyo., who ran without opposition. But conservative Sen. Thad Cochran, R-Miss., defeated the incumbent, Chafee, 22-21 for the chairmanship of the GOP Conference. Chafee was the only liberal among the Senate GOP leaders.

The other battles were for chairman of the Republican Policy Committee, left open by the retirement of Sen. William Armstrong, R-Colo., secretary of the conference and chairman of the Republican Senatorial Campaign Committee.

Sen. Don Nickles, R-Okla., and Sen. Pete Domenici, R-N.M., were running for the policy committee chair; Sen. Christopher Bond, R-Mo., and Robert Kasten, R-Wis., were seeking to become Conference secretary and Sens. Mitch McConnell,

R-Ky., and Phil Gramm, R-Texas, were matched in the race for chairmanship of the campaign committee.

The only newcomer to the Democratic leadership was Sen. Wendell Ford, D-Ky., a moderate, border-state senator who was elected assistant leader, a post he was denied two years ago.

Ford was elected by acclamation after the incumbent, Sen. Alan Cranston, D-Calif., said he was suffering from cancer of the prostate and would not seek re-election to the assistant leader post or re-election to the Senate in 1992.

Sen. David Pryor, D-Ark., explored the possibility of running against Ford. But he dropped the idea after a series of telephone calls convinced him that the 66-year-old Kentucky veteran had the votes locked up. Instead, Pryor reclaimed his post as party secretary, the third-ranked post in the leadership.

Ford, considered more to the center than Mitchell, said after his election, "My view is, and has been, that my leader (Mitchell) is the spokesman. I will be a member of the team and support him.

Others re-elected were Sen. Thomas Daschle, D-S.D., co-chairman with Mitchell of the policy committee; Sen. Alan Dixon, D-Ill., assistant deputy whip; and Sen. Daniel Inouye, D-Hawaii, chairman of the Steering Committee that makes committee assignments. Sen. Robert Byrd, D-W.Va., remains as president pro tem.

The Democrats ratified Mitchell's choice of Sen. Charles Robb, D-Va., as chairman of the Democratic Senatorial Campaign Committee for a two-year term. Twenty Democratic seats, compared to 14 for the Republicans, will be at stake in 1992, which Robb called a "significant challenge."

LA PAZ, Bolivia (NOV. 13) UPI - Bolivian anti-drug police and U.S. Drug Enforcement Agency advisers said they were closing a circle of agents Tuesday in a sweep operation of one of Bolivia's most active cocaine- producing areas.

During the first 11 days of the operation that spread over 360 square miles in the Chapare region of central Bolivia, 140 people had been arrested, ''overflowing the jails,'' said Interior Minister Guillermo Capobianco.

The Chapare region is a center for growing coca leaf, the raw material used to make cocaine, and thus attracts buyers from the drug trade who later process the leaves into a white paste.

Evo Morales, leader of the regional peasant farmers association, said the area was ''in a state of seige'' with a curfew and restrictions on motor vehicle and pedestrian traffic. Morales estimated about 300 people had been arrested.

Gen. Lucio Anez, commander of the anti-drug forces, for the first time said he needed the help of the Bolivian army in the fight against drug trafficking, despite the fact that many public analysts and politicians are strongly against the ''militarization'' of the drug fight.

Many Bolivians argue that use of either national troops or U.S. forces to combat narco-traffickers could backfire in violence against the civilian population like the wave of bombings and assasinations in Colombia.

Col. Rogelio Vargas of the anti-drug force said that more than half of the force's 648 agents were working on the Chapare operation, and that ''the ideal would be to have more than 1,000 agents.''

Officials say the operation is one of the largest taken against drug traffickers in Bolivia, one of the worlds leading producers of cocaine.

Another recent anti-drug ''circle'' in Bolivia, also with assistance from the roughly 30 DEA advisers, netted a dozen drug traffickers and a reportedly significant amount of money and equipment, Anez said.

(NOV. 13) UPI - Scali, McCabe, Sloves Inc., the New York advertising agency, Tuesday admitted running over its feet with a misleading Volvo commercial and resigned its $40 million account with the Swedish carmaker.

Scali said the resignation was due to questions regarding the production of the so-called "monster truck" Volvo commercial in Austin, Texas. Last week, the state attorney general accused Volvo of doctoring its own car to survive a crushing by a giant truck while rigging its competitors to fail.

"We did not resign the account over culpability, we resigned because we are ultimately responsible," Chairman Marvin Sloves told United Press International. "We don't want Volvo hurt anymore than it has been."

Volvo, one of Scali's largest accounts, was among the firm's first clients when it opened shop 23 years ago, Sloves said. Scali prepared both television and print ads for Volvo.

Volvo withdrew the monster truck campaign after extras at the filming complained the cars used in the advertisement had been modified. "It was a mutual conclusion that Scali had to take responsibility," said William Hoover, a spokesman for Volvo of North America based in Rockleigh, N.J.

Hoover said a joint investigation showed that "someone in the Scali shop" signed a television-network practices statement that no props, trick photography or unusual production techniques had been used in the making of the commercial.

While admitting his agency's responsibility for the debacle, Scales emphasized "My people never authorized anyone to play around with those cars."

Volvo, the import that sells about 100,000 cars in the United States every year and has built its reputation mainly on safety, reacted to the scandal with profuse apologies to consumers, taking out ads in major newspapers assuring the public that such an incident would never happen again.

The crisis-communications technique seems to be working, Hoover said. "The majority of contacts we've had from the public praise the way we've handled the situation," Hoover said. "Volvo owners have told us 'this is a bad thing and you guys ought to be ashamed of yourself, but if you want me to stand up and say how safe the car is, I will."'

Not everyone is rolling over for the apologies, though. Last week some monster truck drivers lined up wrecked Volvos in the parking lot of Philadelphia's Spectrum arena and drove over them. "I think the public so far has been able to separate the problems with this ad from Volvo as a product," Hoover said.

PROVIDENCE, RI (NOV. 13) UPI - The city Board of Canvassers certified former Mayor Vincent A. "Buddy" Cianci Jr. as mayor-elect Tuesday, despite claims that his felony convictions for assaulting his wife's alleged lover bar him from taking office.

Cianci, whose scandal-ridden first administration led to the conviction of nearly two dozen city officials, was certified by the three-member board at an afternoon hearing. Chairman Laurence K. Flynn said the board did not have the authority to deal with the objections posed by some voters.

Cianci, who ran as an independent, held an insurmountable lead over independent Frederick Lippitt, a former state administration director, and Democrat Andrew Annaldo, a city councilman, after a recount of voting-machine tallies on Friday by the state Board of Elections. Based on the results, state Elections Chairman Joseph DiStefano told the Board of Canvassers to certify Cianci on Tuesday.

DiStefano also revealed that an objection to Cianci taking office had been filed by three city voters, who maintained he cannot legally take office because a five-year probation on two felony convictions for assaulting his wife's reported lover was not completed until April 1989.

The voters cited an amendment to the Rhode Island Constitution passed in 1986 that requires convicted felons to wait three years after finishing their conviction, parole, or probation before taking public office.

Thomas Rossi, a Cianci campaign manager, argued the law did not apply to Cianci because his conviction came more than two years before a Constitutional Convention passed the amendment, which was dubbed "The Buddy Amendment" in reference to Cianci's nickname and his felony convictions.

Cianci, who won the three-way race despite frequent blasts about his criminal past and widespread corruption in his 3 1/2-term administration from 1974-84, also expressed little doubt that he will take office in January.

But a lawyer for the three voters, David N. Cicilline, said the law applies to Cianci retroactively because it is being applied in a non-criminal setting.

Lawyer Frederick Cass, who represents a group of voters who have joined in the challenge to Cianci's election, said he was not surprised by the Board of Canvassers' decision. But he said he still intends to take the issue to the state Board of Elections and, if necessary, bring it before the Rhode Island Supreme Court.

"All the certification does is declare that Vincent Cianci received more votes than any other candidate," Cass said.

ANKARA, Turkey (NOV. 13) UPI - Iraqi President Saddam Hussein executed six army generals who did not want to fight in Kuwait or who otherwise opposed his policies, a semi-official Turkish news agency quoted an Iraqi defector as saying Tuesday.

The defector, an army captain who fled to Turkey on foot in September, told reporters in the eastern Turkish city of Van that morale among the Iraqi troops was low because many of the soldiers did not want to fight fellow Arabs and Moslems in Kuwait.

Anatolain News Agency said 130 Iraq defectors arrived in Turkey over the past two days, bringing the total to at least 200 since the Iraqi invasion of Kuwait Aug. 2.

Earlier reports said 70 army defectors fled to Turkey after the invasion and

were debriefed by the Turkish intelligence organization in a special camp near the Iraq-Turkey border.

Anatolian quoted Iraqi army captain, whose name was withheld, as telling reporters Saddam ordered the execution of six three-star generals in August and September after they indicated they did not wish to fight in Kuwait or because they opposed his policies.

The defector did not name the generals or say how the executions were carried out, but he said 120 other soldiers were also executed for the same reason about the same time.

The Iraqi captain said morale was so low in the Iraqi armed forces that many officers and other ranks were looking for a chance to escape. He said he made his way on foot to Turkey after bribing several officials.

Last week U.S. Central Intellgience Agency chief William Webster was in Turkey where he was reported to have shown interest in the Iraqi defectors.

The Iraqi captain said Kuwait, after the Iraqi invasion, ''was like a slaughter house. Hundreds of civilians were killed by Iraqi soldiers and many women were raped during the invasion.''

Iraq had deployed 100,000 troops along its border with Turkey by the time he fled across the border, he said.

Other defectors also interviewed in Van said they felt they were fighting a meaningless war in Kuwait, and decided to escape to Turkey. Speaking through an Arabic interpreter, the Iraqi soldiers said other defectors fled to Saudi Arabia and Jordan.

''There are many soldiers who would like to lay down their arms and surrender, but they are afraid of Saddam's intelligence agents,'' one Iraqi private said.

The economic sanctions against Iraq were beginning to show their effects inside the country, and bread was rationed among the Iraqi troops, the defectors said.

Turkish officials said there were 30 civilians, including 10 women and seven children among the latest wave of defectors from Iraq.

The fugitives were given medical treatment immediately upon arrival. Most were suffering from malnutrition, fatigue and psychological shock, the officials said.

Their requests for political asylum in Turkey were under consideration, the officials said.

#90317u1811 11/13/1990 ~United Press International

NEW YORK (NOV. 13) UPI - The dollar drifted mostly higher Tuesday in uninspired New York foreign exchange trading as the market awaited any new information with a continued bearish bias against the American currency.

With the Persian Gulf situation momentarily off the boil amid U.S. debate on whether President Bush should take the offensive against Iraq, and no economic news from Washington, currency dealings were quiet, traders said.

The dollar was making a stronger showing against Japan's yen than against the German mark, said Bank of New York foreign exchange manager Robert Ryan. But, he commented, ''We still seem to be in a downward trend.''

Harris Trust & Savings Bank vice president and analyst Earl Johnson confirmed bearish sentiment on the dollar is pervasive, given the widespread assumption that the Federal Reserve is shortly to lower U.S. interest rates.

''Aside from some psychological or technical rally, there's no reason why the dollar can't go to new lows,'' he said. Given all the negatives, he said, only U.S. intervention or jawboning could support the dollar.

Late in the New York session, the dollar was quoted at 1.4780 German marks, up slightly from 1.4770, and at 129.60 Japanese yen, up from 128.50.

Other New York dollar rates: 1.2510 Swiss francs, up from 1.2460; 4.9730 French francs, up from 4.9690; and 1,112 Italian lire, off from 1,114.50.

The British pound moved down to $1.9625 from $1.9655.

In European dealings the dollar closed mostly lower in the face of a surging German mark and on expected lower U.S. interest rates.

''The dollar is holding up better than expected. The market is still waiting for interest rate cuts from the U.S. Federal Reserve either today or Friday,'' said Kit Juckes, a currency analyst with Warburg Securities.

He said the dollar recovered from morning lows against most European units as dealers worried they might be overselling it.

In Frankfurt, the dollar closed lower at 1.4787 German marks vs. 1.4813. But in Zurich it strengthened to 1.2510 Swiss francs vs. 1.2505.

In London, the pound firmed against the dollar to end at $1.9635 vs. $1.9630.

The dollar was lower in Paris and Milan at 4.9720 French francs vs. 4.9750, and at 1,112.40 Italian lire vs. 1,113.95. In Brussels it gained to finish at 30.51 Belgian francs vs. 30.50 the previous day.

In Tokyo earlier, the dollar plunged against the yen as players looked for a cut in U.S. rates and war fears abated. The dollar ended at 128.77 yen, down 1.73 yen from 130.50 yen Friday. Monday the market was closed.

In Zurich, gold closed higher at $383.50 an ounce vs. $381.50. London gold also moved up, to $383.25 an ounce compared with $382.

Silver closed unchanged in Zurich at $4.20 an ounce. But it fell in London, to $4.21 an ounce from $4.25.

Republic National Bank in New York closed cash gold at $385.75 an ounce, up from $381.75 Monday. The New York Commodity Exchange settled contract gold at $386 an ounce, also ahead from $382.30.

Republic closed cash silver at $4.23 an ounce, up from $4.20. Comex silver ended the session at $4.212 an ounce, up from $4.205.

MANAGUA, Nicaragua (NOV. 13) UPI - The government will use force if former Contra rebels continue to block a highway east of Managua, Presidential Minister Antonio Lacayo warned Tuesday.

The former rebels, supported by mayors in Boaco and Chontales provinces, are protesting the government's failure to fulfill its promise of land, housing, tools, bank credit, food and medicine for their resettlement since the rebels laid down their arms in June.

By Tuesday, the former rebels had occupied 100 miles of the road that leads from Managua to the central Atlantic coast region. They are also occupying public buildings in the city of Boaco, 25 miles northeast of Managua, and several churches in Managua itself.

Eighteen mayors from the fifth region, which includes Boaco and Chontales provinces, are supporting the former Contras in their demands. On Sunday talks between the mayors and President Violeta Chamorro were broken off with no agreement to end the roadblocks.

The mayors have included in their demands the dismissal of Lacayo, of Interior Minister Carlos Hurtado and armed forces chief of staff Humberto Ortega.

Lacayo said Tuesday the government could not allow the situation to continue, and that if talks failed ''there will be no other way out but the ... use of force by the police, who until now have maintained a defensive position.''

On Monday, a riot squad charged pro-Contra demonstrators at barricades at the entrance to the city of Boaco. One person reportedly was wounded and others were beaten.

The mayors, who are Chamorro supporters, have charged that the government has not been purged of the influence of the Sandinistas, who lost elections to Chamorro last February and left office in April.

Army chief Humberto Ortega, defense minister when his brother Daniel Ortega was president, resigned his Sandinista party position before the change of government and was maintained by Chamorro at the head of the armed forces.

Boaco Mayor Armando Incer said the problem was ''the large number of Sandinista civilians who are still armed and fire on former Contras when they are working peacefully on their land.''

Following the disarmament of an estimated 20,000 Contras, many reportedly hid their weapons in the hills where they had operated during the eight-year civil war that failed to topple the Sandinista government.

Since the disarmament, the Sandinista Popular Army has been reduced from more than 90,000 to less than 30,000 active members, although the Sandinistas reportedly distributed weapons during the transition period.

#90317u1865 11/13/1990 ~United Press International

NEW YORK (NOV. 13) UPI - Manhattan Borough President Ruth Messinger refused Tuesday to take a question from a Daily News reporter hours after several city and state officials pledged to support striking unions in their bitter dispute with management.

"I don't talk to scab newspapers," Messinger said after persistent attempts by a News management employee acting as a reporter during the strike to ask a question at a news conference at City Hall.

Earlier Tuesday, several politicans met with officials from the Allied Printing Trades Council, the umbrella group for the nine unions who struck the News Oct. 25, in support of the boycott of the 71-year-old tabloid.

Some even agreed not to talk to reporters working for the strikebound paper. "I will not entertain any question from Daily News folks," said Assemblyman Frank Barbaro, D-Brooklyn. "I would venture to say that is the consensus."

Barbaro, head of the Assembly's Labor Committee, said he and other legislators were considering assigning "campaign workers to visit newstand owners and urge them not to accept the Daily News."

Barbaro also said he has scheduled hearings in Manhattan for Nov. 26 to determine whether replacement workers and security guards hired by News management are creating a threat to public safety. News executives were immediately unavailable for comment Tuesday.

Barbaro said he was joined by several other city and state officials, including Attorney General Robert Abrams, who said they would work towards bringing a fair resolution to the strike that would preserve union jobs and the News, which is owned by the Chicago-based Tribune Co.

A spokesman for the attorney general later said that although Abrams's sympathies lie with the unions, he will investigate impartially all

allegations of violence involving either striking union members or security guards hired by management. Violence has marked the 20-day strike, and two more incidents occurred Tuesday morning.

New York police spokesman Sgt. Peter Berry said a 21-year-old replacement driver needed stitches in his head after being struck by one of four men with a metal pipe in a dawn attack at Merrick Boulevard and 230th Street in the Springfield Gardens section of Queens.

After the 5:50 a.m. attack, Allister Jones, of the Bronx, was taken to Franklin General Hospital in nearby Valley Stream, L.I. with a cut to his head after the four assailants commandeered his truck and attacked him. The suspects then crashed the truck against a telephone pole, Berry said.

No arrests were made, and detectives from the 105th Precinct were investigating the incident, the sergeant said. Hours before on Long Island, a group of men armed with baseball bats and sticks broke the windows of a bus waiting to take strikebreakers to the News's printing plant in Garden City, Nassau County police said.

A large group of men approached the replacement drivers as they were boarding a bus in the parking lot of the Island Inn on Old Country Road in Westbury just before 1 a.m., police said.

As the strikebreakers headed back into the building, the mob proceeded to break the windows of 11 cars in the parking lot and the windows of the bus and inn. Police said three people were slightly injured by flying glass.

The attackers fled and police said there have been no arrests. Detective William Naleps said the workers were hired as drivers for the News and were being lodged at the inn during the strike.

On Monday, a shot was fired at but missed a delivery truck driver in Queens, and early Sunday, a replacement worker leaving the paper's downtown Brooklyn plant was attacked by several men who broke his arm, police said. No arrests have been made in either incident.

#90317u1877 11/13/1990 ~United Press International

WASHINGTON (NOV. 13) UPI - Nearly 4 million Americans drink water that contains unsafe levels of nitrates, a naturally occurring chemical frequently found in pesticide residue, an Environmental Protection Agency study showed Tuesday.

The study also found unsafe levels of two pesticides in a significant percentage of groundwater supplies tested. Groundwater provides 40 percent of drinking water in the United States.

Overall, however, the study concluded that the ''vast majority of drinking water wells'' in the country contain insignificant levels of dangerous substances, EPA officials said.

''There is no current cause for alarm but there is enough evidence of contamination that is cause for concern,'' said EPA Deputy Administrator Henry Habicht at a news conference. But Habicht cautioned, ''if we don't nip it in the bud we could have a serious problem.''

The study showed that 52.1 percent of community water system wells surveyed throughout the country contained safe traces of nitrates, while 56.8 percent of rural wells yielded safe levels, the EPA said.

But the five-year study found that 1.2 percent of 564 community wells surveyed and 2.4 percent of the 783 rural wells tested contained unsafe levels of nitrates. The site of the wells was not immediately available.

Nitrates are formed naturally and are a byproduct of pesticides, human waste and other substances. In low, levels they are not a threat to human health.

But at unsafe levels, which the EPA sets at above 10 parts per million, nitrates can cause serious illness to infants. The most common condition, known as blue baby syndrome, diminishes the ability of blood to carry oxygen, which can cause death.

The effects on adults are less clear. ''There is an unanswered question as to the health effects of nitrates on adults,'' said Mike Cook, director of EPA's Office of Drinking Water.

The EPA has informed well owners whose groundwater contained dangerous levels of contaminants and offered advice on ridding the wells of the substances.

Environmental groups criticized the findings, saying the study's sweeping national sample failed to reveal pockets of high contamination levels in agricultural regions that pose the greatest potential harm.

The survey ''cannot be used to determine with certainty the full extent of pesticide contamination of wells in regions where pesticide use is heavy or frequent,'' a coalition of environmental groups said in a statement.

But Habicht said the survey was designed to produce results that are statistically representative of all wells in the United States.

The $12 million EPA effort, begun during the Reagan administration, measured the levels of nitrates and 126 pesticides typically found in groundwater. Pesticides can get into water supplies when they are washed off crops and farm lands by the rain into rivers, streams and underwater aquifers.

The study found that Atrazine, an herbicide used to control weeds, was found in the highest concentrations - levels that the EPA said may pose a health hazard. Dacthal, or DPCA, which is used to combat crabgrass and other grasses, was also found in high concentrations, but at levels the EPA considers safe.

The EPA did not specify exactly how high the concentrations of Atrazine and Dacthal were, saying the data is still under review.

Completion of EPA's survey comes as an increasing number of states have discovered high levels of groundwater contamination.

Last year, state officials in Kansas and South Dakota found excess nitrate levels in 20 percent of private wells tested. In Iowa, 18 percent of rural water contained unsafe nitrate levels.

The EPA study represents the government's first effort at documenting national levels of the frequency and concentration of pesticides and nitrates.

#90317u1878 11/13/1990 ~United Press International

NEW YORK (NOV. 13) UPI - Stocks closed mixed in moderate trading Tuesday as the market took a breather after a two-day rally that took the blue chips up almost 100 points.

The Dow Jones industrial average, which surged 51.74 Monday, lost 4.95 to close at 2535.40.

Among broad market gauges, the New York Stock Exchange composite index fell 0.76 to 173.31 and Standard & Poor's 500-stock index lost 1.82 to 317.66. The price of an average share lost 13 cents.

Advances led declines 817-729 among the 2,011 issues crossing the NYSE tape. Volume was 160,240,000 shares, compared with 161,390,000 traded Monday.

The Dow rallied 96 points in trading Friday and Monday - 44 points Friday and another 52 Monday on expectations that the Federal Reserve would decide to lower interest rates another notch Tuesday at its regular policy meeting, in an attempt to revive the economy.

The Fed was expected to decide to follow the quarter-point cut in short-term rates that it made two weeks ago, after the enactment of a budget package, with a similar move. Analysts said the actual rate cut could take place any time in the next few days.

Against that backdrop, they described Tuesday's action as a normal breather after any sharp move. Through midday, players took profits from the rally

while waiting to see what action the Fed takes on rates. In late trading prices drifted slightly into the plus column but before the close, they turned lower again.

''I think after being up 90 points plus in the last three days this is a little rest and relaxation, a little R and R,'' said Dennis Jarrett, chief market strategist at Kidder, Peabody & Co. ''It's healthy, almost what the doctor ordered after such a dramatic upswing in such a short period.''

Jarrett said he did not think the mixed market reflected any disappointment that the Fed did not act Tuesday to lower rates. ''The meeting was today, so any action today would have been too soon. But over the next few days the market will be watching more closely to see what they do.

Jarret said he believes the market has run on the perception that rates are headed lower rather than waiting for the move itself, so when it happens, it may be anticlimactic.

''But if it doesn't happen in the next few days it opens up the possibility for more of a corrective phase,'' he said. ''I don't hear anybody talking about rates going back up though. The general perception in the bond and equity markets is that rates are headed lower.''

Jarrett dismissed the rise in oil prices Tuesday, sparked by more saber-rattling on the Mideast crisis by British Prime Minister Margaret Thatcher, as having much effect on the market.

''I think stocks are becoming a little immune to some of Margaret Thatcher's hawkish views,'' he said. ''The market has accommodated itself to the Bush scenario of maybe January (for any military action to be taken in the region).

''People seem to be of the belief that with the new troops that would be more reasonable, I don't think there's any anticipation of something now,'' Jarrett said.

On the trading floor, Alcan Aluminum was the most active issue, unchanged at 17 7/8.

Philip Morris followed, down 7/8 to 48 1/2. Sales of its market-leading Marlboro brand of cigarettes have reportedly been slipping.

Fannie Mae was third, up 3/8 to 32 3/8, extending its rally of the past few sessions which is being sparked by the improved outlook for interest rates.

American Express was next, up 7/8 to 22 1/2. The company said it plans to raise the rate charged on balances on its Optima credit card to 16.75 percent from 15.75 percent.

Among the other blue chips, AT&T fell 3/4 to 33 1/8, IBM lost 1 to 112, McDonald's eased 1/2 to 28 1/4, but Woolworth surged 1 3/8 to 29 3/4.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 201,185,400 shares, compared with 199,636,400 shares traded Monday.

Prices rose in light trading on the American Stock Exchange.

The Amex Market Value index rose 0.78 to 295.56. Advances led declines 288-268 among the 790 issues traded. The price of an average share rose 3 cents. Composite volume was 12,016,100 shares vs. 12,265, 650 traded Monday.

Corona Corp. Class A led the Amex issues, up 1/8 to 4 1/4.

The National Association of Securities Dealers composite index rose 1.34 to 352.80.

CAPE CANAVERAL, FL (NOV. 13) UPI - Keeping tabs on threatening weather, the shuttle Atlantis's five-man crew flew to Florida Tuesday for a blazing nighttime launch Thursday to carry a secret spy satellite into orbit.

With work at the launch pad on or ahead of schedule, the astronauts arrived at the Kennedy Space Center shortly before 5:30 p.m. EST after a flight from Houston aboard sleek T-38 jet trainers.

The shuttle fliers posed briefly for photographs but they were instructed not to talk to waiting reporters, standard procedure for military shuttle flights. After an enthusiastic greeting from family members holding a ''Go Atlantis'' sign, the astronauts departed for their quarters.

While no technical problems were being ''worked'' at launch pad 39A, Air Force meteorologists predicted a 70 percent chance of rain and high winds Thursday that would force a launch delay. The odds are 50-50 for weather conditions that would permit a Friday launch try.

But if all goes well, Air Force Col. Richard Covey, 44, the commander, Navy Cmdr. Frank Culbertson, 41, the co-pilot, Army Maj. Charles Gemar, 35, Air Force Lt. Col. Carl Meade, 39, and Marine Corps Col. Robert Springer, 48, will blast off on the 37th shuttle mission Thursday night.

Launch originally was scheduled for mid July, but Atlantis was grounded by an elusive hydrogen fuel leak. At least two such leaks grounded the shuttle Columbia in May and September, but both spaceplanes have since been repaired and cleared for flight.

Among the family members who flew to the Kennedy Space Center to witness Atlantis's pyrotechnic launching was Gemar's wife, Charlene, who is expecting the couple's first child. NASA officials said earlier reports that she was close to delivery were unfounded.

As usual with such military missions, Atlantis's exact launch time will not be revealed until nine minutes before liftoff, ostensibly to hamper Soviet efforts to monitor the flight and glean details about the payload's ultimate orbit.

But sources who requested anonymity said takeoff is planned for 6:46 p.m. EST Thursday and that the flight is scheduled to last three days, 23 hours and 55 minutes, resulting in a touchdown at Edwards Air Force Base, Calif., at 3:41 p.m. PST next Monday.

The identity of Atlantis's hush-hush satellite payload is classified as well.

Aviation Week & Space Technology magazine reported last month that Covey and company plan to launch a photo-reconnaissance satellite into an orbit that will allow Defense Department analysts to monitor activities in the Persian Gulf region.

Other space experts disputed that claim, saying Atlantis may be carrying an electronic eavesdropping satellite. Despite the uncertainty, the payload clearly is important and would appear to involve some sort of surveillance of the Persian Gulf.

NASA Administrator Richard Truly said in September that Atlantis was scheduled ''to fly a crucial, particularly these days crucial, national security mission.''

Atlantis's flight is the last fully classified Air Force shuttle mission left on NASA's launch manifest, a move that reflects a Pentagon shift away from the shuttle in favor of unmanned rockets like the Titan 4 that was successfully launched Monday night from the Cape Canaveral Air Force Station.

The move also will save some $80 million a year that was being spent on shuttle security operations.

While two more military shuttle flights are scheduled in 1991, the payloads of both have been declassified.

The shuttle Discovery will carry four payload bay experiment packages into space in February to learn more about infrared sensor technology that may prove useful for detecting enemy missile launches or aircraft in flight.

An Air Force spokesman said the payload of a military shuttle flight planned

for next summer is an early warning Defense Support Program satellite equipped with a large infrared telescope capable of detecting enemy missile launches.

The Titan 4 launched Monday night was widely reported to have carried a ''DSP'' satellite into orbit.

(NOV. 13) UPI - Representatives of Pan Am Corp. and UAL Corp. met Tuesday to draft a final agreement for the sale of key U.S.-to-London routes and other assets of Pan American World Airways, and both sides expressed confidence they would complete the agreement by Wednesday.

Meanwhile, Carl Icahn and his privately held Trans World Airlines Inc. waited in the wings with a $450 million offer to buy out Pan Am lock, stock and barrel should the $400 million deal with Chicago-based UAL, parent of United Airlines, falter.

"United has a team in New York working agressively with their Pan Am counterparts to complete the final documentation on our agreement with Pan Am " UAL Chairman Stephen Wolf said in a message to United employees. "We are confident that the documentation will be completed by Nov. 14 and the purchase will go forward as planned," Wolf said.

Pan Am spokeswoman Pamela Hanlon, reached in New York at the financially ailing carrier's headquarters, echoed Wolf's confidence. "We are working toward that goal today and are certainly hopeful that we will have an agreement with United Airlines by the end of the day tomorrow," Hanlon said.

Pan Am and United announced a tentative agreement Oct. 23 under which United would acquire a number of Pan Am's European routes, as well as terminal facilities at San Francisco International, London Heathrow and Washington Dulles airports and two Boeing 747-200 aircraft, for $400 million. They set a Nov. 14 target date for finalizing the agreement.

Since Oct. 23, Texas-based AMR Corp., parent of American Airlines, indicated it also had expressed interest in Pan Am's European routes, which it estimated to be worth about $500 million.

And, last Friday, Icahn responded to a Pan Am "invitation to present an offer to combine the operations of TWA and Pan Am" via a merger of the companies. The merger proposal was valued at $450 million - $100 million in cash and $350 million in securities.

Hanlon said Monday the United deal did not exempt any other party from making a takeover bid for Pan Am. Investor interest in whether Icahn would move more forcefully on a merger with Pan Am made Pan Am's stock one of the most

actively traded issues on the New York Stock Exchange Monday.

But the price of Pan Am stock lost 12.5 cents - half Monday's gain - to $1.875 a share on moderate volume Tuesday. UAL stock closed up 12.5 cents to $100.375 a share in light NYSE trading.

#90317u1914 11/13/1990 ~United Press International

WASHINGTON (NOV. 13) UPI - Sen. Alan Cranston, D-Calif., said Tuesday he will undergo radiation therapy for cancer of the prostate, making it impossible for him to personally appear before the Senate Ethics Committee after this week.

In a letter to the top-ranked members of the Ethics Committee, Cranston said he will appear at the opening of public hearings Thursday but that beginning Nov. 19, when the treatment starts, he cannot testify personally.

"I naturally want to cooperate fully with the committee so that the hearing proceedings may be carried out as expeditiously as possible and with as little interruption as possible," Cranston wrote Chairman Howell Heflin, D-Ala., and Vice Chairman Warren Rudman, R-N.H.

"I have been advised by Dr.(Malcolm) Bagshaw (chairman of radiation oncology at Stanford and his physician) that because of the side effects of my treatment deposition by written questions will be the most appropriate way for me to adhere to the hearing procedure," Cranston said.

The veteran California Democrat said he would not be available even for depositions Nov. 19 and 20 when the treatments begin or after Dec. 7 "since the radiation therapy is likely to have a substantial and progressive - although temporary - enervating effect."

Cranston said he would be available to respond in writing to questions during the weeks of Nov. 26 and Dec. 3. "I put myself at the committee's disposal in California between my daily radiation treatments with these constraints," he said.

There was no immediate indication from the committee whether it would accept Cranston's offer to answer questions in writing or to delay his part of the hearings until after he recovers from the radiation treatment.

Although all five senators will make their opening statements Thursday, the committee has announced that Cranston's case would be heard last. Although the committee hoped to finish its work by the end of the year, deliberations could extend into next year. Cranston announced last week that he was suffering from cancer and that he would not run for re-election in 1992.

#90317u1968 11/13/1990 ~United Press International
MOSCOW (NOV. 13) UPI - A defense factory spill of a deadly cyanide compound has poisoned Latvia's main river, killing 300,000 fish and leaving one- third of the capital of Riga without water, officials said Tuesday.

Acetone cyanohydrin gushed from the plant in the republic of Byelorussia for 15 hours last week into the Western Dvina River in an ecologocial disaster that will have lasting effects, said Janis Peters, chief of the Latvian Mission in Moscow. The cause of the spill was not known.

A videotape viewed by reporters at the Latvian Mission showed droves of fishleaping from the water and dying on the banks of the river in the Latvian city of Jekabpils.

''The concentration of chemicals in this region was so high that the smell of poison filled the air near the river,'' Peters said. ''People living in cities and villages along the river began to panic.''

''Residents of Jekabpils saw a terrifying picture as fish, suffocating in the poisoned water, sprang out by the hundreds onto the river bank, where they died from the disintegration of their gills,'' he said.

The Western Dvina River, called the Daugava in the Latvian language, flows northwest from Byelorussia through Latvia, where it is a main source of potable water for the Baltic republic.

The river feeds three main reservoirs in Riga, a city of nearly 1 million people. One of the reservoirs has been closed by the disaster.

Peters and other Latvian officials accused Byelorussian authorities of failing to inform them of the accident and charged the Soviet government with callousness in responding to the disaster.

Byelorussian officials say 5 tons of the chemical escaped from the Polimer defense factory in the city of Novopolotsk on Nov. 4 and 5, but Peters said that Latvian specialists believe the discharge was 10 times larger.

Latvian officials said several people who ate contaminated fish suffered food poisoning, and that the Latvian Parliament had set up an emergency commission to deal with the crisis.

Latvian health officials learned of the spill Nov. 6 when residents of Kraslava, a Latvian city near the Byelorussian border, reported that ''they were horrified to see a huge quantity of dead fish,'' Peters said.

Riga Mayor Andres Inkulis said that 70,000 kindergartners and schoolchildren are homebound because their schools do not have water.

Inkulis said the lack of potable water has also forced one-fifth of all enterprises and nearly one-third of the restaurants in the Latvian capital to shut down.

Peters said the disaster has caused $34 million in direct economic damage and as much as $510 million in indirect damage such as lost work time.

Latvian Deputy Prime Minister Arnis Kalninsh said senior Soviet officials responded with silence when he sought their help in responding to the disaster at a Nov. 9 meeting of the U.S.S.R. Council of Ministers.

Peters said that the U.S. and Swedish governments had offered to send specialists and provide humanitarian aid.

#90317u1999 11/13/1990 ~United Press International

NEW YORK (NOV. 13) UPI - The Securities and Exchange Commission brought civil charges in federal court Tuesday against two West Coast men it said engaged in insider stock trading based on pre-release copies of Business Week magazine.

An SEC complaint filed in U.S. District Court accused Stephen R. Rasinski and Lawrence M. Small, both of the Newport Beach, Calif., area, of obtaining stock tips from magazines a third man obtained from Business Week's printer.

The SEC filed a complaint last week against that alleged accomplice, John L. Petit of Boca Raton, Fla. Petit simultaneously consented to a final judgement enjoining further violations and obliging him to pay $196,529.

The latest SEC complaint charges Rasinski and Small paid money to Petit, who allegedly was obtaining pre-release copies of the magazine from an employee of the Torrance, Calif., printing plant, to share the information.

SEC complaints said Shayne A. Walters, then employed by the R.R. Donnelly and Sons Co. printers, was the initial source of the magazines.

SEC enforcement attorney Andrew Geist said Walters worked in Irvine, Calif., as a printing services salesman for R.R. Donnelly.

''It's alleged Walters was getting up at three or four in the morning, driving over to the printing plan, sneaking in through the loading dock and handing it over to Petit,'' Geist, an enforcement division branch chief, said.

In August 1989, Walters consented to an SEC judgement and paid out $62,000 in profits, penalties and interest. In September 1989, Walters pleaded guilty to two insider trading-related charges. He is awaiting sentencing.

Geist said Walters allegedly traded in his own account for a period, but then stopped and was simply paid cash by Petit. The SEC complaint said Rasinski and Small later paid ''substantial sums'' to see the bootleg magazine.

#90317u2018 11/13/1990 ~United Press International

NEW HAVEN, CT (NOV. 13) UPI - The Bill of Rights went on display Tuesday as chanting, shouting demonstrators protested treatment of gays and lesbians and demanded more be done to fight the AIDS crisis.

About two dozen protesters carried signs and blew shrill whistles at the New Haven Veterans Memorial Coliseum, where a traveling exhibit featuring the historic document and guarded by former Marines opened a four-day stay.

''We were there to scream,'' said Eric Cohen a member of New Haven chapter of ACT UP, or chapter of the AIDS Coalition to Unleash Power, which organized the loud but peaceful protest that began on the street and moved inside the arena.

''Basically, we made a commotion and got our voices heard. We wanted to make it clear that there are a lot of people in the United States of America who are not included in the Bill of Rights,'' he said.

Busloads of school children and senior citizens were among the early visitors to the exhibit and many gaped as ACT UP members chanted and carried signs that read, ''ACT UP, fight back, fight AIDS.''

Many blew whistles and shouted slogans as police stood by, but did not interfere. There were no arrests, or serious incidents, police said.

The traveling exhibit sponsored by Philip Morris Cos. Inc. will stop in every state and also has prompted protests by various groups in other cities.

Original copies of the Bill of Rights are being displayed over a 16- month period to celebrate its 200th anniversary, with Virginia's copy the one on display in New Haven.

#90317u2025 11/13/1990 ~United Press International

TORONTO (NOV. 13) UPI - Canada's recession, lower trading volumes and reduced revenues means the Toronto Stock Exchange must eliminated 92 staff positions by year-end to cut costs, the market's president said Tuesday.

TSE President and Chief Executive Officer Pearce Bunting said 58 positions have already been eliminated year-to-date by a combination of attrition and not filling vacancies but that an additional 34 current employees will lose their jobs.

''It is unfortunate that people who made a contribution to the exchange's success have to be let go. Their loss will be felt,'' Bunting said.

The layoffs are part of a plan to cut overhead expenses by 12 percent in 1991.

Eliminating the 92 positions means the TSE will pare its expenses $7.2 million after absorbing $1.2 million in cost increases for payroll, property taxes, water and building operations and the estimated effect of a new federal sales tax.

''We believe that by taking action now, we can give greater assurance of continued employment to our remaining staff,'' Bunting added.

During 1990, the TSE also reduced costs by indefinitely suspending the

development of the consolidated trading and information system and postponing other new programs.

Bunting said the TSE intends to meet its 1991 budget goals without increases to its members but that if the exchange's financial position deteriorates further, charges to members will be adjusted.

''The TSE's long-range plan to be the preferred market for trading Canadian securities remains unchanged,'' Bunting said.

In November, executives of the No. 1 Canadian bourse travelled to New York to promote a market-by-price system, that gives U.S. stockbrokers and investors a ''look at the book'' of computer-entered share buy and sell orders.

The stock market data system provides ''real-time'' access to prices generated by Toronto's Computer-Assisted Trading System - known as CATS, a pioneer computerized trading system - and parallel exchange floor action.

Some 1,597 stocks are traded on the Toronto Stock Exchange, of which some 200 are bought and sold on other U.S. and international markets.

~HL:NATIONAL GUARDSMAN SUES U.S.; CLAIMS OPERATION DESERT SHIELD IS ILLEGAL
WASHINGTON (NOV. 13) UPI - Don't call Sgt. Michael Ange an anti-war activist.

''I am a soldier,'' he insists, ''and I firmly believe in the ideals of a strong defensive military designed to protect the United States and its Constitution.''

But don't call on him to fight an illegal war.

''The president is violating the U.S. Constitution and other existing laws by committing acts of war which have not been authorized by the Congress,'' Ange says, calling the recent buildup of U.S. forces in the Persian Gulf ''unlawful.''

And so it is that Ange, a 26-year-old Army National Guardsman attached to the 1450th Transportation Unit at Fort Lee, Va., is suing his government.

His lawyers appeared in federal court Tuesday seeking an emergency court order suspending his deployment to the gulf this week until a full hearing can be held on the constitutional question.

''We're filing a federal lawsuit challenging the president's authority to order Michael Ange to active duty in the Persian Gulf,'' said Michael Ratner, an attorney for the Center for Constitutional Rights, which is representing Ange. ''We believe those orders are violations of the War Powers clause of the Constitution and of the War Powers resolution.''

A federal judge declined to issue the emergency order, but another hearing on the issue was scheduled for Dec. 10.

The lawsuit comes as support for Operation Desert Shield appears to be crumbling on Capitol Hill and elsewhere in the wake of President Bush's announcement six days ago that he intends to double the size of the U.S. force in the Middle East.

Several lawmakers are urging the president to call Congress back into session to debate and vote on the military operation. Sen. Richard Lugar, R-Ind., claimed there is ''an unraveling of support around the country'' for the deployment.

Ange's lawyers say he doesn't fall into the ''conscientious objector'' category, but instead fears Bush is pushing the United States toward a war without consulting his countrymen.

''We believe that this is a historic and critical moment for the American people,'' Ratner said, ''that they should have, as should Sgt. Ange, the consent of Congress and the American people before launching a war in the gulf.''

The 1973 War Powers Act requires the president to notify Congress within 48 hours when U.S. forces are in an area of ''immiment hostilities.'' Congress has 60 days to vote on whether to authorize the military action. Presidents have generally ignored the act and the courts have been reluctant to step into what many consider a political question.

''This is a political debate and it belongs in the political arena,'' said John Tyler, a government lawyer, in arguing against Ange's lawsuit Tuesday.

But Ratner argued at the hearing that U.S. troops are ''in harms way'' and ''basically in a situation that could lead to a shooting war.''

More than 230,000 U.S. troops have been deployed in Operation Desert Shield since August. It has claimed 43 American lives, including 10 Navy personnel killed Oct. 30 by a burst of steam aboard the USS Iwo Jima off the coast of Manama, Bahrain, and 13 Air Force personnel killed Aug. 28 in the crash of a C-5 cargo plane in Germany.

Ange's lawyers argue that the Persian Gulf operation falls into the category of ''imminent hostilities'' under the War Powers Act, even though no shots

have been fired.

Ange could not be in Washington for the filing of the lawsuit because he was confined to his barracks in Fort Lee. A police narcotics investigator from Greenville, N.C., he has been with the National Guard since 1982.

Reached by telephone at the base, Ange said he hopes his case will prod Congress into action. ''We're hoping more than anything else for the media attention to encourage Congress to enforce the War Powers Act and the appropriate articles of the Constitution.

''It appears,'' he added, ''Congress has been hiding from the issue.''

He denied his lawsuit, which also claims that a leg injury and ulcer make him unfit for combat duty, is designed as a back-door way to leave the military.

''Some people may say that and I'm not really concerned about what they think '' he said.

-30- 4465

#90317u2086 11/13/1990 ~United Press International

NEW YORK (NOV. 13) UPI - Colombia announced Tuesday an agreement in principle has been reached with a committee of commercial banks on a $1.775 billion, four-year financing program.

The funds will be used to meet the Latin American republic's financing requirements from commercial banks during the period running from 1991 through 1994, according to Colombia's ministry of finance and public credit.

The ministry said Colombia is the only major Latin American that has not restructured its debt held commercial banks.

According to a ministry statement, Colombian representatives were ''pleased'' with the agreement in principle because it would provide ''very favorable'' financing at a time of ''difficult conditions currently prevailing in the financial markets.''

The financing program will consist of two facilities - an integrated loan facility provided by the banks of about $1.575 billion and a facility of floating rate notes.

CINCINNATI (NOV. 13) UPI - BASF Corp., which accepted blame for the July 19 explosion at its Cincinnati facility, said Tuesday it will pay the Occupational Safety and Health Administration a $1,060,100 fine as part of a

settlement for violations there.

BASF also said it will reimburse local police and fire departments for their costs in reacting to the explosion and will establish a $400, 000 trust fund to assist in retraining workers left unemployed by the accident.

BASF said in a statement from its Parsippany, N.J., headquarters it felt that ''the most productive use of its time and resources is in establishing and maintaining a safe workplace, not in contesting or litigating various points it may have at issue with OSHA.''

The settlement resolves all open issues with OSHA, but does not admit any wrongdoing, BASF said, adding that it cooperated fully with OSHA investigation.

''We have determined that the accident was caused by a build-up of pressure in reactor No. 6 as a direct result of the improper setting of a critical valve on the reactor,'' said J. Larry Jameson, president of BASF's Coatings & Colorants Division.

''After the accident, our investigation found that the main vent valve to the atmosphere was closed. For the process to function properly, it should have been open,'' he said.

''We have concentrated on meeting our responsibilities to those affected by the accident, including employees at the site. Establishing the trust fund to assist in retraining will help ease the transition for our workers,'' Jameson said.

BASF Corp., is the North American member of the BASF Group. The corporation employs approximately 21,000 people at about 55 major production facilities in North America.

#90317u2165 11/13/1990 ~United Press International

NEW YORK (NOV. 13) UPI - Donald J. Trump said Tuesday he had broken off talks with an advisor for some of the investors holding bonds from Trump's ailing Taj Mahal Casino in Atlantic City, N.J., saying he made ''unrealistic'' demands.

''We saw no point in going forward,'' Trump said in a statement released late in the day by the Trump Organization, stating the cash- strapped developer had ''terminated'' negotiations with Wilbur Ross of L.F. Rothschild.

Ross, a senior managing director of the investment bank, has emerged as a key player in the latest challenge to the beleagured developer, who was bailed out of a similar squeeze in June by a $65 million bank loan.

Trump is not expected to be able to make a $47.3 million interest payment on the $675 million casino bond issue due Nov. 15. He has asked investors to take more bonds in lieu of payment, and restructure the ''junk'' issue.

Predicting the matter would end up in court ''for many years to come, '' Trump said numerous individual bondholders voiced interest in an agreement, ''but we are unable to make a deal with Mr. Ross and his group.''

Trump aide Stephen Bollenbach said the developer was still in talks with some investors. He said Trump's declaration ''was pointing out (that) we didn't feel the Rothschild firm was representing'' bondholders accurately.

''When we talked to bondholders, we found they had a much more realistic view of what could be done here in terms of restructuring,'' Bollenbach said.

#90317u2172 11/13/1990 ~United Press International

SEATTLE (NOV. 13) UPI - Prosecutors charged five civilians and an Air Force airman with destruction of government property Tuesday for the Veterans Day pipe bombings of two cars and the Office of Special Investigations (OSI) at McChord Air Force Base.

Five boyish-looking young men who appeared before U.S. Magistrate Philip K. Sweigert in Seattle were ordered held without bail until a detention hearing Thursday after the magistrate agreed with U.S. attorneys that the alleged crime represented an act of violence.

A government-appointed attorney for one of the suspects objected, noting her client was only charged with destruction of federal property worth more than $100.

''With bombs, counselor, with bombs - you don't think that's a crime of violence?'' Sweigert responded, rejecting the motion.

Government attorneys kept mum about the alleged motive for the bombings, which injured no one but destroyed two unmarked vehicles used by OSI agents and caused minor damage to the OSI building, where criminal investigations involving Air Force personnel are conducted.

The only word of a possible motive has come from the FBI, which has speculated generally that the bombings may have been in retaliation for past OSI investigations.

Charged under Title 18, Section 1361 of the U.S. Code were Arch D. Drummond Jr., 20; his brother, Michael J. Drummond, 18; Louis M. Baldassari, 19; Bryan Cotten, 19; Michael R. LeVasseur, 20; all of Lakewood, Wash., and Airman Steven Hawkins, 19, who is stationed at McChord.

Hawkins, who was not present in court Tuesday, is being held in the stockade at Fort Lewis and will be prosecuted under the military justice system, an Air Force spokesman said.

A complaint alleges that four of the defendants, Michael Drummond, Baldassari, Cotten and LeVasseur, met Saturday night in Baldassari's garage to assemble two pipe bombs.

According to the complaint, LeVasseur - the only defendant who retained his own attorney for Tuesday's hearing - told FBI Agent Alfred Gunn that Michael Drummond ''stated that Steven Hawkins and Arch John Drummond Jr. wanted to use the bombs against OSI.''

LeVasseur, the complaint said, said the group dropped Cotten off at his home because he was sick, went to Michael Drummond's house, where they were met by Arch Drummond and Hawkins, and departed for the base, stopping off at a gas station to fill two plastic containers with gasoline.

There, they went to Hawkins' barracks, where Hawkins told a fellow airman that if anyone asked he was asleep all night, but instead changed into dark clothing and left with Baldassari and Arch Drummond, the complaint said.

The other airman, Jason Hill, told the FBI that while those three were gone, the two remaining, who fit the description of LeVasseur and and Michael Drummond, made several comments, including talk of a 5-foot- long fuse, that they were going to hear some booms and that police dogs might track back to the barracks.

''Hill advised he heard two booms, and, looking out from his room, saw Hawkins John (Arch Drummond) and Baldassari coming toward the barracks from the direction of the OSI building, and that when they got to the room there were congratulations - hand slappings - among the group,'' the complaint said.

The bombs went off at 4 a.m. Sunday, heavily damaging two unmarked OSI cars, while a fire slightly damaged the office. Metal fragments from the cars were blown more than 200 feet. A small piece of pipe with a cap on one end was found about 100 feet from the cars. There were no injuries.

Air Force spokesman Staff Sgt. Randy Mitchell said terrorism or anti- war activity had been discounted as a motive because no group had claimed responsibility for the bombing.

#90317u2174 11/13/1990 ~United Press International

LOS ANGELES (NOV. 13) UPI - Occidental Petroleum Corp. said Tuesday that the United States Supreme Court has refused to hear a 1989 appeals court decision

that reversed a $500 million judgement against its MidCon Corp. subsidiary, Natural Gas Pipeline Co. of America.

Occidental said that the reversal of the judgement became final after the Supreme Court denied a petition for certiorari filed by Colorado Interstate Gas Co.

The 10th Circuit Court of Appeals had reversed a trial court's ruling that Natural had breached a contract for the purchase of gas from Colorado Interstate and had attempted to monopolize the market for the long distance transportation of natural gas produced in Wyoming.

#90317u2194 11/13/1990 ~United Press International

(NOV. 13) UPI - Senate leaders are calling for a special congressional session to discuss the U-S role in the Persian Gulf crisis. Even if that meeting does NOT come to pass, lawmakers are getting ready to hold committee meetings of their own. Senate Democratic leader George Mitchell says Washington's change from a purely defensive position to having the potential to go on the attack is a move that warrants discussion by the Foreign Relations and Armed Services Committees. Armed Services Chairman Sam Nunn of Georgia and Foreign Relations Chairman Claiborne Pell of Rhode Island say they hope to begin the meetings in a few weeks.

A 34-year-old Egyptian-born man stood silently next to his lawyer in a New York courtroom today as he heard murder charges leveled against him in the assassination of militant Rabbi Meir Kahane. The lawyer for El-Sayyid Nosair says he has subpoenaed hospital records and videotapes to prove the suspect was too heavily sedated to give police a legally admissible statement. After the hearing, more than 40 Nosair supporters in the hallways shouted ''God is Great!'' in Arabic. Nosair was returned to a prison unit at Bellevue Hospital.

The nation's Roman Catholic bishops meeting in Washington have adjourned for the day without announcing the results of their ballot on a proposal to urge that more money be spent on alcohol and drug treatment efforts. The pastoral statement also criticizes the U-S government efforts to curb the international drug trade. The bishops did reject a plan that would have allowed trained lay people to officiate at funerals and burials in instances where NO priest was available.

The makers of Koala Springs fruit-flavored mineral water voluntarily recalled the drink today after Florida health officials found up to 18 times the acceptable level of the cancer-causing substance benzene. Koala Springs International pulled the product from supermarket shelves throughout the United States and in Eastern Canada. In a statement released from its headquarters in Fremont, California, Koala said independent tests confirmed what it called ''minute'' traces of benzene in Koala drinks shipped to the East Coast.

Medical researchers say that men who take aspirin after a meal and then drink liquor increase the effects of the alcohol. The director of the Bronx, New York, Veterans Affairs Medical Center admits that while the increase is small, its could be significant for anyone driving a car or operating a machine.

#90317u2334 11/13/1990 ~United Press International

(NOV. 13) UPI - The White House is rejecting Indiana Senator Richard Lugar's call for a special session of Congress to debate what would amount to a declaration of war against Iraq. Lugar, the Number two ranking Republican on the Senate Foreign Relations Committee, says a vote would show the world that Congress and the White House are of one mind for Iraq to withdraw from Kuwait. But White House spokesman Marlin Fitzwater says that's UNnecessary at this point. He says the administration wants to do everything to avoid war.

In another development, Iraq today sent envoys to Morocco and Libya to discuss prospects of holding an Arab summit on the gulf crisis. Egyptian President Hosni Mubarak also headed for Libya on a similar mission. And Soviet President Gorbachev dispatched two senior diplomats to the Middle East to sound out Arab leaders on the summit issue. But Arab states continue to display a cool response to Morocco's call over the weekend for an Arab summit to avert war.

A government study shows nearly four-Million Americans drink water that contains unsafe levels of nitrates, which are often found in pesticide residue. In addition, the E-P-A study also found high levels of two pesticides in a significant percentage of groundwater supplies tested. However, E-P-A officials say the study concludes the ''vast majority of drinking water wells'' in the country contain insignificant levels of dangerous substances.

Senator Alan Cranston says he'll undergo radiation therapy for cancer of the prostate, beginning next week. Therefore, the California Democrat says, it'll be impossible for him to personally appear before the Senate Ethics Committee after this week. The panel opens hearings Thursday into allegations that Cranston and four other senators lobbied federal banking regulators on behalf of Charles Keating, who contributed one- point-three Million dollars to their campaigns and causes.

In Miami, deposed Panamanian strongman Manuel Noriega may lose his

high-profile defense team and be assigned public defenders. A federal judge said today that Noreiga's attorneys may have to quit or agree to become lesser paid court-appointed attorneys if they don't find a method of payment by Friday. All but one of the lawyers say they can't stay on the case to defend Noriega against drug-trafficking charges if they are paid by the government at 75 dollars an hour. Prominent defense lawyers command upwards of 250 dollars an hour for their services.

The Bill of Rights went on display today in New Haven, Connecticut, amid chants and shouts by demonstrators protesting treatment of gays and lesbians. About two dozen protesters carried signs and blew shrill whistles at the New Haven Veterans Memorial Coliseum, where a traveling exhibit featuring the historic document opened a four-day stay. Police reported NO arrests or serious incidents.

#90317u2412 11/13/1990 ~United Press International

PALM SPRINGS, CA (NOV. 13) UPI - The political beat goes on for Sonny Bono, the entertainer-turned-mayor of this desert playground who announced Tuesday he is exploring the possibility of running for the U.S. Senate in 1992.

Bono, 50, half of the defunct singing duo Sonny and Cher who has been mayor of Palm Springs since 1988, announced Tuesday he is exploring the idea of running for one of the two Senate seats that need to be filled in 1992.

"I will begin researching what it will take to win the election and making myself aware of the issues that most concern the people of California," Bono told a news conference. "Recent events in California ... have convinced me that the time is right for me to explore the feasibility of my seeking election in 1992."

Bono, a Republican who ran for mayor because he was fed up with the "old boys network" he said controlled the resort town of 38,000, sounded a populist chord with supporters Tuesday, citing last week's elections as "a problem in communication between the people and the professional, career politicians."

"As a successful songwriter, singer, restaurateur, businessman, and now, mayor I have always tried to learn from my various successes and failures," he said. "I have shared the American dream and participated in the challenges that face every businessman and family in this great state."

Bono said he plans to form an advisory committee to begin raising funds for his exploratory effort and announce at a later date whether he is definitely in the running.

If he does decide to be a candidate, Bono would not be the first entertainer to parlay his fame into a California political career. Song and dance man

George Murphy served in the Senate and actor Ronald Reagan moved from the governorship to the White House.

Bono achieved show business celebrity with his wife as Sonny and Cher in the late 1960s and early 1970s, but their act dissolved when the couple divorced in 1974. Together they produced a string of hits, including "I Got You Babe" and "The Beat Goes On."

Bono, who lives with his fourth wife, had a relatively quiet life in Palm Springs, operating an Italian restaurant called "Bono" until re-emerging into the spotlight as a non-partisan mayoral candidate two years ago.

Last week, both of California's senators were eliminated from the 1992 race: the state's junior senator, Pete Wilson, was elected governor and Alan Cranston, California's senior senator, announced he would not run for re-election because he has prostate cancer.

As a result, voters will have the rare opportunity to elect two U.S. senators at the same time. So far, only Rep. Barbara Boxer, D-Calif., and Rep. Robert Matsui, D-Calif.,have announced their intentions to run.

-30- 2993

#90317u2414 11/13/1990 ~United Press International

NEW YORK (NOV. 13) UPI - Steffi Graf swept through the first three games, then struggled for survival against 14-year-old sensation Jennifer Capriati before claiming a three-set victory Tuesday night in the opening round of the $3 million Virginia Slims Championships.

Capriati, hitting each ball with reckless abandon, forced the world's premier women's player to fight for an hour and 54 minutes before capitulating, 6-3, 5-7, 6-3.

Three double faults by Capriati in the first game of the final set gave Graf the opening she needed, and the 21-year-old German protected that service break against repeated Capriati attacks before breaking again in the final game.

Capriati had break point in the fourth game of the third set and reached deuce on Graf's serve in the sixth and eighth games, but was unable to convert.

Capriati thus ended her first year as a pro with a match record of 42-11, earnings of close to $300,000, depending on the bonus pool breakdown, and a world ranking of No. 10. Graf, winner of her last four tournaments, has lost only four of 75 matches in 1990, but three of them came in Grand Slam events. If she wins this event, Graf will surpass $2 million for the year.

Earlier, Conchita Martinez, winner of her previous two tournaments, swept the

final nine games to upset Zina Garrison, 6-3, 6-0, and sixth seed Katerina Maleeva utilized a single service break in each set to defeat Helena Sukova, 6-3, 6-3.

After Graf blitzed her way through the first three games, Capriati played the defending champion even the rest of the set. She saved two break points against her in the fourth game, holding with an ace clocked at 97 mph, but was unable to threaten Graf's serve.

Capriati returned the favor in the second set, taking the first three games. Graf, though, broke back in the seventh game, helped by a Capriati double fault.

With the women seemingly headed for a tie-break, Capriati converted her second set point in the 12th game. Graf, serving at 30-40, thought she registered an ace and didn't realize for 20 seconds it had been called a fault.

Although Graf did win the point, on her next break opportunity Capriati unleashed a bullet-like forehand that Graf returned long.

''I'm happy I got to play in it and even happier I played a good match,'' Capriati said. ''I could have come in to the net more, I could have hit down the line on my backhand more and returned better.''

Garrison actually won the first two games of the match, but managed to take only one more against Martinez, ranked 11th in the world. Garrison double faulted on set point in the first set.

Garrison, who has a history of poor performances in this season- ending championship, managed merely 10 points in the second set as she bowed out in 58 minutes. This is the fourth time in the last five years Garrison was eliminated in the opening round, and last year she was a second-round victim.

''I think my mind wasn't there at all,'' said Garrison, the seventh seed who celebrates her 27th birthday Friday. ''This is really bad for me. I had no motivation, no pickup; it wasn't even that I was flat, it was like I wasn't here. When you're playing so bad you don't know how to get out of it, or even if you can get out of it.

''I've probably been looking forward too much to resting.''

Despite reaching the Wimbledon final, where she lost to Martina Navratilova, Garrison winds up what for her has been a disappointing season.

''I just had one good tournament, the rest of the year I didn't play well at all,'' she said.

After falling behind 2-0, Martinez won the next two games at love and broke

again in the fifth game. Garrison broke back immediately to draw even at 3-3, but that proved to be the end for her.

Martinez, who won in Indianapolis last week, converted her fourth break point in the seventh game and the 18-year-old Spaniard continued on from there.

''At the beginning I played really nervous,'' said Martinez, making her debut appearance in these championships. ''I haven't played on this surface, and it's really difficult to play on supreme, but I'm happy I controlled the match.''

Maleeva, ranked sixth in the world, broke Sukova in the fourth game of the opening set and in the fifth game of the second. Sukova had a break point in each of the second and fourth games of the second set, but was unable to convert.

#90317u2534 11/13/1990 ~United Press International

(NOV. 13) UPI - Senate Democratic leader George Mitchell of Maine says Americans deserve a full national debate about U-S goals in the Persian Gulf and the potential costs of achieving those goals. He says there's widespread concern over the shift from a defensive strategy in the region.

President Bush told a dinner for Senate Republican leaders tonight that he's ''more determined than ever'' to drive Iraq from Kuwait. Bush said- ''It is my view that the United States will and must NOT fail in its objective.''

A new poll published today indicates the president is losing public support on the Gulf crisis. The U-S-A Today poll says 51 percent of 615 Americans surveyed said they approve of how Bush is handling the crisis. That's down from 82 percent in an August 20th poll.

The nation's Roman Catholic bishops are joining the war on drugs. The bishops today considered a proposed pastoral statement urging more money for alcohol and drug treatment programs. But they expressed deep concern over the increasing militarization of the government's anti-drug efforts.

In another action today, the bishops rejected a proposal that would have allowed trained lay people to officiate at funerals and burials in instances where NO priest was available and where the mass was not celebrated.

The environmental group Greenpeace says it will try to stop tomorrow's nuclear weapons test at the Nevada Test Site. A spokeswoman says three women hiked into the test site area and are in position to disrupt the test. The Energy Department says security forces found NO trace of anti-nuclear protesters.

#90317u2655 11/13/1990 ~United Press International

(NOV. 13) UPI - A Pentagon official denies U-S military manuevers planned on Saudi territory are intended as a provocation. The Washington Times says two-thousand Marines will conduct the landing exercise Sunday just 10 miles from the Kuwaiti border, within range of Iraqi shore positions and its Silkworm anti-ship missiles. Pentagon spokesman Pete Williams, however, says he doesn't think that report is accurate. But a full rundown on the exercise is expected

Thursday.

Authorities say a gunman, apparently shooting at random, killed at least eight people today in a quiet retirement village on New Zealand's South Island. Police say the gunman is a village resident in his 20's and is armed with two high-powered rifles. Police have cornered the assailant in salt marshes on the edge of the town of Aramoana near Dunedin. But they say the suspect continues to hold some 140 heavily armed officers at bay. The massacre is said to be the worst mass killing in New Zealand this century.

In the Philippines, typhoon Mike killed at least 14 people. The storm swept the central Philippines with torrential rains and 150-mile-an-hour winds, forcing nearly 240-thousand people to flee their homes. The so- called ''super typhoon'' trapped 17 people, including six Americans, on an offshore oil drilling platform. But they're reported safe... and was to be carried to land by a helicopter after the weather cleared.

A family member says Marlon Brando's 20-year-old daughter, Cheyenne, tried to commit suicide again, the second time in two weeks. The family says Cheyenne tried to hang herself at her mother's home in Tahiti, but was discovered Sunday by her mother. She reportedly was NOT breathing but her heart was still beating. The young woman was taken to a hospital and is said to be out of danger. Cheyenne has been charged with complicity in the May 16th shooting death of her boyfriend Dag Drollet in Los Angeles. Her half-brother, Christian Brando, has been charged with the killing.

Character actor David Willock has died of a stroke at age 81. A family spokesman announced today that Willock, who appeared in more than 200 movies in a career that spanned five decades, died yesterday at the Motion Picture and Television Hospital in Woodland Hills, California. The long-time actor usually played the leading man's sidekick. His movie credits included ''Hustle '' ''Emperor of the North,'' ''Hush, Hush Sweet Charlotte,'' ''Spellbound,'' ''Pinup Girl,'' and ''The Fleet's In.''

ANCHORAGE, AK (NOV. 14) BUSINESS WIRE - The board of directors of Alaska Housing Finance Corp. authorized the sale and issuance of $35 million in mortgage bonds at their meeting Tuesday.

The money generated by the bonds will be used by AHFC to continue its Veteran's Mortgage Program, one of only five in the country that is permitted under federal tax law to issue tax exempt bonds.

The tax exempt collateralized bonds were sold through a competitive bid process as required by Alaska statute. AHFC received six bids for the bonds. The successful bid from Merrill Lynch resulted in a true interest cost of 7.508 percent.

The bond proceeds will be used to purchase Government National Mortgage Association Certificates (GNMA) and Federal Home Loan Mortgage Corp. (FHLMC) Participation Certificates representing pools of mortgage loans made to qualified veterans. The bonds are expected to be rated Aaa by Moody's Investors Service and AAA by Standard and Poors.

As required by federal law, the bonds are guaranteed by the state of Alaska.

The Collateralized Bonds 1990 First series are structured to permit recycling of mortgage pre-payments into new mortgage loans for approximately 10 years. As refunding bonds, they are exempt from the alternative minimum tax (AMT)

provisions of federal tax law.

#90318b0018 11/14/1990 ~Business Wire

SAN JOSE, CALIF. (NOV. 14) BUSINESS WIRE - Cygnet Systems Inc., manufacturer of high capacity, high performance optical disk jukeboxes, Wednesday announced the signing of an agreement with Digital Equipment Corp. to perform third party servicing for Cygnet jukeboxes.

The agreement covers both the Series 1800 Expandable Jukeboxes for 12 inch optical disk drives and the high performance, Series 5250 for LMS LD 510 5.25 inch optical disk drive.

The agreement initially covers the United States, but is expected to be expanded to Europe, Canada and the Pacific Rim where Cygnet also has a significant number of installations.

''It is very important to us to make sure that the end-user experiences maximum uptime with the jukebox. It is particularly important since we distribute our products exclusively through resellers. We want to make sure that our customers have access to reliable service organizations to service our products,'' said Wayne Augsburger, vice president of marketing for Cygnet.

''We have a reputation for making reliable products, and we need to ensure that our jukeboxes receive dependable service to reenforce this reputation,'' he added. '' The ability to offer a wide range of service alternatives allows us to satisfy the needs of a larger range of customers and increases our market coverage.''

Digital Equipment Corp., headquartered in Maynard, Mass., is the leading worldwide supplier of networked computing systems and services. Digital offers a full range of computing solutions and systems integration for the entire enterprise -- from the desk top to the data center.

Cygnet Systems Inc., headquartered in San Jose, is a peripheral products company that designs and manufactures robotic mass storage devices. Announced products consist of high performance optical disk jukeboxes for 12 inch and 5.25 inch optical disk drives and media.

CARLSBAD, CALIF (NOV. 14) BUSINESS WIRE - Decom Systems Inc. (NASDAQ:DSII) Wednesday announced a net loss for the fiscal year ended Sept. 30, 1990, of $295,000, or 11 cents share, on revenues of $8,454,000, compared with net income of $457,000, or 17 cents per share, from revenues of $8 million last year.

For the fourth quarter the net loss was $226,000, or 8 cents per share, compared with net income of $44,000, or 2 cents per share, in the same quarter last year. Revenues were $1,885,000, compared with $2,084,000 in the fourth quarter last year.

Jack Robinson, president of Decom Systems, said the quarter's loss reflected nearly $400,000 in delayed orders for DSI's high-margin telemetry, tracking and control equipment due partly to budget uncertainties and the diversion of resources to operation "desert shield" in the Middle East.

Robinson added, "To return to profitability in 1991, we have refocused our product development and marketing efforts, streamlined and restructured operations to reduce annual costs by $400,000. With the Quad 7 telemetry data processing system and 7735 high performance bit synchronizer now well positioned for growth, DSI will enter 1991 as a strong competitor for high performance telemetry equipment and systems."

Backlog at September 30, 1990 was to $2.8 million, compared with backlog of $2.5 million at September 30, 1989.

Robinson noted that DSI's Quad 7 integrated telemetry system has received recognition for its outstanding performance in supporting Northrop's successful flight test program for the Air Force's Advanced Tactical Fighter.

Robinson also said the 7735 high performance bit synchronizer was recently delivered to selected customers who have confirmed its overall performance is unmatched by competitive products. "The Quad 7 and 7735 represent the highest performance telemetry data acquisition system in their market," he said.

Decom Systems Inc. designs, manufactures and integrates aerospace telecommunications equipment and systems for military and commercial users.

SACRAMENTO, CALIF. (NOV. 14) BUSINESS WIRE - David C. Hardie, chairman and chief executive officer, of Hallador Inc. and Affiliates, has been elected to the board of directors of American Recreation Centers Inc. headquartered in Sacramento, Calif.

Hardie, 40, brings a diverse business background to the board of ARC. He is currently a director of several other companies including Freedom Newspapers Inc., Merksamer Jewelers Inc., Pacific Rice Products and Hallador Petroleum Co. Hardie has managed financial and administrative matters in such businesses as publishing, food products, and electronic instrumentation companies.

''We are pleased to have Dave join the board and look forward to the experience and insight his background will provide the board,'' said Robert Crist, president and chief executive officer. Crist added, ''Many of the issues that face today's board of directors requires input from all sectors of business and professional community and the addition of Dave Hardie will further strengthen the ARC board.''

Hardie has been with Hallador Inc. since its inception in 1979, and prior to that he was more actively involved in Freedom Newspapers Inc., a family owned business. Hardie has a business degree from California Polytechnic State University and graduated from the Harvard Business School, Owner/President Management Program in February 1990. He is also a member of the National Association of Corporate Directors.

American Recreation Centers Inc. is the largest publicly held corporation in the country devoted primarily to the operation of bowling centers. The company operates 27 bowling centers, 22 in California, and five in Texas with an aggregate 1,126 lanes.

The company is also active in the development and management of real estate. Real estate activities include management and operation of bowling division real estate as well as conversion of non-productive real estate assets, including non-profitable bowling centers, into more productive assets.

#90318b0032 11/14/1990 ~Business Wire
VENTURA, CA (NOV. 14) BUSINESS WIRE - Benton Oil and Gas Co. (OTC:BNTN) Wednesday announced record results of operations for the quarter ended Sept. 30, 1990.

Revenues for the third quarter were $1,496,478 compared with $176,108 for the same quarter of 1989. Third quarter expenses were $993,410 for 1990, compared with $280,659 for 1989. The net income for the quarter was $503,068, or 11 cents per share, compared with a 1989 third-quarter loss of $104,551, or 5 cents per share.

For the nine months ended Sept. 30, 1990, revenues were $2,159,366, compared with $280,008 for the same period of 1989. Nine-month expenses were $2,336,828 for 1990, compared with $670,289 for 1989. The net loss for the nine months of 1990 was $177,462, or 5 cents per share, compared with a corresponding 1989 period loss of $390,281, or 22 cents per share.

The company's oil sales were significantly impacted by the Persian Gulf situation during the third quarter. The average price per barrel of oil at West Cote Blanche Bay increased to approximately $31.59 in September from approximately $16.82 in July. The company expects oil and gas production and revenues to increase during the remainder of 1990 as its acquisition and development efforts at West Cote Blanche Bay and Pershing continue.

Also, the company experienced relatively high levels of repair and maintenance lease operating costs during the first half of 1990. Benton expects fewer of these activities during the remainder of 1990 and that lease operating costs will decline relative to oil and gas revenues. The company believes that as it continues to grow, results from operations during 1990 will not be comparable to the results of corresponding prior periods.

Benton Oil and Gas Co., based in Ventura, is an independent oil and gas exploration and production company with operations in California, Colorado, Oklahoma, Mississippi, Texas and Louisiana. Its common stock (symbol BNTN) is traded OTC.

CAMARILLO, CALIF. (NOV. 14) BUSINESS WIRE - Everest & Jennings International Ltd. (ASE:EJ.A/EJ.B) Wednesday announced that it has reached an agreement in principle with its primary domestic lender to extend its current long-term financing agreement.

This agreement provides for long-term financing through June 30, 1992, under favorable terms to the company.

Commenting on the agreement, Barre Rorabaugh, president and chief executive officer, stated, ''This financing agreement forms the foundation of the company's restructuring plan and, in conjunction with the company's new

products incorporating significant innovations and improvements and the extraordinary efforts of our employees, helps pave the way for future growth and profitability.''

Additionally, Rorabaugh indicated that the company will incur a substantial third-quarter loss resulting primarily from additional restructuring charges incorporating a provision for losses on the expected sale of the company's Camarillo facility. He also stated that negotiations with the company's principal shareholder concerning their secured and unsecured debt are continuing.

In a separate agreement, the board of directors elected Robert C. Sherburne as chairman. Sherburne has served on the company's board since 1982 and is a member of the board of directors of Zero Corp., a NYSE company.

Everest & Jennings is engaged in the design, manufacture and marketing of wheelchairs and other durable medical equipment to worldwide markets, primarily in North America and Western Europe.

SEATTLE (NOV. 14) BUSINESS WIRE - Alaska Airlines Wednesday unveiled its first vacation packages to the three beach resorts it serves on the West Coast of Mexico -- Los Cabos, Puerto Vallarta and Mazatlan.

Packages include round trip airfare, hotel accommodations that span the budget spectrum, transfers between all hotels and airports and most taxes.

Eight hotels are available for the choosing in Puerto Vallarta, seven in Mazatlan, and nine -- plus a condominium -- in Los Cabos. Each of the properties is rated between four-star and deluxe.

Los Cabos airport serves the Southern Baja resort communities of Cabo San Lucas and San Jose Del Cabo.

''These packages represent some of the most affordable and attractive beach front opportunities around,'' said Bill McKnight, Alaska's vice president of marketing.

To illustrate: round trip airfare from Los Angeles, three nights lodging, most taxes and round trip airport-to-hotel transfers for two adults in Mazatlan is available for as little as $336 per person. A similar package from San

Francisco to Puerto Vallarta can run as low as $428 per person, while Seattle-Los Cabos can be as low as $506 per person.

Packages are available from each of the more than 60 cities Alaska and sister carrier Horizon Air serve in the West Coast and Rocky Mountain regions. Prices vary depending on season, hotel and days of travel.

For more information, contact your travel agent or call Alaska Airlines Vacations at 1-800-468-2248

#90318b0062 11/14/1990 ~Business Wire

SAN FRANCISCO (NOV. 14) BUSINESS WIRE - Pacific Gas and Electric Co. and Shell Oil Co. Wednesday announced jointly plans to install compressed natural gas dispensers at selected Shell service stations in PG&E's Northern and Central California service area.

The installations will be the first at retail service stations in Northern California. Final details of the program, including the number of dispensers to be installed, station sites, and the installation schedule, are being developed.

At the outset, the dispensers will be for use by fleet vehicles whose operators have signed contracts with PG&E for compressed natural gas (CNG) service. Later, it is expected that any vehicle equipped to operate on CNG will be able to refuel at the Shell locations.

PG&E's Bryan said that CNG now has a gasoline-equivalent cost of about 70 cents a gallon. He added that emissions from CNG vehicles are significantly lower than from vehicles powered by conventional fuels.

The utility has a proposal before the California Public Utilities Commission to add 25 more stations by the end of 1992 -- six at PG&E-owned sites, six at oil company service stations, and 13 at the refueling headquarters of major fleet users.

Of the 800,000 fleet trucks, vans and buses in PG&E's 94,000-square-mile service area, an estimated 50,000 are suitable for conversion to CNG operation Bryan said.

GLENDALE, CA (NOV. 14) BUSINESS WIRE - Pollution Research and Control Corp. (NASDAQ:PRCC) Wednesday reported it had received a contract award from the South Korean EPA for approximately $550,000 for air pollution monitoring instruments.

A. E. Gosselin Jr., president and chief executive officer, said that, ''Since 1988, when the company was awarded monitoring for the Olympic Games, PRCC has received every EPA award for air pollution monitoring systems in South Korea.''

Gosselin also stated, ''This award is particularly gratifying since, as the smallest company in this field of business, we now are the single largest supplier in South Korea, more than all others combined. This factor is even more important when the immensity of the remaining market is considered.''

Gosselin noted that a significant factor in the award process was that, regardless of size, PRCC is the only company that designs and manufactures all components of an air pollutant monitoring system. He added, ''Our lead in technology is finally overcoming the marketing power of size.''

Pollution Research and Control designs, manufactures and markets air pollution monitoring instruments, nationally and internationally, under the trade name Dasibi.

#90318b0070 11/14/1990 ~Business Wire
DALLAS (NOV. 14) BUSINESS WIRE - Income Opportunity Realty Trust (ASE:IOT) Wednesday announced operating results for the third-quarter and nine-months ended Sept. 30.

For the three-months ended Sept. 30 the trust recorded a net loss of $7.3 million, or $1.98 per share, on revenues of $2 million, compared with a net loss of $3 million, or 75 cents per share, on revenues of $3.1 million in the third quarter of the prior year.

For the nine-months ended Sept. 30 the trust recorded a net loss of $8.5 million, or $2.28 per share, on revenues of $6 million, compared with a net

loss of $4.9 million, or $1.30 per share, on revenues of $10.5 million in the first nine months of 1989.

As previously indicated, Income Opportunity Realty Trust recorded a provision for losses of $6.6 million in the third quarter of 1990. The total provision for losses was $7.3 million in the first nine months of 1990.

These provisions were a result of the in-substance foreclosure of a mortgage loan in the second quarter, and the permanent impairment of a joint venture equity property and a loss reserve on a second mortgage lien secured by an office building in the third quarter.

Income Opportunity's financial condition has seriously declined in recent years and liquidity has weakened.

The trust reported that it will be unable to generate sufficient cash to meet its various cash requirements during the remainder of 1990 and in 1991 unless it is able to liquidate a substantial portion of its assets or attain financing against its unencumbered properties and mortgages receivable.

As a consequence, there is no assurance that the trust will have sufficient liquidity to meet its obligations.

Income Opportunity Realty Trust is a combination mortgage and equity real estate investment trust which operates nationwide.

KANSAS CITY, MO (NOV. 14) BUSINESS WIRE - At their regular meeting on Nov. 14 1990, the board of directors of BMA Corp. (BMAC) approved the following:

- declared a regular quarterly dividend of 30 cents per share payable Dec. 4

to stockholders of record Nov. 27. This is the 140th consecutive dividend paid.

- reduced board membership to 12 directors, from the 15 serving prior to the recent sale of its insurance subsidiary, Business Men's Assurance Co.

BMAC chairman of the board, W. D. Grant, said, ''We gratefully appreciate the many contributions to the board made by Oscar R. Klein, J. William Sayler Jr., John E. Walker, Arthur J. Doyle, William L. Adams, and Charles E. Yonkers, as they step down from the board after many fine years of service. We are pleased to welcome to the board three new members: John H. Robinson, Jr., executive partner of Black & Veatch; and Beth S. Hall and James R. Seward, senior vice presidents, BMA Corp.''

#90318b0081 11/14/1990 ~Business Wire

ENGLEWOOD, CO (NOV. 14) BUSINESS WIRE - Basic Earth Science Systems Inc. had net income of $90,000, less than one cent per share, on oil and gas sales of $975,000 for the six months ended Sept. 30, 1990, compared to a net loss of $25,000, less than one cent per share, on oil and gas sales of $854,000 for the comparable 1989 period, it was announced Wednesday by G.W. Breuer, president.

The increase in sales revenue was primarily due to the recent surge in oil prices. Normal production decline from 40,698 barrels in the 1989 period to 39,711 barrels in the 1990 period was more than offset by an increase in the average price per barrel fom $17.38 in 1989 to $19.94 in 1990.

For the quarter ended Sept. 30, 1990 Basic had net income of $117,000, less than one cent per share, on oil and gas sales of $552,000 compared to a net loss of $57,000, less than one cent per share, on oil and gas sales of $403,000 for the comparable 1989 period.

Once again, the increase in sales revenue can be attributed to the upward swing that oil prices have seen since the beginning of August 1990. Basic's average price per barrel in the 1990 quarter was $23.64 compared to an average price of $17.08 per barrel in the 1989 quarter.

Basic is an oil and gas exploration and production company with primary operations in south Texas and the Williston and Denver-Julesburg basins in the Rocky Mountain region. Basic is traded on NASDAQ under the symbol BSIC.

#90318b0082 11/14/1990 ~Business Wire
SANTA ANA, Calif. (NOV. 14) BUSINESS WIRE - GB Foods Corp. (NASDAQ:GBFC) announced Wednesday increased revenues and earnings for the third quarter ended Sept. 30, 1990.

Revenues increased to $1,359,993, up from $826,204 registered in the year earlier third-quarter period. Earnings before taxes increased to $31,688, up from $30,214. Net earnings decreased due to higher taxes to $13,188, compared with last year's third-quarter net earnings of $20,014.

Nine-month revenues increased to $3,643,797, up from $2,733,983 registered in the year earlier comparable period. Net earnings increased to $120,666, up from last year's nine-month net earnings of $69,764.

The company also disclosed Wednesday that it anticipates the signing of 10 new Green Burrito franchises prior to the end of the calendar year.

According to Robert Gibson, executive vice president of GB Foods, ''During the months of September and October the company suspended the sale of franchises in order to amend certain conditions of its franchise agreement. The company has just reopened franchise sales and is forwarding its backlog of 25 disclosure documents and franchise agreements out to franchisees for signature.''

''Furthermore, we are experiencing a greater demand for franchises than had been anticipated when the company made its initial public offering in August of 1990.''

GB Foods operates a 32-store chain of high-quality fast-food restaurants under the name of The Green Burrito. All of the company's locations are in Southern California. The company offers traditional Mexican fare, which are specially formulated to produce milder flavors than are typically associated with Mexican food. All food is prepared in the company's central commissary in order to insure the high quality and consistency of product.

#90318b0083 11/14/1990 ~Business Wire
DALLAS (NOV. 14) BUSINESS WIRE - Transcontinental Realty Investors Inc. (NYSE:TCI) Wednesday announced operating results for the third quarter and nine months ended Sept. 30, 1990.

For the three months ended Sept. 30, 1990, the company recorded a net loss of $5.7 million, or $1.78 per share, on revenues of $6.9 million, compared with a net loss of $793,000, or 25 cents per share, on revenues of $7.6 million in the third quarter of the prior year.

For the nine months ended Sept. 30, 1990, the company recorded a net loss of $7.8 million, or $2.43 per share, on revenues of $20.4 million, compared with net income of $703,000, or 23 cents per share, on revenues of $23.9 million in the first nine months of 1989.

Transcontinental recorded a provision for losses of $4.8 million in the first nine months of 1990 in connection with the foreclosure of a mortgage loan, the anticipated foreclosure of a mortgage loan secured by an apartment complex and a loss reserve on a first mortgage lien secured by two commercial buildings.

The company's provision for losses for the first nine months of 1989 was $476,000. During 1990's third quarter, the company acquired a 45 percent general partner's interest in a joint venture. As previously announced, this partnership purchased, for $2.7 million, a 55-unit apartment complex in Dallas with money loaned by Transcontinental.

Also during the third quarter the company initiated an odd-lot repurchase program. The program expired on Oct. 31, at which time the company had acquired approximately 150,000 shares.

Transcontinental Realty Investors Inc. is a combination mortgage and equity real estate investment trust which operates nationwide.

#90318b0125 11/14/1990 ~Business Wire

LOS ANGELES (NOV. 14) BUSINESS WIRE - Carolco Pictures Inc. (NYSE:CRC) Wednesday announced results for the third quarter and nine months ended Sept. 30, 1990.

Revenues for the third quarter of 1990 increased 151 percent to $90,626,000 from $36,076,000 for the same period last year. Net income before payment of preferred stock dividends was $1,407,000 compared with $5.06 million for the third quarter of 1989.

Net income attributable to common stock of $220,000 for the third quarter 1990 includes payment of preferred dividends of $1,187,000 on the company's Series B and Series C Convertible Preferred Stock. For the third quarter Carolco recognized $4,302,000 as its share of the operations of LIVE Entertainment. During the third quarter of 1989, LIVE's contribution of $6,863,000 included

approximately $4.4 million from the proceeds of a key man life insurance policy.

Earnings per share were 5 cents for the quarter before taking into account the payment of the Preferred Stock dividends, compared with 17 cents for the third quarter of 1989. Earnings per share attributable to common stock was 1 cent for the three-month period.

For the full year it is anticipated that the preferred dividends paid will not be included in the earnings per share calculations as such inclusion would be anti-dilutive.

Carolco Pictures is a diversified entertainment company which finances, produces and leases motion pictures for exhibition in domestic (United States and Canada) and foreign theatrical markets and for later worldwide release in all media including home video and pay and free television.

Carolco includes Orbis Communications, a leader in the television distribution and advertising sales industry, the IndieProd company, an IndieProd company, an independent motion picture production company headed by Dan Melnick, Carolco Licensing which arranges licenses for characters and similar rights for motion pictures, and Carolco Music which handles the development and exploitation of music publishing rights.

Carolco owns a 47 percent interest in LIVE Entertainment Inc. LIVE is a diversified entertainment software producer, distributor and retailer, with headquarters in Los Angeles.

LIVE is the parent company of Los Angeles-based LIVE Home Video Inc., one of the nation's leading producer/distributors of home video; Lieberman Enterprises, one of the country's top rackjobbers of home video, music and personal computer software; and Strawberries Records Tapes & CDs, the dominant specialty music retail chain in the New England area, based in Milford, Mass.

#90318b0131 11/14/1990 ~Business Wire

CULVER CITY, CA (NOV. 14) BUSINESS WIRE - Showscan Corp. (NASDAQ:SHOW) said Wednesday that it has extended its contract with its largest customer, Imagine Japan Inc.

According to the announcement made by Showscan President Roy Aaron, the new agreement provides for aggregate minimum royalties to Showscan over the next three years of approximately $4.5 million. Showscan has also awarded an extension of geographic exclusivity for three years to Imagine Japan and

broadened their product representation to include Showscan Specialty Theaters and specialty films.

Five previously contracted Dynamic Motion Simulators (DMSs) will be purchased over the next 13 months, completing the 10 DMSs originally ordered by Imagine Japan. Aaron said, ''We are particularly pleased with the additional vote of confidence in the Showscan technology that this contract extension represents.''

In commenting, Aaron said: ''An excellent relationship has developed between our two companies. Both companies are confident that many more than the initial 10 DMSs will be installed in Japan.

''This is especially true in light of Imagine Japan's participation in our new space-ride film and attraction being produced with Industrial Light and Magic, which we have begun marketing at the International Association of Amusement Parks and Attractions convention in Washington, D.C. this week.''

Showscan Chief Financial Officer James Sorensen said the company values the increased minimum royalties and licensing fees, together with the confirmed equipment sales at more than $10 million. ''The extended contract doubles the minimum royalty and licensing fee per installation,'' he said, adding that ''in addition to the higher minimum royalties, the five newly confirmed DMSs should generate several million dollars in equipment revenue.''

Showscan develops and supplies advanced image and experience technologies to stimulate, entertain and educate the public. It is also developing products to use in high-definition television.

#90318b0139 11/14/1990 ~Business Wire

LAS VEGAS (NOV. 14) BUSINESS WIRE - Southwest Gas Corp. (NYSE:SWX) recorded a third quarter loss of 34 cents per share, compared to a loss of 14 cents per share for the same quarter a year ago, according to George C. Biehl, senior vice president and chief financial officer.

The company's third quarter 1990 loss applicable to common stock was $6,723,000, compared to a deficit $2,743,000 in the third quarter of 1989.

Consolidated net loss for the quarter was $6,322,000, compared to a net loss of $2,299,000 for the same period in 1989. The gas segment's contribution to

the consolidated total was a deficit $7,604,000 during the current quarter, compared to a deficit of $6,694,000 recorded in the third quarter of 1989.

Biehl attributed the decrease in earnings from the gas operations segment to increased operating costs associated with providing service to the company's growing customer base, increased depreciation expense and general taxes relating to natural gas pipe replacement programs in Arizona, and costs for expanding and upgrading operating facilities.

Net earnings from the company's financial services subsidiary, PriMerit Bank, also decreased, from $5,173,000 in the third quarter of 1989 (contributing $4,395,000 to consolidated net income after deducting tax-effected carrying costs associated with its acquisition by Southwest Gas) to $2,341,000 in the third quarter of 1990 (contributing $1,282,000 to consolidated net income after deducting tax-effected carrying costs).

According to Biehl, the Bank's 1990 contribution to consolidated net income was lower than the previous year due principally to a decrease in real estate development income, a non-recurring gain on the sale of preferred stock related to its investment in the Federal Home Loan Mortgage Corp. in July 1989 and increased general and administrative expenses due to the expansion of PriMerit's branch network in Nevada and Arizona, offset to a certain extent by a significant improvement in net interest margin.

Consolidated operating revenues for the third quarter of 1990 were $168,850,000 up slightly from $168,341,000 for the same quarter a year ago. Average outstanding common shares increased to 19,682,000 during the third quarter 1990 from 19,087,000 in 1989.

For the nine months ended Sept. 30, 1990, consolidated net income was $8,951,000, down from $20,559,000 for the nine months ended Sept. 30, 1989.

Net income applicable to common stock was $7,737,000, revenues were $614,162,000 and earnings per share were 40 cents (based on 19,530,000 average outstanding common shares) for the nine months ended Sept. 30, 1990, compared to $19,215,000, $610,066,000 and $1.01 (based on 18,940,000 average outstanding common shares), respectively, for the nine months ended Sept. 30, 1989.

Southwest Gas is a diversified natural gas and financial services organization. It provides natural gas to over 800,000 customers in Nevada, Arizona and California. In addition, it provides gas for resale to almost 100,000 customers of Sierra Pacific Power Co. and CP National Corp.

PriMerit Bank markets a wide variety of consumer financial products and services through branches in Nevada and metropolitan Phoenix. A federally chartered savings bank, PriMerit also engages in residential real estate development in Nevada and California as well as single-family home lending in

KANSAS CITY, MO (NOV. 14) BUSINESS WIRE - William Pfeiffer has been named senior vice president of the Sprint Data Group, according to Ron LeMay, president of US Sprint.

Pfeiffer is succeeding Floyd Trogdon who will be retiring effective Feb. 28, 1991.

Pfeiffer's appointment is effective Nov. 19. He'll report to LeMay and be responsible for the planning, development, implementation and marketing of data products and services that will continue to position US Sprint as the data market leader.

''We're very pleased to have a person of Bill Pfeiffer's outstanding talent and industry credentials on board with Sprint,'' LeMay said.

Pfeiffer was vice president and chief operating executive of the Data Network Division of Northern Telecom where he had full profit and loss responsibility for Northern Telecom's data packet network product line serving the domestic commercial, telco and government markets. Prior to joining Northern Telecom in 1986, he was vice president, MIS for ITT Telecom, North America.

Until his retirement, Trogdon will continue to report directly to LeMay assisting in the integration of data strategies with the other high focus activities of the long distance division.

''When Floyd accepted his current assignment, we understood he was looking forward to retirement in early 1991,'' LeMay said. ''We're truly grateful for his 15 years of service to this company, and I'm personally appreciative for his leadership in the development of data capabilities that have made US Sprint the leader in the data market.''

US Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company with $7.5 billion in revenues. US Sprint provides a comprehensive array of voice, data and video communications products and services on the nation's only all-digital, fiber-optic network.

SEATTLE (NOV. 14) BUSINESS WIRE - Seattle FilmWorks Inc. (NASDAQ: FOTO) Wednesday announced record net income of $2,095,000, or $1.09 per share, for the fiscal year ended Sept. 29, 1990.

This represents a 24 percent improvement over income for fiscal 1989 of $1,693,000, or 86 cents per share, excluding a gain from settlement of lawsuit in fiscal 1989. Net revenues for fiscal 1990 were $32,674,000, up 6 percent from $30,682,000 in fiscal 1989.

For the fourth quarter of fiscal 1990, net income was $1,138,000, or 60 cents per share, compared to $959,000, or 50 cents per share, for the same period of fiscal 1989. Net revenues for the fourth quarter of fiscal 1990 were $9,910,000, up 3 percent from $9,627,000 for the same quarter of the previous fiscal year. Adjusting for the extra week in the fourth quarter in fiscal 1989, the fourth quarter revenue in fiscal 1990 is up approximately 10 percent.

''Our record earnings, which were partially due to the elimination of long-term debt, reflect a very successful year and position us well for the future,'' stated Gary Christophersen, president and chief executive officer. He also noted that the Nov. 12, 1990, issue of ''Forbes'' magazine ranked the company 10th in Forbes' 1990 list of the ''200 Best Small Companies in America.''

DURANGO, COLO. (NOV. 14) BUSINESS WIRE - James C. Sheppard, president of Centennial Savings Bank, F.S.B., announced fiscal 1990 earnings of $761,000, or $1.21 cents per share for the year ended Sept. 30, 1990, as compared to $509,000, or 81 cents per share, for the year ended Sept. 30, 1989.

Sheppard said, ''The improved earnings picture is reflective of the bank's acquisitions in the Grand Junction, Colo., and Montrose, Colo., markets along with an improving economy in Western Colorado.''

At Sept. 30, 1990, the bank reported total assets of $159.7 million as compared with $116.3 million at Sept. 30, 1989. The Savings Bank operates branches in Durango, Cortez, Dolores, Grand Junction, Montrose and Pagosa Springs in Western Colorado and a mortgage subsidiary, Centennial Mortgage Corp., in Farmington, N.M.

KANSAS CITY, MO (NOV. 14) BUSINESS WIRE - BHA Group Inc. (NASDAQ:BHAGA, BHAGB) Wednesday announced uanudited operating results for the fourth quarter and the fiscal year ended Sept. 30, 1990.

The company's two domestic subsidiaries, BHA Co. and PrecipTech Inc., performed in line with historical growth rates. The company's German subsidiary, Filtra GmbH, performed at unacceptable levels and the board of directors approved a provision in the 1990 fiscal year to downsize Filtra's operations.

Net sales for the year increased 28 percent to $72,003,000 from $56,247,000 the prior year. Net sales for the fourth quarter increased 24 percent to $18,602,000 from $15,039,000 for the same period in 1989. Net earnings for the year declined to $2,621,000 (40 cents per share) from $3,887,000 (67 cents per share) for fiscal 1989. For the fourth quarter the company reported a loss of $1,340,000, or a loss of 20 cents per share, compared to income of $922,000 (15 cents per share) for the same period in 1989.

Commenting on the results, Michael T. Zak, president and chief operating officer, said: ''The company's domestic operations were within our expectations and continue to grow at historical rates. If shown separately, domestic operations would have reported year-end sales of $64,729,000 and earnings of 85 cents per share, compared to $49,831,000 and 72 cents per share for 1989.

Final audited numbers will be available within the next three weeks.

BHA Group Inc. manufactures and markets replacement parts and provides maintenance and rebuilding services for industrial air pollution control equipment on a worldwide basis.

FREMONT, CA (NOV. 14) BUSINESS WIRE - Flextronics Inc. (NASDAQ:FLEX) Wednesday announced results for the quarter ended Sept. 30, 1990.

Net sales totaled $4,875,000 with a net loss of $9,234,000 or 99 cents per share, as compared with sales of $43,499,000 with a net loss of $6,905,000, or 74 cents per share, for the comparable quarter of the previous year.

For the six months ended Sept. 30, 1990, net sales were $33,832,000 with a net income of $780,000, or 8 cents per share, which included a gain on the recapitalization of the company's Asian operations of $14,698,000.

For the comparable period last year, net sales were $90,084,000 with a net loss of $9,182,000, or 99 cents. Weighted average shares outstanding were 9,281,000 for all periods.

Reported results include a provision of $6,911,000 for costs to be incurred in connection with the cessation of manufacturing operations at the company's plant in Fremont. Results for the quarter also include the company's 44 percent equity interest of $597,000 in the net income of Flex Holdings Pte. Ltd.

Flextronics Inc. is continuing restructuring activities begun in mid-1989. A key component of this restructuring was a transaction completed in June 1990, in which controlling interest in the company's Asian operations, now known as Flex Holdings Pte. Ltd., was sold to a group of institutional investors.

Following the cessation of electronics contract manufacturing operations in Fremont, Flextronics Inc.'s remaining activities will be management of its interest in Flex Holdings Pte. Ltd., and the operation of component testing laboratories in California and Maine.

#90318b0179 11/14/1990 ~Business Wire

KANSAS CITY, MO (NOV. 14) BUSINESS WIRE - SAZTEC International Inc. of Kansas

City Wednesday announced a return to profitability for the three-months ended Sept. 30.

For the quarter revenues were $5,983,579 with a net income reported of $83,170 or 2 cents per share.

This turnaround in earnings is partially attributed to the acquisition of Advanced Automation Associates Inc. (AAA), a New England-based data management company. In comparison to the prior six months, SAZTEC also experienced increased revenues in other lines of business including a resurgence of telephone revenues.

According to Richard C. Thompson, president and chief operating officer of SAZTEC, ''The first quarter of fiscal 1991 reflected the improvement we anticipated. I'm confident we will continue this progress as a result of our enhanced revenue base.''

SAZTEC International Inc. is traded in the over-the-counter market and is quoted on NASDAQ under the symbol SAZZ.

HOUSTON (NOV. 14) BUSINESS WIRE - Plains Resources Inc. (ASE:PLX) Wednesday reported a net loss of $335,000, or 5 cents per share, on total revenue of $13,888,000 for the quarter ended Sept. 30.

This contrasts with a net loss of $111,000, or 10 cents per share, on total revenue of $4,253,000 for the third quarter of 1989.

During the quarter, oil production increased 14 percent to 84,000 barrels from

74,000 barrels during the like period in 1989, and gas production increased 3 percent to approximately 1.1 billion cubic feet from about one billion cubic feet in the comparable quarter a year ago.

Average wellhead oil prices rose 26 percent to $22.70 per barrel during the quarter from a level of $18.02 per barrel in the prior year's quarter. Average wellhead natural gas prices, however, fell 14 percent to $1.86 per Mcf during the quarter from an average price of $2.17 per Mcf for the like period a year ago.

For the nine months ended Sept. 30, Plains sustained a net loss of $1.2 million on total revenue of $29,782,000, as contrasted with net income of $630,000 on total revenue of $14,511,000 for the like period in 1989.

#90318b0185 11/14/1990 ~Business Wire

KASHIWAZAKI, JAPAN (NOV. 14) BUSINESS WIRE - A 12-foot-diameter sculpture called ''Atomic Universe,'' symbolically representing the structure of a typical atom, was dedicated here recently as a tribute to the pioneering work of the Tokyo Electric Power Co. in the development of commercial nuclear power for Japan.

The sculpture is a gift from GE Nuclear Energy.

The sculpture is a duplicate of one located at GE Nuclear Energy headquarters at San Jose, Calif., and erected in 1960. Top officials from area Japanese governments, Tokyo Electric Power Co. (TEPCO), Japanese industry and GE attended the dedication ceremonies held at the TEPCO Kashiwazaki Kariwa nuclear power station's visitor center, 140 miles northwest of Tokyo.

John A. Urquhart, GE senior vice president, speaking at the dedication, cited the sculpture's inscription: ''Celebrating the importance of nuclear energy development in building the friendship and prosperity of the peoples of Japan and the United States.''

Urquhart said, ''From the beginning your leaders recognized, as we are all experiencing today in the Persian Gulf, that every nation, not just Japan, has a national economic as well as a security interest in developing alternative energy sources.

''Today, thanks to the courage and foresight of your leadership, we're celebrating the successful utilization of one of the safest and most economic

solutions to this worldwide energy demand: Nuclear Energy.''

He continued: ''Nuclear energy will carry an increasing share of Japan's electricity growth. First, because its nuclear fuel is an engineered energy source that provides a high assurance of availability and price stability. And second, because nuclear is the most environmentally benign base load energy source available.

''It is free of the atmospheric concerns for pollution, greenhouse effect and acid rain.''

Calling TEPCO ''a world leader in nuclear power plant operation and safety,'' he said: ''The sculpture is a reminder that you are not alone in this pursuit. It does celebrate our joint nuclear energy accomplishments to date. In the future when we pass by this sculpture, I hope it reminds us more of the unlimited opportunities that this remarkable technology can bring to our collective future.''

Today, Japan has 21 operating boiling water reactors (BWRs) supplied by GE or its licensees, Hitachi Ltd. and Toshiba Corp. In addition, five BWR units are under construction and three others are in planning stages.

The Kashiwazaki Kariwa site will be the location for two advanced design GE boiling water reactors (ABWR), each rated 1,350 megawatts, and associated GE turbine-generators. Construction on the first unit will begin in 1991. The site currently has three BWRs operating, each rated 1,100 megawatts. Another two units of the same rating are under construction.

GE power generation technology accounts for 60 percent of Japan's steam-generating capacity and 80 percent of TEPCO's output, the largest privately owned power company in the world. GE nuclear technology accounts for more than 50 percent of Japan's nuclear generating capacity and 100 percent of TEPCO's.

Urquhart noted that one of GE's earliest relationships with Japan's utility industry began in 1905 when GE supplied equipment for a hydro-power station.

Electricity's share of Japan's total energy consumption is expected to expand from about 39 percent today to 43 percent in the year 2000. In 2010, it's expected to be 50 percent, growing to 62 percent in 2030.

''What is clear in this field of high technology exchange is that there is room for both sides to benefit -- the Japanese in needed electric power sources to drive its economy -- and we Americans in a favorable balance-of-trade return,'' Urquhart said.

The sculpture, fabricated by California artisan Alan Osborne, weighs 6,000 pounds. Its orbital rings are reactor-grade stainless steel symbolizing man's

conquest of the atom for peaceful purposes.

More than 150,000 people are expected to view the sculpture annually during their visits to the TEPCO center.

Of TEPCO's nuclear power program, Urquhart said: ''Together we have shown that nuclear energy development can build friendship and prosperity for the peoples of Japan and the U.S. On behalf of the people at GE, I wish to offer this Atomic Universe sculpture as a symbol of our friendship and as an inspiration to the people of both our countries to carry on in this spirit.''

#90318b0189 11/14/1990 ~Business Wire

PLAINVIEW, NY (NOV. 14) BUSINESS WIRE - ARX Inc. (NYSE:ARX) reported financial results for the first quarter of fiscal 1991 which ended Sept. 30, 1990.

Net sales for the three months were $25,957,000 as compared to $20,993,000 in the same period last year. The company incurred a net loss of $(5,123,000), or (64 cents) per share, for the current three month comparable period.

The loss in the current period was attributable to a $5,266,000 loss in its T-Cas Corp. subsidiary, including allocable corporate overhead and interest expense. Included in this amount is a $4,400,000 loss reserve relating to revised estimates of contract costs on two telecommunications systems contracts scheduled for completion during the fiscal year ending June 30, 1991.

ARX further announced that the loss for the first quarter caused the company to fail to meet certain covenents under its revolving credit agreements.

While the company and the lending banks presently are negotiating a restructuring of the credit agreements, there are no assurances that the company will be successful in its efforts to either enter into a new agreement or obtain bank waivers with respect to its non-compliance with such covenants.

ARX Inc. is engaged in the design and manufacture of a wide variety of electronic and magnetic products and mechanical systems with industrial and defense applications, and provides engineering and support services to governmental agencies. The company also owns a controlling interest in VTX Electronics Corp. (ASE:VTX).

#90318b0192 11/14/1990 ~Business Wire

DALLAS (NOV. 14) BUSINESS WIRE - Pratt Hotel Corp. (AMEX:PHC) reported a net loss of $2,171,000, or (4 cents) per share, for the quarter ended Sept. 30, 1990, compared to a net loss of $2,813,000, or (6 cents) per share for the like period in 1989.

Net revenues for the 1990 third quarter amounted to $72,871,000 compared to net revenues for the 1989 third quarter of $73,598,000.

PHC's flagship property, the Sands on the Park in Atlantic City, N.J., reported net revenues of $69.7 million, a slight decrease from $70.2 million in the previous year. Casino revenues totaled $63.7 million, a .6 percent increase over the like three month period a year ago. For the first nine months of 1990, casino revenues increased 5.8 percent to $177.2 million.

''The Sands on the Park was one of only two Atlantic City casinos to post an increase in casino revenues for the quarter. This improvement comes in the face of a relatively flat casino industry as a whole and a slowdown in the general economic climate. Our slot revenue performance was especially favorable, with an 8.3 percent increase over the same quarter one year ago and a 13.2 percent increase for the first nine months of 1990,'' said William P. Weidner, president and chief operating officer.

Weidner noted that credit for the slot revenue increases was due to a package of slot marketing programs, including ActionCash, the company's recently introduced slot program that provides players with easy access to cash and complimentary incentives, along with the Paradise Isle high limit slot area and adjacent Island Club exclusive lounge, both introduced in the first half of 1990.

The company also noted that revenues were impacted favorably by an increase in the table games ''hold percentage'' of .9 percent over the like three month period one year ago. Hold percentage is the portion of gross wagering that a casino retains.

Operating costs were up just .1 percent for the third quarter compared to the previous year. ''We maintained revenues without increasing costs, thus allowing us to retain our operating margins while offering our guests outstanding customer service, superstar entertainment and special events,'' Weidner said.

For the nine months of 1990, Pratt posted a net loss of $16,383,000, or (32 cents) per share, compared with a net loss of $7,954,000, or (16 cents) per

share for the 1990's first nine months. Net revenues increased to $204.7 million compared with 1989's $193.8 million. The nine months results were impacted primarily by factors occurring during the first half of 1990 including, increased provisions for doubtful accounts, losses on obligatory investments and increased operating expenses.

AUSTIN, TX (NOV. 14) BUSINESS WIRE - Prime Medical Services Inc. (''Prime'') (NASDAQ: PMSI) Wednesday announced results for the third quarter of 1990.

For the three months ended Sept. 30, 1990, revenues decreased to $3,174,000 from $3,498,000 for the same period in 1989. The net profit amounted to $393,000, or $0.05 per share, vs. a net loss of $1,409,000, or $0.17 per share in 1989.

For the first nine months, Prime reported revenues of $10,173,000 vs. $10,413,000 in 1989. A net loss of $258,000, or $0.03 per share, compares to a loss of $2,961,000, or $0.35 per share, in 1989. The profit for the third quarter, 1990, included a non-recurring gain of $1,287,000 for the sale of the stock held by Prime in Employee Pharmaceuticals Inc., partially offset by approximately $470,000 of other non-recurring expenses related to insurance and taxes.

Prime Medical Services Inc. is engaged in providing non-medical management services to 47 cardiac rehabilitation clinics and seven imaging centers in 13 states.

#90318b0222 11/14/1990 ~Business Wire

DALLAS (NOV. 14) BUSINESS WIRE - Dallas-based United Medicorp Inc. (NASDAQ: UMCI), announced Wednesday that, for the three months ended Sept. 30, 1990, expenses exceeded revenues by $2,374,173.

Net revenue for the period totaled $165,735.

During the third quarter of 1990, the dollar value of medical insurance claims processed by United Medicorp increased by 167 percent when compared to the second quarter of 1990, reaching $10,448,000. The company expects that most of these claims will be collected in, and should generate fee revenue for, the fourth quarter.

The company made significant third quarter expenditures to carry out a nationwide marketing campaign which included media advertising and telemarketing. The campaign promoted both UMC's basic claims management and collection service and its backlog collection service. As a consequence of this campaign, management believes that revenues will increase during the fourth quarter of 1990.

In addition, United Medicorp devoted extensive efforts and funds towards enhancing its computer systems, claims processing, management and collection services and customer reports to better serve its clients, especially the targeted hospital market. The company intends to implement these product enhancements during the fourth quarter.

During August, 1990, United Medicorp completed a public offering of its common stock which generated net proceeds to the company of $8.4 million. The proceeds have been used to pay off short-term debt, to fund the national marketing campaign, and to provide working capital to fund ongoing development of the company's computer systems and services.

Third quarter revenues were less than those of the second quarter primarily due to the completion of a substantial backlog collection contract in June. Subsequent backlog collection projects were not initiated until September, when the effects of the company's new marketing campaign began to produce positive results.

According to G. Ray Miller, chairman and chief executive officer of United Medicorp Inc., ''With the completion of United Medicorp's product enhancements and the favorable results of our recent marketing efforts, the company is well-positioned to pursue its objective of profitability in early 1991.''

#90318b0228 11/14/1990 ~Business Wire

PARAMUS, NJ (NOV. 14) BUSINESS WIRE - Drivefone Inc. (NASDAQ:DFON) announced total revenues of $2,259,000 for the three months ended Sept. 30, 1990, compared with revenues of $2,806,000 in the like period of the prior fiscal year.

The company incurred a net loss of $194,000 for the three months ended Sept. 30, 1990, compared with a net loss of $197,000 in the prior year.

Michael Pfeffer, president of Drivefone Inc., stated, ''Total revenues during the quarter declined by approximately 20 percent from the corresponding period in fiscal 1989. While revenues from cellular carriers increased 41 percent from the prior year to $818,000, such gains were offset by a decline in revenues from the sale of cellular telephone hardware,'' he said.

''The decline in cellular telephone hardware sales occured for several reasons including the significant decline in the selling price of the company's hardware products, and management's decision to generally limit sales of lower margin telephones to those customers who also acquire cellular service through the company,'' Pfeffer continued.

''However, in the face of declining revenues, the company was able to improve its overall gross profit percentages and reduce selling, general and administrative expenses, thereby reducing losses slightly from the prior year '' he added.

Headquartered in Paramus, N.J., Drivefone Inc. has branch offices in Norwalk, Conn. and Waltham, Mass.

CHATSWORTH, CA (NOV. 14) BUSINESS WIRE - Image Entertainment Inc. (NASDAQ:DISK), one of the two largest licensors and distributors of laserdiscs in the United States, Wednesday announced financial results for the three and six months ended Sept. 30, 1990.

Revenues for the three months ended Sept. 30, 1990, were $9,524,477, compared with $5,976,685, for the three months ended Sept. 30, 1989, an increase of 59 percent. The net loss for second quarter of fiscal 1991 was $624,577 (less than 1 cent per share) vs. a net loss for the second quarter of fiscal 1990 of $218,945 (less than 1 cent per share).

Revenues for the six months ended Sept. 30, 1990, were a record $19,710,855, compared with $10,663,526, for the six months ended Sept. 30, 1989, an increase of 85 percent. The net loss for the first six months of fiscal 1991 was $512,717 (less than 1 cent per share) vs. a net loss for the first six months of fiscal 1990 of $313,569 (less than 1 cent per share).

Martin W. Greenwald, president and chief executive officer, stated, ''While pleased with the continued expansion in revenues during the three- and six-month periods just ended, our results would have been more impressive were it not for a shipping delay, which caused approximately $1.9 million in sales to be pushed into the first two days of our next quarter, which ends Dec. 31, 1990.''

''We attribute our sales growth primarily to increased consumer demand, an increase in the number of Image releases, an increase in number of laserdisc retail outlets, increased laserdisc manufacturing capacity and increased availability of laserdisc players at lower prices.''

Image Entertainment has exclusive licensing arrangements with companies such as CBS Music Video, Hanna-Barbera Home Video, HBO Home Video Inc., LIVE and Orion Home Video and wholesale distribution arrangements with Buena Vista Home Video, Warner Home Video, MGM/UA Home Video and MCA/Universal Home Video.

The company is also the national distributor of CBS/Fox Video product. To date, Image has released approximately 1,500 exclusive titles.

#90318b0247 11/14/1990 ~Business Wire

ST. LOUIS (NOV. 14) BUSINESS WIRE - Invitron Corp. announced Wednesday revenues of $0.6 million and a net loss of $3.8 million, or 25 cents per share for the third quarter of 1990.

This compares with $1.9 million of revenues and a net loss of $5.7 million, or 37 cents per share, for the third quarter of 1989.

Invitron had revenues of $3.3 million for the first three quarters of 1990, as compared with $9.8 million for the comparable 1989 period. The net loss for the first three quarters of 1990 was $13.3 million, or 85 cents per share, vs. $10.5 million, or 68 cents per share, for the comparable 1989 period.

Total operating costs and expenses for the third quarter of 1990 were $5.3 million which included $0.3 million in expenses in connection with the previously announced termination of approximately one-third of the company's work force which took effect in November.

Total operating costs and expenses for the first three quarters of 1990 were $17.8 million, which included $0.6 million in expenses in connection with the November employee terminations and an earlier termination of employees in April 1990. Total operating costs and expenses for the third quarter also included $0.7 million in expenses related to Invitron's employee retention plan.

During the third quarter of 1990, Invitron completed the sale of its investment in Tanox Biosystems Inc. for $2.4 million. A gain of $0.9 million was recognized on the sale.

Invitron continues to conduct preliminary and informational discussions with pharmaceutical and/or biotechnology companies in efforts to seek additional funds for the company through the sale of equity or assets and/or the establishment of licensing and manufacturing relationships.

Certain of these discussions recently have focused on the sale of company assets, including the company's manufacturing facility, and the possible establishment of a separately funded product research and development organization of which the company might own a minority interest. There is no assurance that any of these discussions will result in a transaction.

As of Sept. 30, Invitron had $4.1 million of cash and cash equivalents available for operating expenses. In filings made today with the Securities and Exchange Commission, the company reported, in part, that it will need additional funds from external capital sources in order to operate its business beyond 1990.

Invitron further reported that if its capital raising efforts do not generate additional funding in the very near term, then it will be necessary for it to further reduce employment and other expenses, to begin to liquidate its assets and to wind up its affairs.

#90318b0616 11/14/1990 ~Business Wire

SANTA ANA, CALIF. (NOV. 14) BUSINESS WIRE - The First American Financial Corp. (NASDAQ:FAMRA) reported that the company reached record revenues again this quarter and was profitable for both the third quarter and year to date, despite increases in title losses and other claims.

Revenues for the three months ended Sept. 30, 1990, were a record $185,949,000 compared with $176,984,000 for the third quarter 1989. Net income totaled $1,377,000, or 14 cents per share, as compared with $5,324,000, or 53 cents per share, for the third quarter 1989.

Revenues for the nine-month period ended Sept. 30, 1990, amounted to a record $534,894,000, compared with $512,497,000 for the same period in 1989. Net income for the period totaled $2,787,000, or 28 cents per share, as opposed to $6,016,000, or 60 cents per share, for the same period in 1989.

''Despite record revenues, provisions for title losses and other claims continue to depress earnings,'' said D.P. Kennedy, president.

''Although we are pleased with the increased market share as evidenced by the growing revenues, we are much more concerned with improving our profit structure,'' Kennedy continued. ''We are confident that the systems, procedures and training programs in place will substantially improve our claims experience, and thus our profitability, in the immediate future.''

The First American Financial Corp., based in Santa Ana, operates its title

insurance business through its principal subsidiary, First American Title Insurance Co., one of the largest title insurers in the nation.

The company offers title services through a network of more than 5,500 offices or agents in all 50 states. It also provides title services abroad in the Bahamas, Guam, Mexico, Puerto Rico, the Virgin Islands and the United Kingdom.

LAGUNA HILLS, CA (NOV. 14) BUSINESS WIRE - Sir Speedy has opened quick printing centers in Taiwan and Colombia.

The company has also reached an agreement to begin operations in Spain and Portugal early in 1991.

In making the announcement Wednesday, Sir Speedy's president and chief executive officer, Don Lowe, said he expects substantial international growth and ''other pending developments'' could make the company the world's largest quick printing system by 1995.

Sir Speedy is already the quick printing industry sales volume leader. System-wide sales were $306 million in 1989, with 860 operating units.

The master franchise agreements in Taiwan, Colombia, Spain and Portugal could result in 100 new centers. According to Lowe, the openings are part of an ''aggressive international expansion'' that calls for 250 new international printing centers over the next five years. He expects most foreign growth to come from operations in Asia, South America and Europe.

Sir Speedy's first Colombian operation opened in Bogota in October. It is the first of 25 centers planned for Colombia over the next five years. Area franchisor Carlos Leyva is a publisher who has also brought Burger King and the first Apple Computer distributorship to Colombia.

The company's Taiwan operation opened in November. Also the first of 25 centers, it is located in the capital city of Taipei. Texas-educated chemical executive Sinoese Liou heads the investor group, which operates the area franchise. A second center will open in Taipei this January.

Recently, the Spanish government approved an agreement for 50 Sir Speedy Centers in Spain and Portugal over the next 10 years. The area franchisor for the two countries is Luis Fernandez. He is an executive with a leading American multinational packaged-goods company.

With competitive beachheads in Europe, Asia and South America, Sir Speedy's vice president in charge of international development, Ken Ross, anticipates strong international growth in 1991. ''Based on current interest levels, we expect to double the number of foreign countries with Sir Speedy operations next year,'' he said.

Sir Speedy Inc. established its first international operations in Canada and Hong Kong in the 1980s. The 22-year-old company is based in Laguna Hills.

#90318b0619 11/14/1990 ~Business Wire

LENEXA, KS (NOV. 14) BUSINESS WIRE - Home Office Reference Laboratory Inc. (HORL) Thursday announced net earnings for the third quarter 1990 of $2.9 million, or 22 cents per share, on revenues of $19.4 million compared with net earnings of $3.7 million, or 28 cents per share on revenues of $19.7 million the like quarter last year.

Total unit testing volumes increased in the third quarter 1990 compared to the like period in 1989. However, these volume increases were not sufficient to offset the impact of decreased unit prices, thus resulting in the decreased revenues. Unit prices decreased primarily as a result of competitive pressures and additional volume discounts.

Gwinett Laboratory Inc. (HORL's wholly owned, Georgia subsidiary) sustained heavy damage from a fire in the laboratory area on Sept. 1, 1990. All testing performed at Gwinnett has been transferred to HORL's Kansas operation and at present, HORL does not plan to reopen the Gwinnett facility. The financial impact of the fire loss and the closing of this facility, net of anticipated insurance proceeds, resulted in a net loss of $0.2 million for the third quarter.

#90318b0621 11/14/1990 ~Business Wire

SUNNYVALE, CALIF. (NOV. 14) BUSINESS WIRE - Logic Devices Inc. (NASDAQ:LOGC) Wednesday reported net income of $222,000, or 5 cents per share, on net sales of $3,854,000 for the third quarter ended Sept. 30.

This compares with net income of $360,000, or 8 cents per share, on net sales of $3,231,000 for the prior quarter ended June 30, 1990.

Net income for the quarter ended Sept. 30, 1989 was $830,000, or 18 cents per share, on net sales of $3,574,000. Net income for the nine months ended Sept. 30 was $1,015,000, or 22 cents per share, on net sales of $10,365,000. This compares with net income of $2,869,000, or 63 cents per share, on net sales of $11,416,000 for nine months ended Sept. 30, 1989.

Net income for the nine months ended Sept. 30, 1989 quarter was restated upward by 9 cents per share, or $438,000 from those originally reported as a result of 1989 year-end audit adjustments reflecting changes in accounting policies on recognition of revenues on distributor shipment and capitalization of certain product development-related tooling expenses.

''During the third quarter, we enjoyed exceptionally strong booking activity on our ultra high-speed static memories. As the quarter unfolded we found that, in spite of a slowing economic environment and the usual summer doldrums for semiconductor sales, our revenue opportunities became limited by our ability to manufacture and test sufficient product to meet potential opportunities.

''To address this, we significantly expanded our manufacturing team which is diligently working to increase our production volume on new products. This challenge is continuously exacerbated by the number of new products entering the manufacturing system. These products should fuel the accelerated growth expected next year and beyond.

''However, we continue to be faced with a large number of new products entering the manufacturing system which present both opportunity and challenge. Thus, the challenge for the fourth quarter is to improve our manufacturing throughput to meet the increasing customer demand for these products. Overall, we feel well positioned to accommodate any occasional downside that may arise in this time of slowing economic activity,'' stated Bill Volz, president of Logic Devices.

Logic Devices manufactures ultra high-performance CMOS digital integrated circuits for applications requiring high operating speeds and low operating power. The company's products include performance leadership static random access memories (SRAMs), arithmetic computational circuits used in real-time and signal processing applications, and proprietary products which address specific application requirements.

The company's products are used in numerically intensive applications including computers, workstations, medical instrumentation, video image processing, and telecommunications.

#90318b0622 11/14/1990 ~Business Wire

ANTWERP, BELGIUM (NOV. 14) BUSINESS WIRE - Shlomo Dovrat, president and chief executive officer of OSHAP TECHNOLOGIES LTD. (NASDAQ/NMS:OSHSF, OSHWF; NASDAQ:OSHUF) Wednesday announced results for the nine months ended Sept. 30.

Net sales for the nine months ended Sept. 30, 1990, increased by 27.2 percent to BF 926,749,000 (US $28,727,000) from BF 728,847,000 (US $22,593,000) for the same period last year. The company reported a net profit of BF 79,114,000 (US $2,452,000), or BF 13.91 (US 43 cents) per share, as compared to BF 45,461,000 (US $1,409,000), or BF 8.37 (US 26 cents per share, for the same period in 1989.

Net profits for the nine months ended Sept. 30, 1989 and Sept. 30, 1990 were

positively affected by capital gains related to capital raising transactions by the company's Tecnomatix Technologies subsidiary (in the second quarter of 1989) and the company's Tecnomatix medical subsidiary (in the first quarter of 1990).

The gross profit for the nine months ended Sept. 30, 1990 increased by 68.5 percent, representing 42.6 percent of sales, compared with 32.2 percent of sales for the same period a year ago. The company reported an operating profit before financial expenses of BF 19,905,000 (US $617,000) as compared to a loss of BF 49,527,000 (US $1,535,000) for the nine months ended Sept. 30, 1989.

The company had an operating profit after financial expenses of BF 33,056,000 (US $1,025,000) as compared to a loss of BF 57,511,000 (US $1,783,000) for the nine months ended Sept. 30, 1989.

OSHAP TECHNOLOGIES LTD. provides advanced computer aided engineering workstations, flexible machining systems and standard automation products to major worldwide industrial concerns. OSHAP is also a manufacturer of hyperthermia and medical imaging equipment, and software products primarily used for Inter-Bank communications.

RIVERSIDE, CA (NOV. 14) BUSINESS WIRE - Fleetwood Enterprises Inc. (NYSE/PSE:FLE), the nation's leading producer of recreational vehicles and manufactured housing, Wednesday announced the appointment of Lyle N. Larkin to the position of treasurer.

Larkin replaces David R. Marriner who has left the company.

Larkin joined Fleetwood in 1979 as a division controller for the motor home division. He was subsequently promoted to group controller for the recreational vehicle group and most recently held the position of controller - operations. Prior to joining Fleetwood, Larkin spent nine years with a national CPA firm.

#90318b0624 11/14/1990 ~Business Wire

KANSAS CITY, MO. (NOV. 14) BUSINESS WIRE - Net earnings for BMA Corp. (BMAC) in the third quarter 1990 totaled $5.5 million, or 58 cents per share, on revenues of $21.4 million, compared with net earnings of $9.6 million, or 99 cents per share, for the same quarter last year.

Included in third quarter results were two significant transactions: a net gain, after-tax, of $32.2 million from the closing of the sale of 95 percent of a wholly owned insurance subsidiary, Business Men's Assurance Co.; and an after tax-loss of $27.9 million on the carrying value of real estate assets.

W. Thomas Grant II, president and chief executive officer of BMA Corp., said, ''We are pleased with the after-tax value of $145 million received for BMAC's insurance operations, and that stockholders were able to directly share in the sale through the distribution of $35 million in the form of a special, one-time dividend of $3.70 per share.

''On Oct. 9, 1990, the corporation indicated that it was concerned with the weakening economy and its growing negative effect on real estate values. Following a thorough evaluation of prevailing market conditions and the corresponding effect on BMAC's real estate assets, it is management's opinion that the carrying value of BMAC's real estate portfolio has been impaired by this difficult economic period.

''Therefore, in the third quarter financials, we have provided for a loss in the carrying value of BMAC's real estate assets to reflect a book value of $86 million, which we believe is more commensurate with current market conditions.

#90318b0627 11/14/1990 ~Business Wire

WALNUT CREEK, CA (NOV. 14) BUSINESS WIRE - Mission Resource Partners L.P. (ASE:MRP) Wednesday reported a significant increase in net income for the third quarter ended Sept. 30.

Net income more than doubled to $3,217,995, or 74 cents per unit, compared with $1,402,636, or 32 cents per unit, in the comparable quarter a year ago. Revenues increased to $5,867,970 from $5,602,737 in the third quarter of 1989. Cash flow per unit was 93 cents, compared with 56 cents in 1989.

''While our oil and gas revenues were impacted negatively by a reduction in producing properties, they were enhanced by significant increases in oil and gas prices,'' said Douglas K. Brown, president of Mission Resources Inc., MRP's manager.

''Due to the sale of several properties,'' he continued, ''we have reduced our production capacity since a year ago. At the same time, oil and gas prices for the quarter have increased some 40 percent and 30 percent respectively, from $15.90 to $22.38 per barrel (Bbl) and $2.13 to $2.78 per thousand cubic feet (MCF).''

Brown attributed the partnership's increased profitability to a significant reduction in expenses, due to the restructuring program initiated last year. For the quarter, expenses were $2,649,975, a 37 percent decrease from the $4,200,101 of a year ago.

For the nine months ended Sept. 30, the partnership reported net income of $4,726,488, or $1.09 per unit, compared with $3,449,603, or 80 cents per unit in 1989. Revenues for the nine months were $13,670,837, compared with $14,422,993 in 1989. Cash flow per unit was $1.56, compared with $1.41 for the like period a year ago.

Brown said that completion of a $7.4 million capital expenditure program on the Patrino Fee property, the partnership's principal property interest, had increased the partnership's current production to 2,100 Bbl and 2,300 MCF per day, levels above initial expectations.

On Oct. 5, Mission announced it had signed a definitive agreement with Santa Fe Energy Resources (NYSE:SFP) for the sale of all of its properties and retail related assets for $56 million, plus a revenue sharing payment based upon operating results of November and December. Brown said he anticipates the transaction, which is subject to unitholder approval, will be completed in January 1991.

Mission Resource Partners L.P. has interest in approximately 475 oil and gas wells which are located principally in California.

#90318b0628 11/14/1990 ~Business Wire

HOUSTON (NOV. 14) BUSINESS WIRE - Medical Innovations Inc. 1/8 NASDAQ Symbols MIXX (common stock) MIXXW (Class A Warrants) and MIXXZ (Class B Warrants) 3/8 reports net income of $119,346, or 2 cents per share of common stock, on revenues of $2,282,681 for the quarter ended Sept. 30, compared to a net loss of $28,908, or less than 1 cent per share, on revenues of $1,908,679 for the quarter ended Sept. 30, 1989. Net income for the nine-month period ended Sept. 30 was $140,358, or 2 cents per share, on revenues of $6,335,563, compared to net income of $160,701, or 4 cents per share, on revenues of $3,967,066 for the nine month period ended Sept. 30, 1989.

Third quarter revenue gain over the third quarter of 1989 is attributed to growth of the home infusion therapy market, and to continued strong performance of the company's Home Infusion Care Center in Houston. Revenue gain for the 9-month period over the prior year is attributed to this and to the addition of OMNA Corp. Healthcare Staffing operations, a subsidiary acquired in May 1989.

Improved net income for this third quarter over the prior year's third quarter

and the second quarter of this year is attributed to increased revenues from home infusion therapy, and to efficiencies resulting from the consolidation of OMNA Healthcare Staffing operations into the New Jersey Home Infusion Care Center in June 1990. The decrease in net income for the first nine months of 1990 as compared to the first nine months of 1989 is attributed to (1) interest expense on debt incurred to finance the acquisition of OMNA Corp., and (2) amortization of intangible costs, also associated with the acquisition of OMNA.

Medical Innovations Inc., specializes in providing Home Infusion Care (intravenous therapies) especially for immunosuppressed patients (i.e. cancer and AIDS) and through innovation has become one of the leaders in developing care protocols for these patients. Company operations are located in Houston; Livingston & Cranford, N.J.; and Richmond, Va.

ENGLEWOOD, CO (NOV. 14) BUSINESS WIRE - Medical Dynamics Inc. (NASDAQ:MEDY), a provider of micro-invasive surgical and diagnostic camera systems, Wednesday announced it has received a purchase order from a new OEM customer for Model 5960 Surgical Camera Systems and ancillary products.

The initial purchase order is valued at $1 million. The company's expectation is that this purchase order is the initial phase of a supplier relationship expected to involve up to $3 million in shipments during the 1991 fiscal year.

The OEM customer is a large medical company that markets its products primarily to the general surgery, gynecology and laparoscopy markets.

Gallbladder laparoscopy involves complete removal of the gallbladder through a laparoscope. As more physicians are trained in the field, Medical Dynamics expects orders for Model 5960s to increase, Horsley said.

Medical Dynamics also markets the patented Model 5990 Optical Catheter System (tm), a next generation surgical camera system that at just .5mm to 1.5mm in diameter is small enough to thread into previously inaccessible areas of the body. Procedures performed with an Optical Catheter System offer physicians and patients a number of practical, technical and economic benefits over alternative forms of treatment.

The company has sold 15 Optical Catheters to date, including two over the past 90 days.

NEW YORK (NOV. 14) BUSINESS WIRE - Investment Technologies Inc. (NASDAQ:IVES) has signed a letter of intent with Thomas James Associates Inc. for the public offering of $4 million in preferred stock (with common stock warrants) on a firm commitment basis.

The company is presenting a proposal to shareholders at its Nov. 29 annual meeting that would authorize the issuance of preferred stock on terms and conditions approved by the board.

The net proceeds of the offering will be used by the company to enter the asset-management business, using its proprietary computer-models.

The date of the offering will be as soon as practicable subject to regulatory approval.

NEW YORK (NOV. 14) BUSINESS WIRE - Enzo Biochem Inc. (AMEX:ENZ) Wednesday announced that the U.S. District Court, Southern District of New York, has granted Enzo permission to amend its complaint in its lawsuit against Johnson & Johnson Inc. (J&J) and two J&J subsidiaries, Ortho Diagnostic Systems Inc., and J&J Development Corp. Inc., to include two violations (1962) (b) and (c) of the Rackteer Influenced and Corrupt Organizations Act (RICO).

J&J had unsuccessfully moved to dismiss these RICO claims.

Enzo's lawsuit, originally filed on Aug. 24, 1987, also charges J&J with

breach of contract, breach of fiduciary duty, unfair competition and fraud in connection with agreements between Enzo and J&J for the manufacture and marketing by J&J and Enzo of products developed in the field of nucleic acid manupulation.

Enzo seeks $100 million in actual damages and an additional $500 million in punitive damages.

Serle I. Mosoff, corporate counsel for Enzo, stated, ''The Court's acceptance of these two RICO claims, despite J&J's motion to dismiss, we believe, confirms the merit of Enzo's position and puts J&J at risk for treble damages. We are gratified by this favorable ruling and anticipate the suit will move ahead expeditiously to trial.''

Enzo Biochem Inc. is an established New York City-based biotechnology company engaged both in the research, development and manufacture of innovative health care products based on molecular biology and genetic engineering techniques and in the provision of diagnostic services to the medical community.

SALT LAKE CITY (NOV. 14) BUSINESS WIRE - Dayna Communications Inc. Wednesday announced a new version of its DOS Mounter utility.

DOS Mounter 2.0 shows improved performance, incorporates new features and supports a variety of removable media drives.

DOS Mounter allows any Macintosh computer with an Apple SuperDrive to access 3.5-inch MS-DOS disks from the desktop. With DOS Mounter, an MS-DOS disk in the SuperDrive looks and behaves like a Macintosh disk.

The new DOS Mounter 2.0 improves on previous versions of the product in several ways. There is noticeable improvement in the time it takes to mount and dismount MS-DOS volumes. Disks can now be formatted in Macintosh or MS-DOS high and low density formats directly from the Finder.

Extension Mapping, a feature that links MS-DOS file extensions with Macintosh applications, is now a simple Control Panel option. Write-protected and full disks are now fully supported. Finally, DOS Mounter 2.0 is designed to support all removable media drives commonly used in the Macintosh and MS-DOS worlds, including Bernoulli, SyQuest, PLI and Kennect.

Available Dec. 15, DOS Mounter 2.0 has a suggested U.S. retail price of $89.95. Registered owners of DOS Mounter purchased at any time after Oct. 1 will be upgraded free of charge. Other DOS Mounter owners can upgrade to the new version for $24.95 and should contact Dayna's Customer Service Department at 801/972-2000 for details.

Dayna Communications Inc. is a privately held company that designs and manufactures a range of products to meet the connectivity and productivity needs of personal computer users.

HIGH BRIDGE, N.J. (NOV. 14) BUSINESS WIRE - Computer Power Inc. (NASDAQ:CPWR) Wednesday reported net income of $72,000, or 5 cents per share for the first nine months of fiscal 1990 ended Sept. 30, 1990, compared with net income of $151,000, or 10 cents per share in the comparable 1989 period.

Revenues for the nine months were up 12 percent to $13,952,000 compared with $12,477,000 in the comparable 1989 period.

For the third quarter fiscal 1990, Computer Power Inc. reported net income of $37,000, or 3 cents per share, compared with net income of $47,000, or 3 cents per share, for the same period in fiscal 1989.

Revenues for the quarter were down 14 percent to $4,321,000, compared with $5,005,000.

''Our revenues for the year are off slightly after adjustments for Siltron are taken in consideration. Siltron revenues for fiscal 1989 included only five months (acquired on May 1, 1989) and fiscal 1990, includes a full nine months activity,'' said Roger Love, president.

''We are pleased,'' continued Love, ''that our profitability remains intact, as a result of cost cutting and budgetary measurements instituted in anticipation of a soft market climate.''

Computer Power Inc. manufactures and distributes a line of uninterruptible power system (UPS), battery charger and emergency lighting equipments.

STAMFORD, CT (NOV. 14) BUSINESS WIRE - Warrantech Corp. (NASDAQ:WTEC) announced Wednesday that a new marketing unit has been formed to offer a range of new services.

The new unit, called Warrantech Direct, will be based in Fort Worth, Texas.

The unit was formed to handle every stage of a direct marketing program, including telemarketing and direct response through direct mail and televised infomercials. Initially, Warrantech Direct will concentrate its efforts renewing Warrantech's rapidly expanding base of service contracts as they expire.

It is anticipated that early in 1991 Warrantech Direct will begin offering its services to other companies.

David Morris has been named managing director of Warrantech Direct. Formerly, Morris was director of operations at A Telemarketing Group Inc., in Miami.

''Warrantech Direct will implement innovative marketing strategies that will help increase the number of service contract holders who renew as their contracts expire. We will use a combination of telemarketing and direct mail in pursuing these renewals, which will provide a new source of revenues.

''In addition, we plan to execute a second-effort marketing program designed to capture sales which are missed at the point-of-sale, giving our dealers an additional revenue source,'' Morris explained.

Warrantech Direct is a division of Warrantech Consumer Product Services Inc., a wholly owned subsidiary of Warrantech Corp.

Warrantech Corp. administers service contracts for consumer electronic products, appliances and home office equipment. Through Warrantech Dealer Based Services Inc., the company administers service contracts for automobiles and recreational vehicles.

MENLO PARK, CA (NOV. 14) BUSINESS WIRE - Liposome Technology Inc. (LTI), a California-based pharmaceutical company, Wednesday announced results from its third fiscal quarter ended Sept. 30.

The company reported a net loss for the quarter of $1,717,000 (18 cents per share), an increase of 15 percent from a net loss of $1,498,000 (21 cents per share) in the third quarter of the prior year.

Research and development expenditures were $1,875,000, an increase of approximately 21 percent over the like period in 1989. General and administrative expenses were $373,000, a decrease of 13 percent over the third quarter of the prior year. Total expenditures for the quarter were $2,282,000 compared to $1,987,000 in the comparable quarter in 1989.

The increase in R&D expenses is due to expenditures for the preclinical/clinical development of LTI's amphotericin B colloidal dispersion (ABCD) and liposomal doxorubicin products, while the decrease in G&A for the quarter is primarily due to savings associated with a reduction in the company's workforce effected in 1989.

The company also announced the termination of its collaboration with Erbamont N.V. for the development of liposomal epirubicin, effective Dec. 13. The termination is due to Erbamont's decision to concentrate its financial resources on fewer projects and thus to discontinue funding of LTI's development efforts.

To date, LTI has successfully developed and manufactured a stable, lyophilized liposomal epirubicin product for use in preclinical studies, which meets mutually agreed upon specifications appropriate for a commercial product.

The company is continuing to explore financing opportunities, including the sale of equity, new strategic alliances and other funding sources, as required to commercialize its proprietary products and fund the pharmaceutical development of additional products in the pipeline.

Located in Menlo Park, LTI currently is developing injectable doxorubicin for anticancer therapy, injectable ABCD for systemic antifungal therapy, and inhaled liposomal albuterol to treat asthma and bronchitis. The company's second-generation focus is on utilizing LTI's proprietary Stealth liposomes to target injectable oncologics to tumors and to deliver therapeutic proteins and peptides.

#90318b0662 11/14/1990 ~Business Wire

MIAMI, FL (NOV. 14) BUSINESS WIRE -All American Semiconductor, Inc. (NASDAQ:SEMI), a national distributor of electronic components, Wednesday announced unaudited results for the three and nine months ended September 30, 1990.

Net sales for the three months ended September 30, 1990 were $9,612,766 compared to $9,491,890 for the three months ended September 30, 1989.

This modest increase was less than anticipated, largely the result of a computer problem which prevented the Company from conducting sales for more than three full business days in September. The increase in sales that did occur was primarily due to the addition of passive products to the Company's product offerings. Conversely, sales of semiconductor products declined slightly due to flat growth in the industry and continued downward pressure on prices of certain memory products.

The net loss in the current quarter was primarily due to the lost business resulting from the above mentioned computer problem and additional expenses associated with this problem. The Company believes that this lost business is covered under the Company's business interruption insurance.

All American Semiconductor is the nation's 34th largest distributor of electronic components. The Company is headquartered in Miami and has nine sales offices in Florida, California, Minnesota, New York, Massachusetts and Texas. In addition, All American distributes its products through an affiliated company in Rockville, Maryland.

DALLAS (NOV. 14) BUSINESS WIRE - Sun Coast Plastics Inc. (NASDAQ:SUNI), Dallas, reported Wednesday that its net income for the three months ended Sept. 30, 1990 was $139,000 (1 cent per share), an improvement of $210,000 over the net loss of $71,000 (1 cent per share) incurred for the three months

ending Sept. 30, 1989.

Total revenues were $14,696,000 this year, a decrease of 2 percent from the comparable prior year quarter.

The decrease in revenue resulted from a large non-recurring order for custom dinnerware placed in the first quarter last year, from new price competition for imports in chemical products, and from reduced demand for molding compounds and resins.

Improved gross margins and reduced interest expense caused the $210,000 improvement in net income. Stable resin costs and continuance of projects to enhance manufacturing efficiency caused the margin improvements. Repayment of $2,868,000 of total debt since Sept. 30, 1989 caused the reduction of interest expense.

NEW YORK (NOV. 14) BUSINESS WIRE - Sales and earnings of Tiffany & Co. (NYSE:TIF) rose to record levels in the third quarter and nine months ended Oct. 31.

Tiffany's chairman, William R. Chaney, announced the results while speaking to security analysts and institutional investors at a ''Breakfast at Tiffany's'' meeting in New York.

Sales for the third quarter rose 19 percent to $113,232,000, compared with $95,116,000 in the similar period a year ago. Net income increased 21 percent to $9,052,000, or 58 cents per share, compared with $7,509,000, or 48 cents per share, in the third quarter of 1989.

For the nine month period, sales increased 23 percent to $313,733,000, compared with $254,279,000 in the same period in 1989. Net earnings rose 25 percent to $21,594,000, or $1.37 per share, compared with $17,330,000, or $1.10 per share, in the first nine months of fiscal 1989.

Chaney said, ''We are most gratified with Tiffany's overlall strong performance which further confirms the benefits of Tiffany's diversified growth strategies. Tiffany's international sales continue to grow rapidly throughout the Far East and Europe. We are also encouraged with improvements in our United States businesses in the third quarter, despite consumer caution

in several regional markets.''

Sales by channel of distribution were as follows: International Retail sales rose 38 percent in the third quarter to $38,838,000 and increased 75 percent to $115,614,000 in the nine month period; United States Retail sales increased 11 percent in the third quarter to $57,175,000 and rose 4 percent in the nine months to $150,819,000; Direct Marketing sales increased 12 percent to $17,219,000 in the third quarter and rose 7 percent to $47,300,000 for the nine months.

Tiffany & Co. is an internationally renowned retailer with locations in the United States, the Far East and Europe. The company's merchandise offerings include an extensive selection of fine jewelry, sterling silverware, china, crystal, watches, clocks, stationery, leather goods, scarves and fragrances.

#90318b0668 11/14/1990 ~Business Wire

EMERYVILLE, CALIF. (NOV. 14) BUSINESS WIRE - Cetus Corp. announced Wednesday that a TNF virus engineered by company scientists will be used in the first human gene therapy trials to be conducted in the field of oncology.

Dr. Steven Rosenberg of the National Cancer Institute (NCI) will use Cetus' invention in human clinical trials for the treatment of melanoma, a dangerous cancer of the skin. It was announced yesterday that the NCI has been granted approval to initiate these trials by the U. S. Food and Drug Administration.

Cetus scientists genetically engineered a retrovirus encoding the immune system protein, tumor necrosis factor (TNF). NCI researchers use the TNF retrovirus to infect special cancer fighting cells, called tumor infiltrating lymphocytes or TIL cells, which have been removed from cancer patients. The TIL cells are then re-injected into the patient, they migrate to the site of the tumor and, because they have been ''educated'' to produce the cancer fighting protein, kill the cells of the tumor.

Michael Kriegler Ph.D. and his group at Cetus designed the novel TNF virus. Cetus has filed numerous patent applications on its gene therapy work, including applications on several unique forms of TNF which may prove more efficacious for gene therapy research in the future.

TNF has been employed in human studies for various cancers with little

clinical success. This has been due in part to the serious toxicities which arise when the protein is administered systemically. It is thought that systemic side effects can be avoided with the gene therapy approach, because the TNF is more concentrated at the tumor site.

Cetus Corp. applies the tools of biotechnology and the science of immunology to the development of novel pharmaceutical products. The company is also developing several commercial applications of its GeneAmp polymerase chain reaction (PCR) technology. Business collaborations with other firms are an important part of the company's strategy both in pharmaceuticals and in PCR. Founded in 1971, Cetus is based in Emeryville and also operates EuroCetus in Amsterdam, Netherlands.

SAN RAFAEL, CALIF. (NOV. 14) BUSINESS WIRE - Phoenix Affiliates International Inc., a company formed by Gus Constantin, the chief executive officer, chairman and president of Phoenix American Inc. (NASDAQ:PHXA), said it expects to complete the acquisition of all outstanding shares of Phoenix American Wednesday by merging Phoenix American with and into Phoenix Affiliates.

Phoenix Affiliates also said that its cash tender offer for all outstanding shares of Phoenix American common stock at $5 per share, which was commenced Oct. 8, 1990, expired at 4 p.m., San Francisco time, on Nov. 9, 1990.

As of the expiration of the offer, 1,183,718 shares had been tendered -- including 134,233 shares tendered by notice of guaranteed delivery -- in accordance with the offer.

Those shares, together with the 3,287,866 shares contributed to Phoenix Affiliates by family trusts controlled by Gus Constantin, represent approximately 98.5 percent of the outstanding shares.

Phoenix Affiliates has accepted for payment all shares that have been validly tendered and will pay for the shares as promptly as possible.

Under California and Nevada law, the merger will not require a vote of Phoenix American shareholders since more than 90 percent of the outstanding shares are held by Phoenix Affiliates.

In the merger, each of the 70,132 remaining shares of Phoenix American not owned by Phoenix Affiliates will be converted into the right to receive $5 in cash.

Payments will be made upon the surrender of certificates representing the shares to Manufacturers Hanover Trust Company of California, the paying agent, according to instructions that will be mailed promptly after consummation of the merger to shareholders of record at the close of business today.

NEWTON, MASS. (NOV. 14) BUSINESS WIRE - Staples Inc. (NASDAQ:SPLS) announced Wednesday that it had recorded substantial gains in sales and earnings during the third quarter and first nine months of its 1990 fiscal year.

Staples pioneered the office superstore industry and today operates 66 office superstores located in the Northeast United States and California.

For the quarter ended Oct. 27, 1990, sales rose 59.5 percent from the prior year quarter to $78,862,000, while earnings before extraordinary credit increased 31.6 percent to $1,277,000 (13 cents per share). In the prior year quarter, Staples earned $970,000 (10 cents per share) before extraordinary credit on sales of $49,439,000.

Staples opened 13 new stores during the third quarter, three more than originally anticipated, which raised the store count to 64 at quarter end. Included in the new store openings were three additional units in Southern California, raising the store count to six in that market; two stores in Rochester, N.Y., a new market; and the company's first ''Express'' store.

The company hopes the Express prototype, which opened in downtown Boston, could evolve into a significant growth vehicle. Over the balance of the fiscal year, the company expects to add eight or more new stores.

JERUSALEM, ISRAEL (NOV. 14) BUSINESS WIRE - Teva Pharmaceutical Industries Limited (NASDAQ: TEVIY), Israel's largest pharmaceutical company, Wednesday reported that net income for the three months ended September 30, 1990 increased nine percent on an eight percent increase in sales.

Sales for the quarter reached 143,155,000 Adjusted New Israeli Shekels (NIS) ($69,594,000 US) compared with 132,670,000 Adjusted NIS in the prior year. Gross profit rose 7.7 percent to 52,203,000 Adjusted NIS ($25,378,000 US) from 48,479,000 Adjusted NIS in 1989.

Net income was up 8.9 percent to 7,937,000 Adjusted NIS ($3,859,000 US), or 0.34 Adjusted NIS, 0.34 fully diluted, ($0.17, $0.17 US, respectively) per American Depository Receipt (ADR) with 2.1 percent less shares outstanding than in the prior year. Last year's third quarter net income amounted to 7,290,000 Adjusted NIS, or 0.32 (0.31, fully diluted) Adjusted NIS per ADR.

Pointing out that on a period to period comparison, the third quarter shows more improvement than the first two quarters of 1990, Eli Hurvitz, Teva's President and Chief Executive Officer, said that ''we could not fully achieve our goals primarily as a result of two external factors.''

''The lack of U.S. Food and Drug Administration approvals on new generic products, a phenomena experienced by the whole U.S. Generic drug industry, influenced the results of TAG Pharmaceuticals, our jointly owned U.S. subsidiary. At the same time, Israel's health authorities prolonged their approval process and the General Health Fund, our major customer, delayed the

introduction of newly approved products into its system because of budget considerations,'' Mr. Hurvitz explained.

The increase of minority interest in profits of consolidated subsidiaries in the first nine months to 2,109,000 Adjusted NIS ($1,025,000 US) from interest in losses of 346,000 Adjusted NIS a year earlier resulted from the improved profitability of TAG Pharmaceuticals, Teva's jointly owned U.S. subsidiary.

Teva Pharmaceutical Industries, Ltd. (NASDAQ: TEVIY) develops, manufactures and markets human pharmaceuticals, pharmaceutical chemicals, medical disposables, veterinary products, baking yeast and alcohol. The largest supplier of such products to Israel's public and private healthcare markets, the Company has manufacturing facilities in Israel, Western Europe and the United States and markets its products in 50 countries.

PORTLAND, MAINE (NOV. 14) BUSINESS WIRE - Vincent E. Furey Jr., president and CEO of The One Bancorp, a Maine-based bank holding company, and Dr. Thomas J. Whalen, chairman of the board of directors of Southstate Bank for Savings, a Brockton, Mass.-based subsidiary of The One, Wednesday announced the unanimous election by the Southstate board of directors of William J. Walsh, formerly chief operating officer of Southstate, as the bank's president, CEO and a director

Southstate operates seven banking offices in Brockton, Hingham and Weymouth, Mass., and holds some $325 million in assets.

Walsh, 37, joined Southstate in 1986 as senior vice president and chief financial officer, with responsibility for the development and execution of the bank's overall financial, investment, tax and asset/liability management strategies. He was named acting chief operating officer by the Southstate board in July.

Prior to joining Southstate in 1986, Walsh was vice president and controller of First Mutual of Boston, an institution he joined in 1978 as a management trainee.

Walsh holds a bachelor of science degree in finance from Fairfield University in Fairfield, Conn., and has completed the executive development program of the National Council of Savings Institutions. He holds a master's degree in

business administration, with a concentration in finance and banking, from Boston College.

Walsh resides in Wrentham, Mass. with his wife, Lauren, and their three children.

Chartered in 1881 as Brockton Savings Bank, Southstate converted from mutual to stock form in 1987 and changed its name to Southstate Bank for Savings. It was acquired by The One Bancorp in October 1988, along with East Weymouth Savings Bank, which was merged into Southstate.

The One Bancorp is a $2.3-billion-asset, Maine-based banking holding company with banking subsidiaries in Maine, Connecticut and Massachusetts.

The One Bancorp's common and preferred shares are listed and quoted in the National Quotation Bureau's Pink Sheets, an information service providing stock quotations for over 10,000 over-the-counter securities issues.

#90318b0682 11/14/1990 ~Business Wire

DENVER (NOV. 14) BUSINESS WIRE - United Artists Entertainment Co. (NASDAQ/NMS:UAECA/UAECB) Wednesday announced revenue for the nine months ended Sept. 30 of $1,086.4 million.

Operating income before depreciation and amortization (cash flow) was $289.1 million, with a net loss of $82.6 million, or 59 cents per share, applicable to common shareholders.

On May 25, 1989, United Artists Communications Inc. and United Cable Television Corp. were merged into a new entity, United Artists Entertainment. The results of operations for UCTC are included in UAE's results from that date forward.

Cable television revenue increased to $552.6 million during the nine months compared with $341.1 million for the like period ended Sept. 30, 1989. Cable operating expenses were $302.7 million during the period, compared with $176.0 million for the like period last year, while cash flow grew from $165.1 million to $249.9 million.

The increase in cable television revenue was due primarily to an additional 205,893 basic subscribers and 173,410 premium subscriptions at the end of the third quarter of 1990 compared with the like date in 1989.

Cable division operating expenses as a percentage of cable revenue increased due primarily to startup costs associated with European cable and the acquisition of certain cable systems with lower-than-normal operating margins. Excluding the effects of the above, cable operating expenses as a percentage of cable revenue remained relatively constant during the period.

Theatre admissions and confection sales were approximately $517.3 million during the nine months, compared with $498.9 million a year ago.

UAE owns and/or manages 86 cable television systems serving approximately 2.7 million subscribers. The company also owns and/or manages approximately 2,560 motion picture screens in 569 locations.

Rights to put UAE common stock also trade under the symbol TCOMR and are a security of Tele-Communications Inc. (TCI). UAE is the largest publicly traded affiliate of TCI.

ROSLYN, NY (NOV. 14) BUSINESS WIRE - Cheyenne Software Inc. (AMEX:CYE)

reported that for the quarter ended Sept. 30, 1990, consolidated revenues of Cheyenne and its 49 percent owned subsidiary, Gates/FA (NASDAQ:FACO), a microcomputer distributor, were $41,232,000, as compared to $41,668,000 for the quarter ended Sept. 30, 1989.

The net profit was $123,000, or 1 cent per share, for the first fiscal quarter of 1991 vs. a net loss of $195,000, or 2 cents per share, in the prior period.

With growing acceptance in the OEM marketplace of its top rated local area networking (LAN) software products, ARCserve and Monitrix, Cheyenne management is confident software sales will continue to increase rapidly and expects to be able to announce increasing profits during the remainder of the year.

TUPELO, MISS. (NOV. 14) BUSINESS WIRE - Hancock Fabrics Inc. (NYSE:HKF) Wednesday announced unaudited results for its third fiscal quarter of 1990.

Sales for the quarter ended Oct. 28, 1990, increased 8.3 percent to $100.8 million from $93.1 million in the same quarter last year. Net earnings for the quarter were $7.3 million, or 65 cents per share, compared with $7.2 million, or 59 cents per share in the third quarter of 1989.

For the 39 weeks to date, sales rose 10.4 percent to $282.4 million from $255.8 million in the same period last year. Net earnings were $19.6 million, or $1.72 per share, compared with $18.2 million, or $1.46 per share, in the first 39 weeks of 1989.

In commenting on the results, Morris O. Jarvis, chairman and chief executive officer, stated: ''After extremely hot temperatures and the effects of the Middle East crisis hindered sales in August, business returned to normal levels and we ended with a respectable quarter.

''Comparable store sales recovered in the final weeks to finish almost 3 percent higher than a year ago and gross margins increased despite a considerably higher LIFO charge. Operating expense ratios increased as a result of the slower sales but were also pressured by the opening of fifty-one new stores since a year ago.

''Interest expense was higher than a year ago. The recent weakness in the stock market made share repurchases considerably more attractive than the reduction of a very conservative debt. In the last 18 months, 1.92 million HKF shares have been repurchased at a cost of $57.4 million. At Oct. 28, 1990 the company's debt to total capitalization was 34 percent and return on

equity was 30 percent,'' continued Jarvis.

Hancock Fabrics Inc. is a retail and wholesale merchant of fabrics, crafts and related home sewing and home decorating accessories.

NEW YORK (NOV. 14) BUSINESS WIRE - Siemens Corp., the holding company for the Siemens AG (Berlin/Munich) operations in the United States, reported preliminary increases of 14 percent and 16 percent, respectively, in fiscal 1990 (10/1/89-9/30/90) orders and sales over the previous year.

The company did not offer a net income forecast, indicating that result would be forthcoming in January when final figures for 1990 are released.

Orders, an indicator of future business, stood at $4.4 billion (previous year $3.8 billion). Sales rose to $4.1 billion (previous year $3.6 billion).

Siemens Medical Systems Inc., Iselin, N.J., continued to report the highest sales volume with $1.4 billion. Siemens Energy & Automation Inc., Alpharetta, Ga., became the second Siemens company in the United States to reach the billion dollar sales mark.

Siemens has some 60 production facilities and 450 sales and service locations throughout the country. Its wholly owned, consolidated companies employ about 29,400 people.

MIDDLEBURG, PA. (NOV. 14) BUSINESS WIRE - Poloron Products Inc. (NASDAQ:PPRI) which designs, manufactures and distributes modular and custom mobile housing Wednesday reported operating results for the third quarter and nine month period ended Sept. 30.

Sales for the third quarter were $4,029,000 and the company reported a net loss of $46,000, or 2 cents per share. In the year ago quarter sales totaled $7,019,000 and the company reported a net loss of $224,000 or 6 cents per share. Management attributes the operating improvement to the implementation of cost containment measures.

Sales for the nine month period this year totaled $11,425,000 compared with $16,931,000 in the year ago period. This is indicative of the recessionary level of housing starts in the company's Northeast marketing area.

The company had a net loss of $1,247,000 or 35 cents per share, for the nine month period of 1990 compared with a net loss of $1,176,000 or 32 cents per share, a year ago.

Poloron Products Inc. operates through its wholly-owned subsidiary, Poloron Homes of Pennsylvania Inc.

Poloron Products Inc.

NEW YORK (NOV. 14) BUSINESS WIRE - Fresh from their success in one of the year's top-grossing movies, the Teenage Mutant Ninja Turtles are now looking forward to their next blockbuster performance -- as stars of the upcoming Christmas sales season.

Riding the momentum of a 40-city national live rock n' roll arena show and the recent home video release of the quartet's record-breaking spring movie, more than 300 other licensed Turtle toys, products and entertainment vehicles are expected to dominate the children's market during the all-important holiday sales period.

And according to Mark Freedman, president of Surge Licensing, exclusive worldwide marketer of the property, high volume sales during the last quarter of 1990 are expected to push the total retail performance of all Teenage Mutant Ninja Turtle merchandise and projects over $1 billion for the year.

Below are some new Turtle items that are expected to be among the most popular in the coming months.

o On Oct. 4, IVE/Family Home Entertainment released the much-anticipated ''Teenage Mutant Ninja Turtles: The Movie'' on videocassette. The enormous popularity of the theatrical release is sure to make the home video a favorite stocking stuffer.

o The ''Coming Out of Their Shells'' album, based on the Pizza Hut-sponsored live show, has already sold more than two million copies since its release in September. The album, which was available only at Pizza Hut restaurants, is now being sold through traditional retail outlets.

o ''Turtles II,'' scheduled for release in December, is the second home video game based on the Turtles introduced by Konami Inc., makers of Nintendo software. The company is working with Pizza Hut to promote the game, including the inclusion of a ''Free Personal Pan Pizza'' coupon inside each game package. In addition, the two companies have planned an in-store sweepstakes, offering Turtle video products as prizes.

o ''Turtle Claus,'' a plush figure depicting a Teenage Mutant Ninja Turtle dressed as Santa Claus, is a special limited edition toy produced by Playmates Toys Inc., the California-based manufacturer of Turtle action figures, vehicles and playsets. Only 200,000 units will be produced, so demand for the toy is expected to be high.

MIAMI (NOV. 14) BUSINESS WIRE - Bayport Restaurant Group Inc. (NASDAQ:PORT) reports total revenues for the nine months ended Sept. 24 increased 24 percent

to $18,626,606 from $14,970,768 for the comparable nine months last year.

Net earnings for the nine months ended Sept. 24, 1990 were $250,336 compared to a loss of $370,689 for the nine months last year. Total revenues for the three months ended Sept. 24, 1990 increased 20 percent to $6,058,476 from $5,045,650 for the comparable three months last year.

Net earnings for the three months ended Sept. 24, 1990 were $15,817 compared to a loss of $388,605 for the three months last year.

As previously reported, the company changed its fiscal year end from the last Sunday in August to the last Monday in December. Consequently, the company's results for the third quarter and nine months ended Sept. 24, 1990 have been compared to those of the comparable periods ended Aug. 27, 1989.

As previously announced, the company is continuing its efforts to raise aditional capital to facilitate the expansion of the company's restaurnat chain. In this connection, the company is continuing discussions with several groups. In the event such a transaction is consummated, a change in control of the company may result.

#90318b0736 11/14/1990 ~Business Wire

FITCHBURG, MASS. (NOV. 14) BUSINESS WIRE - Earnings of Fitchburg Gas and Electric Light Co. (AMEX:FGE) for the three months ended Sept. 30, 1990 were $420,061, or 30 cents per share, the company announced Wednesday.

The third quarter results compare to a loss of (11 cents) per share for the comparable three months a year earlier. The earnings of the company for the first nine months and for the 12 month period ended Sept. 30, 1990 were also markedly higher than the comparable period last year.

The higher earnings are primarily due to the lask of impact on expenses to date in 1990 related to the ongoing, 18 month old hostile tender offer by Boston-based Eastern Utilities Associates (EUA).

EUA is currently involved in a proceeding before the New Hampshire Public Utility Commission which is considering whether to approve or disapprove the proposed hostile acquisition by EUA of the company's proposed merger partner, UNITIL Corp., and the effect that such an acquisition would have on New Hampshire ratepayers.

A decision in that proceeding is expected sometime in December. Earnings for the quarter were also positively impacted by lower maintenance expenses and a prior period income tax adjustment.

Fitchburg Gas and Electric Light Co. is an operating public utility providing electric service to over 25,000 customers and natural gas service to over 15,000 customers in north central Massachusetts.

#90318b0744 11/14/1990 ~Business Wire

WESTBOROUGH, MA (NOV. 14) BUSINESS WIRE - ASA International Ltd. (NASDAQ:ASAA) announced its financial results for the third quarter ended Sept. 30, 1990.

Revenues for the third quarter 1990 were $4,236,000, down from $6,152,000 in the third quarter 1989. Net loss for the third quarter 1990 was $343,000, compared to net earnings of $120,000 for the quarter ended Sept. 30, 1989.

ASA International Ltd. quarterly and nine-month results are summarized as follows:

ASA International Ltd. markets multi-user business computer solutions, primarily on Digital Equipment Corp. and IBM hardware, to manufacturing, tire dealer and international trade companies. The firm, founded in 1969, reported 1989 revenues of $23,769,000.

#90318b0746 11/14/1990 ~Business Wire

EXETER, N.H. (NOV. 14) BUSINESS WIRE - Consolidated earnings of UNITIL Corp. (AMEX:UTL) for the three months ended Sept. 30, 1990 were $321,321 or 41 cents per share, the company announced Wednesday.

The third quarter results compare to consolidated earnings of 68 cents per share for the comparable three months a year earlier. The earnings of the company for the first nine months and for the 12 month period ended Sept. 30, 1990 were also lower than the comparable period last year before the effect of a one-time accounting change which occurred in 1989.

Earnings, for all reported periods, were impacted negatively by the current economic conditions being experienced in the service areas of the company's subsidiaries. Sales growth for the current nine month period over the same period last year is only 1 percent with new services installed down by 16 percent. In addition, write-offs due to uncollectable accounts have risen substantially.

The lower earnings are also due, in part, to the recording of merger and unsolicited tender offer expenses incurred last year as well as additional expenses incurred this year in relation to the regulatory hearings concerning the ongoing, 18-month-old hostile tender offer by Boston-based Eastern Utilities Associates (EUA).

The New Hampshire Public Utility Commission (NHPUC) is currently considering whether to approve or disapprove the proposed hostile acquisition based upon its effects on New Hampshire ratepayers. Hearings in this proceeding began on Aug. 9, 1990 and after 26 days were concluded on Sept 28, 1990. Initial briefs, by all parties, were filed on Oct. 23, 1990, and were followed by reply briefs on Nov. 6, 1990. Aside from EUA, all parties, including the New Hampshire Office of the Consumer Advocate and the City of Concord, as well as many public representatives who made statements during the hearings, are strongly opposed to EUA's proposed hostile takeover.

A decision from the NHPUC is expected in December of this year. If the NHPUC does not approve the transaction, then, absent a successful appeal by EUA of the NHPUC order, EUA's hostile takeover attempt would be effectively ended. Even if the NHPUC were to allow EUA to acquire shares of UNITIL stock, EUA would still be required to obtain approvals from the Securities and Exchange Commission as well as the Federal Energy Regulatory Commission.

UNITIL is a New Hampshire based utility holding company. Subsidiaries are Concord Electric Co., Exeter & Hampton Electric Co., UNITIL Realty Corp., and UNITIL Service Corp.

#90318b0751 11/14/1990 ~Business Wire

COSTA MESA, CA (NOV. 14) BUSINESS WIRE - US Facilities Corp. (NASDAQ:USRE) announced Wednesday that, for the third quarter ended Sept. 30, 1990, net income amounted to $265,000, or 7 cents per share, after a non-recurring charge of $860,000.

The company indicated that net operating results for the quarter were negatively impacted by the one-time write-off of previously capitalized expenses related to a proposed acquisition that was not consummated.

This charge, net of an income tax credit, amounted to $763,000, or 19 cents per share. Therefore, were it not for this non-recurring item, net income for the 1990 Sept. 30 quarter would have been $1,028,000, or 26 cents per share.

This compares with net income of $307,000, or 8 cents per share, reported for the similar period last year. Total revenues for the 1990 quarter rose to $17,101,000, a 5 percent increase over total revenues of $16,371,000 for the 1989 third quarter.

For the nine months ended Sept. 30, 1990, net income, after the one-time charge, rose 47 percent to $1,925,000, or 49 cents per share, on a 13 percent increase in total revenues to $51,399,000. Comparitively, in the 1989 nine-month period, net income was $1,313,000, or 35 cents per share, on total revenues of $45,402,000.

The continuing revenue gains were again due to increases in commissions and management fees earned by the company's US Benefits subsidiary.

Reflecting gains of 42 percent and 49 percent in the respective 1990 periods compared with last year, these increases were primarily the result of an increase of rate levels and a greater number of accounts in the medical stop-loss business underwritten by US Benefits.

Net earned property and casualty reinsurance premiums for the USF RE INSURANCE COMPANY subsidiary decreased 4 percent in the quarter and were up 5 percent for the nine months of 1990 as industry-wide rate levels continue to be low.

Net investment income amounted to $1,213,000 for the 1990 quarter and $3,607,000 for the nine-month period of 1990, a gain over 1989 of 25 percent and 35 percent respectively. This was due to an increase in average investable assets and a shift from tax-exempt securities to higher yielding, taxable investment-grade securities during 1989.

Losses and loss adjustment expenses incurred were up 10 percent and 17 percent for the quarter and nine months; other expenses decreased 13 percent for the quarter and increased 2 percent for the nine months, while interest expense declined 61 percent and 60 percent for the comparable 1989 periods because of debt reduction.

Company management indicated it expects that its US Benefits medical stop-loss business will continue to improve as long as rate increases are accepted. Rate levels in the USF RE property and casualty area are anticipated to remain low in the fourth quarter and into 1991.

#90318b0754 11/14/1990 ~Business Wire

HUNT VALLEY, MD (NOV. 14) BUSINESS WIRE - EA Engineering, Science, and Technology Inc. (NASDAQ: EACO) Wednesday reported record consolidated net revenue for the fourth quarter and fiscal year ended August 31.

However, cost increases attributable to hiring additional professional and technical personnel necessary to support the growing demand for the company's services, and certain reserve increases for possible unrecoverable project overruns depressed earnings in the fourth quarter and for the entire year.

Net revenue for fiscal 1990 advanced to $41.1 million, a 23 percent increase from $33.3 million recorded in fiscal 1989. Net income was $609,000, or $.25 per share, compared to net income of $1.2 million, or $.47 per share, a year earlier.

Year-end backlog increased to over $30 million, up 50 percent from the previous year-end. EA also has open task orders for approximately $63.5 million, which, if authorized, would increase total backlog to over $93.5 million compared to $92.5 million last year.

Net revenue for the company in the fourth quarter was $11.3 million, and net income was $60,000, or $.02 per share. A year earlier, net revenue was $9.8 million and net income was $416,000, or $.17 per share.

EA Engineering, Science, and Technology Inc. is a multidisciplinary professional consulting firm providing a wide range of engineering, scientific analytical, and remediation capabilities to address existing and potential threats to the environment and to human health and safety for government and industrial clients across the nation.

EA designs building systems for energy conservation, indoor air quality, and climate control; provides remedial designs at contaminated sites; and develops

solution for waste management, energy conservation, and emissions control. EA is headquartered in Hunt Valley, Maryland, and has offices in Texas, California, New York, New Jersey, Georgia, Nebraska, Illinois, Massachusetts, North Carolina, Washington, and Virginia.

TROY, OHIO (NOV. 14) BUSINESS WIRE - Television picture tubes manufactured by American Matsushita Electronics Corp. (AMEC) are now being exported to TV factories in Asia.

At a ceremony held Wednesday at AMEC, the company announced that it will begin shipping approximately 3,000 27-inch diagonal color picture tubes per month to both Japan and Taiwan. AMEC is an affiliate of Matsushita Electric Corp. of America, known for its Panasonic, Technics and Quasar brands.

''Ohio is the third largest exporting state in the nation, and today's announcement by AMEC provides an excellent example why our economy is leading in this arena,'' said Ohio Governor Richard F. Celeste.

''This announcement proves that Ohio is once again shattering old manufacturing stereotypes and setting the stage for leadership in the new economic climate.''

Richard A. Kraft, president of Matsushita Electric Corp. of America said, ''By shipping these Ohio-made picture tubes across the Pacific, Matsushita is once again demonstrating its commitment to exporting products manufactured in North America. We've established an impressive record of exports over the past few years, and AMEC is now adding to it.''

Since 1988, Matsushita has exported its North American-produced televisions, cellular telephones, combination TV/VCR units and microwave ovens to both Asia and Europe. In addition, through its Los-Angeles-based trading affiliate, AMAC Corp., Matsushita also purchases a wide range of U.S.-made products for export. Overall, in 1989, North American Matsushita exported over $600 million worth of products made in the United States.

Founded in 1988, AMEC expects to produce approximately 500,000 picture tubes in 1990. Product was supplied to Matsushita's television factory in Franklin Park, Ill., as well as to major TV manufacturers throughout North America.

Established in 1959, Matsushita Electric Corp. of America now has 30 North American subsidiaries and affiliates including 16 factories, and 11,000 employees. North American Matsushita markets and produces both consumer and

industrial products, and recorded sales of $5.4 billion for fiscal 1989.

BASKING RIDGE, N.J. (NOV. 14) BUSINESS WIRE - Bringing an array of telecommunications services to the suburban and rural territories of 27 states AT&T and TDS TELECOM Wednesday announced an agreement naming TDS TELECOM marketing agent for AT&T long distance services in its service areas.

Under this contract, TDS TELECOM becomes the primary point-of-contact for marketing, sales and support of AT&T's business and residential long distance services in TDS TELECOM's operating territories.

''This is a significant opportunity for both companies,'' said Jim Barr III, president and CEO of TDS TELECOM. ''Armed with AT&T's long distance expertise we can offer our customers the latest innovations in telecommunications, now and in the future.''

''AT&T is delighted to be forming this alliance with TDS TELECOM,'' said Michael Keith, AT&T's director of alternate channels.

''We are combining AT&T's high-quality long distance services with TDS TELECOM's local presence and reputation for personalized service in ways that will serve our customers well.''

TDS TELECOM, headquartered in Madison, Wis., operates nearly 80 independent telephone companies serving the suburban and rural areas of Alabama, Arkansas, California, Florida, Georgia, Idaho, Indiana, Kentucky, Maine, Michigan, Mississippi, Missouri, Minnesota, New Hampshire, New York, North Carolina, Ohio, Oklahoma, Oregon, Pennsylvania, South Carolina, Texas, Tennessee, Vermont, Virginia, Washington and Wisconsin. It is a subsidiary of Telephone and Data Systems Inc. (TDS) of Chicago. In addition to its telephone subsidiary, TDS is a key competitor in the cellular and paging industries.

AT&T's business is information movement and management, providing quality products, systems and services to diverse markets around the globe. It had total 1989 revenues of $36.1 billion and assets of $37.7 billion.

MIAMI (NOV. 14) BUSINESS WIRE - The annual rush to deliver shipments of this year's Beaujolais Nouveau to the furthest points of the globe embraced every aircraft of Cargolux Airlines International's all-Boeing 747 fleet of freighters in order to beat the Nov. 15 embargo for opening the new wine set by the French Government.

As usual Cargolux combined its efforts with the airport authorities, custom officials, freight forwarders and shippers, to see that the French wine arrived in time for the myriad of parties, tastings and promotions staged throughout the United States and Canada to sample this year's new crop.

In the United States the first shipment of the new vintage arrived into Cargolux Airlines' Miami International Airport warehouse late Tuesday evening Nov. 13 and according to French Food & Wine News for Americas, ''this years harvest is the epitome of Beaujolais Nouveau.''

Cargolux Director - The Americas, Sigmar Sigurdsson toasted, ''another successful year of being a part of delivering to American wine lovers the latest shipment of the French Beaujolais Nouveau.''

CAMBRIDGE, MA (NOV. 14) BUSINESS WIRE - Cayman Systems Inc., a leading provider of Macintosh internetworking solutions, Wednesday announced $3.9 million in financing for business expansion and new product development.

Lead investors in Cayman Systems' expansion are Concord Partners, managed by Dillion Read and Co. Inc., and St. Paul Venture Capital Inc. Additional funding was provided by Cayman Systems' shareholders.

This round of financing follows the recent introduction of Cayman Systems' GatorBox AppleTalk-Ethernet gateway with Release 1.6 software, and GatorPrint, an application that provides UNIX-to-AppleTalk printing. Both products substantially increase the functionality of Macintosh and Ethernet networks. The new Release 1.6 software delivers significant performance improvements, with typical routing speeds that are up to 90 percent faster than earlier releases.

Cayman Systems will intensify research and development activities aimed at expanding the company's line of standard-setting AppleTalk-Ethernet hardware and software products into the broader local area network arena.

Cayman Systems Inc., founded in 1987 and based in Cambridge, Mass., is a leading developer of reliable, high performance network gateways. Current products include GatorBox, Cayman Systems' AppleTalk-Ethernet gateway; GatorShare, software that runs on the GatorBox and provides NFS file sharing to Macintosh users; GatorPrint, that allows UNIX users access to AppleTalk network printers; GatorMail, a Macintosh to Unix mail gateway; and GatorCard E/II, the fastest Ethernet card for the Macintosh II family of computers.

WEST PALM BEACH, FLA. (NOV. 14) BUSINESS WIRE - Flagler National Bank, a wholly-owned subsidiary of The Flagler Bank Corp. (NASDAQ:FLGLA), announced Wednesday that it is conducting a due diligence examination of Central Savings & Loan Association which is located in Martin County, Fla.

Flagler and Central intend, if the examination is satisfactory, to enter into a Definitive Agreement for the acquisition of the assets and the assumption of the deposit liabilities of Central by Flagler National Bank. The acquisition

will be subject to regulatory approvals and other customary conditions.

Central, which opened for business in 1982, is a single office Association with approximately $23 million in deposits. The Flagler Bank Corp. has total assets of approximately $366 million.

Flagler expects to operate the new location as a branch of Flagler National Bank and, as a result, significant cost savings are anticipated. The acquisition, if completed, would represent Flagler's first branch office in Martin County, Fla.

VALLEY STREAM, N.Y. (NOV. 14) BUSINESS WIRE - Nationwide Cellular Service Inc., (NASDAQ:NCEL) Wednesday announced financial results for the company's third quarter ended Sept. 30, 1990.

During that period, revenues increased to $27.6 million, up from, $18.6 million in the third quarter of 1989. For the nine months ended Sept. 30, 1990, revenues increased to $77.7 million, up from $49.9 million in the corresponding 1989 period.

During the third quarter of 1990, the company's net loss increased to $1,092,000 or 21 cents per common share, from a loss of $984,000 or 16 cents per share in the same 1989 period. Net loss for the first nine months of 1989 decreased to $5,724,000 or $1.01 per share, from a loss of $5,843,000 or $1.27 per share in 1989.

Included in the nine month period ended Sept. 30, 1989, the company recorded an expense of approximately $1,620,000, which was incurred in connection with the exchange of its 9 percent Convertible Subordinated Debentures for common stock and warrants to acquire additional shares of common stock.

Of such expense, $1,427,000 represents the fair market value of the warrants. Also included in the company's net loss for the three months and nine months ended Sept. 30, 1990 and Sept. 30, 1989 is the company's 50 percent share of the loss of Cellular Technical Services Co. (''CTS''). For the three months ended Sept. 30, 1990, CTS' loss increased to $136,000 from a loss of $97,000 for the same period in 1989. For the nine moths ended Sept. 30, 1990, CTS' loss decreased to $439,000 from a loss of $508,000 for the same period in 1989.

During 1990, the company continued to expand its subscriber base and currently has in excess of 65,000 subscribers in its various markets. The losses associated with this expansion are primarily the result of selling and

administrative costs associated with acquiring new subscribers. Once subscribers have been activated and begin using the company's services, they generate ongoing revenues.

DES PLAINES, IL (NOV. 14) BUSINESS WIRE - Amerihost Properties Inc. Wednesday announced its third quarter ended Sept. 30, resulted in all-time-high earnings.

It was the company's sixth consecutive quarterly profit. Michael P. Holtz, Amerihost's president, announced that Amerihost's earnings for the nine months ended September 30, also reached a record level. Revenues for the three months ended September 30, reached $1,035,000 off from $1,605,000 for the third quarter of 1989. Net income rose modestly to a record $46,000, or three cents a share, from $42,000, or three cents a share, a year earlier.

Sales for the nine months ended September 30, amounted to $4,381,000 versus $4,789,000 for the comparable year-ago period. Net income rose a record $71,000, or four cents a share, compared with a loss of $21,000, or one cent a share, for the first nine months of 1989.

Entering the field in January 1987, Amerihost has rapidly expanded its lodging activities to become INC Magazine's 67 fastest growing small public company. Today its 2,200 hotel rooms under management are valued at more than $60 million.

NORTHVALE, NJ (NOV. 14) BUSINESS WIRE - Baltek Corp. (NASDAQ:BTEK) Wednesday announced results for the third quarter and nine months ended Sept. 30, 1990.

Jacques Kohn, president, commented, ''The decline in sales and earnings for the nine months reflects the continued softness in the U.S. pleasure boating industry as well as weakness in shrimp production and prices. Sales of balsa in the European market, however, partially offset these declines. Further, during the third quarter, the company recorded a substantial exchange gain due to the weakness of the U.S. dollar in relation to European currencies.

''In another development during the third quarter, we acquired the adjacent shrimp farming company which we expect to help increase efficiency and more fully utilize our Ecuadorean shrimp packing plant.''

Kohn concluded, ''The company's liquidity, as measured by working capital, improved to a ratio of 3.22 at Sept. 30, 1990 from 3.15 at Dec. 31, 1989.''

OAK BROOK, ILL. (NOV. 14) BUSINESS WIRE - McDonald's Wednesday announced its test of a new lowfat ground beef sandwich, the Lean Deluxe.

The sandwich is made with a 91 percent fat-free beef patty which should be good news for nutrition-conscious consumers who love the taste of beef but want to cut down on fat in their diet.

This new low-fat ground beef is the result of three years of research and development by Auburn University. The work was encouraged by McDonald's and funded by the Beef Industry Council of the Meat Board in cooperation with Auburn University.

''If it weren't for McDonald's, this product would never have happened,'' said Dale Huffman, Ph.D., of Auburn University, who, together with co-worker Russ Egbert, developed the initial research for the new lowfat ground beef. ''McDonald's has refined our product and is the first to make it available to customers in their restaurants.''

''Our hamburgers are already classified 'lean' by the USDA, but when it comes to our products, we're never satisfied,'' said Ed Rensi, President, McDonald's USA. ''The Lean Deluxe offers our customers an additional lowfat menu choice and delivers the taste our customers expect. We're testing it in our restaurants in Harrisburg, PA, as an addition to our existing hamburger line-up.''

Members of the beef industry predict the impact of this new product will go beyond the McDonald's menu board. ''The beef industry already recognized the need to develop a leaner ground beef alternative,'' said Dave Hurt, Ph.D., Vice President, Research, National Live Stock and Meat Board. ''McDonald's helped move the entire beef industry in a direction that will benefit all consumers.''

The McDonald's Lean Deluxe is a lowfat ground beef sandwich made with a 91 percent fat-free, quarter pound beef patty served on a sesame seed bun with ketchup, mustard, pickle, onion, lettuce and tomato. It contains only 310 calories and 10 grams of fat.

McDonald's is the world's largest quick service restaurant organization, with more than 11,400 restaurants in 53 countries.

CARMEL, IND. (NOV. 14) BUSINESS WIRE - Conseco Inc. (NYSE:CNC), a financial services company headquartered in Carmel, Wednesday commented on the recent activity in its stock, saying:

(1) The company last week reported record earnings from operations in the third quarter and nine months ended Sept. 30, and also confirmed that Conseco expects to equal or exceed current analyst estimates of operating earnings per share of approximately $4.50 for the full year -- a 40 percent increase over the $3.21 earned by the company in 1989. Earnings from operations for the third quarter of 1990, excluding realized investment gains, were $9.1 million, or $1.20 per share fully diluted, up 30 percent on a per share basis from operating earnings of $8.5 million, or 92 cents per share, in the third quarter of 1989. Nine-month 1990 operating earnings were $26.4 million, or $3.26 per share fully diluted, up 35 percent on a per share basis from $21.9 million, or $2.42 per share, in 1989.

(2) The company this morning (Wednesday, Nov. 14) filed with the Securities and Exchange Commission its Quarterly Report on Form 10-Q for the quarter ended Sept. 30. In the 10-Q, Conseco discussed its operating results and also stated that, ''During the fourth quarter of 1990, the company intends to sell

and issue in a private placement to one or more institutional investors up to $25.0 million stated value of Series C Redeemable Preferred Stock. The Series C Preferred Stock will be issued for stated value of $25 per share, will be redeemable at any time at the option of the company, and will accrue cumulative dividends payable quarterly at rates to be determined. The company intends to use the proceeds from the sale of the Series C Preferred Stock for general corporate purposes, including the repurchase of shares of its common stock pursuant to its stock repurchase program.'' The Series C Preferred Stock would not be convertible into common shares.

#90318b0786 11/14/1990 ~Business Wire
LIVERPOOL, NY (NOV. 14) BUSINESS WIRE - Advanced Medical Products Inc. (NASDAQ:ADVA) reported Wednesday the results of its first fiscal quarter that ended Sept. 30, 1990.

The company's net sales increased 30 percent to $1,816,000 in the current quarter from $1,399,000 in the same quarter in the last fiscal year. Net income for the quarter increased $45,000 (69 percent) over the same period last year from $65,000 to $110,000.

''The Company's continued sales and profit growth are primarily attributable to the maturing of our distribution network and our increasing market share in the holter monitoring market,'' said Clarence Groff, president and CEO of AMP. ''These strengths position us well for the product diversification and substantial growth we expect in the coming year,'' Groff continued.

According to a recent Wall Street Journal review of advances in Medical Technology, over 90 percent of primary care physicians now perform in-office clinical diagnostic testing. The availability of rapid in-office results has allowed primary care physicians to initiate therapy, and relieve patient's anxiety, sooner. Advanced Medical Products is an emerging leader in the design of new generations of clinical diagnostic systems specifically for office-based physicians. AMP currently offers systems which are instrumental in the diagnosis of cardiovascular disease, hypertension and prevention of sudden cardiac death.

NEW ORLEANS (NOV. 14) BUSINESS WIRE - Freeport-McMoRan Inc. (NYSE:FTX)

announced Wednesday that it has received court approval of the settlement of certain lawsuits which were filed following the initial announcement of the proposed merger of its affiliate, Freeport-McMoRan Oil & Gas Co. (NYSE:FMP), into a wholly owned subsidiary of FTX.

Subsequent to the court approval, FTX filed a certificate of merger with the Delaware Secretary of State. Upon acceptance of the certificate of merger by the Secretary of State, which is expected to occur later today, the merger will be consummated and each outstanding publicly held share of FMP common stock will be converted into .3119461 of a share of FTX common stock, resulting in the issuance of approximately 7 million FTX shares.

Holders of record of FTX common stock as of Nov. 15, 1990, including the shares of common stock issued pursuant to the merger, will receive the December dividends aggregating 62.5 cents per share on the FTX common stock.

As previously announced, the merger was approved by holders of approximately 90 percent of FMP's common stock. Of those publicly held shares which were voted, holders of approximately 97 percent of FMP common stock voted in favor of the merger.

FTX is a leader in the exploration, mining, development, production, processing, and marketing of natural resources. The company's assets include sulphur, phosphate rock, phosphate fertilizer products, oil and natural gas, copper, gold and other natural resources.

DALLAS (NOV. 14) BUSINESS WIRE - The Board of Directors of Atmos Energy Corp. (NYSE:ATO) Wednesday approved a 1 cent increase in the company's regular quarterly dividend on common stock.

The increase from 29 cents to 30 cents per share is effective with the dividend to be paid on Dec. 10, to shareholders of record on Nov. 26. The indicated annual dividend is now $1.20 per share.

Atmos Chairman Charles K. Vaughan said, ''We have raised our dividend for the third consecutive year. Since 1985, the dividend has increased 50 percent. We are pleased to continue our record of providing a good return to the shareholders who have invested with us.''

This is the 28th consecutive quarterly dividend paid by the company.

Atmos Energy Corp. provides natural gas service to more than one-half million customers in Texas, Louisiana, and Kentucky through its operating companies - Energas Company, Trans Louisiana Gas Company and Western Kentucky Gas Company.

#90318b0793 11/14/1990 ~Business Wire

BOSTON/GENEVA (NOV. 14) BUSINESS WIRE - The Ares-Serono Group Wednesday reported worldwide sales of US $150.9 million for the third quarter ending Sept. 30, 1990, compared with $114.9 million for the same period last year, an increase of 31.3 percent.

Net income increased by 8.9 percent to $14.8 million or $27.14 per share, compared with $13.5 million or $24.91 per share in 1989. Commenting on these results, Fabio Bertarelli, chief executive officer of The Ares-Serono Group, remarked, ''Sales performance for the third quarter proves to be well above the industry average, encouraging us to pursue our strong R&D investment strategy.''

Worldwide sales for the nine months ending Sept. 30, 1990 rose 24.1 percent to $453.2 million, compared with $365.3 million during the same period in 1989. Excluding favorable currency fluctuations, actual sales growth for the nine months of 1990 was 14.0 percent. Net income rose 3.6 percent to $44.8 million or $82.37 a share, compared with $43.2 million or $79.52 per share for the first nine months of 1989.

Net income shows the impact of the group's continuous investments in research and development, in marketing, as well as its keeping up with a high level of investments in the diagnostic field. In addition, it includes foreign exchange differences of $3.0 million from Latin America, and increased financial expenses.

Year-to-date prescription pharmaceutical sales worldwide increased by 27.6 percent to $376.6 million from $295.2 million during the same period last year. After adjusting for currency effects, the growth in sales of pharmaceutical products was 17.1 percent.

Sales growth for pharmaceuticals was positively impacted by the new oncological indications obtained for Serono's native beta interferon, Frone, in Italy last quarter as well as the strong market penetration of Saizen, the recombinant human growth hormone, in Italy, France, Germany and Spain.

For the first nine months of 1990, sales of the group's diagnostic products

were $67.5 million, up 13.2 percent from $59.6 million. During the last quarter, the diagnostic division registered a particularly strong increase in sales on the French market as well as on its export markets.

During the first nine months of 1990, sales of over-the-counter products declined from $10.5 million to $9.1 million, due to the one-time repurchase of inventories in the first quarter resulting from a switch from an external to an internal Ares-Serono distribution network. Third quarter sales of the OTC division increased by 54.3 percent to $3.6 million.

The Ares-Serono Group is a leading multinational developer and marketer of pharmaceutical and diagnostic products with executive headquarters in Geneva, Switzerland and operating headquarters in Boston U.S.A. The Group operates subsidiaries and manufacturing facilities in more than 20 countries. Shares of Ares-Serono S.A., the parent company of the Group, are traded on the major Swiss stock exchanges.

#90318b0798 11/14/1990 ~Business Wire

KENILWORTH, NJ (NOV. 14) BUSINESS WIRE - ''Schering-Plough has the product pipeline, the right strategic focus and the organizational vitality to sustain our record of growth and profitability for our shareholders,'' Robert P. Luciano, chairman and chief executive officer, told financial analysts during a meeting Wednesday here at the company's pharmaceutical headquarters.

Calling Schering-Plough ''a premier pharmaceutical company,'' Luciano reiterated his projection made a year earlier that 1990 earnings would increase by 18 to 20 percent. During the question-and-answer session that followed, he added, ''The same rate of growth -- 18 to 20 percent -- should carry over for 1991.''

Approximately 150 analysts and portfolio managers attended the meeting, which included remarks by Luciano and Richard J. Kogan, president and chief operating officer. The meeting opened with workshops on the company's pharmaceutical research progress and on developments in the Schering-Plough Pharmaceuticals and Schering-Plough HealthCare Products business units.

The chairman reviewed with analysts some of the major events that have occurred at Schering-Plough over the past year:

In April, a 2-for-1 stock split and an increase in the quarterly dividend from 45 cents, per pre-split share, to 56 cents were announced. The stock split was the second in three years; the dividend increase continues a five-year trend that has seen the dividend almost triple.

In September, a common stock repurchase program of up to $1 billion was announced.

The Maybelline cosmetics business was sold for $300 million to a Wasserstein Perella partnership.

The U.S. Food and Drug Administration's (FDA) Biological Response Modifiers Advisory Committee unanimously recommended approval of ''Intron A'' alpha interferon for hepatitis C. The committee's recommendation was followed by a favorable article in The New England Journal of Medicine on a study using ''Intron A'' to treat chronic hepatitis B.

FDA's Fertility and Maternal Health Drugs Advisory Committee unanimously voted in June for approval of an OTC version of ''Gyne-Lotrimin'' to treat vaginal candidiasis.

A Product License Application was filed in early 1990 for ''Leucomax'', Schering-Plough's and Sandoz's brand of granulocyte macrophage colony stimulating factor (GM-CSF), as a treatment for patients with low white blood cell counts. In August, a joint application with Sandoz was filed for ''Leucomax'' with the European Economic Community's Committee for Proprietary Medicinal Products.

The antihypertensive dilevalol was withdrawn from international markets and from FDA review.

Pointing to the company's strong earnings performance, Luciano commented, ''We have built this record of growth -- and we expect to maintain it -- by adhering to the strategy we have been vigorously pursuing at Schering-Plough throughout the '80s, and the course on which we will remain for the years to come.''

A key element of that strategy involves a long-term commitment to research and development, he added. The company's R&D investments have increased substantially each year throughout the 1980s. R&D expenditures in 1990 will probably exceed the $370 million previously estimated, while those for 1991 should approximate $420 million.

Concentrating resources on emerging new technologies -- particularly biotechnology -- has also been a top priority, along with providing a state-of-the-art research environment for scientists. Extensive renewal during the past decade of Schering-Plough's entire research infrastructure will be capped in 1992 with the completion of the $300 million Drug Discovery Facility in Kenilworth.

#90318b0804 11/14/1990 ~Business Wire
EL PASO, TX (NOV. 14) BUSINESS WIRE - El Paso Electric Co. reported results of operations for the quarter ended Sept. 30, 1990.

For the three month period, net loss applicable to common stock (after regulatory disallowances of $14,402,000 and preferred stock dividend requirements of $2,429,000) was $7,954,000.

This compares to a net loss (after regulatory disallowances of $407,000, preferred stock dividend requirements of $2,901,000, and losses from discontinued operations of $35,098,000) of $24,776,000 for the same period ended Sept. 30, 1989.

Net loss applicable to common stock for the nine months ended Sept. 30, 1990, (after regulatory disallowances of $19,629,000 and preferred stock dividend requirements of $9,597,000) was $18,960,000.

This compares to a net loss applicable to common stock (after regulatory disallowances of $15,894,000, preferred stock dividend requirements of $8,965,000, and losses from discontinued operations of $63,238,000) of $66,598,000 for the nine months ended Sept. 30, 1989.

Operating income for the third quarter of 1990 decreased by approximately $1,920,000 compared to the same period in 1989; and for the nine months ended Sept. 30, 1990, operating income declined by approximately $10,491,000.

The company continued to experience increases in base revenues (revenues before fuel revenues) as evidenced by the growth in KWH sales. Native system KWH sales increased .8 percent and 1.8 percent for the three and nine months ended Sept. 30, 1990 compared to the same periods in 1989.

Total system KWH energy sales increased 2.2 percent for the same comparable periods. Base revenues also increased as a result of base rate increases in Texas and New Mexico effective June 1989 and May 1990, respectively, and from bonded rates for Texas in June 1990.

While base revenues increased in both the three- and nine-month periods, the increases were offset by general increases in operating expenses, including reductions in phase-in plan deferrals.

In addition, in spite of all three units at the Palo Verde Nuclear Generating Station returning to full operation in July 1990, the outages of Palo Verde Units 1 and 2 during the first half of 1990 continued to negatively impact operating results for nine months ended Sept. 30, 1990.

In the aggregate, the company has recorded, net of taxes, $19,629,000 of

regulatory disallowances during the nine-month period ended Sept. 30, 1990, of which $14,402,000 was recorded in the third quarter 1990.

The disallowances recorded in the third quarter 1990 were the greatest factor contributing to the net loss. In August 1990, the Public Utility Commission of Texas rendered its final order in the company's filing to reconcile the company's fuel expenses and revenues for the period Aug. 1, 1985, through March 31,1989.

Upon rehearing, the company was ordered to refund to Texas customers approximately $7,100,000, plus interest, over a 12-month period.

As a result of this order, and a recent Texas Supreme Court decision, the company wrote off the balance of its unrecovered costs in connection with an abandoned uranium fuel joint venture. Aggregate pre-tax write-offs related to the company's fuel case were approximately $14 million.

In August 1990, the PUCT also issued its final order in connection with the company's filing for the third scheduled base rate increase under the rate moderation plan in the company's Texas jurisdiction.

The final order provides for an approximate $11.2 million increase in Texas base rates ($7.1 million in cash and $4.1 million in phase-in deferrals) and approximately $2 million for rate case expenses to be surcharged to its Texas customers over 12 months.

The company had filed for a $33.9 million increase ($7.1 million in cash and $26.8 million in phase-in deferrals). As a result of the order and a recent Texas Supreme Court decision, the company recorded approximately $4 million in pre-tax regulatory disallowances.

The company also recorded approximately $8.1 million in pre-tax regulatory disallowances during the second quarter 1990 in connection with the New Mexico Public Service Commission's final order denying the company's requested amendment to its New Mexico rate moderation plan.

Other factors affecting the three- and nine-month periods ended Sept. 30, 1990 were increased interest costs due to greater outstanding debt balances; and reduced phase-in plan deferred return resulting from decreased deferrals allowed by the PUCT in the company's recent rate cases.

El Paso Electric is an electric utility serving approximately 243,000 customers in El Paso, Texas and the Rio Grande Valley in Texas and New Mexico. The company has a 15.8 percent interest in each of the three 1,270 megawatt nuclear generating units at the Palko Verde Nuclear Generating Station located near Phoenix, Arizona.

EAST HANOVER, NJ (NOV. 14) BUSINESS WIRE - The Ultimate Corp. (NYSE:ULT) expects its recently announced layoffs and expense reductions to cut selling, general and administrative costs at the software and services company by up to $5 million per quarter, or $20 million annually, according to Michael J. O'Donnell, Ultimate's chairman, president and chief executive officer.

O'Donnell said the company expects the cost-cutting to be effective in returning Ultimate to profits, but anticipates that revenues may drop by 10 percent or more as the effects of recession are felt over the coming year.

In remarks Wednesday before the Atlanta Society of Financial Analysts, O'Donnell said that the company expects to write off certain intangible assets including good will, for several small operations. He added that the write-off will decrease the company's depreciation and amortization burdens, with positive results for future quarters.

''We made the cuts to size our operation to our anticipated revenue and gross profit margins,'' O'Donnell said. ''The cuts reflected both the consolidation of internal services made possible by increased employee productivity, and the elimination of several small operations in Canada, Australia, France and the United States.''

O'Donnell declined to estimate the size of the ''significant'' charge to earnings that Ultimate expects to report for its second quarter ended Oct. 31, 1990, but said that the charge will include the costs of cutting back, including severance and facilities charges, as well as the write-off of assets from the disposed operations.

He said that the charge is under study by the company's auditors and should be announced in mid-December.

O'Donnell also commented on Ultimate's recent forays into the Soviet Union and Eastern Europe. ''We have sold 35 large systems to the U.S.S.R. over the last couple of years, amounting to about $5 million in revenues. All those systems were paid in hard currency, which will continue to be our preference until currency exchange mechanisms are fully in place.''

He said that Ultimate completed a very successful seminar on first-time computerization in Moscow during October, following week-long meetings with Soviet economists, business managers and government officials.

Ultimate provides business solutions to companies of all sizes by integrating system-level software and applications software on hardware platforms from

premier computer vendors such as Bull HN, Hewlett-Packard, IBM and Sequoia Systems.

The firm also provides education, training, consulting and field-maintenance services to customers across a wide range of vertical markets. In addition to its North American operations, Ultimate has subsidiaries in the United Kingdom France and Australia.

SANTA CLARA, CALIF (NOV. 14) BUSINESS WIRE - Smith, Dennis & Gaylord Inc. (SD&G) and Cognos Inc. have recently reached a partnership agreement whereby SD&G will incorporate Cognos' PowerPlay into its BUSINESS/XL Financial Management applications.

The union of these two products will serve to create software solutions with built-in Executive Information System capabilities.

SD&G has developed specialized software which enables PowerPlay to work with the BUSINESS/XL financial software. This is one element of the product offering that will be marketed as BUSINESS/XL Dimensions.

SD&G is a key software solution provider in the Hewlett-Packard minicomputer (HP 3000) marketplace. The companpy has been a PowerHouse partner since 1988. ''SD&G's newly enhanced working relationship with Cognos is evidence of the value that we place on our strategic alliances,'' said Jon Witty, director of sales and marketing. ''Furthermore,'' said Witty, ''we are confident that the addition of BUSINESS/XL Dimensions will help us maintain a leadership position in the project accounting market.''

SD&G is a provider of state-of-the-art Project Accounting and Financial Management software solutions. These solutions meet the sophisticated needs of government contractors, environmental services firms, engineering companies professional services firms, and other organizations with demanding accounting requirements. These organizations typically maintain at least 100 professional employees on staff and have annual revenues of at least $20 million.

Cognos markets application development software used on mid-range computers. The publicly held company is headquartered in Ottawa, Canada, with worldwide sales, service and marketing operations based in Burlington, Mass.

#90318b0821 11/14/1990 ~Business Wire

NEW YORK (NOV. 14) BUSINESS WIRE - The Farm Credit System reported combined net income of $93 million for the third quarter of 1990, compared with net income of $158 million for the same period of the prior year.

Net income for the nine months ended Sept. 30, 1990 was $455 million, compared with $514 million for the first nine months of 1989. Income before an extraordinary loss related to a repurchase of debt for the quarter and nine months ended Sept. 30, 1990 was $132 million and $494 million, respectively; no extraordinary items were reflected in 1989 income.

''Even though the System's net income for the third quarter of 1990 declined when compared with the same period of 1989, the level of core earnings of the system, as represented by the excess of net interest income over net other expenses, continued to improve,'' stated James A. Brickley, president and chief executive officer of the Federal Farm Credit Banks Funding corporation.

''Core earnings also improved for the nine months ended September 30, 1990 as compared with the same period last year. The primary factor leading to this strengthening of core earnings was an increase in net interest income.''

Net interest income increased $52 million to $288 million for the third quarter of 1990 and increased $172 million to $904 million for the nine months ended Sept. 30, 1990, as compared with net interest income of $236 million and $732 million, respectively, for the same periods of the prior year. The increase in net interest income was primarily attributable to the replacement of maturing higher-cost debt with lower-cost debt.

Offsetting this improvement in net interest income were reductions in the negative provision for loan losses. The negative provision for the third quarter was $4 million and for the nine months ended Sept. 30, 1990 was $40 million, a decline of $72 million and $192 million respectively, from the negative provisions recorded during the comparable periods of 1989. Moreover, during the third quarter of 1990 the System's net income was reduced as a result of a $39 million extraordinary loss related to the repurchase by the Farm Credit Bank of Spokane of certain of its higher-cost debt. No extraordinary items were recognized during the third quarter or the nine months ended Sept. 30, 1989.

The Farm Credit System is a nationwide system of federally chartered agricultural lending institutions cooperatively owned by their borrowers.

#90318b0823 11/14/1990 ~Business Wire

NEW YORK (NOV. 14) BUSINESS WIRE - The Blackstone Income Trust Inc. Monthly review - November 1990.

Distribution information:

$0.0875	Nov. 30, 1990	Nov. 15, 1990	Nov. 1, 1990

Investment adviser commentary:

Fixed income markets traded more positively in October following a drop in oil prices and passage of a deficit reduction bill by Congress. Yields of 30 year Treasury securities fell from over 9 percent to 8.75 percent at the end of October. With the economy facing a potential recession, the Federal Reserve lowered short-term interest rates by 25 basis points, and many market participants believe that further easing of monetary policy in the near future is likely.

Portfolio Databank (As of 10/31/90):

Portfolio Composition	Current Percentage
Mortgage Pass-Throughs	41 Pct.
Multiple Class Mortgage Pass-Throughs	19 Pct.
Stripped Mortgage-Backed Securities	6 Pct.
CMO Residuals	25 Pct.
Asset Backed Securities	6 Pct.
High Quality Money Market Securities	3 Pct.

Performance Update

	Oct. 31	Sept. 28	Aug. 31
NAV	$8.50	$8.35	$8.30
Stock Price	$8.25	$7.75	$8.13

	On initial offering price ($10.00)	On Oct. 31 Stock price ($8.25)
Annualized distribution rate	10.50 Pct.	12.73 Pct.
Annualized bond equivalent distribution rate	10.73 Pct.	13.07 Pct.

NEW YORK (NOV. 14) BUSINESS WIRE - An agreement was signed Wednesday by Rockwell International Corp.'s Autonetics Marine and Aircraft Systems Division (AM & ASD) and FIAR (Fabbrica Italiana Apparecchiature Radioelettriche) of Milan, Italy to jointly retrofit and modernize the avionic systems of defense aircraft worldwide.

The two companies, which have been collaborating since 1960, will combine their capabilities in program management and avionics' integration.

Under the agreement, Rockwell will also have the option to manufacture under license FIAR radar in the United States for installation in F-5's and other aircraft.

The market for avionics systems retrofit and upgrade is expected to reach $25 billion worldwide in the next 10 years and the two companies hope to substantially penetrate that market.

FIAR has developed a line of pulse doppler radars for the retrofit market. The most recent model -- GRIFO F -- was designed for the F-5E/F as an attractive alternative to its standard system. The advanced retrofit package offers many operational options and can be installed with no structural modifications to the aircraft.

FIAR is an Italian company known internationally for advanced electronic systems for defense, space applications and environmental monitoring. As of Jan. 1, 1991, FIAR will be controlled by Finmeccanica and Breda Finanziaria - two major Italian industrial groups with combined revenues of approximately

$10 billion.

Rockwell International, with revenues of approximately $12 billion, operates in electronics, aerospace and automation.

BROOKLYN, N.Y. (NOV. 14) BUSINESS WIRE - After 10 years of planning, including four years of hearings and deliberations, the Iroquois Gas Transmission System received construction approval Wednesday from the Federal Energy Regulatory Commission (FERC).

The 370-mile pipeline will transport 576 million cubic feet of Canadian gas daily to 21 Northeastern utilities and cogenerators. Through its subsidiary, North East Transmission Co. Inc., Brooklyn Union (NYSE:BU) has the largest distribution-company ownership in the Iroquois project, from which it expects to receive 70 million cubic feet of gas per day in the winter of 1991-92.

The gas to be transported by Iroqouis will displace 30 million barrels of oil annually, and heat 1.5 million homes. Also, the new gas supply will reduce sulfur emissions in the Northeast by more than 75,000 tons annually.

Robert B. Catell, president and chief operating officer of Brooklyn Union Gas, hailed the FERC decision as a ''giant step forward in our goal to build the Iroquois pipeline which would help satisfy the growing demand for clean natural gas to meet energy needs. Gas from Canada will play a crucial role in helping the Northeast meet federal clean-air standards. Consumers and the environment are the winners.''

The gas volumes will be sold to the distribution companies through Alberta Northeast Gas Ltd. (ANE), a Canadian corporation formed by utilities in the Northeast to purchase gas from producers in Alberta, Canada. Catell serves as chairman of ANE.

''Long before the Persian Gulf crisis, Brooklyn Union recognized the need to bolster the energy security of our region,'' said Edward J. Sondey, Brooklyn Union vice president for gas supply and one of the original planners, ''and the compelling advantages of Iroquois clearly demonstrate it as the best way to tap into a major new long-term supply of secure, competitively priced natural gas.''

Recently, TransCanada PipeLines Ltd. secured approval from The National Energy Board of Canada for a rolled-in tolling methodology. Construction of the pipeline is expected to commence early in 1991, with initial deliveries

expected by November of that year.

Brooklyn Union Gas serves 1.1 million customers in New York City's boroughs of Brooklyn, Queens and Staten Island.

SEATTLE (NOV. 14) BUSINESS WIRE - Government health officials Wesnesday announced the implementation of a federally funded nationwide program designed to break the spread of hepatitis B, a serious liver infection, from mothers to their newborn babies.

Experts from the U.S. Centers for Disease Control (CDC) met in Seattle with public health officials who will conduct the program to screen pregnant women receiving prenatal care in the public sector and vaccinate the babies of mothers who are found to be hepatitis B carriers.

Hepatitis B infects some 300,000 Americans a year, and there are up to 1 million carriers in the United States. Of the women who give birth each year, as many as 18,000 are hepatitis B carriers, many who are unaware they can spread the disease to their babies through infected blood at the time of birth.

''All babies of chronically infected mothers are at extremely high risk of being infected,'' said Dr. Harold Margolis, chief, hepatitis branch, CDC. ''But immediate immunization of newborns has been shown to be up to 95 percent effective in breaking the cycle of infection from carrier mother to baby.

''However, government studies show that about 40 percent of physicians in private and public sectors are not routinely screening pregnant women for hepatitis B,'' said Margolis.

The National Perinatal Immunization Program provided $10 million to 52 state and local immunization grant recipients this year. The program marks the first time federal funds have been appropriated for hepatitis B immunization of newborns, as recommended by the Immunization Practices Advisory Committee of the U.S. Public Health Service.

Under the new program, all pregnant women receiving prenatal care through the public sector will have blood tests to determine if they are infected with the hepatitis B virus. Women who test positive will be advised that their newborn infants need three doses of hepatitis B vaccine and one dose of hepatitis B immune globulin, the first doses to be administered as soon as possible after birth.

Describing hepatitis B as a ''serious disease with major public impact,'' Dr. Walter A. Orenstein, director, division of immunization, CDC, said that 85 percent to 90 percent of the babies infected with hepatitis B become carriers and that an estimated one-fourth of these carriers ultimately die from cirrhosis of the liver or liver cancer.

The Hepatitis B Action Group, a working committee of NFID's National Coalition for Adult Immunization, consists of associations, medical specialty societies, federal agencies and industry.

#90318b0844 11/14/1990 ~Business Wire

DALLAS (NOV. 14) BUSINESS WIRE - Abatix Environmental Corp. (NASDAQ:ABIX) Wednesday announced record sales for the third quarter and nine months ended Sept. 30, 1990.

Sales for the third quarter of 1990 increased 6 percent to $2,859,147 from $2,699,080 one year earlier. Net income for the third quarter of 1990 declined to $75,627 or $.03 per share from $195,420 or $.09 per share in the third quarter of 1989.

For the nine months ended September 30, 1990 sales increased 17 percent to $7,498,021 from $6,427,462 in 1989. Net income was $170,072 or $.07 per share as compared to $380,290 or $.20 per share for the first nine months of 1989.

Earnings per share calculations for the third quarter and nine months of 1990 were based on 2,407,520 and 2,306,217 weighted average shares outstanding, respectively, an increase of 16% and 20% from 2,081,817 and 1,923,366 weighted average shares outstanding, respectively, for comparable periods in 1989. The increase in the weighted average shares outstanding principally resulted from the Company's issuance of 289,483 shares upon exercise of warrants completed May 1, 1990.

Higher revenues for the current nine month period were principally attributable to an increase in market share of the asbestos abatement industry. The 6% increase in revenues for the third quarter was due to new sales in the hazardous materials industry. Net income in the third quarter and nine month period of 1990 declined as increased price competition in the asbestos abatement market resulted in a slight decline in gross profit margins. Earnings for 1990 were further impacted by ongoing expenses for the Company's Houston, Texas facility, established in February 1990, and its recently expanded Hayward, California facility.

According to Terry W. Shaver, President, ''In response to the anticipated slowdown in the asbestos abatement industry, the Company has been expanding its distribution services to include the hazardous materials (haz-mat) industry. Approximately 10 percent of total sales in the third quarter were to the haz-mat industry. The percent of sales to this segment is expected to increase significantly in the future. We are especially pleased with the growing contribution to revenues from our Houston facility opened earlier this year.

''Although gross margins were impacted by intense price competition in the asbestos abatement industry in the third quarter and nine month periods, we are confident that gross margins in the fourth quarter will improve as prices stabilize and as sales to the hazardous materials industry increase.''

Shaver concluded, ''Importantly, several competing distributors have recently curtailed their activities in the asbestos abatement industry and we anticipate that others may do so in the coming months. Abatix' strong financial position enables us to exploit these market opportunities while further developing our presence in the haz-mat market.''

Abatix Environmental Corporation is a distributor to the asbestos abatement, hazardous materials and industrial safety industries. The Company's product lines include personal safety and protection products and durable and non-durable equipment and supplies.

Abatix has distribution centers in Dallas and Houston, Texas and in Hayward, California and a sales office in Nederland, Texas from which it services customers throughout the Southwest, Midwest and Pacific Coast including asbestos abatement contractors and toxic waste remediation, chemical, petrochemical and general industrial companies.

ATLANTA (NOV. 14) BUSINESS WIRE - Georgia Power Co. announced Wednesday that it plans to redeem on Jan. 2, 1991, a total of $34,292,000 principal amount of its First Mortgage Bonds, by operation of the Annual Improvement Fund requirement.

The redemption amount will be allocated to two of the company's outstanding issues as follows:

13-1/8 percent First Mortgage Bonds due 2012 $20,852,000 11-3/4 percent First Mortgage Bonds due 2005 $13,440,000

The redemption of the 13-1/8 percent First Mortgage Bonds (Cusip No. 373334BY6) will result in a full redemption of all outstanding bonds of this series. Chemical Bank, as bond trustee, will notify each registered holder by first-class mail on or before Dec. 3. The books will be closed to transfer on Jan. 2, 1991, the redemption date.

For the partial redemption of the 11-3/4 percent First Mortgage Bonds (Cusip No. 373334BM2), the trustee will select on a random basis the bonds to be redeemed and notify each registered holder on or before Dec. 3, by first-class mail.

The date of record for the purpose of selecting bonds for redemption will be the close of business on Nov. 23. The books will be closed to transfer through the close of business on Nov. 27.

Redemptions of these bond issues, for Improvement Fund purposes, will be at the special redemption price equal to the principal amount thereof and accrued interest to the date of redemption, without premium.

CHICAGO (NOV. 14) BUSINESS WIRE - John Nuveen & Co. Inc. announced the filing of a registration statement with the Securities and Exchange Commission, for the initial public offering of common stock of the Nuveen Insured Quality Municipal Fund Inc., a tax-free, closed-end investment company.

The common stock offering is expected to take place in December at a price of $15 per share. The registration statement is for an offering of 10 million shares, plus additional shares to cover underwriters' overallotments.

Nuveen anticipates that the common stock will be listed on the New York Stock Exchange. All bonds in the portfolio will have the timely payment of their principal and interest guaranteed by AAA rated insurers or by escrow accounts containing U.S. government or U.S. government agency securities.

Alex. Brown & Sons Inc. is the lead manager of the underwriting. Co-managers include PaineWebber Inc., John Nuveen & Co. Inc., Prudential-Bache Capital Funding, Smith Barney, Harris Upham & Co. Inc., A.G. Edwards & Sons Inc., Blunt Ellis & Loewi (a division of Kemper Securities Group Inc.) and Legg Mason Wood Walker Inc.

The fund will be managed by Nuveen Advisory Corp., a wholly owned subsidiary of Nuveen. Nuveen has sponsored more than $40 billion of tax-free trusts and funds nationwide. Founded in 1898 and headquartered in Chicago, Nuveen is the nation's oldest and largest investment banking firm specializing in the underwriting, trading and marketing of municipal bonds, and of tax-free unit trusts, mutual funds and closed-end funds.

Income from the fund will be federal income taxes but may be subject to state and local income taxes, as well as to the federal alternative minimum tax. Capital gains, if any, will be subject to capital gains taxes.

#90318b0859 11/14/1990 ~Business Wire

PITTSBURGH (NOV. 14) BUSINESS WIRE - Information Display Technology Inc. (AMEX:IDT), Wednesday reported revenues for the third quarter of 1990 increased slightly to $15.2 million over the $15.1 million reported for the third 1989 quarter.

For the nine months ended Sept. 30, 1990 IDT reported revenues increased 9 percent to a record $38.8 million compared with revenues of $35.3 million for the nine month 1989 period.

Third quarter 1990 net income of $761,000 was down 14 percent compared with net income of $889,000 for the same 1989 period. For the first nine months of 1990, net income decreased 5 percent to $994,000 compared with net income of $1,054,000 for the first nine months of 1989.

The company's backlog as of Sept. 30, 1990 was $28.7 million, a 24 percent increase, compared with a backlog of $23.1 million as of Sept. 30, 1989. The company expects all backlog orders to be filled within a year.

Information Display Technology Inc., designs, engineers, manufactures, and markets custom-designed writing and projection surfaces, chalkborads and market boards, custom cabinetry and partitions for healthcare facilities, offices and institutions; exterior architectural building panels and cataloged office products.

NORWALK, CT (NOV. 14) BUSINESS WIRE - The Perkin-Elmer Corp. (NYSE:PKN) Wednesday reported growth in earnings, sales, and orders for the first quarter of its 1991 fiscal year.

In the quarter, which ended on Oct. 31, Perkin-Elmer's net income rose 16 percent to $9.9 million from $8.5 million a year ago. Earnings per share increased to 30 cents from 19 cents last year. The average number of shares outstanding in the current period was 33.3 million compared with 43.8 million in the prior year.

Sales in the quarter grew 11 percent to $204.8 million from $183.9 million last year, and orders in the quarter were $207.4 million compared with $185.3 million a year ago, an increase of 12 percent. Results for last year included approximately $7 million in sales and $10 million in orders of Semiconductor Equipment Service, a unit that was subsequently divested. The effect on earnings was minimal.

''Orders growth in the quarter was led by analytical instruments which were up by 21 percent in a year to year comparison,'' said Horace G. McDonell, chairman and chief executive officer. ''Instruments introduced earlier in this calendar year were the strongest contributors to the increases, with products for the biotechnology and environmental markets sharply higher.''

McDonell also noted that the gains in business were broadly-based geographically and were aided by favorable currency trends.

''We are pleased by the continued growth of our businesses,'' McDonnell said. ''However, economic developments are being watched closely and the business will be managed accordingly. We believe Perkin-Elmer's broad range of products, geographic diversity, and concentration on growth markets that are minimally cyclical, provide the best defense against difficult economic conditions.''

Backlog at Oct. 31 was $165.8 million compared with $146.4 million a year ago.

CLEVELAND (NOV. 14) BUSINESS WIRE - Mr. Gasket Co. (NASDAQ:MRGC) Wednesday reported results of the quarter ended Sept. 30, 1990.

Net income for the quarter was $156,000 (or 2 cents per share) compared with net losses of $483,000 (or 5 cents per share) for the quarter ended Sept. 30, 1989. Net sales for the quarter were $23,604,000 compared with $24,766,000 for the quarter ended Sept. 30, 1989.

Net income for the nine months ended Sept. 30, 1990, was $1,903,000 (18 cents per share) compared with net losses of $161,000 (2 cents per share) for the nine months ended Sept. 30, 1989, an increase of $2,064,000. Net sales for the nine months ended Sept. 30, 1990, were $81,759,000, compared to $85,749,000 in the nine months ended Sept. 30, 1989.

Net sales for the quarter were negatively affected by a fire at its Mexicali, Mexico, manufacturing facility in December of 1989, and a reduced sales emphasis on non-automotive items.

The company's continued emphasis on cost containment, efficiency and cash flow management is continuing to result in improved profitability. The company is continuing to take steps to further its cost reduction and efficiency program by combining its California Wheel & Tire Group with its Exhaust & Off Road Group in Tempe, Ariz. Administrative and marketing departments and distribution facilities are being relocated in Tempe. Although the favorable

financial impact of the combination will not be totally realized until 1991, the company is beginning to realize the benefits of improved customer service and improved internal controls.

Mr. Gasket Co. manufactures, imports and distributes an extensive line of products for the automotive aftermarket. The company's products are designed to improve the performance and/or appearance of automobiles and light trucks. The products include exterior automobile accessories, exhaust systems, custom wire, steel and aluminum wheels, transmission shifters and other performance products.

#90318b0865 11/14/1990 ~Business Wire

WOODBURY, NY (NOV. 14) BUSINESS WIRE - Cablevision Systems Corp. (ASE:CVC) Wednesday reported third quarter 1990 results, citing double digit increases in revenues and operating cash flow.

Revenues for the three and nine month periods ended Sept. 30, 1990 were $141,434,000 and $416,384,000, respectively, compared to revenues of $124,415,000 and $360,531,000, respectively, for the same periods in 1989.

The three and nine month increases of 14 percent and 15 percent, respectively, resulted primarily from rate increases and internal subscriber growth, and from the December 1989 acquisition of cable systems from Times Mirror Cable Television Inc. Additionally, the nine month increase in 1990 reflects nine full months of revenues from the company's acquisition, in mid-February 1989, of cable television systems from Viacom Inc.

Operating cash flow (defined as operating profit before depreciation and amortization) for the three and nine months ended Sept. 30, 1990 amounted to $59,961,000 and $175,541,000 respectively, representing increases of 14 percent and 16 percent respectively over the comparable 1989 periods. The increases were mainly attributable to the items discussed above.

The company reported net losses for the three and nine month periods ended Sept. 30, 1990 of $(74,534,000) and $(216,273,000), or $(3.38) and $(9.85) per common share after preferred dividend requirement, as compared to net losses of $(57,886,000) and $(92,885,000) or $(2.66) and $(4.33) per common share after preferred dividend requirement for the same periods in 1989. The 1989 results reflected a one-time gain of $103,214,000 on the sale of certain programming interests in April 1989.

Excluding the effects of the one time gain in 1989, the increase in the nine month 1990 loss is mainly due to additional interest and depreciation and

amortization expenses related to cable system acquisitions in 1989.

Net interest expense amounted to approximately $66,330,000 for the three month and $194,753,000 for the nine month periods ended Sept. 30, 1990. Of these amounts, approximately $18 million and $50 million, respectively, required no current cash outlays. The reported net interest expense represent increases of approximately $7,863,000 and $31,263,000, respectively, over the comparable 1989 periods.

Depreciation and amortization expense amounted to approximately $161,589,000 for the first nine months of 1990 as compared to approximately $144,149,000 for the same period in 1989.

At Sept. 30, 1990, approximately 1,318,000 households subscribed to the company's cable television services. This represents a penetration rate of 67 percent of homes passed and a gain of more than
44,500 subscribers during the first nine months of 1990.

Cablevision Systems Corp. owns and operates cable television systems in 11 states, and through subsidiaries owns interests in companies which produce and distributed programming services and provide advertising sales services for the cable television industry.

#90318b0866 11/14/1990 ~Business Wire
LOS ANGELES, CA (NOV. 14) BUSINESS WIRE - Leo's Industries, Inc. (ASE:LI) Wednesday announced results for the second quarter and six month period ended September 30, 1990.

For the three months ended September 30, 1990, total revenues reached $23,169,000 up from $19,725,000 in the second quarter of 1989. The increase was principally the result of the growth of the Company's cellular telephone reselling subsidiary, Twentieth Century Cellular, whose revenues reached $4,571,000, up from $3,404,000 in the immediately preceding quarter ended June 30, 1990.

In the second quarter ended September 30, 1989, the Company did not have any reselling operations and acted as an agent for cellular telephone companies in Southern California, deriving $1,129,000 in commissions. The Company remains a cellular telephone company agent in the Sacramento area and in the current second quarter, reported $93,000 in commissions. It should be noted that because of the transition from an agent to a reseller in November 1989, results for the second quarter of 1990 and 1989 are not strictly comparable.

Second quarter 1990 net sales from retail store operations were $18,505,000 versus $18,596,000 in the second quarter of 1989.

Effective April 1, 1990, Leo's Industries changed its accounting principle and began to expense as incurred all cellular telephone subscriber acquisition costs instead of deferring such costs. As a result, the Company recorded significantly higher cost of sales and increases in selling, general and administrative costs in the second quarter ended September 30, 1990.

The Company experienced a net loss for this period of $1,992,000 or $.44 per share. In the second quarter of 1989, when Leo's was an agent and did not incur cellular telephone subscriber acquisition costs, it had net income of $799,000 or $.20 per share.

Highlights of results for the six months ended September 30, 1990 are included in the attached table. It should be noted that the Company restated its 10Q for the first quarter ended June 30, 1990 to give cumulative effect as of April 1, 1990 to the aforementioned change in accounting. The effects of this change were to reduce earnings for the three months ended June 30, 1990 by $3,906,000 or $.90 per share.

Leo's Industries, Inc. operates Twentieth Century Cellular, Inc. a certified reseller of cellular telephone services in California, as well as Leo's Stereo Inc., a 38 store retail consumer electronics chain. These stores feature a diverse selection of brand name audio/video merchandise, but specialize in cellular telephone and in the installation of car stereos and alarms.

SAN FRANCISCO (NOV. 14) BUSINESS WIRE - Williams Sonoma Inc. Wednesday announced net earnings for the third quarter ended Oct. 28, 1990 of $1,866,000 17 cents per share, an increase of 34 percent over third quarter ended Oct. 29, 1989 of $1,389,000, 14 cents per share.

The net earnings reported for the 39 weeks ended Oct. 28, 1990 were $2,841,000 28 cents per share, compared to the net earnings of $1,894,000, 19 cents per share, for the like period of 1989.

Net sales for the 13 week period ended Oct. 28, 1990 were $63,829,000, an increase of 18.5 percent over the $53,869,000 reported for the 13 weeks ended Oct. 29, 1989.

Comparable store sales increased 3.5 percent while mail order sales were up 15.6 percent against the 13 weeks ended Oct. 29, 1989. Total net sales for the 39 week period were $177,833,000, an increase of 25.1 percent over the $142,133,000 reported for the 39 weeks ended Oct. 29, 1989.

Williams-Sonoma Inc. is a nationwide specialty retailer of high quality kitchenware and other products for the home and garden. These products are marketed through 139 retail stores and five mail order catalogs representing six distinct merchandise strategies: Williams Sonoma, Pottery Barn, Hold Everything, Chambers, Gardener's Eden and California Closet Company.

POMPANO BEACH, FL - (NOV. 14) BUSINESS WIRE - ROCK-A-BYE BABY INC., a Pompano Beach-based manufacturer of proprietary infant care products, has completed a long term manufacturing agreement with Burcliff Industries Inc., the world's second largest heating pad manufacturer.

According to Andrew Horn, president of ROCK-A-BYE BABY Inc., Burcliff has agreed to utilize most of the capacity of its Mishawaka, Ind. plant to supply ROCK-A-BYE BABY with up to 200,000 of it's patented waffle-design heating pads annually.

The new agreement will allow ROCK-A-BYE BABY to meet growing demand for its COMFY WIPE WARMER, a patented product that warms baby wipes.

The heating pads were designed especially for ROCK-A-BYE BABY to provide a number of important safety features not available on any other baby wipes warmer, including an on-off switch, lower operating temperature, and snug

wrap-around fit on wipes containers of any shape or size. The pad's waffle design also eliminates the possibility of wire movement within the pad.

COMFY WIPE WARMER, utilizing the Burcliff heating pad, is the only baby wipes warmer tested and approved by Underwriters Laboratories.

''Our agreement with Burcliff makes COMFY WIPE WARMER the safest baby wipe warmer available today, and gives us the increased production capacity we need to meet both current and future demand for the product,'' Horn said. ''And, of course we're proud that it is American-made.''

ROCK-A-BYE BABY's infant care products, including COMFY WIPE WARMER and ROCK-A-BYE BEAR, the original natural audio pacifier, are sold through more than 700 retail and mail order houses nationwide. Shares of the publically-held company are traded over the counter.

#90318b0887 11/14/1990 ~Business Wire

NEW YORK (NOV. 14) BUSINESS WIRE - Prime Financial Partners LP (AMEX:PFP), a financial services company which offers employee benefit plans to small corporations, ''which in the January-October period witnessed a 2.3 times increase in benefit trust contributions, expects an outstanding year, since 80 percent of the revenues are traditionally generated in the last two months of the year,'' Jerry P. Franks, president, told analysts at a meeting in New York Wednesday.

''Losses for the third quarter and nine months were as anticipated due to the extensive marketing activity and were increased by one time charges, further improving the ongoing outlook of the company,'' he said.

Franks said that ''as previously announced, the company intends to tender an exchange offer, at a date yet to be announced, of Class A units for the 341,000 preferred units, but at a rate no greater than 4-to-1.''

For the third quarter ended Sept. 30, 1990, the company had revenues of $486,207 compared with $442,249 for the same period last year.

Prime had a net loss of $701,171 including $191,000 of non-recurring expense, or 9 cents per Class A unit, for the quarter against a loss of $568,393, or 17 cents per Class A unit, in the same three month period last year.

For the nine months ended Sept. 30, 1990, Prime had revenues of $1,686,272 compared to $1,262,127 for the first nine months of 1990. The company had a net loss of $1,306,175, or 23 cents per Class A unit, for the first nine

months against a net loss of $1,423,534, or 44 cents per Class A unit, for the same period last year.

The Prime Trust is an employee benefit plan that provides death and severance benefits to employees funded on a tax deductible basis to the corporate employer. Additional benefits of the plan include protection of assets from creditors, flexible funding options, liquidity, estate tax-free benefits and the security of guaranteed values by the various insurance organizations offering the program.

MARKHAM, Ontario (NOV. 14) BUSINESS WIRE - SSMC Inc. Wednesday announced results for its third quarter ending Sept. 30.

Revenues for the quarter were US $158.4 million and income from continuing operations US $33.7 million. This compares with revenues of US $143.4 million and income of US $22.5 million for the same quarter last year.

For the nine month period ending Sept. 30, 1990, revenues were US $453.8 million and income from continuing operations was US $50.6 million. This compares with revenues of US $421.4 million and income of US $3.9 million in the previous year. Included in the income from continuing operations is a gain of $22.7 million from the sale of 30 percent of Singer Taiwan.

Commenting on the improved results, James Ting, chairman and chief executive officer, said, ''The results, both operating income and net income reflect Singer's management continued attention to improving operations and opening new retail outlets around the world. The introduction of new products has also contributed to these results.''

SSMC Inc. is the leading manufacturer of consumer sewing machines worldwide and also distributes industrial sewing machines and consumer durable goods. Its principle executive offices are located in Hong Kong.

The common stock of SSMC Inc. is owned by Semi-Tech (Global) Limited (''Semi-Tech''), a Hong Kong based company listed on the Hong Kong Stock Exchange, symbol 448. Semi-Tech (Global) is a subsidiary of International Semi-Tech Microelectronics Inc. whose shares are listed on the Toronto Stock Exchange, trading under symbol ISE.

#90318b0895 11/14/1990 ~Business Wire

SIDNEY, Ohio (NOV. 14) BUSINESS WIRE - Robert J. Siewert, president of The Monarch Machine Tool Co. released the following letter to shareholders Wednesday.

''Your Board of Directors has found it necessary to reduce the quarterly dividend from 20 cents to 5 cents per share. This is the first dividend reduction that Monarch shareholders have experienced in nineteen years and we feel that we owe you an explanation.

''Since 1981 your Company has experienced a depressed market and an onslaught of foreign competition. During this period we have been able to earn a profit each year, but this profit was not sufficient to cover the dividends returned to you. In order to have a viable, growing company which will enhance future shareholder benefits, it is not financially appropriate to continue to pay out more in dividends than is earned.

''We have seen growth in both revenues and earnings over the past two years. The management and the directors of your Company are committed to continuing this trend into the future.

''Our product lines have an excellent reputation and our products can compete. However, it is imperative that, if Monarch is to remain a strong, viable and growing company, we must continue to invest in product development and provide our employees with the most efficient equipment to produce these products.

''With the economic uncertainties on the horizon, we believe it prudent to take the action to reduce the dividend. We hope that you concur with us and will continue your support as we strengthen and grow.''

#90318b0896 11/14/1990 ~Business Wire

DENVER (NOV. 14) BUSINESS WIRE - Forest Oil Corp. reported a third quarter 1990 net loss of $6.1 million before redeemable preferred stock dividend requirements, compared to a net loss of $5.6 million for the comparable period of 1989.

The loss for the third quarter of 1990 was greater than the comparable period of 1989 primarily due to corporate consolidation and restructuring costs of approximately $3 million incurred in 1990 and increased depreciation and depletion expenses partially offset by higher oil and gas sales and lower interest expense.

The net loss for the first nine months of 1990 was $66.9 million before redeemable preferred stock dividend requirements, compared to a net loss of $6 million in 1989. The loss for the first nine months of 1990 was greater than the loss for the same period in 1989 despite lower interest expense because in the 1990 period revenue was down due to lower production and the impairment of the book value of the company's estimated oil and gas reserves resulting from the application of SEC regulations.

In addition, 1989 results were affected by a one-time settlement of a take-or-pay gas contract dispute. After making provisions for dividends on the company's redeemable preferred stock, the net loss attributable to common stock for the third quarter of 1990 was $7.5 million, or 77 cents per share, compared to a net loss of $7 million, or 62 cents per share, for the third quarter of 1989.

The net loss attributable to common stock for the first nine months of 1990, after making provision for dividends on the company's redeemable preferred stock, was $71.1 million, or $6.55 per share, compared to a net loss of $10.2 million, or $1 per share, for the comparable nine months of 1989.

Total revenue for the third quarter of 1990 was $20.1 million, a slight increase over the same period of 1989 due primarily to increased production volumes attributable to three new platforms which were put into service in early 1990.

Forest Oil Corp. is engaged in the exploration for and acquisition, development and production of oil and natural gas. The company's principal reserves and producing properties are located offshore Louisiana and in Texas, Wyoming, Oklahoma and Alberta, Canada. The company is traded on the NASDAQ/NMS system, under the FOIL symbol.

#90318b0911 11/14/1990 ~Business Wire

CHICAGO (NOV. 14) BUSINESS WIRE - Arthur M. Goldberg, interim chief executive officer of Bally Manufacturing Corp. (NYSE:BLY), announced Wednesday that results of operations before unusual and extraordinary items for the third quarter ended Sept. 30, 1990, were a loss of $6,530,000 compared to income of $4,697,000 for the third quarter of 1989 (loss per share of 30 cents in 1990 and income per share of 10 cents in 1989).

Revenues increased to $531,252,000 from $530,439,000 in the prior year.

Goldberg noted that ''Lower operating results were reported by each of our three business segments. The casino group reported lower revenues and operating income due to increased capacity in both the Atlantic City and Nevada markets, and a weakening economy in the Northeastern United States.

''The fitness center group reported a 7 percent increase in revenues, but lower operating income due to increases in expenses, including bad debts. The products and services group reported a 20 percent increase in revenues, but lower operating income due to losses in the gaming equipment and systems business.''

Goldberg further noted, ''The results for the third quarter 1990 were also negatively impacted by unusual items totaling $78.1 million, net of tax, or $2.72 per share.

''Unusual items, net of tax, consisted of a $69.0 million write-off of Bally's Grand Inc. intangible assets associated with our decision not to make the scheduled Oct. 15, 1990, interest payment of $18.4 million, and other charges of $9.1 million related to litigation, the write-down of an investment and other items.

''In the third quarter 1989, an extraordinary loss was reported related to the early retirement of debt associated with a refinancing.''

For the nine months ended Sept. 30, 1990, revenues were $1,636,093,000, compared to $1,565,942,000 in 1989. Income before unusual and extraordinary items was $6,911,000 in 1990 vs. $12,584,000 in 1989, with earnings per share of 3 cents and 24 cents, respectively.

As previously discussed, unusual items in 1990 were $78.1 million with 1989 unusual items, net of tax, consisting of a $33.9 million gain on the sale of Aladdin's Castle and charges of $8.4 million. The extraordinary items consisted of a gain in 1990 and a loss in 1989 on the early retirement of debt.

Bally Manufacturing Corp. is a world leader in the gaming and fitness industries with four casino hotels, a nationwide network of fitness centers and a complete line of gaming equipment and systems, fitness products, and lottery products and services.

#90318b0920 11/14/1990 ~Business Wire

BURLINGTON, MA (NOV. 14) BUSINESS WIRE - M/A-COM Inc. (NYSE:MAI) reported income for the fourth quarter of fiscal 1990 of $4,825,000 or $0.19 cents per share compared with a loss from continuing operations of $4,693,000 or $0.19 per share for the comparable period in fiscal 1989.

For the fiscal year ended Sept. 29, 1990, M/A-COM reported a net loss of $105,410,000 or $4.32 per share compared with net income of $178,000 or $0.01 per share for the prior fiscal year. 1990 fiscal year losses reflect first quarter 1990 restructuring charges and provisions for contract losses of approximately $43,500,000 or $1.78 per share, as well as a first quarter 1990 loss from discontinued operations of $73,890,000 or $3.03 per share.

Sales in the fourth quarter of fiscal 1990 from continuing operations were $97,345,000 compared to $91,594,000 in the prior year comparable period, an increase of 6 percent. Sales from continuing operations for the year were $374,719,000 compared with $287,055,000 in fiscal 1989. Orders for fiscal 1990 amounted to $339,652,000 compared to $316,752,000 in the prior year.

The increase in both sales and orders during fiscal 1990 results from the acquisition of Adams-Russell Inc. in July 1989. Orders for the fourth quarter of fiscal 1990 were $82,397,000 compared to $117,850,000 in the comparable period of the prior year. Backlog at Sept. 29, 1990 was $263,733,000.

Vanderslice also reported that the company's divestiture program made solid progress during fiscal 1990. Of the businesses identified during the first quarter for divestiture, three sales have closed and most of the remaining businesses are in various stages of active negotiation with corporations that have strong strategic interests in the businesses.

M/A-COM Inc. is a leading producer of radio frequency, microwave and millimeter wave semiconductors, components and subsystems for applications in telecommunications, radar, navigation and defense systems including missile guidance and electronic warfare. M/A-COM also supplies equipment used in electronic surveillance. The company's products are used primarily in defense electronics systems, but also have numerous commercial applications.

#90318b0921 11/14/1990 ~Business Wire

ELMSFORD, NY (NOV. 14)BUSINESS WIRE - AFP Imaging Corp. (NASDAQ:AFPC) Wednesday reported its results for the first quarter ended Sept. 30.

The company reported net sales of $8,703,859 for the first quarter of fiscal 1991, compared to $10,030,963 for the first quarter, of fiscal 1990, a decrease of 13 percent. The company recorded a net loss of $708,115 or (15 cents) per share compared to a net loss of $538,535 or (12 cents) per share in the comparable quarter last year.

The loss for the first quarter was a direct result of the sudden and unexpected drop in sales. This unprecedented decline can be attributed to the domestic economic situation and in reaction to the political events in the Middle East during August 1990 which have added uncertainty to the U.S. economy.

Many buyers of our capital equipment have become cautious and have chosen to delay or cancel delivery of their orders. Retail advertising placed in newspapers and other four color formats is insufficient to warrant additional printing plant expansions at this time.

Management has stabilized the situation and can operate at these lower revenue levels by continuing the significant restructuring program to reduce personnel and all nonessential costs. Expenses were reduced by $735,000 or 18.5 percent from the comparable quarter last year and this is an additional decline of

$258,000 or a 7 percent decrease as compared to the June 30th quarter.

AFP Imaging designs, manufactures and markets equipment and systems to hospitals, radiologists, cardiologists, dentists and other medical specialists used to generate, record, process and view hard copy diagnostic images under the AFP and DENT-X trademarks. The company also provides a broad line of pre-press image making equipment to the international printing and graphic arts industry under the LOGETRONICS, FOROX and KENRO brands. AFP products are distributed worldwide by three different dealer networks.

BILLERICA, Mass. (NOV. 14) BUSINESS WIRE - Davox Corp. (OTC/NMS:DAVX) Wednesday announced revised third quarter revenues of $9.1 million and a net loss of $54,000 for the period ending Sept. 30, 1990.

These figures, as stated in its quarterly report filed with the Securities and Exchange Commission on Form 10Q, compare to revenue of $9 million for the second quarter of 1990 and $8.8 million for the comparable period of 1989.

Net loss for the period compares to net losses of $640,000 and $332,000, respectively, in the preceding and year-earlier quarters. Net loss per share was one cent for the 1990 third quarter.

For the first nine months of 1990, revenue was $28.1 million, 9 percent higher than the $25.7 million reported for the same period last year. Net loss for

the nine months of 1990 was $646,000 compared to a net loss of $2,221,000 for the nine months of 1989. Net loss per share was 12 cents vs. a net loss per share of 43 cents for the first nine months of last year.

Davox develops, produces and markets computer aided communications systems, which include predictive dialing, interactive voice response and multifunction workstation systems. These products automate and integrate telephone and data communications functions to increase productivity in applications such as collections, telemarketing and customer service.

JACKSONVILLE, FL (NOV. 12) BUSINESS WIRE - Amerishare Investors Inc., a Jacksonville, Fla., insurance agency, announced that A.L. Williams Marketing Corp., a marketing and sales unit of Primerica, has settled its lawsuit with Investors Life Insurance Co. of Nebraska.

All claims have been dropped against Investors Life, the underwriter for Amerishare Investors.

Amerishare's President, Randy Stelk, said, ''We are pleased that A.L. Williams Corp. and MILICO have ended the case against Investors Life Insurance Co. of Nebraska and have relinquished all claims. We agree with this action because such cases are best settled in the market place instead of in the courts.''

Amerishare Investors is a three-year-old life insurance agency with offices in 47 states and over 8,000 agents nationwide. This year it expects to pass the $4 billion mark in face value of policies written.

Amerishare is currently one of the top 100 companies in the United States and concentrates on the sale of term life insurance and mutual funds.

#90318b0933 11/14/1990 ~Business Wire
OAKLAND, NJ (NOV. 14) BUSINESS WIRE - Diagnostic/Retrieval Systems Inc. (ASE: DRS.A, DRS.B) Wednesday reported a net loss for the second quarter ended Sept. 30.

The net loss for the three-month period amounted to $3,550,000, or 66 cents per share, compared with a net loss of $6,366,000, or $1.13 per share, for last year's second quarter. Revenues rose to $12,599,000, an increase of 4

percent over revenues of $12,120,000 for the second quarter of fiscal 1990.

For the first six months of fiscal 1991, the company recorded a net loss of $3,409,000, or 62 cents per share, as compared with a net loss of $6,072,000, or $1.08 per share, for the same period in the previous year. Revenues for the first half of the fiscal year were $23,218,000, down 10 percent from revenues of $25,909,000 for the first two quarters of fiscal 1990.

Contract backlog at Sept. 30, stood at approximately $39 million, compared with backlog of approximately $42 million at March 31, the company's fiscal year end.

The increase in revenues during the second quarter primarily was due to shipments relating to the company's recording system product line.

The net loss for the three-month period was principally due to the recording of a loss provision amounting to $4.2 million for unabsorbed overhead and general and administrative expenses, as well as estimated contract losses arising from higher overhead and general and administrative expenses not recoverable under existing fixed-price contracts.

Although the company implemented an internal restructuring program to reduce its staff and facilities, it has continued to maintain the capability to manufacture and support Advanced Video Processors (AVP) and other products in anticipation of production contract awards. The charge was recorded primarily because the company does not expect to fully utilize this capability in fiscal 1991, due to delays in the receipt of contract awards.

The AVP program was awarded to DRS in 1987. For this program, the company is developing advanced display workstations for U.S. Navy surface ships engaged in antisubmarine warfare.

Diagnostic/Retrieval Systems Inc. designs and manufactures special-purpose computer and display systems, as well as recording, trainer and optical systems for military and industrial applications.

#90318b0934 11/14/1990 ~Business Wire

WEST COLUMBIA, S.C. (NOV. 14) BUSINESS WIRE - Robert K. King, president of Wells American Corp. (ASE: WAC), Wednesday announced the company's second quarter results for fiscal 1991.

Sales for the second quarter ended Sept. 30, 1990 were $42,350, compared to $2,298,880 for the like period in fiscal 1990. The company incurred a net

loss $343,770, or 7 cents per share for the second quarter as compared to a net loss of $1,170,870, or 23 cents per share for the comparable period in 1990.

King indicated that the decrease in sales was attributable to the continued suspension of production which began in January 1990. He indicated that second quarter loss also included one time start-up marketing costs associated with the company's new MegaMac product line and write-downs of approximately $81,000 related to company's decision to sell certain unused or surplus property as a means of raising capital.

King stated that the board of directors of Wells American is of the opinion that the company's cash and capital resources together with cash flow from operations are not sufficient to finance long-term continued operations unless revenues are restored to a level which prevents further significant operating losses. He indicated that the company has ''reduced personnel and work hours to their minimum levels and is continuing to provide technical assistance and warranty and non-warranty repair and spare parts service to its customers.''

Concurrent with this activity, King said the board is exploring sources of outside capital. The company is also attempting to identify and negotiate with individuals or entities who may have an interest in acquiring or merging with the company,. In the event these initiatives are unsuccessful, the company may find it necessary to file for bankruptcy reorganization or liquidation.

Should adequate funding be acquired, King stated that the company intends to commence manufacturing of its new product, the MegaMac, which is designed to increase the productivity of Apple Macintosh computers for business users. The company believes production of the MegaMac could begin within 30 days after adequate capitlization is acquired.

Wells American's common securities are traded on the American Stock Exchange under the ticker symbol ''WAC.'' For further information on Wells American and its products, contact Robert K. King, president, at the company's corporate headquarters. The address is 3243 Sunset Blvd., West Columbia, S.C. 29169. Phone is 803/739-1829.

#90318b0937 11/14/1990 ~Business Wire

CINCINATTI (NOV. 14) BUSINESS WIRE - Manhattan National Corp. (NYSE:MLC) Wednesday announced third quarter and year-to-date 1990 financial results for the Cincinatti-based holding company.

Manhattan National Corp. financial results for the third quarter and nine months of 1990, were significantly better than the same periods a year earlier. Third quarter 1990 net income was $442,000, or 7 cents per share, compared with a net loss of $2,115,000, or 25 cents per share, in the same period a year ago. For the nine months ended Sept. 30, 1990, net income was $1,124,000, or 17 cents per share, compared with a net loss of $1,444,000, or 17 cents per share, reported for the same period last year.

Third quarter results included a charge of $798,000 ($527,000 after tax) for contingencies resulting from the sale of Manhattan National Life Insurance Co. earlier this year and the closing of a Manhattan National Pension Services Inc. satellite office in Long Beach, Calif.

Shareholders' equity at Sept. 30, 1990 was $62,633,000, equivalent to $9.92 per share outstanding. At Sept. 30, 1990, the company had 6,315,260 common shares issued and outstanding.

The company did not repurchase any of its common stock during the third quarter. The company has repurchased 415,800 shares for $2,241,135 or an average of $5.39 per share, since its $5.0 million share repurchase program was adopted in August 1987.

Commenting on financial results, Larry R. Pike, chairman and CEO stated, ''The company's financial results continue to show solid improvement reflecting the positive impact of efforts undertaken to 'rightsize' the company and reduce expenses.

''Net income rose from a 17 cents per share loss in the first nine months of 1989 to 17 cents per share income for the same period of 1990. We are especially pleased with the results of Manhattan Life Insurance Co. whose net income increased $429,000, or 43.2 percent for the nine months ended Sept. 30, 1990, compared to the same period in 1989.

Regarding other corporate matters, Pike said, ''The agreement with the New York Insurance Department announced last week regarding the accrual of interest on the Manhattan Life Insurance Co. Guarantee Capital Reserve will result in a fourth quarter 1990 charge of $792,000, or $.125 per share.''

Manhattan National Corp. is a holding company with major subsidiaries in life insurance, investment services and pension administration.

#90318b0938 11/14/1990 ~Business Wire

WOBURN, MA (NOV. 14) BUSINESS WIRE - First Woburn Bancorp Inc. (NASDAQ: WOBS) Wednesday reported a net loss of $3,389,000 or $1.06 per share for the quarter ended Sept. 30, 1990, as compared to a net income of $46,000 or 1 cent per share for the quarter ended Sept. 30, 1989.

First Woburn's non-performing loans at Sept. 30, 1990 totalled $21,717,000 or 11.3 percent of loans outstanding. The company's total real estate owned or substantially repossessed was $24,161,000 at Sept. 30, 1990. At the end of the first quarter, First Woburn's reserve for possible loan losses was $4,094,000.

According to Frank J. Porcaro, president and chief executive officer of First Woburn, operating results for the first quarter are attributable to a charge-off relating to a real estate joint venture of $1.8 million and lower net interest income of $693,000. The company also sustained a loss on real estate owned of $417,000, an increase in asset collection and disposition costs of $263,000 and an increase in the provision for possible loan losses of $201,000.

Total assets at Sept. 30, 1990 were $282,600,000 compared to $313,836,000 at Sept. 30, 1989. Stockholders' equity at Sept. 30, 1990 was $8,963,000, equivalent to $2.80 per share or 3.17 percent of assets.

First Woburn Bancorp is the holding company for Woburn Five Cents Savings Bank. Established in 1854, Woburn Five conducts operations through five full-service banking offices located in Middlesex County, Mass.

MANCHESTER, NH (NOV. 14) BUSINESS WIRE - Davis P. Thurber, chairman, Bank of New Hampshire Corp., announced that the company's board of directors have voted a quarterly dividend of five cents per share, as compared to the previous quarterly dividend of thirteen center per share.

Commenting on the eight cent per share reduction from the previous quarter, Thurber stated that ''Given the continued general softness in the local and regional economy and other considerations, the board of directors deemed this a realistic and prudent course of action at this time, and it will continue to assess, on a quarterly basis, the advisability and level of future declarations.''

He also noted that the company's capital position remains strong and, in fact, as of Sept. 30, 1990 the company's primary capital ratio stood at 7.80 percent -- well in excess of the current regulatory requirement of 5.5 percent.

The dividend will be paid Jan. 2, 1991 to shareholders of record as of Dec. 12 1990.

Bank of New Hampshire Corp., headquartered in Manchester, is a five-bank holding company. The offices of the affiliates total 28, in 16 different communities throughout the southern, central, coastal and lakes regions of the state.

#90318b0942 11/14/1990 ~Business Wire

HERNDON, VA (NOV. 14) BUSINESS WIRE - Anthony L. Craig, president and chief executive officer of this metropolitan Washington, D.C.-based systems integrator, Wednesday announced the results of operations for the second fiscal quarter ended Sept. 30.

Second quarter revenue increased 63 percent to $20.4 million in the September 1990 quarter from $12.5 million in the September 1989 quarter. This increase was the result of substantially increased shipments of ruggedized, custom workstation systems under the company's contract with the U.S. Marine Corps and shipments under its contract with the Navy for Desktop tactical computers.

The substantial increase in systems revenue of $9.7 million (125 percent) was somewhat offset by a $1.8 million decline in maintenance services revenue. For the first six months ended Sept. 30, 1990, revenue has increased 101 percent to $44.4 million from $22.1 million for the comparable period in 1989.

The company incurred operating losses for the three and six month periods ended Sept. 30, 1990 of $1.7 and $1.9 million compared with operating losses of $3.1 and $6.9 million in the same periods in 1989. This represents a decline in operating losses of 44 percent and 72 percent for the three and six month periods ended Sept. 30, 1990, respectively.

The operating results continued to be affected despite the growth in revenues because of continuing losses in the company's maintentance services segment.

Craig said, ''We have completed a thorough review of our customer service organization resulting in further downsizing of our maintenance operations to match our current and anticipated volumes. Our next step to improve operating results will be in the identification of new maintenance opportunities.''

The company's net income for the quarter and first six months of $22 and $19.3

million, respectively, reflects an extraordinary gain of $23.1 million posted in the second quarter as a result of the company's completion of the previously announced financial recapitalization.

Fred Knoll, the company's chairman stated, ''The year-to-date operating results reflecting the strong revenue growth and decline in operating losses, coupled with a record firm order backlog of $54.8 million, positions the company for future success.''

#90318b0945 11/14/1990 ~Business Wire

LONDON (NOV. 14) BUSINESS WIRE - British Gas plc (NYSE:BRG) announced Wednesday that it has received approval from Investment Canada for its proposed offer for all the common shares of The Consumers' Gas Company Ltd of Toronto.

Investment Canada approval is conditional on British Gas's acceptance of the undertakings given to the Government of Ontario. British Gas has accepted those conditions.

British Gas has also agreed to an Investment Canada requirement that, as soon as possible but in any event within three years, Consumers' Gas dispose of oil and gas assets held as part of its Telesis Oil and Gas division, excluding those which the Ontario Energy Board designates as gas storage. This is consistent with federal government policy restricting foreign acquisition of Canadian owned upstream oil and gas assets.

''The Investment Canada approval supports our view that the association between British Gas and Consumers' Gas will provide real benefits to Canada,'' said George Langshaw, Managing Director, Global Gas for British Gas. ''The approval means we can now proceed with our offer as soon as possible.''

British Gas plans to make its offer for all the shares of Consumers' Gas on or before November 28.

British Gas, headquartered in London, is the largest integrated gas company in the Western world and is primarily involved in the purchase, transmission, and sale of natural gas to domestic, industrial and commercial customers in Great Britain. Important support activities to its marketing efforts include appliance trading and customer service to domestic gas customers.

British Gas is also active in the exploration for and production of hydrocarbons both offshore and onshore. Expertise developed in the gas business is offered for sale overseas through the British Gas International

Consultancy Service.

American Depositary Receipts are traded on the New York Stock Exchange. One ADR is equivalent to ten ordinary shares.

#90318b0952 11/14/1990 ~Business Wire

LOUISVILLE, KY (NOV. 14) BUSINESS WIRE - ICH Corp. (ASE:ICH) Wednesday announced earnings for the three months ended Sept. 30, 1990.

Net earnings applicable to common stock were $6,167,000, or 13 cents per share on revenues of $468,568,000. This compares to a loss of ($100,649,000), or ($2.09) per share, on revenues of $420,528,000 in the third quarter of 1989. The 1989 results include a net after-tax loss of ($99,000,000) related to the sale of subsidiaries.

For the nine months ended Sept. 30, 1990, net earnings were $16,647,000, or 35 cents per share, on revenues of $1,425,991,000. This compares to a loss of ($111,786,000), or ($2.30) per share, on revenues of $1,309,684,000 in the nine months of 1989.

''We are very pleased with improvements in operating results and continued progress in our restructuring efforts,'' said John Franco, chief executive officer of ICH. Health claims experience did begin to improve in the quarter, as previously anticipated. In addition, individual life mortality claims experience improved markedly and accumulation product spreads remained stable.

Third quarter earnings included the effects of a one-time charge related to the final purchase price adjustments of the March 30, 1990 sale of certain subsidiaries to HMS Insurance Holdings Inc. This charge approximated 11 cents per share.

Common equity increased in the quarter by $11,411,000, or 24 cents per share, as a result of reported earnings and significant unrealized gains, bringing book value to $2.57 per share.

Although accounting for its 20 percent investment in First Executive Corp. (FEXC) on the equity method, at Dec. 31, 1989, the company reduced its carrying value below its adjusted equity basis to more accurately reflect management's assessment of the realizable value of this investment.

Since circumstances at FEXC have not changed during the first nine months of 1990, the company offset its equity in FEXC's reported gain (totaling $713,000 and $7,690,000, for the quarter and nine months, respectively) through corresponding permanent writedowns of its investment in FEXC. Accordingly, FEXC again had no effect on ICH's 1990 third quarter or nine months reported earnings.

#90318c0019 11/14/1990 ~Comtex

WASHINGTON (NOV. 14) COMTEX - The 8-K report filed at the SEC shows on Nov. 8 1990, Balfour Maclaine Corp.(TICKER: BML) announced it is preparing a restructuring plan in connection with refocusing the company's core commodity businesses.

The plan will include proposals for the sale or other disposition of several affiliates, including Balfour MacLaine Futures Inc. and its interest in American Vision Centers Inc.(TICKER: AMVC).

American Vision Centers, which filed this 8-K report, notes that since acquiring its initial stake in American Vision, Balfour has been American Vision's principal source of funding through additional equity purchases, term loans and advances.

Balfour presently holds a 74% interest in American Vision Centers.

Balfour also announced it expects to report an approximate $7 million loss on operations for the third quarter and additional losses on certain businesses which have been or are proposed to be discontinued under the restructuring plan.

GROUP LED BY RD HUBBARD OWNS 812,476 SHARES (20.50%) OF HOLLYWOOD PARK ENTERPRISES INC. (TICKER: HTRF) OF INGLEWOOD, CALIFORNIA.

ANNOUNCEMENT:

On Aug. 3, 1990, Hubbard filed an initial 13D announcing his intention to seek representation on the boards of the companies. On Sept. 13, 1990, Hubbard sent a letter to operating company's board requesting that Marjorie Everett, the chairman and CEO of that board, retire as a director and officer of operating company effective at the next annual meeting and be appointed chairwoman

emeritus. Hubbard also proposed that he and his four nominees be elected to the board of the company and that he be elected president and CEO of operating company. On Oct. 19, 1990, Hubbard met with the members of the board but the board took no action. On Oct. 24, 1990, Lodwrick Cook resigned from the board and the company announced that its annual meeting will be held on Jan. 28, 1991 and that the expiration date for submitting shareholder proposals would be Oct. 31, 1990. Also on Oct. 24, Hubbard sent a letter to the board. On Oct. 26, 1990, Hubbard filed a complaint in Delaware against the companies and their directors alleging failure to satisfy fiduciary duties. Hubbard is seeking a declaration that the rights agreement is inapplicable to proxy contests and that the court act to preclude the companies from preventing him from making nominations after Oct. 31, 1990. Hubbard delivered a notice of stockholder proposals. On Nov. 1, Hubbard delivered to the company a stockholder consent in lieu of meeting, which approves and adopts resolutions removing the entire board and electing RD Hubbard to fill the vacancies.

LATEST TRANSACTION:

RD Hubbard purchased 2,300 shares from Sept. 17 to Nov. 1, 1990 for $31.78 to $22.41 per share.

GROUP LED BY P.E. MALLOY III OWNS 304,000 SHARES (9.78%) OF NEW YORK BANCORP INC. (TICKER: NYBC) OF DOUGLASTON, NEW YORK.

ANNOUNCEMENT:

On Nov. 9, 1990, Malloy and McManus entered into an agreement, dated as of Nov. 9, 1990, with the company pursuant to which Malloy and McManus have been named to the four-person executive and nominating committees of the company's board of directors. The executive committee will be co-chaired by Malloy and Martin Dehler. Also, the agreement provides that Malloy and McManus will be named to the board of directors of the company's wholly-owned subsidiary, Home Federal Savings Bank. Malloy and McManus agreed to vote their shares of common stock in favor of the board's three nominees, Dehler, Robert Simms and Peter Goodson, for election to the board at the 1991 annual meeting and to vote their shares for the nominees selected by the nominating committee at the 1992 annual meeting. Malloy and McManus will not conduct a proxy contest but will take necessary steps to dismiss their lawsuit against the company. The company will not oppose Malloy and McManus seeking regulatory approval to increase their aggregate ownership of common stock up to 20 percent of the outstanding shares and the company will revise the bank's charter after such approval has been obtained.

PURPOSE:

Agreement, dated Nov. 9, 1990.

ANNOUNCEMENT:

The Imetal note became exchangeable on or after Jan. 1, 1990 into shares of common stock at an initial exchange price of $3 in principal amount for one share of common stock. On Nov. 9, 1990, Imetal entered into a first amendment to the note purchase agreement, dated as of Nov. 7, 1990, with the Company and the Steel Company pursuant to which Imetal agreed to exchange $3,000,000 principal amount of the Imetal Note for 2,400,000 shares of common stock at a price of $1.25 principal amount for each share of common stock. The consummation of the exchange is conditioned upon: the simultaneous closing of the transactions provided for under a subscription agreement, dated Nov. 7, 1990, by and between the Company and Daido Steel Co. Ltd. pursuant to which the Company agreed to issue and sell to Daido 5,840,000 shares of common stock for $7,300,000; the sale by CSC of common stock to one or more persons for an

aggregate purchase price of not less than $7,200,000 and at a per share purchse price equal to $1.25; and the filing by the Company of a certificate of amendment to its "charter amendment" to increase the number of authorized shares of common stock from 20,000,000 to 50,000,000 with the Secretary of State of the State of Delaware. According to a press release issued Nov. 8, 1990, the charter amendment was approved at a special meeting held on Nov. 7, 1990. The first amendment may be terminated by any or the parties if the exchange of a portion of the Imetal Note is not consummated on or before March 31, 1990.

PURPOSE:

Acquisition of shares.

TOKYO (NOV. 14) - U.S. Vice President Dan Quayle urged Japanese Prime Minister Toshiki Kaifu Wednesday to make concessions to overcome an impasse in the Uruguay Round of global trade talks, Japanese officials said.

The officials said Mr. Quayle appealed for the opening of the virtually closed Japanese rice market, the main area of contention between Tokyo and Washington in the stalled talks due to end next month.

Mr. Quayle also handed a letter to Mr. Kaifu from President George Bush seeking Japanese cooperation in successfully concluding the four-year round being held under the General Agreement on Tariffs and Trade (GATT).

"The conclusion must be successful," Mr. Quayle later told a news conference. "The Cold War must not be replaced by a trade war."

But he also said that Japanese subsidies to rice farmers were only one of several "contentious issues outstanding." Others included U.S. subsidies for sugar and dairy farmers and European subsidies for other products, he said.

The appeal to the Japanese premier coincided with pledges of renewed efforts by the United States and the European Economic Community (EEC) to break the deadlock in the Uruguay Round.

Mr. Bush, who discussed the issue with Italian Prime Minister Giulio Andreotti and EEC president Jacques Delors in Washington Tuesday, said the two sides "pledged to make every effort to ensure the round concludes successfully."

Mr. Quayle, visiting Japan for the enthronement of Emperor Akihito, said he also repeated to Mr. Kaifu Washington's wish for a Japanese "presence" in the Gulf.

"As Japan has achieved economic superpower status, there are certain global responsibilities that go with that," he said. "We are not going to detail what

that presence would be."

Mr. Quayle described the Japanese contribution of four billion dollars to multinational forces in the Gulf as an "adequate reponse" and a "very valuable and needed asset to resolve this international crisis."

"But we anticipate that Japan will be doing more," he said, adding, "Everyone will have to be doing more."

Mr. Quayle also said that efforts by former Japanese premier Yasuhiro Nakasone and others to secure the release of hostages in Iraq were "counterproductive" although he understood their humanitarian motives.

"Saddam Hussein wants to appear benevolent in releasing hostages," he said. "That is simply despicable."

TOKYO (NOV. 14) - Japan's trade surplus shrank 30.4 percent from a year earlier to 3.2 billion dollars in October and was also down sharply from 7.7 billion dollars in September, the Finance Ministry said Wednesday.

Exports rose 15.8 percent to 26.6 billion dollars while imports leapt 27.6 percent to 23.4 billion dollars, the ministry said in a preliminary report.

Japan's trade surplus with the United States was 3.7 billion dollars. Exports climbed 6.8 percent to 8.4 billion dollars while imports from the country jumped 15.3 percent to 4.7 billion dollars.

The trade surplus with Asia was 1.7 billion dollars. Exports to non-communist Asian nations soared 27.2 percent to 8.6 billion dollars while imports from the region advanced 19.6 percent to 6.9 billion dollars.

The surplus with the European Economic Community (EEC) was 1.6 billion dollars. Exports to the EEC rose 19.4 percent to 4.8 billion dollars while imports from the 12 nations surged 36.2 percent to 3.2 billion dollars, the ministry said.

#90318d0660 11/14/1990 ~French/German News Agency

TOKYO (NOV. 14) - Japan's estimated imports of foreign cars in 1990 were revised downward to 230,000 units from an initial projection of over 240,000, Japan Automobile Importers Association officials said Wednesday.

They attributed the downward revision mainly to higher rates on car loans and the shortage of parking lots in the Tokyo metropolitan area.

They also predicted a slowdown in the growth rate of car imports in 1991 to between 10 and 15 per cent, following 30 per cent rises over four straight years due to the yen's advance against the dollar which reduced yen-denominated car prices.

Sales of imported cars in 1989 totaled 182,168 units, up 35.2 per cent from the previous year.

#90318d0680 11/14/1990 ~French/German News Agency

TOKYO (NOV. 14) - Standard and Poors Inc. said Wednesday it would probably lower its credit rating for Japan's Kyowa Bank Ltd. following its announcement of a merger with Saitama Bank Ltd.

"At this time the most likely outcome seems the lowering of Kyowa's ratings to the same level as Saitama's current ratings," the Japanese unit of the U.S. rating agency said, announcing a review of the ratings of both banks.

The proposed merger, announced Tuesday, will create Japan's ninth-biggest bank with assets of more than 33 trillion yen (258 billion dollars).

The agency said the rating review had negative implications for Kyowa, the smaller but more profitable of the two, but positive implications for Saitama. Kyowa's certificates of deposit are currently rated "AA-minus" to "A-1-plus" while those issued by Saitama carry a lower rating of "A-plus" to "A-1."

"Saitama's recent financial results have suffered from squeezed profitability, mainly reflecting the decline of securities-related income.

"Although Kyowa's performance has been the best of the second-tier city banks, the current difficult environment is also gradually harming its profitability " the agency said in a statement.

"In the early stages of the merger, substantial overlaps could aggravate the problem of excess overheads. Furthermore," it added, "increased funding costs from further deregulation of retail deposit rates will hurt profitability."

In the long term, however, the merger "has the potential to create a profitable bank with a strong retail base in the Tokyo metropolitan area."

TOKYO (NOV. 14) - Japanese business failures rose 9.7 percent to 531 cases in October from a year earlier, ending a 69-month consecutive year-on-year decline, Tokyo Shoko Research Ltd. said Wednesday.

The figure represented a 21.7 percent rise from September, with the total liabilities amounting to 150.1 billion yen (1.2 billion dollars), up 48.2 per cent from a year ago and 64.6 percent from September, the leading private credit research agency said.

Agency officials said companies that depend heavily on loans have been hit hard by the rising interest rates, and worsening labor shortages have also played a major role.

Of the total, company failures stemming from labor shortage accounted for 51 cases, up 11 cases from September.

It also said the number of real estate companies which went bankrupt totaled 38 cases, the largest for this year because of sluggish sales due to higher rates on housing loans.

#90318d1000 11/14/1990 ~French/German News Agency

BERLIN (NOV. 14) - Dozens of West Berlin firms are sending their mail from East Berlin, discovering that they can save 50 pfennigs (35 cents) per letter, the Berliner Morgenpost reported Wednesday.

The habit is worrying the Deutsche Bundespost, the German post office, in the runup to the Christmas period, when millions of greetings cards are mailed.

The price differential stems from pre-unification, when East German mail, heavily subsidised by the authorities, cost consumers in the German Democratic Republic only half as much as in the Federal Republic.

The Bundespost has scheduled price increases next year in the former territory of East Germany to help make up the gap.

"The Bundespost has lost a million marks (680,000 dollars) in our district alone," said Guenter Herrath, director of the sorting centre in Berlin-Mitte, a part of the city centre that lies in East Berlin.

In that area, West Berliners need only to cross the street to mail a letter to a German address for 50 pfennigs, instead of one mark.

"We handle about 280,000 pieces of mail a day, about 80,000 of which come from the west," he said. Ironically, some of the fattest sacks come from West Berlin government agencies, he said.

#90318d1080 11/14/1990 ~French/German News Agency

NAIROBI (NOV. 14) - Rwanda has freed 500 suspected rebel sympathisers, Rwandan radio reported Wednesday, following President Juvenal Habyarimana's move to end single-party rule.

The releases brought the number of people freed since last week to 2,500, according to the radio, monitored here.

Since the mainly Tutsi Rwandan Patriotic Front (RPF) attacked the Hutu-led government from neighbouring Uganda on October 1, soldiers in the capital,

Kigali, have rounded up between 3,500 and 6,000 people. Sources differ on the number of people arrested.

On Tuesday Major-General Habyarimana announced that the government would organise a referendum in June to seek popular support for a new constitution to introduce multi-party politics. He also announced plans to issue new identity cards that will no longer mention the bearer's ethnic group.

The planned reforms are line with the demands of the RPF, whose leaders have called for multi-party democracy and an end to tribal discrimination.

Hutus outnumber Tutsis 10 to one in Rwanda, one of Africa's most densely populated countries, with a population of more than seven million crammed into an area slightly smaller than Belgium.

The rebels, who include many Ugandan army deserters, are mainly Tutsi exiles whose families fled Rwanda starting in the late 1950s amid tribal massacres as the Hutus seized power from the Tutsis, the traditional feudal rulers.

The six-week-old civil war has dealt a cruel blow to the fragile economy of landlocked Rwanda, which has suffered chronic famine caused by overpopulation and soil erosion.

TAIPEI (NOV. 14) - About 1,000 Taiwan and U.S. government officials and business leaders open a two-day annual conference here Thursday to seek ways of improving commercial and economic cooperation, organizers said.

Taiwan representatives will invite U.S. industrialists to join the island's major construction projects -- including the Taipei subway system and a new nuclear power station -- worth billions of U.S. dollars, they said.

Under its 1991-1996 national development plan, which is in the process of being finalized, Taiwan will invest a reported 13,000 billion Taiwan dollars (476 billion U.S. dollars) in various constructions projects.

They will also discuss bilateral trade and investment at their 14th yearly conference, which is co-sponsored by the Taiwan-U.S. Economic Council and its U.S. counterpart.

The two groups have played significant roles in promoting economic ties between the two countries in the absence of diplomatic links, conference organizers said.

Taiwan officials at vice-ministerial level will take part in the meeting, they said.

U.S. representatives will include the Commerce Department's Assistant Secretary for International Economic Policy Thomas Duesterberg, the U.S. Trade Representative's Office's Director of Southeast Asia and the Pacific Laura Anderson and U.S. Senator Frank Murkowski, a Republican from Alaska.

Taiwan's trade surplus with the United States, its largest trading partner, was 7.8 billion U.S. dollars in the first 10 months of 1990, down 23.8 per cent from a year earlier.

Authorities here launched a five-year export diversification program in 1988 under pressure from Washington, following a record 16 billion U.S. dollar trade imbalance in 1987 in favor of export-oriented Taiwan.

Incentives to boost U.S. imports helped narrow the trade gap to 13 billion dollars in 1988 and to 12 billion dollars last year.

#90318d1480 11/14/1990 ~French/German News Agency

HONG KONG (NOV. 14) - The United Nations High Comissioner for Refugees (UNHCR) owes Hong Kong some 17 million U.S. dollars the government spent on caring for Vietnamese refugees stranded here, government auditors said Wednesday.

The amount was spent on food, social services and other necessities for about 53,000 Vietnamese living in detention camps here in the 12 months to March, the auditors said in their annual report presented to the local legislature.

The British colonial authorities were entitled to bill the UNHCR for such expenses under a mutual pact signed in 1988.

Hong Kong taxpayers bore the costs of building the detention centres and making them secure.

The UNHCR was unable to reimburse the amount immediately but has promised to try to raise additional funds, the government said.

#90318d1680 11/14/1990 ~French/German News Agency

ABU DHABI (NOV. 14) - Yugoslav Foreign Minister Budimir Loncar, whose government holds the current leadership of the Non-Aligned Movement, arrived Wednesday in the United Arab Emirates from Iran to discuss the situation in the Gulf, the official WAM news agency reported.

Most members of the Non-Aligned Movement have condemned the August 2 Iraqi invasion of Kuwait. Both Iraq and Kuwait belong to the movement.

The Yugoslav news agency Tanjug reported November 8 that Mr. Loncar's tour of the region, aimed at securing a peaceful end to the Gulf crisis, could also include Iraq.

But it said Baghdad had not yet agreed to the visit.

Apart from Iran and the UAE, Mr. Loncar was also expected to visit Syria and Jordan and could travel to Saudi Arabia, with which Yugoslavia has no diplomatic relations.

-30- 1008

#90318d1690 11/14/1990 ~French/German News Agency

BONN (NOV. 14) - German Education Minister Juergen Moellemann, chairman of the German-Arab Society, proposed a three-point plan Wednesday to resolve the Gulf crisis.

Moellemann's plan calls for an immediate release of all foreigners held by Iraq, the withdrawal of Iraqi troops from Kuwait under United Nations supervision and the convening of a Middle East peace conference.

He said the German-Arab Society which has more than 1,000 members would send letters containing the proposal to members of the U.N. Security Council and

Arab countries.

Baghdad's stated position that its annexation of Kuwait was irrevocable could change, Moellemann said, adding, ''I've always found these statements to be foolish and irresponsible.''

-30- 934

#90318d1720 11/14/1990 ~French/German News Agency

ABU DHABI (NOV. 14) - Saudi Arabia Wednesday implicitly rejected a Moroccan call for an emergency Arab summit as long as Iraq refuses to withdraw its troops from Kuwait.

"An Arab meeting will not bear fruit as long as Iraq refuses to accept Arab summit resolutions approved in Cairo (August 10) and those adopted by the U.N. Security Council demanding an Iraqi withdrawal from Kuwait and the restoration there of legitimate authority," said Saudi Foreign Minister Prince Saud al-Faisal.

Prince Saud, quoted by the offical WAM news agency of the United Arab Emirates (UAE), was speaking after a meeting with the UAE president, Sheikh Zayed bin Sultan al-Nahayan.

Only a handful of the Arab League's 21 members have so far endorsed an appeal by King Hassan II of Morocco for a "last chance" summit to avert war in the Gulf between Iraq, which is occupying Kuwait, and a U.S.-dominated multinational force opposed to Baghdad.

Iraq initially posed conditions on its participation, namely that the gathering could not take place under foreign threats targeting Baghdad, but on Tuesday sent a senior official to Rabat for talks with King Hassan.

The emissary, First Deputy Prime Minister Taha Yassin Ramadan, said his government was interested in any serious Arab dialogue, a remark interpreted as a softening in Baghdad's position.

Iraq has also demanded that it be involved in pre-summit consultations and wants the agenda to be expanded to include other Arab issues, notably the Palestinian question.

Mr. Ramadan warned that a new summit must not be a repeat performance of the August 10 Cairo gathering, which denounced the Iraqi invasion of Kuwait and authorized the deployment of Arab forces in Saudi Arabia.

-30- 1947

#90318d1830 11/14/1990 ~French/German News Agency

JERUSALEM (NOV. 14) - Israel has imprisoned three prominent Palestinians

without trial and imposed a curfew on most of the Gaza Strip ahead of the second anniversary of the declaration of a Palestinian state.

The Israeli crackdown follows a rise in violence in the 35-month-old Palestinian uprising, or intifada, with a shift from stone-throwing protests to attacks on Israelis with knives and blunt instruments.

"It's possible that our measures will spark protests abroad. But the security of Israel is more important to us than our image," said a close aide to Defence Minister Moshe Arens.

Several cabinet members, notably the far right-wing Agriculture Minister Raphael Eytan, have in recent weeks called for radical measures to crush the intifada that erupted in December 1987.

The expulsion of a large number of so-called Palestinian trouble-makers and the closure of Arab newspapers in east Jerusalem are among the measures that have been proposed.

Mr. Arens ordered the arrest Tuesday of three leading Palestinian figures who have ties to the outlawed PLO and placed them under administrative detention, for terms ranging from six to 12 months.

Radwan Abu Ayash, president of the Palestinian Journalists' Association, and another journalist Ziad Abu Ziad, were both imprisoned for six months, while a doctor, Ahmad al-Yazidji, was ordered to serve one year in detention.

All three personalities are advocates of a dialogue with Israel and were seen as possible candidates for a Palestinian delegation to enter negotiations over a May 1989 Israeli plan for elections in the occupied territories.

But Israeli authorities charged they belonged to the mainstream Fatah group of the Palestine Liberation Organisation and to the underground Unified Leadership of the uprising.

They had "incited the murder of Israelis," according to the authorities, by taking part in drafting communiques issued by the Unified Leadership.

Israeli officials said the time had come to move against the Unified Leadership because "its calls are having more impact on the Palestinian population and taking on a more violent character."

"By ordering the arrests, the Israeli government proves yet again that it is opposed to any peace settlement," said leading Palestinian nationalist Faisal Husseini, who has himself been arrested several times.

The leftist factions Ratz, Shinoui and Mapam also denounced the arrests, describing them as measures by the right-wing government of Prime Minister

Yitzhak Shamir to remove "Palestinian moderates who formally recognise Israel."

But a military source retorted that Mr. Abu Ayash and Mr. Abu Ziad were "not small fish, they're big sharks."

Under administrative detention, which Israel inherited from the British colonial powers that ruled Palestine, a suspect can be seized and held without trial or the right to appeal.

Israeli troops Wednesday shot and wounded three Palestinian students and clamped a curfew on most of the Gaza Strip ahead of expected protests to mark the 1988 proclamation of a Palestinian state, army and Arab sources said.

Three quarters of the 600,000 Palestinian residents of the Gaza Strip, including all those living in refugee camps, were under curfew and the entire territory was declared a closed military zone.

Journalists will be admitted to the Gaza Strip only with special permission under the regulations.

Israeli occupation authorities took the steps ahead of expected celebrations marking the proclamation of an independent Palestinian state, with Jerusalem as its capital, by the Palestine National Congress on November 15, 1988.

#90318d1860 11/14/1990 ~French/German News Agency
LONDON (NOV. 14) - Here is the full text of Michael Heseltine's announcement Wednesday that he would challenge Mrs. Thatcher for leadership of the Tory party:

''I have said many times that I could not foresee the circumstances in which I would allow myself to be nominated to challenge Mrs. Thatcher for the leadership of the Conservative Party.

''The past few days have been tumultuous for my party. The Deputy Prime Minister, Sir Geoffrey Howe, has resigned.

''The reasons he gave to the House of Commons yesterday cannot be dissociated from my own resignation four years ago and the more recent departure of the then Chancellor of the Exchequer, Nigel Lawson.

''In essence, the Prime Minister holds views on Europe behind which she has not been able to maintain a united cabinet. This damages the proper pursuit of British self-interest in Europe.

''The Conservatives have been driven into third place in Bradford, an industrial city, which has unavoidable comparisons with other constituencies

essential to the future re-election of a Conservative Government.

''The opinion polls now say that I am best placed to recover those people who have indicated that without a change of leader they will not vote Conservative at the next election.

''More than 100 of my parliamentary colleagues have urged me to stand and promised me their support.

''None of this could I have foreseen. But neither can I ignore the conclusion.

''I am persuaded that I would now have a better prospect than Mrs. Thatcher of leading the Conservatives to a fourth electoral victory and prevent the ultimate calamity of a Labour Government.

''I have accordingly informed the Chief Whip, Tim Renton, and the chairman of the 1922 Committee, Cranley Onslow, that I intend to let my name go forward.

''A significant consequence of my election as leader would be an immediate and fundamental review of the poll tax which I believe to be important for the revival of Government fortunes.

''Finally, let me say that Mrs. Thatcher's outstanding contribution to the politics of our times is not in question. It has been by any standards remarkable.

''The issue now, however, is how best to protect what we have all achieved under her leadership and advance under a Conservative Government to meet the already daunting challenges of the 1990s.''

#90318d1900 11/14/1990 ~French/German News Agency

BRUSSELS (NOV. 14) - The European Economic Community (EEC) executive proposed Wednesday that oral moist snuff be banned, and that warning labels on cigarette packets be made mandatory also for other tobacco products.

The decision would take effect, if approved by the EEC council of ministers, from January 1, 1993, the official start date of the EEC's single market.

The European Commission said in a statement that although oral moist snuff was known to cause cancer and to be addictive, it was spreading fast among young people.

Britain and Ireland have already banned the product and Belgium is considering doing so. The commission proposed that the ban be extended throughout the other 10 EEC countries.

The use of oral moist snuff has spread quickly in such countries as the United States and Sweden. In the United States, it became popular for use on airplanes when smoking on internal flights was banned.

The commission also decided that warning labels should be applied to rolling tobacco, packs of cigars and other smoking tobacco products similar to those on cigarette packs.

And it recommended that smokeless tobacco products, mainly chewing tobacco,

carry the labels "tobacco seriously damages health" and "can cause cancer".

The commission decided last year that from 1993 all cigarette packets should bear two warning labels. The manufacturer will have the choice between "smoking causes cancer" or "smoking causes heart disease".

The second message can be chosen from a list of 14 alternatives, ranging from "Smoking kills" to "Protect children: don't make them breathe your smoke".

The EEC's proposed battery of anti-smoking laws from 1993 already includes a lowering of the tar content of cigarettes.

EEC ministers must also still decide on controversial proposals to ban all television and even written advertisements for smoking tobacco.

#90318d1930 11/14/1990 ~French/German News Agency

BONN (NOV. 14) - The German government Wednesday adopted Finance Minister Theo Waigel's budget plan for next year as costs of German unification were expected to push the government deficit to 70 billion Deutsche marks (47.29 billion dollars), officials said.

This is a rise of three billion marks (2.04 billion dollars) over this year.

The government also wants to peg spending so that Germany's overall public sector budget deficit next year will be limited to 140 billion marks (93.9 billion dollars).

The public sector deficit includes spending by federal and regional governments and agencies tasked with overseeing the east German economy, but excludes social security spending and spending by the Bundespost and national railway network.

The government expects the federal government's deficit to drop to 30 billion marks (20.4 billion dollars) within four years, after the former East German economy is restructured.

#90318d1940 11/14/1990 ~French/German News Agency
ROME (NOV. 14) - Gas stations all over Italy closed Wednesday as operators went on a two-day strike in a protest at heavy federal taxes and reduced margins.

Station operators called on the government to reduce taxes, which represent 71.25 percent of the price of a litre of gasoline, by two percent. Oil companies get 25.07 percent and operators 3.68 percent of the 1,550 lire (about 1.30 dollars) drivers have to pay for a litre of gas.

The strike was originally scheduled to last three days but operators said it would last only two after they noted the government's "good will" to solve the crisis in a meeting with officials.

#90318d1970 11/14/1990 ~French/German News Agency
ABU DHABI (NOV. 14) - Sheikh Zayed bin Sultan al-Nahyan, president of the United Arab Emirates (Uae), Wednesday received a message from Saudi Arabia's King Fahd dealing with the Gulf crisis and a Moroccan call for convening an emergency Arab summit on the crisis, it was reported here.

The message was delivered by Saudi Arabia's Foreign Minister, Prince Saud al-Faisal during his meeting with Sheikh Zayed.

In a statement before leaving Abu Dhabi, Saud said the message dealt with the call made by Morocco's King Hassan Ii sunday for a ''last-chance'' Arab summit to avert war in the Gulf and with Saudi Arabia's attitude toward it.

The Saudi foreign minister stressed that any Arab summit meeting will not be fruitful unless Iraq agreed to the decisions of the emergency Arab summit conference held in Cairo last August, as well as the resolutions of the U.N. Security Council.

These resolutions, which Iraq has rejected, called for a total and unconditional withdrawal of Iraqi forces from Kuwait and the reinstatement of the legitimate government there.

If Iraq makes this commitment (accepting Arab and U.N. resolutions), then Arab meetings will, no doubt, be fruitful, Saud said in his statement carried by the Qatar News Agency.

LONDON (NOV. 14) - The Boots Company, Britain's largest chain of chemists, announced Wednesday interim profits up 1.1 per cent to 161.7 million pounds (316.9 million dollars) against 159.9 million pounds (314.4 million dollars) for the first six months of last year.

Although the results were ahead of brokers' expectations of between 135 and 160 million pounds, the share price fell 2 pence to 311 pence on the news.

Directors announced an interim dividend of 4.1 pence per share, up 6.5 percent on the previous 3.85 pence interim payout.

Profit growth was achieved on a turnover up by 21.7 percent from 1,424 million pounds (2,791 million dollars) to 1,733 million pounds (3,396 million dollars).

The core Boots chemists business which accounts for 63 percent of turnover and the related pharmaceuticals business which accounts for 17 percent of turnover contributed 149.2 million pounds (292.4 million dollars), or 92 per cent of profits.

Chief Executive Sir James Blyth said, "given the economic climate this was a good overall result".

SANAA (NOV. 14) - An estimated 100,000 foreign workers, mainly Asians, will leave Yemen before the end of this year in line with a decision by the Sanaa government to replace them with Yemenis, it was reported Wednesday.

The Saudi newspaper Asharq al-Awsat quoted an official source in the Yemeni Labour Ministry as saying that the decision was aimed at ''giving Yemenis,

particularly those who have returned home in the wake of the Gulf crisis, an opportunity to work in their country and contribute to its development''.

The paper said in its report from Sanaa the announcement on the departure of this large number of foreign workers came at a time Yemen was facing economic difficulties as well as a political crisis over its stand on the Gulf crisis, sparked off by Iraq's August 2 invasion of Kuwait.

Demonstrations were staged in Sanaa and other cities last month to protest the worsening economic conditions in the country.

Asharq al-Awsat quoted political observers as saying that they expected the economic situation in Yemen to deteriorate further and that the Yemenis were preparing themselves for the worst.

Over 350,000 Yemenis have returned from Saudi Arabia after Riyadh suspended residence privileges for Yemeni workers in what was viewed as a retaliatory measure against Sanaa's stand on the Gulf crisis.

Yemen has supported Iraq in its current conflict with the U.S.-led alliance over Baghdad's seizure of Kuwait.

MADRID (NOV. 14) - Spanish consumer prices rose 0.9 percent last month and seven percent over the last 12 months, the National Statistics Institute (INE) said.

October's rate is more than twice as high as the same month last year (0.4 percent), triggering fears that inflation is again accelerating. It takes the inflation rate since the start of the year to 6.4 percent.

Official forecasts said inflation would be 5.7 percent in 1990 but the figure was later revised to 6.9 percent.

On Wednesday's announcement the Madrid Stock Exchange shed 1.13 percent in midday trading.

Government measures to cool down the economy have failed to keep down the inflation rate but triggered a rise in unemployment for the third month running, with 15.64 percent of the work force unemployed.

Transport, food, and clothing had the most impact on the October inflation rate, up 1.3, 1.2, and 1.1 one percent respectively.

Industry Minister Claudio Aranzadi said the poor figures could be attributed to exceptional circumstances, notably a strike by heavy goods vehicle drivers which had had a particularly negative effect on food and transport prices.

BERLIN (NOV. 14) - A Soviet-built nuclear reactor at Rheinsberg, south of Berlin, has been closed down permanently for technical and economic reasons, its owners, Energiewerke Nord AG, announced Wednesday.

The 24-year-old, 70-Megawatt pressurised water reactor had been disconnected from the East German electricity network five months ago, the company's spokesman said.

He said the decision came after studies showed that it would have technically difficult and economically costly to bring the reactor up to date.

The German authorities have already decided to curb production at the biggest nuclear generator in former East Germany because of safety reasons. The plant is at Greifswald, in the northeast.

JOHANNESBURG (NOV. 14) - A man was decapitated after allegedly being tried by a "people's court" in Dambuza black township near South Africa's Natal Province capital Pietermaritzburg, state-run radio said Wednesday.

Police said 35-year-old Mtwa Nhlakoane and 31-year-old Tsekiso Moleko reportedly quarrelled over the sale of marijuana at the weekend and Mr. Moleko was stabbed to death.

Mr. Nhlakoane, police said, was allegedly tried and sentenced to death by a "people's court", one of many illegal courts set up in black communities by activists aligned with the African National Congress (ANC) to circumvent official courts and to build community structures.

Mr. Nhlakoane's decapitated body was later found by police in a road at Dambuza.

Some 4,000 people have died in a four-year Natal war between supporters of Zulu chief Mangosuthu Buthelezi's Inkatha party and members of the socialist United Democratic Front.

In August and September this year the war spilled over into black townships around Johannesburg leaving about 800 people dead.

On Tuesday, police in South Africa's largest black township Soweto near Johannesburg, said the body of a 23-year-old man, sought in connection with attempted murder and rape, was found in White City, one of Soweto's poorer suburbs, after he apparently was sentenced and executed by a "people's court".

Lieutenant-Colonel Tienie Halgrun said Golden Nlopo had been stabbed and then set alight by a group of youths.

NEW DELHI (NOV. 14) - At least three people were killed and more than 30 injured when a communal clash between Hindus, Moslems and Sikhs erupted Wednesday in the older part of New Delhi, the United News of India reported.

Police opened fire after teargas failed to separate the clashing groups which indulged in arson, shooting and a stabbing spree.

The trouble started in the Idgah Road area of the old city when a ''peace procession'' by the Sikhs was attacked by ''miscreants'' belonging to a religious group. Under Indian press law, the media is barred from identifying the group in order to stop the conflagration from spreading to other areas.

P.K. Hazarika, chief casualty medical officer of the Bara Hindu Rao hospital, said all the three victims were ''brought dead'' to the hospital. Two had bullet wounds.

It was not immediately clear if the deaths occurred in police firing or in clashes between the communities. The third death was a case of stabbing.

COVENTRY, ENGLAND (NOV. 14) - At ceremonies Wednesday marking the 50th anniversary of the massed German air raid on Coventry, German President Richard von Weizsaecker begged forgiveness from all who had been wronged in the Second World War.

Weizsaecker, saying he was speaking for all those who had actively participated in the fighting for nearly six years, remarked: ''To forgive is human, but it is a very personal matter.''

He was speaking at a service in the cathedral of a city which was pounded to destruction by 449 German bombers in an 11-hour raid on November 14, 1940. The Church of England cathedral was built in 1962 by the ruins of its medieval predecessor.

Earlier, Weizsaecker and Elizabeth, the British Queen Mother, officially opened a garden of peace near the ruins.

Delegations from Coventry's twin cities, among them Kiel and Dresden in Germany, laid wreaths in the city cemetery for the 546 persons killed the night the city centre was turned into an inferno.

Coventry, 20 kilometres east of Birmingham, was rebuilt after the War and is today a flourishing manufacturing centre for cars and components with 300,000 inhabitants.

AMMAN (NOV. 14) - Some 250 women from 25 countries marched here on Wednesday to promote peace in the Gulf and delivered messages to eight but the embassies including the Syrian mission which rejected the statement.

"We want to tell the press that the Syrians would not accept our letter," said one of the organisers, American Marie Bayyat, after a 15-minute wait outside the embassy's main gate.

The demonstrators, under police escort, visited the U.S., Egyptian, Soviet, French, Syrian, British and Saudi Arabian embassies. They also delivered a message to the United Nations headquarters in Amman where white pigeons symbolising peace were released over the premises.

"We are fed up with fighting. War is devastating. We've lived through war and we want peace", Lebanese-born Salam Abu Sway told Agence France-Presse.

Another demonstrator, Ica Wahbeh from Romania, said the march marking Jordanian King Hussein's 55th birthday was "an open message to the Western world: pull out your troops from the Gulf and let us live in peace."

Several protesters carried banners that read "War is victory for the grave not the brave."

The marchers were welcomed by officials at the French, American and Italian embassies but given a lukewarm reception at the British and Saudi missions.

"Sorry we are closed. Come back on Saturday," said an unidentified officer at the Saudi Embassy. He later relented after being pressured by the women and escorted one of them onto the premises to deliver the message.

British embassy personnel refused to open their main gate and accepted the women's message through a tiny barred hole.

The demonstrators also addressed messages to 21 world leaders -- including King Hussein, Iraqi President Saddam Hussein, King Fahd of Saudi Arabia, U.S. President George Bush, French President Francois Mitterrand, British Premier Margaret Thatcher and Syrian President Hafez al-Assad -- urging them to work for peaceful resolution of the Gulf crisis.

#90318d2340 11/14/1990 ~French/German News Agency
PARIS (NOV. 14) - Thousands of protesters took to the streets of France Wednesday in a new challenge to the government of Socialist Prime Minister Michel Rocard, already shaken by fall-out from a student demonstration two days ago.

More than 10,000 marchers took part in three separate rallies through Paris, eyewitnesses said, organised by all the main French trade unions except the pro-Socialist CFDT and the Christian CFTC.

The marchers are opposed to Mr. Rocard's plan to bring in an additional 1.1 per cent tax to finance social welfare.

The moderate Force Ouvriere union called for a strike Wednesday, in addition to organising marches in Paris and elsewhere. Disruptions were reported in the Paris metro and the suburban rail network.

About 10,000 people marched behind union banners in the southern port city of Marseilles, where police fired tear gas canisters to disperse some demonstrators who tried to break through police barriers placed outside the central administrative building. No injuries were reported.

Up to 4,000 also demonstrated in Le Havre, in northern France, while 2,600 workers took to the streets in Lyons chanting "Rocard, you've had it" and 1,300 in southeastern Grenoble, police said.

The government argues that the measure, in the form of a bill due to come before parliament on Thursday, is aimed at "democratising" social security as it would apply not only to salaried workers but to all categories.

The decision to put deputies in control of the 35 billion francs (7 billion dollars) income from by the Generalised Social Contribution (CSG) would also be more democratic, according to the government.

The social security budget, totalling 1,300 billion francs (260 billion dollars) is currently the only state budget not directly controlled by

parliament.

The unions, who currently administer France's welfare funds, argue that the CSG should not apply to retired persons and the unemployed, and charge that the "Roc tax" would mark the beginning of a hike in welfare charges.

BY ISABELLE ASTIGARRAGA

LONDON (NOV. 14) - Former defence secretary Michael Heseltine, who announced he would challenge Margaret Thatcher for the Conservative Party leadership on Wednesday, has been the leading champion of Europe within the party for the past few years.

Since resigning from government almost five years ago, Mr. Heseltine had carefully avoided criticising Mrs. Thatcher by name. While admitting he had differences with her, he remained statesman-like. However he never hid his ambition.

As a student at Oxford University Mr. Heseltine set himself a goal of becoming prime minister by the age of 55. He became a millionaire early in life, he said, so he could devote himself to politics. Now 57, he is just two years behind that self-imposed schedule.

The son of an engineer, he was born in Wales. After Oxford, he rapidly amassed a fortune in real estate and publishing, now put at between 50 and 60 million pounds (100 and 120 million dollars).

He was elected to the House of Commons in 1966 and went on to hold various junior government positions from 1970.

A supporter of former prime minister Edward Heath, he changed sides when Mr. Heath yielded the helm of the Conservative party to Mrs. Thatcher in 1975, and was rewarded in 1979 when she appointed him environment secretary.

Mr. Heseltine went on to become secretary of defence in 1983, but resigned three years later over the Westland helicopter affair when Mrs. Thatcher decided, against his wishes, that a U.S. firm rather than a European consortium should take over the company.

Since then, he has waged an intense personal campaign on behalf of the European cause, pitting himself directly against Mrs. Thatcher.

#90318d2430 11/14/1990 ~French/German News Agency

BRUSSELS (NOV. 14) - The European Economic Community (EEC) plans to write off debts of 3.9 billion dollars to the African-Caribbean-Pacific (ACP) bloc of 69 developing countries, the European Commission said here Wednesday.

Commission vice-president Manuel Marin said the EEC council of ministers would be asked to cancel the debts of three billion European Currency Units (ECU's) at its next meeting in December.

He said the debts comprised only those owed to the EEC as a body, and did not include money owed to individual EEC countries.

The ACP countries, linked to the EEC since 1975 under the Lome Convention, have combined debts totalling about 169 billion dollars.

Repayments to be cancelled include special development loans and risk capital, and debts already made as well as those agreed but not yet accorded.

Mr. Marin said the ACP countries would also no longer have to pay into an export stabilisation system whereby they were compensated if prices of their exports dropped but had to refund the money when the prices rose again.

He said the debt cancellation was aimed principally at black African states which had embarked on economic reforms.

Mr. Marin said that no conditions were attached to the cancellations, but that in future aid recipients might have to meet certain standards of human rights and democracy which the EEC was preparing.

WASHINGTON (NOV. 14) - The Soviet Union sold a dozen advanced SS-12 missiles to Iraq several years ago, a development that is causing alarm within the U.S. defense and intelligence community, The Washington Times reported Wednesday.

The paper quoted U.S. officials as saying news of the missile sales was relayed to them by Turkey after a Turkish diplomat recently learned about the delivery from a Soviet military attache in Baghdad.

The SS-12's, which are designed to deliver nuclear warheads, are said to have greater accuracy and longer range than other Soviet-made missiles in the Iraqi arsenal and could pose a more potent threat to U.S. forces deployed in Saudi Arabia and the Gulf in the wake of the August 2 Iraqi invasion of Kuwait.

The Soviet attache reportedly told the Turkish diplomat that the delivery was made before the 1987 signing of the U.S.-Soviet treaty banning all medium-range nuclear missiles. Under that treaty, the SS-12 and other similar missile systems are banned.

The Times quoted U.S. officials as saying the Ss-12 "Scaleboard" has a range of 900 kilometers (558 miles) and is accurate within 600 meters (yards) of its target at that distance.

By comparison, the Soviet-made Scud-B, also in the Iraqi arsenal, has a range of 280 kilometers (174 miles) and is far less accurate than the SS-12, the experts said.

The Times quoted an intelligence source as saying a U.S. spy satellite flying over Iraq had photographed the mobile launcher used for both the Scud-B and the SS-12.

Iraq has deployed scores of mobile ballistic missiles with high-explosive and chemical warheads, including some aimed at Saudi oil pipelines and the U.S.-led multinational forces deployed in Saudi Arabia, according to U.S. intelligence.

DHAKA (NOV. 14) - At least 5 people were killed and more than 100 injured Wednesday when troops fired on striking industrial workers blocking a highway outside Dhaka, police said.

Troops were called out in the industrial suburb of Demra after repeated teargassing failed to quell riots which broke out Tuesday night between supporters of rival trade unions.

The violence, about 10 miles from central Dhaka, led to the closure of jute mills and more than a score of industrial plants.

Troops fired on workers in a bid to clear a barricade on the Dhaka-Chittagong highway, eyewitnesses said.

EASTERN SAUDI ARABIA (NOV. 14) - The next few weeks of the Gulf crisis will be "critical" as time runs out for Iraqi President Saddam Hussein to peacefully withdraw from Kuwait, British Defense Secretary Tom King said Wednesday.

Mr. King, speaking to reporters after attending a joint exercise between Britain's 7th Armoured Brigade and U.S. Marines, also said Britain was planning to send more troops to Saudi Arabia.

He declined to give details of the additional British contribution to the

multi-national force assembled against Iraq, but Brigadier Patrick Cordingley, commander of the 7th Armoured Brigade, Britain's "Desert Rats," said it would probably include more tanks.

"The next few weeks are critical weeks," Mr. King said, adding that Mr. Hussein "better take a pretty early decision or he will have to take the responsibility for the consequences."

"Time is running out ... Our patience will run out," he said. "There's no specific time limit but there's not limitless time."

"There are 30 nations involved in this exercise. We're not going to sit around forever," the British defense secretary said. "The meaning is quite clear and it would be a very foolish man indeed who thought we were bluffing."

Mr. King, who held talks with General H. Norman Schwarzkopf, commander of U.S. forces in the Middle East on Tuesday, said Britain was "very satisified" with the command and control arrangements for its forces.

The 7th Armoured Brigade and its 120 Challenger tanks are under the tactical control of U.S. Marine General Walter Boomer while Lieutenant General Sir Peter de la Billiere, commander of British forces in the Gulf, retains operational control.

#90318d2550 11/14/1990 ~French/German News Agency

NEW DELHI (NOV. 14) - India's parliament will meet Friday for new Prime Minister Chandra Shekhar to prove he enjoys a working majority, nine days after it made legislative history by voting his embattled predecessor out of office.

Mr. Shekhar appears certain to win the legislature's mandate for his breakaway Janata Dal (People's Party) with backing from Rajiv Gandhi's Congress (I),

although doubts persist about how durable the alliance would prove.

The 63-year-old career politician, who assumed office Saturday, needs the support of 262 members in the elected lower house, which has an effective strength of 522, to keep governing India. Twenty-two seats are vacant.

He claims he has 280 MP's with him, including 212 members of the Congress and its allies and 61 of his own rebel party, which he has christened Janata Dal-Socialist.

Mr. Shekhar's aide, Satya Prakash Malaviya, said he expected more members from the original Janata Dal to cross the floor and join the breakaway group.

He said Mr. Shekhar would win Friday's vote of confidence in parliament "comfortably," and even his opponents agreed.

"He won't have any problems proving a majority," said a spokesman for the Janata Dal headed by Mr. Shekhar's predecessor Vishwanath Pratap Singh, who on November 7 became India's first prime minister to be voted out by parliament.

"Rajiv Gandhi's support will see him through on Friday," said spokesman Jaipal Reddy, who described Mr. Shekhar as the "first puppet prime minister of India."

"The battle for survival will begin later," he said, adding that his own party of 79 members would vote "no" to Mr. Shekhar.

The powerful Bharatiya Janata Party (BJP, Indian People's Party) is also committed to voting "no." BJP General Secretary Murli Manohar Joshi said Mr. Shekhar's government would probably win the confidence vote, but not survive long enough to present the budget in March.

The Hindu right-wing BJP toppled Mr. V.P. Singh by cutting off its vital parliamentary support for his 11-month-old government to protest his opposition to Hindu plans to raze a mosque and replace it with a temple.

Both the BJP and Mr. V.P. Singh's faction have alleged that the Congress (I), defeated in the November 1989 general elections, would be the real power behind the Shekhar throne.

#90318d2660 11/14/1990 ~French/German News Agency

BEIJING (NOV. 14) - Indonesian President Suharto expressed his interest in developing long-term friendly bilateral relations when he met with his Chinese counterpart Yang Shangkun here Wednesday, the official Xinhua news agency reported.

The two leaders met in the Great Hall of the People three months after a visit

by Chinese Premier Li Peng to Indonesia during which the two countries resumed diplomatic relations.

Scheduled for six days, it is the first visit by an Indonesian leader to China since President Sukarno went to Peking in 1964.

Yang said he expected the trip to ''open a new phase for bilateral relations'' and described Suharto's visit as being ''of great significance''.

''I hope our two countries will develop a friendly, cooperative relationship in a long-term, steady and comprehensive manner ...'' said Yang.

Indonesia broke off its relations with China in 1967, charging that Peking was involved in an attempted communist coup two years earlier.

#90318d2670 11/14/1990 ~French/German News Agency

JOHANNESBURG (NOV. 14) - Police announced here Wednesday they had launched a manhunt for top South African Communist Party (SACP) member Ronnie Kasrils and three other suspects in an alleged red coup plot.

Mr. Kasrils, Janet Love, Charles Ndaba and Christopher Mayne are wanted in connection with Operation Vula, an African National Congress covert operation security police unearthed when they seized computer tapes from SACP safe houses.

The tapes, detailing a secret SACP meeting at Tongaat in Natal in May, supposedly revealed that the ANC and its SACP allies were amassing arms for a military takeover under cover of negotiations with the government.

The four were wanted for bringing weapons, ammunition and explosives into the country illegally, police said, warning that the suspects, who used "all sorts of disguises", were expected to be "armed and dangerous".

Nine ANC members are already on trial in the eastern port city Durban for their alleged part in the plot.

They were granted bail last week, and are expected to apply for the indemnity from prosecution the government is offering offenders who committed politically motivated crimes before October 8, part of a deal it struck with the ANC in a bid to secure negotiations on enfranchising the black majority.

The prosecutor said he wanted the matter sorted out before the trial resumes on January 15.

Mr. Kasrils went into hiding on July 26 after a dramatic appearance at a press luncheon here hosted by the Foreign Correspondents' Association, and

resurfaced briefly again last week to give an interview to the pro-ANC New Nation newspaper, which is based in Johannesburg.

#90318d2730 11/14/1990 ~French/German News Agency

DAR ES SALAAM (NOV. 14) - Tanzanian President Ali Hassan Mwinyi has said one of the big tasks facing him in his second term of office will be to cushion effects of rising oil prices from the on-going Gulf crisis.

A State House statement issued here Tuesday quoted Mr. Mwinyi as saying that an estimated 80 per cent of the country's export earnings would be go towards the oil import bill, if the crisis was prolonged.

The Gulf crisis, triggered by Iraq's invasion of Kuwait on August 2, has doubled Tanzania's oil bill from 9.4 million U.S. dollars to 15 million per load of crude oil import.

Observers here noted that the invasion would also deprive Mr. Mwinyi's government of a 178-million-dollar loan promised by Kuwait for a road construction project in southern Tanzania.

The project has now been suspended.

#90318d2890 11/14/1990 ~French/German News Agency

JERUSALEM (NOV. 14) - Israeli Defence Minister Moshe Arens Wednesday said here the government in Amman should do more to hinder guerrillas from infiltrating into the Israeli-occupied West Bank.

He said his government expects Amman to strengthen its controls on the border with the West Bank, which runs more than 100 kilometres along the Jordan River.

Israel has changed its alert status on the border and the army now treats it as an actively hostile area because of a growing number of infiltration attempts, military sources said.

New arrangements there would lead to the strengthening of forces, increasing

patrols to detect infiltrators and the possible replacement of reserve soldiers by regular troops, the sources said.

Many guerrillas have infiltrated into the West Bank this year, killing and injuring a number of Israeli troops. The latest attack along the border with Jordan occured late Monday, when a gunman shot and killed an Israeli soldier manning a post.

Meanwhile, Israeli military authorities clamped a four-day curfew on large parts of the Gaza Strip and several refugee camps in the West Bank, confining hundreds of thousands of people to their homes.

The curfew was aimed at preventing demonstrations marking the second anniversary of the declaration of the independent state of Palestine on November 15, 1988 by the exile Palestine National Council. The underground Palestinian uprising (intifada) leadership has called for marches to mark the anniversary.

The Israeli army earlier placed the entire Gaza Strip under curfew, fearing a violent popular backlash to the jailing without a trial of three leading Palestinian activists a day before.

Jerusalem journalists Radwan Abu Ayash and Ziad Abu Ziad were placed under a six-month ''administrative detention'' order and leading Gaza physician Ahmed Yazdji was imprisoned for twelve months under similar provisions.

Security sources said the arrests were the first steps in a new crackdown on the three-year-old intifada and that the jailed men were leading members of the Palestine Liberation Organisation (Plo) in the territories and ranking members of the intifada.

The lawyers of the three Palestinians said they would appeal against the detention order, a measure introduced by British mandate rule before the establishment of Israel in 1948.

Abu Ziad said in a lettrer from prison: ''The only way to a solution is by means of dialogue and negotiations.'' He was alluding to repeated calls by the Plo for negotiations with Israel, an idea rejected by Israeli Premier Itzhak Shamir.

Faisal al-Husseini, the unofficial Plo spokesman in annexed Arab East Jerusalem, said, ''The arrests are clear messages to the international communitiy reitirating his (Shamir's) rejection of any peaceful solution to the Palestinian problem''.

#90318d2900 11/14/1990 ~French/German News Agency

LONDON (NOV. 14) - General Accident, the insurance company, announced Wednesday pre-tax losses of 73.3 million pounds (143.6 million dollars) for the first nine months of 1990.

The losses, made on a turnover of 2.34 billion pounds (4.61 billion dollars) (against 2.33 billion pounds -- 4.59 billion dollars -- previously), compared to profits of 137.1 million pounds (270.1 million dollars) in the same period last year.

Losses per share were 12.3 pence against earnings per share of 26 pence.

The losses were greater than anticipated by brokers, and at mid-afternoon on the London stock markets General Accident shares were down three pence at 434 pence.

Storm damage to many properties last winter and a growth of subsidence claims, contributed to the disappointing results.

#90318d3090 11/14/1990 ~French/German News Agency

PRAGUE (NOV. 14) - A fragile agreement on the critical question of division of powers between Czechoslovakia and its constituent Czech and Slovak republics was reached here following marathon negotiations between officials from the three governments, according to the news agency CTK.

The accord, reached late Tuesday, appeared to have headed off a constitutional crisis which had threatened to lead to the disintegration of the Czechoslovak federation.

However, the Slovak prime minister Vladimir Meciar announced following the meeting that he was "disillusioned" and called the agreement "insufficient."

The accord followed eleven hours of negotiations between the prime ministers and some 30 ministers from the three governments and the speakers of the Czech and Slovak parliaments.

The agreement calls for a single central bank and federal control over revenues, with each of the three govenments having jurisdiction over its own expenditure.

The federal budget is projected to represent 92 million koruna (four billion dollars) against a total of 470 million koruna (20 billion dollars) for the two republics.

Negotiators were unable to reach agreement on the questions of jurisdiction over railroads, assignment of radio and television frequencies and the power to declare a state of emergency, and these issues are therefore to be settled

under specific legislation.

The three governments are to to discuss the draft text and make separate pronouncements on it before it is put before the Czech and Slovak parliaments next week. If approved, it will be voted on by the Federal Assembly in December.

Discussions of the text are expected to go smoothly in the Czech and federal governments, both dominated by the Vaclav Havel's federalist Civic Forum, but increasing nationalist sentiment in Slovakia may derail the agreement when it is discussed in Bratislava, observers said.

#90318d3100 11/14/1990 ~French/German News Agency

TUNIS (NOV. 14) - Iraq was reported Wednesday to have demanded its Arab foes swallow their words as a pre-condition for an eleventh-hour Arab summit to avert war in the Gulf.

First Deputy Prime Minister Yassin Ramadan said that before any fresh summit, the ''anti-Iraq resolutions'' of the last summit in Cairo would have to be withdrawn, according to the Iraqi news agency Ina.

The Ina despatch, distributed here, said Ramadan made the remarks Tuesday night in Rabat, Morocco, where he was meeting King Hassan Ii. The Moroccan monarch has proposed the summit as a ''last chance'' for a peaceful settlement.

The Arab League was split at its October summit in Cairo, with a majority voting to rebuke Iraq and demand it immediately withdraw its troops from neighbouring Kuwait.

The majority, led by Egypt, Syria and the Gulf monarchies, authorised the despatch of Arab troops to Saudi Arabia to confront Iraq. Arab leaders were still consulting Wednesday on the Moroccan proposal.

#90318d3140 11/14/1990 ~French/German News Agency

WASHINGTON (NOV. 14) - Citing national security imperatives, President George Bush Wednesday extended by 90 days the active duty period of some 36,000 reserve troops who have been called to service as part of Operation Desert Shield.

"The continued need for units and members of the selected reserve to augment the active armed forces of the United States for the effective support and conduct of operational missions in and around the Arabian peninsula necessitates this action," Mr. Bush said in a letter to congressional leaders.

Mr. Bush had called up reserves last August 22 for a period of 90 days. By law the president can extend this period three additional times by 90 days, to 360 days total, but must inform Congress each time.

The law, which formerly allowed no more than one 90-day extension, recently was amended.

More than 36,000 reservists from the five U.S. armed services (Navy, Air Force Army, Marine Corps and Coast Guard) have been called up to supplement the U.S. armed forces deployed in the Gulf region, or to replace troops in the United States sent to active duty in the Gulf.

HAVANA (NOV. 14) - An oil tanker with "Iraqi tankers" inscribed in white letters on its side was sighted heading out of the Havana harbor, but neither Cuban authorities nor the Iraqi Embassy would confirm its presence.

The tanker was seen by an Agence France-Presse correspondent sailing Sunday towards the port of Mariel, west of here, but Iraqi Ambassador Waleed Abbas said late Tuesday he knew nothing of the ship.

In early September, Cuba categorically denied reports it had received oil shipments from Iraq in violation of the U.N. mandated trade embargo against Baghdad for its August 2 invasion of Kuwait.

"Since August 6, 1990, there has been no direct commercial transaction" between Cuba and Iraq, a Foreign Ministry statement said referring to U.N. resolution 661 adopted on that date.

Other sources at the Iraqi Embassy suggested the sighted tanker may have been carrying out a contract signed prior to the start of the international embargo against Iraq.

BEIRUT (NOV. 14) - The head of the pro-Iranian Moslem fundamentalist militia Hezbollah, Sheikh Mohamad Hussein Fadlallah, Wednesday called here for the release of all hostages in Lebanon.

Fadlallah's statement came two days after Iran's former interior minister, Ali Akbar Muhtashimi, said three British hostages in Lebanon ''would regrettebly regain their freedom within the coming few days''.

The Hezbollah (Party of God) leader said all hostages should be freed because ''their continued detention was an inhuman action''.

Earlier, Fadlallah met with relatives of four Iranian diplomats who were kidnapped by the pro-Israeli Christian Lebanese Forces militia in eastern Lebanon in 1982. He voiced his pessimism about the fate of the four Iranians.

Christian militia leaders have repeatedly said they were killed, with the rival leaders, Samir Geagea and Elie Hobeika, blaming one another for their liquidation.

British citizens John McCarthy, Jack Mann and Terry Waite been held hostage for years by shadowy groups linked with Hezbollah. Six Americans, two Germans and an Italian are also held by the same groups in Lebanon.

SOFIA (NOV 14) - Bulgarian Prime Minister Andrei Lukanov on Wednesday presented an emergency 100-day plan to parliament providing for a wide range of free-market economic policies to combat the country's economic crisis.

The opposition Union of Democratic Forces (UDF) rejected the program and called on its supporters to demonstrate late in the week for the resignation of the government and formation of a coalition government in which the UDF would hold the key posts, including that of prime minister.

Mr. Lukanov's plan, which is proposed to run until January 31, provides for the cancellation of decrees which limited the economic autonomy of businesses and for the dismantling and privatization of a number of major state concerns.

The program would establish a special agency to handle foreign investment and the privatization of state property, as has been done for East Germany and Hungary, with compensation and reployment of workers sacked as a result.

It would lift some import restrictions and introduce a partial convertibility within the country of the national currency, the lev.

Mr. Lukanov announced his intention to put agricultural and rural development policy proposals before parliament by January 10, and to present a plan for a second stage of economic reforms by January 20.

He said that the government would request assistance from the International Monetary Fund and other financial institutions to stabilize the lev's exchange rate.

A decision is also due to be taken before January 31 to remove price controls on most products and services.

MUNICH (NOV 14) - Siemens, the German electrical giant, raised its share dividend 50 pfennigs Wednesday for the second year in a row.

The mother company said here it would pay out 13 marks (8.80 dollars) per share for the business year ending September 30, 1990.

In a retort to stockmarket pundits, a company spokesman said Siemens hoped to maintain the higher dividend for 1990-1991 ''despite the difficult economic environment''.

The markets have been betting on a slump in Siemens' profitability because of the company's takeover of lossmaking German computer maker Nixdorf late this year.

Worldwide group turnover rose four per cent to 63.3 billion marks (42.8 billion dollars), according to the Siemens announcement Wednesday. After-tax group profit was up six percent to 1.67 billion marks.

The parent company, Siemens Ag, is to reserve 678 million marks from its 1.09-billion-mark surplus for the dividend payout.

#90318d3370 11/14/1990 ~French/German News Agency
LAGOS (NOV. 14) - Liberia's interim president Amos Sawyer on Wednesday offered rebel leader Charles Taylor a chance to fight elections and become head of state, while taking the most important political post available in the meantime.

Mr. Sawyer, a lawyer and constitutional expert, said that Mr. Taylor could become speaker of parliament under the interim government's national unity programme. That was the highest post open to anyone wishing to run for the presidency.

Mr. Taylor, a Liberian former top civil servant who started the country's bloody civil war last December, has already proclaimed himself president. This was even before a breakaway rebel faction led by Prince Johnson tortured the incumbent head of state Samuel Doe to death in September.

The rebel National Patriotic Front of Liberia (NPFL) led by Mr. Taylor is the last warring faction to hold out against West African moves to establish a ceasefire throughout the country and install Mr. Sawyer's interim administration.

Mr. Sawyer, who had talks here Wednesday with Nigerian President Ibrahim Babangida, said "we are happy that Nigeria and other cooperating countries did

not stand idly by and let Liberians massacre themselves into extinction".

Nigerian and Ghanaian troops form the bulk of a 7,000-strong five-nation peacekeeping force sent into Liberia in August by the Economic Community of West African States (ECOWAS). The force, known as ECOMOG, has driven the NPFL out of Monrovia.

Mr. Sawyer also offered six seats in parliament to the NPFL, against four for Mr. Johnson, who has pledged to cooperate with the interim government. Nine members of the new adminstration were already in Monrovia on Wednesday, while Mr. Sawyer was to go there after visiting the Gambia and Guinea.

Under the offer, the NPFL would have half the number of seats to be granted Liberia's six political parties, which would each take two, Mr. Sawyer pointed out. Mr. Taylor thus "has an opportunity to transform his military organization into a political organization," he said.

Since the rebel leader claimed to control "90 per cent of the country", he also had a chance to "influence the election" of 13 additional deputies to be appointed from Liberia's 13 counties.

#90318d3390 11/14/1990 ~French/German News Agency

BEIRUT (NOV. 14) - Unknown gunmen opened fire with machine guns late Wednesday on a car carrying five Frenchmen north of here, wounding three of the passengers -- one seriously -- sources said.

Lucien Chayrouni, 34, an employee at the French embassy was seriously hurt with a shot to the head and rushed to hospital in the Christian suburbs, medical sources said, adding that his condition had stabilized.

France's Ambassador to Lebanon, Rene Ala, confirmed the incident but said that given the recent events in Lebanon, the Frenchmen were perhaps not targeted on account of their nationality.

The car was shot at by one or more assailants as it circulated in the Mkalles sector which is under Lebanese and Syrian army control, security sources said.

Renegade Christian military leader Michel Aoun has been holed up in the French embassy since his defeat October 13 by a Syrian-led assault aimed at extending the Lebanese government's authority over the entire country.

The Syrians have accused Gen. Aoun of high treason but France does not want him tried by Syrian authorities.

AMSTERDAM (NOV 14) - Soviet oil sources will run dry by the end of the century if current pumping levels are maintained, a close aide to Russian Federation President Boris Yeltsin said here Wednesday.

"It was not for nothing that the Soviet Union invaded Afghanistan," but because Moscow "wanted access to the Gulf", said Mikhail Poltoranin, Russian minister for the press and former editor of the Communist Party daily Pravda.

"The Soviet oil reserves are almost exhausted," he said.

Mr. Poltoranin criticized past Soviet oil policy of exploiting reserves near the surface "any old how" without regard to damage caused to reserves lying deeper.

"We exploited the 20 percent of oil fields that were of easiest access, and I wonder if the remainder can still be used," Mr. Poltoranin said at a press conference.

The minister, who was in the Netherlands on a private visit, also called on Western investors to help create independent newspapers, television and radio stations in the Soviet Union.

#90318d3500 11/14/1990 ~French/German News Agency

BEIRUT (NOV. 14) - Britain's Ambassador to Lebanon, David Tatham, on Wednesday expressed "optimism" about the release of British hostages believed held here in the wake of comments made by an Iranian hardline leader.

Mr. Tatham said statements by Iran's former interior minister, Ali Akbar Mohtashemi, on Tuesday about the freeing of British hostages in Lebanon in the coming days were not precise, but that he was "optimistic this time."

"The British hostages should be released in the coming days in Lebanon, because Moslem groups are under pressure, while our Iranian brothers are still held in prison by the Phalangists," Mr. Mohtashemi said.

Mr. Mohtashemi, an MP from Teheran and the leader of the Iranian hardline militants, made the remarks in an interview with the Iranian newspaper Abrar.

He was referring to Terry Waite, special envoy of the Church of England, journalist John McCarthy and retired airline pilot Jack Mann. The three are among 12 Westerners held in Lebanon.

Most of those held are believed to be in the hands of pro-Iranian Lebanese Shiite groups in Lebanon.

On Tuesday, an Iranian source here said the release of three British hostages must be preceded by a resumption of ties between London and Damascus. Relations were cut in 1986.

Iran and Syria earlier this year arranged the release of three hostages.

Teheran later appealed for Western help to secure the liberation of four Iranians it says were seized in Beirut in 1982 by right-wing Lebanese Christian militiamen during an Israeli invasion.

#90318d3530 11/14/1990 ~French/German News Agency

Bonn (NOV. 14) - The Bonn government confirmed Wednesday that a secret intelligence network was set up in West Germany along with other North Atlantic Treaty Organisation (Nato) countries as part of a contingency plan to sabotage any Soviet occupation of Europe.

German government spokesman Hans Klein said Bonn had from the late 1950s taken measures ''to guarantee the obtainment of intelligence information in the presumed area of conflict''.

However he denied the Nato operation, codenamed Gladio, involved the training of covert commando forces.

Klein refused to give further details of the operation. However it was clear from his comments that parliament had not been informed of the network and that the contingency plans still existed.

Other Nato countries, including Italy, Belgium, France and the Netherlands, have already admitted the existence of covert groups.

In a television interview broadcast in Stockholm Wednesday, William Colby, former chief of the U.S. intelligence agency Cia, said the Cia had also set up a covert anti-communist resistance group in neutral Sweden during the 1950s.

The German opposition Social Democrats (Spd) called Wednesday for state prosecutors to launch an investigation.

Spd member of parliament Hermann Scheer said the existence of a secret armed military organisation outside parliamentary control and the status of the official armed forces seemed to be a violation of the constitution and should be the subject of judicial inquiry.

#90318d3560 11/14/1990 ~French/German News Agency

BAGHDAD (NOV. 14) - Iraq Wednesday accused the United States of preparing to

carry out a military attack on it, denouncing as as ''provocative'' plans by U.S. marines to conduct a landing exercise on Saudi territory, near the Iraqi border.

The Pentagon had said Tuesday marines would conduct a landing exercise on Saudi territory soon. Some reports said the exercise would take place Sunday within range of Iraqi shore positions and its Silkworm anti-ship missiles.

''This behaviour constitutes a clear provocative act and unveils, in addition to many other proofs, the aggressive U.S. intentions against Iraq,'' an Iraqi spokesman said in a statement to the Iraqi News Agency (Ina) which was broadcast by Baghdad Radio late Wednesday.

The spokesman accused Washington of planning to carry out ''provocative acts in order to shuffle cards and mislead the American people and Congress and the world public opinion with a view to staging an aggression against Iraq.''

The spokesman stressed that Iraq, ''a believer in its right, the justness of its cause, and in a just peace,'' was capable of hitting back at any aggression it might be subjected to.

Iraqi President Saddam Hussein Wednesday appointed a key member of the ruling Baath Party as governor of the ''province of Kuwait'', Baghdad Radio reported.

Aziz Saleh al-Neman took a legal oath as governor at a ceremony attended by Saddam, the radio said.

PARIS (NOV 14) - Officials from Egypt and 24 creditor nations will meet here Thursday and Friday to assess Cairo's economic reforms and discuss a rescheduling or reduction of Egypt's foreign debt, French and Egyptian sources announced Wednesday.

Any rescheduling by the so-called Club of Paris would have to be agreed to by the International Monetary Fund and the World Bank.

The Egyptian delegation will comprise Atef Ebeid, state minister for administrative development, and Salah Hamed, deputy prime minister and governor of the Egyptian central bank.

In a separate meeting, called at the request of U.S. President George Bush, creditor nations will discuss ways to cancel Egypt's military debt Friday.

Egypt owes France nine billion French francs (1.8 billion dollars) for military equipment in a total debt toward France of 39 billion (7.8 billion dollars).

ZURICH (NOV 14) - The Swiss cigarette maker Reemtsma Cigaretten AG, a subsidiary of the German company of the same name, closed down its plant at Gontenschwill, north of here, due to German unification, a company spokesman announced Wednesday.

Before the two Germanies reunited last month, more than 50 per cent of the Gontenschwill production was destined for the East German market.

But the Hamburg-based parent company said cigarettes formerly made in Switzerland would now be rolled in Germany after taxes between East and West Germany were abolished on July 2 when the Deutsche mark was introduced in the East.

The annual turnover at the Gontenschwill plant stood at 63 million Swiss francs (50 million dollars).

A total of 70 people lost their jobs due to the closure.

-30- 983
#90318d3790 11/14/1990 ~French/German News Agency
BAGHDAD (NOV. 14) - Iraqi Information Minister Latif Nassif Jassem on Wednesday accused British Prime Minister Margaret Thatcher of flagrant meddling in Iraq's internal affairs.

Mr. Jassim said Mrs. Thatcher's statements on Monday vowing that allied forces would free Kuwait from Iraqi annexation, by military means if necessary, were "flagrant interference in Iraq's internal affairs, adding to hostility" against his country.

Iraq invaded Kuwait on August 2 and annexed its oil-rich neighbor days later.

The Iraqi minister said Mrs. Thatcher's "passion to provoke war was due to her colonial mentality which finds refuge in a diabolic and unsteady spirit."

In her annual speech at the banquet of the Lord Mayor of London, the premier said: "We hope that (U.N.) sanctions will compel Iraq to withdraw soon. But if not, Arab and Western forces will have no alternative but to free Kuwait by military means."

Mr. Jassem reaffirmed Iraq's position for a peace in the Gulf based on a comprehensive settlement of all the Middle East's problems, namely including the Palestinian issue.

#90318d3920 11/14/1990 ~French/German News Agency

ADDIS ABABA (NOV 14) - Ethiopia on Wednesday rejected denied Somali defence minister Hussein Abdirahman Matan's charge it was harbouring Somali rebels.

A statement issued here by the foreign ministry said that the allegation made Monday by the Somali defence minister over Radio Mogadishu "only contributed to undermine the mutual confidence existing between the two countries".

The foreign ministry statement stressed that Ethiopia was committed to the full implementation of the April 1988 normalization agreement it signed with Somalia.

It warned the allegation "was neither helpful nor constructive and was against the spirit of a declaration here last July 9 at a special summit of heads of state of the six-nation Inter-Governmental Authority on Drought and Desertification (IGADD) -- Djibouti, Ethiopia, Kenya, Somalia, Sudan and Uganda.''

#90318d4340 11/14/1990 ~French/German News Agency

MANAGUA (NOV. 14) - The opposition Sandinista Front Wednesday came out in support of former contra rebels' demands for land grants from the government and criticized President Violeta Chamorro for being slow to resolve a two-week-old uprising by the ex-guerrillas.

Five people have died and 40 have been injured since the start of the protest move led by former contras and supported by local mayors and dissident officials of Mrs. Chamorros governing coalition.

The activists have blocked roads and occupied churches and government buildings demanding that the government make good its promises when it took office in April to give the former anti-Sandinista guerrillas land and financial aid in return for their demobilization.

Government sources said Mrs. Chamorro would hold a cabinet meeting in Juigalpa on November 21 to hear from an official delegation sent there to assess the situation.

Mrs. Chamorro's chief of staff, Antonio Lacayo, Tuesday warned that the army and police might intervene to quell the uprising if negotiations with the ex-contras and their backers brought no results.

Leaders of the Sandinista Front, which ruled the country for 10 years until April, said they would support a "quick and fair solution" to the contras' demands.

Luis Carrion, a senior front official, said the administration's slowness in addressing the protesters' demands "fed the desperation of the demobilized (contras)" and was bringing the country to the brink of a crisis.

Mr. Carrion distinguished between the former contras' demands and those of local deputies and mayors, many of whom belong to the ruling coalition, who are calling for dismissal of senior members of the Chamorro government and army commanders still loyal to the Sandinistas.

Their complaints, he said, "are not directly linked to the land issue" but have political undertones, adding that many of the local officials were simply seeking more power.

A faction of the ruling coalition and the former rebels believe, instead, that Mrs. Chamorro is being manipulated by the Sandinistas and failing to back those who voted her into power in February.

#90318d4360 11/14/1990 ~French/German News Agency

WASHINGTON (NOV. 14) - Cambodian resistance leader Son Sann insisted

Wednesday that more than 60,000 Vietnamese troops were still in Cambodia and urged Washington not to normalize ties with Hanoi until a complete Vietnamese troop withdrawal is verified by international observers.

Speaking at the National Press Club here, former premier Son Sann, head of the Khmer People's National Liberation Front (KPNLF), said: "It is not the right moment (for the United States) to normalize relations with Vietnam."

"I'm here to request that the U.S. administration not lift the (15-year-old trade) embargo against Vietnam until Vietnam accepts the withdrawal of all its forces under international supervision," he added.

He said he had been reassured on this point in talks here with officials of the Departments of State and Defense as well as from the National Security Council.

The KPNLF is allied with another non-communist group led by Prince Norodom Sihanouk and with the communist Khmer Rouge in a coalition opposing the Hanoi-backed Phnom Penh Government.

Under a U.N.-brokered peace plan, all four Cambodian parties formed a Supreme National Council (SNC) last September to embody Cambodian representation during the transition.

The 12-member SNC is equally represented between the Phnom Penh Government and the tripartite resistance. But the four parties have been deadlocked over a resistance proposal to have Prince Sihanouk named chairman.

#90318d4460 11/14/1990 ~French/German News Agency

PARIS (NOV 14) - Air France will suspend several dozen domestic and French-originated European routes over the next few weeks to concentrate on more profitable ones, a reliable source said Wednesday after a board meeting of the French national carrier.

Management said the move would affect mainly routes linking 11 provincial French cities with European cities using small 30-seat planes chartered by regional firms.

Also eliminated will be flights from eight provincial cities to Paris feeding trans-Atlantic flights to New York. Only Nice and Lyons will keep these connecting trips.

Chairman Bernard Attali told the meeting that the overall service offered would be "globally stable", with a 2.2 percent fall in medium-haul flights and a corresponding increase for long-haul.

Passenger-kilometres to Asian destinations will as a result of the modifications increase 11.3 percent, to North America 7.5 percent and South America 7.6 percent.

Between Paris and major European cities they will increse 13 percent, while services from the French provinces directly to other European destinations will drop 17.4 percent. Traffic to Algeria will drop 36 percent.

#90318d4540 11/14/1990 ~French/German News Agency

DAKAR (NOV. 14) - Security forces arrested several opposition leaders here Wednesday as they participated in a demonstration against what they see as restrictive policies on the media imposed by the ruling Socialist Party.

Among those arrested were Abdoulaye Bathily, Secretary General of the Democratic League, Babacar Niang, Secretary General of the People's Liberation Party, Majhmouth Diop, Secretary General of the African Independence Party, and Ahmadou Guiro, leader of the Socialist Workers' Organization.

Also arrested were several opposition deputies, including Boubacar Sall, the deputy head of the Senegalese Democratic Party (PDS).

Security forces, who were deployed in massive numbers throughout the capital, used teargas to disperse the demonstrators.

One opposition leader said that several persons were injured in clashes which began when some 100 persons succeeded in gathering at the designated departure point of the protest march, which was to have led to the communications ministry.

Reporters witnessed a brutal beating of PDS deputy Abdoulaye Faye by several policemen using clubs, and senior PDS official Ousmane Ngom said that Mr. Faye was subsequently arrested.

He indicated that a number of injured persons, including about 10 members of the security forces, were taken to Dakar's two principal hospitals.

#90318d4630 11/14/1990 ~French/German News Agency

CAIRO (NOV. 14) - Eight people have been killed and 45 injured in clashes between demonstrators and security forces in several towns in Sudan, Sudanese opposition sources said here Wednesday.

The motive for the demonstrations was not specified. Protests notably took place in Madani and Kasala in Kordofan province, according to the sources.

The situation in Khartoum was also said to be "extremely tense" due to political agitation, with the police and army out in force on the streets.

In addition, more than 200 lecturers from the University of Khartoum have been sacked by the government, the opposition sources said.

They said that a rail strike last week was accompanied by arson and other acts of sabotage which paralyzed the country's entire railroad system for five days.

#90318d4640 11/14/1990 ~French/German News Agency

SANTIAGO (NOV. 14) - A top general has called for a purge of the Chilean army which is commanded by General Augusto Pinochet, amid a widening scandal of corruption and murder involving members of the military and secret police.

The call coincided with new accusations leveled against the army by a senator who charged that the former Pinochet government made large-scale transfers of state property to the army in its final months in office.

Gen. Pinochet, who governed at the head of a military government for 16 years, remains commander of the army even though an elected civilian government headed by Patricio Aylwin assumed office this year.

The army already is at the center of a scandal over charges that top military officials participated in a secret financing company that made loans worth millions of dollars.

Since the scandal broke last month, six members of the army high command have resigned and 16 lower ranking officers have been dismissed in a major upheaval in the military. A number of figures linked to the scandal have also been killed or died under mysterious circumstances.

"The army should be cleaned and purged," General Raul Iturriaga said Tuesday. "The investigation should go to the very end. The investigation cannot stop because one man has a higher rank than another."

A former member of the army high command, Gen. Iturriaga's comments were believed to carry weight because he remains on active duty and held top military posts under Gen. Pinochet, including in military intelligence.

Gen. Iturriaga was among the six members of the army high command who resigned last month, but denied he was "directly or indirectly" involved with the secret loan-sharking operation.

The Chilean press has reported that four of those who resigned from the high command were implicated in the crisis, including General Hugo Salas Wenzel, army chief of staff and head of the now defunct National Intelligence Center

(CNI), and Gen. Gustavo Abarzua, director of military intelligence.

The operation came to light after the murder of Aurelio Sichel, a businessman and partner in the financing scheme who was killed after trying to take a million dollars of his money out of the illicit business.

#90318d4750 11/14/1990 ~French/German News Agency

WASHINGTON (NOV. 14) - U.S. President George Bush said Wednesday the build up of U.S. forces in the Gulf was designed to create a ''credible option'' for military action against Iraq.

But he said no decision on this had yet been taken.

Bush met with a group of senators, who said afterwards that there was, for the time being, no need to discuss the Gulf crisis in a special session of Congress.

They said Bush listened without comment to their call not to wage war against Iraq before receiving approval from Congress.

U.S. Secretary of State James Baker said the Bush administration would abide by the constitution, which stipulates that only Congress has the right to declare war.

However, he noted that the 1973 War Power Resolution permits the despatch of U.S. forces into combat for a period of 90 days without approval by Congress.

Every president has considered this resolution unconstitutional since it was passed.

#90318d5650 11/14/1990 ~French/German News Agency

WASHINGTON (NOV 14) - NATO and the Warsaw Pact will formally "bury the Cold War hatchet" at a meeting in Paris next month, Secretary of State James Baker said Wednesday.

Briefing reporters on President George Bush's upcoming tour of Europe and the Middle East, he said the two military alliances would sign three accords which would mark the dawn of a new era in Europe.

To be signed are an agreement to reduce U.S. and Soviet conventional forces in Europe (CFE), another pledging non-aggression and one vowing closer ties between former adversaries.

The occasion will be a 34-nation meeting -- scheduled for November 19 to 21 in

Paris -- of the Conference on Security and Cooperation in Europe (CSCE), which groups all the nations of Europe, except Albania which will be attending as an observer, plus the United States and Canada.

"For the first time in 40 years, Europe will be meeting and discussing and planning without an artificial East-West divide to block progress," said Mr. Baker.

Twenty-two of the participants at the Paris gathering -- the 16-member North Atlantic Treaty Organization (NATO) and the six-nation Warsaw Pact -- will sign "a non-aggression declaration which will, in a sense, bury the Cold War hatchet," Mr. Baker said.

#90318d5710 11/14/1990 ~French/German News Agency

DALLAS, Texas (NOV 14) - The World League of American Football (WLAF) will begin its inaugural season in March 1991 as planned, despite lingering questions as to the ownership and exact location of some of the teams.

"It was decided that the time to negotiate is over and that everything is in place and we need to go on with it," said WLAF president Mike Lynn following a meeting here Wednesday of league shareholders.

The WLAF will kick off a 10-week regular season on March 23, with 10 teams divided into three divisions.

The Europe division will feature teams from London, Barcelona (Spain) and Frankfurt (Germany).

The North America eastern division will be made up of New York, Montreal, Orlando (Florida) and a team from either Raleigh or Charlotte (North Carolina), while the western division will include Sacramento (California), San Antonio (Texas) and Birmingham (Alabama).

"For business reasons, the league will own and operate the London and Frankfurt franchises and will announced management groups for those franchises " Lynn said, addressing the concerns over lack of European owners.

The new league will announce the playing schedule by December 1, along with the site of the first World Bowl on June 9.

#90318d5770 11/14/1990 ~French/German News Agency

WASHINGTON (NOV 15) - The Bush administration is in no hurry to sign a proposed Trans-Atlantic Declaration with the European Community during next week's 35-nation European summit in Paris, according to a high-ranking

administration official Wednesday.

''Paris would be a convenient place in which it could be signed, but the schedule is already heavy,'' said the official. ''We are not hung to sign it in a particular place at a particular time.''

The declaration spells out a partnership between the United States and Western Europe based on changing developments and a continued expansion of the European Community.

The official confirmed that long-simmering trade issues are blocking the way.

''It has to do with the description of the Uruguay round,'' the official said in reference to the proposed declaration's stance on upcoming global trade talks.

E.C. Council President Giulio Andreotti came out of White House talks with President Bush Tuesday saying he was hopeful the declaration could be finalized in Paris. He also warned that failure at the Uruguay Round would result in ''serious damage'' particularly to less developed countries.

Agreement by early December is doubtful because the United States and the Common Market disagree on cutting agriculture subsidies for European farmers. The E.C. has proposed a 30 per cent reduction based on 1986 levels, and the United States is calling for cuts of 75 to 90 per cent.

#90318d5830 11/14/1990 ~French/German News Agency

BERLIN (NOV 15) - Rioting and looting rocked the heart of Berlin for the second night this week after a peaceful protest march by 10,000 people turned ugly.

Store windows were smashed, cars overturned and at least one police vehicle was set afire in a raging street battle that lasted until early Thursday. Eyewitnesses said stores were looted.

The demonstration through the centre of what used to be East Berlin had been called to protest alleged police brutality in this week's concerted efforts to evict squatters from a total 16 delapidated buildings in the eastern half of the city.

Appeals for non-violence were made by the march's organizers, including Barbel Bohley, a activist from last year's pro-democracy movement in East Germany.

But once the march got underway, a hard core of militants began breaking windows and pelting police with petrol bombs and paving stones. Pacifists in the crowd staged an impromptu sit-down in a bid to defuse the situation, but to

no avail.

Police countered with tear gas and water cannons, sending thousands of choking people streaming in all directions, according to eyewitnesses. Scores of people were detained, and eyewitnesses said there were numerous injuries in clashes with police.

#90318d5840 11/14/1990 ~French/German News Agency

MOSCOW (NOV 15) - The Russian parliament on Wednesday defied the Soviet leadership by voting to invalidate a Soviet cabinet decision to free the prices of many luxury goods.

The move came a few days after the president of the Russian Republic, Boris Yeltsin, met with Soviet President Mikhail Gorbachev and the two agreed to form a coalition administration that would include Yeltsin nominees.

The Russian Supreme Soviet, as the parliament is known, reacted only hours after Prime Minister Nikolai Ryzhkov announced the price-decontrol measure.

The parliament justified its decision by saying the measure would have brought price increases that would have lowered the standard of living of many Russians.

The measure applied to a wide range of goods including furniture, furs, car parts, imported liquor, electronics and choice cuts of meat.

Also included was sturgeon, the fish whose eggs are eaten as caviar.

ZURICH (NOV 15) - An Alitalia Dc-9 on a flight from Milan crashed into rugged woodlands on approach to Zurich's Kloten Airport in fog and drizzle Wednesday, killing all 40 passengers and six crew members, Swiss authorities said early Thursday.

The jetliner came down near the town of Stadlerberg, 10 kilometres from the airport.

Kloten air controllers had received no distress call, and the cause of the crash was unknown, said Cantonal Police Director Eugen Thomann.

By midnight 10 bodies had been recovered from the wreckage of the aircraft, which eyewitnesses said had been engulfed in a ball of fire in midair before it hit a wooded hillside.

The plane, with a passenger list of mostly Swiss, Italian and Japanese businessmen, sliced a 250-metre-long swath through trees before breaking up on the ground.

Wreckage from what is already being called the worst Swiss aviation accident since 1973 was strewn over a radius of 120 metres. Emergency crews were to resume sifting through the debris at daybreak.

The Dc-9-32, said to be about 20 years old, was carrying only about half its capacity when it left Milan's Linate Airport for a popular after-business hours flight to Zurich Wednesday evening.

Zurich Kloten air controllers said the plane was 10 kilometres northwest of the airport at an altitude of 600 to 700 metres when it vanished from their screens at 8:13 p.m. Despite drizzle and some ground fog, visibility was said to be good.

#90318d6280 11/14/1990 ~French/German News Agency

TOKYO (NOV. 15) - The Science and Technology Agency Thursday approved construction of a low-level radioactive waste storage facility in Rokkasho-mura, in northern Japan's Aomori Prefecture, agency officials said.

Japan Nuclear Fuel Industries Co., Inc. will soon start construction of the facility to store about three million barrels of radioactive scrap and waste discharged from nuclear power plants, they said.

The facility will also include a uranium enrichment factory and a plant for reprocessing spent nuclear fuel.

The initial phase of construction, to be completed by December 1992, will hold 200,000 of the 200-litre (52-gallon) drums that will hold the waste.

About 450,000 barrels containing low-level radioactive waste are already being held at nuclear power stations, but the Rokkasho-mura site is expected to hold three million barrels when completed.

Japan's first commercial uranium enrichment factory, now in its final stages of construction, is expected to start operation next September.

The agency is still considering plans for the fuel reprocessing plant which a separate firm will begin to build in late 1991, in time for it to begin operating in 1995.

Japan now operates 39 nuclear power reactors, the agency said.

#90318d6330 11/14/1990 ~French/German News Agency

MANILA (NOV. 15) - So-called "sin taxes" and the general economic slowdown in the Philippines has caused a 64 percent decline in third quarter profits of San Miguel Corp. (SMC), a company report said Thursday.

The food and beverage firm posted a net income of 238 million pesos (8.5 million dollars) from July to September, down from 664 million pesos (23.7 million dollars) in the same period last year, the report said.

Consolidated net income for the first nine months of the year totalled 1.28 billion pesos (46 million dollars), down from 2.09 million pesos (75 million dollars) in the first nine months of 1989, it said.

The report said income from operations declined due to lower sales volume of beer in the third quarter compared to the same period last year, following a price increase.

The government in July raised levies on so-called "sin" products such as cigarettes and beer, whose ad valorem tax was raised to 50 percent from 37 percent.

The general economic slowdown, rising oil prices, mounting inflation and interest rates and a depreciating peso strained the company's sales and profitability, and was only partially offset by cost-cutting measures and improvements in the firm's other operations, the report added.

Consolidated sales rose by 16 percent to 10.53 billion pesos (376 million dollars) in the third quarter, and rose 17 percent to 31.16 billion pesos (1.11 billion dollars) in the first nine months of 1990, the report said.

#90318h0121 11/14/1990 ~Chinese News Agency
TIRANA (NOV. 14) XINHUA - ALBANIA IS STEERING TOWARD CONSTITUTIONAL CHANGES WHICH ARE EXPECTED TO STRENGTHEN THE POWERS OF THE PARLIAMENT.

THE MOVE WAS TAKEN BY THE PARLIAMENT IN ITS DECISION ON TUESDAY TO SET UP A CONSTITUTIONAL AMENDMENT COMMITTEE AFTER THE HEAD OF THE PARTY OF LABOR AND GOVERNMENT RAMIZ ALIA MADE A SPEECH ENDORSING THE IDEA.

IN HIS ADDRESS TO PARLIAMENT, ALIA DESCRIBED SOME CLAUSES IN THE CURRENT CONSTITUTION AS OUTMODED WHICH, HE SAID, HAD TO BE REPLACED BY NEW AMENDMENTS.

ALIA, WHO WILL HEAD THE COMMITTEE, STRESSED THAT THESE AMENDMENTS ARE AIMED AT GIVING A LARGER SAY TO THE PARLIAMENT BY DEFINING ITS NATURE AND FUTURE ROLE WITHIN THE LEGAL FRAMEWORK OF THE CONSTITUTION.

REFERRING TO ONE OF THE CLAUSES IN THE PRESENT CONSTITUTION WHICH STIPULATES THAT THE COMMUNIST PARTY CAN BE THE ONLY LEADING POLITICAL FORCE IN THE COUNTRY, ALIA SAID IT IS UNNECESSARY TO PUT THIS CLAUSE INTO THE CONSTITUTION, ARGUING HIS PARTY'S ROLE IS GUARANTEED BY ITS POLCIES, NOT BY LAWS.

INCLUDED IN ALIA'S SPEECH WERE PROPOSED AMENDMENTS FOR LIFTING BANS ON ACTIVITIES SUCH AS THE ESTABLISHMENT OF FOREIGN-OWNED ENTERPRISES IN ALBANIA, GETTING LOANS FROM ABROAD, RELIGIOUS EXPRESSION AND MINORITY PEOPLES' RIGHTS.

THE CONSTITUTIONAL CHANGES WORKED OUT BY THE COMMITTEE WILL BE DEBATED BY THE NEW PARLIAMENT FOLLOWING LEGISLATIVE ELECTIONS SCHEDULED FOR FEBRUARY NEXT YEAR.

BELGRADE (NOV. 14) XINHUA - THE WORLD BANK WILL PROVIDE 198 MILLION DOLLARS IN LOANS TO YUGOSLVIA TO HELP MODERNIZE THE COUNTRY'S RAILWAYS AND BUILD INFRASTRUCTURE FOR TOURIST FACILITIES ALONG THE ADRIADIC COASTLINE.

THE LOAN WAS OFFERED IN AN AGREEMENT SIGNED BY THE YUGOSLAV EMBASSADOR TO THE UNITED STATES DZEVAD MUJEZINOVIC AND EUGENIO LARI, HEAD OF THE EUROPEAN BUREAU OF THE WORLD BANK, TUESDAY IN WASHINGTON.

UNDER THE TERMS OF THE AGREEMENT, YUGOSLAVIA WILL BEGIN TO PAY BACK THE LOAN FIVE YEARS FROM NOW, AND HAS A TOTAL OF 15 YEARS AFTER THAT TO COMPLETE PAYMENT. THE WORLD BANK LOAN CARRIES AN INTEREST RATE OF 7.65 PERCENT.

YUGOSLAVIA IS SEEKING INTERNATIONAL AID IN AN ATTEMPT TO COMPENSATE FOR ITS ECONOMIC LOSSES CAUSED BY THE GULF CRISIS AND THE EFFECTS OF THE HEAVY DRAUGHT THE COUNTRY SUFFERED THIS YEAR.

PRESIDENT OF THE WORLD BANK BARBER CONABLE, IN HIS RECENT MEETING WITH MUJEZNOVIC, PROMISED THAT HIS BANK WILL GIVE SERIOUS CONSIDERATION TO YUGOSLAVIA'S REQUESTS AND WILL CONTINUE TO GIVE FINANCIAL AND TECHNOLOGICAL AID TO YUGOSLAVIA.

#90318h0131 11/14/1990 ~Chinese News Agency

BEIJING (NOV. 14) XINHUA - CHINA HAS INVESTED MORE THAN 600 MILLION YUAN THIS YEAR ON THE CONSTRUCTION OF GRANARIES WITH A TOTAL HOLDING CAPACITY OF 7.45 BILLION KG.

AN OFFICIAL IN CHARGE OF THE STORAGE AND TRANSPORTATION OF FOODSTUFFS UNDER THE MINISTRY OF COMMERCE SAID THAT THIS YEAR'S TOTAL GRAIN OUTPUT MAY HIT 420 BILLION KG.

SINCE CHINA HAS INCREASED ITS GRAIN PURCHASES AND REDUCED ITS VOLUME OF SALES, THE TOTAL AMOUNT OF GRAIN STOCKPILED AT THE END OF OCTOBER INCREASED BY 25.65 BILLION KG OVER THE SAME PERIOD OF LAST YEAR.

THE OFFICIAL SAID THAT AT PRESENT GRAIN STORAGE FACILITIES ARE IN SHORT SUPPLY IN CHINA AND CANNOT MEET THE STORAGE DEMANDS OF THE COUNTRY'S GRAIN RESERVES AND THE GRAIN PURCHASED FROM FARMERS. HE ADDED THAT MORE THAN HALF OF THE COUNTRY'S GRANARIES WERE BUILT BEFORE THE 1970S.

ACCORDING TO THE ONGOING NATIONAL GRAIN WORK CONFERENCE, ABOUT 70 PERCENT OF THE FIRST TWO GROUPS OF GRANARIES, WITH A COMBINED TOTAL CAPACITY OF 5.25 BILLION KG, HAVE BEEN COMPLETED AND PUT INTO USE.

IN ADDITION, CHINA ALSO PLANS TO BUILD STOREHOUSES CAPABLE OF HOLDING 500 MILLION KG OF THE COUNTRY'S GRAIN RESERVES. MORE THAN 90 PERCENT OF THESE STOREHOUSES WILL BE COMPLETED THIS YEAR.

IT WAS REPORTED THAT THE STATE COUNCIL ALSO PLANS TO BUILD GRAIN STOREHOUSES WITH A TOTAL CAPACITY OF FIVE BILLION KG EACH YEAR DURING THE PERIOD OF THE EIGHTH FIVE-YEAR PLAN (1991-1995).

CARACAS (NOV. 14) XINHUA - PRESIDENT CARLOS ANDRES PEREZ TODAY INAUGURATED VENEZUELA'S FIRST INTERNATIONAL TOURISM CONFERENCE.

THE EVENT, SPONSORED JOINTLY BY THE VENEZUELAN TOURISM CORPORATION AND THE U.S. EMBASSY HERE, WILL CONTINUE UNTIL FRIDAY, NOVEMBER 16 AND AIMS TO EXPAND AND PROMOTE INVESTMENT AND DEVELOPMENT OPPORTUNITIES FOR BOTH COUNTRIES THROUGH TOURISM.

THE CONFERENCE WILL ANALYZE THE GLOBAL TOURISM OUTLOOK, MARKET STRATEGIES FOR INTERNATIONAL TOURISM AND TRAVEL, THE CONTRIBUTION OF TOURISM TO THE ECONOMIC AND SOCIAL DEVELOPMENT OF VENEZUELA AND U.S.-VENEZUELAN COOPERATION IN THIS AREA.

GLOBALY, TOURISM HAS DEVELOPED RAPIDLY OVER THE PAST FEW YEARS, BECOMING THE THIRD LARGEST GENERATOR OF REVENUE AFTER PETROLEUM AND THE AUTOMOBILE INDUSTRY.

LAST YEAR, HOWEVER, VENEZUELA ONLY ATTRACTED A MEAGER 411,849 FOREIGN TOURISTS OR 0.1 PERCENT OF GLOBAL TOURISM.

TO CHANGE THIS SITUATION, VENEZUELA PLANS TO INTENSIFY ITS TOURISM AND CAMPAIGNS TO BOOST ITS IMAGE ABROAD AND TO INVEST MORE IN HOTELS AND OTHER TOURISM INFRASTRUCTURE.

MEXICO CITY (NOV. 14) XINHUA - HONDURAS' FORMER CONSUL IN SAN ANTONIO, TEXAS, TUESDAY DENIED CHARGES OF INVOLVEMENT IN THE TRAFFICKING OF CENTRAL AMERICAN CHILDREN FOR PAID ADOPTION IN THE UNITED STATES.

ACCORDING TO NEWS REPORTS PUBLISHED NOVEMBER 9 IN HONDURAS, FORMER CONSUL ROSARGENTINA PINEL CORDOBA HAS BEEN ACCUSED OF BEING ONE OF SEVERAL PEOPLE USING THEIR POSITION TO ACT AS CONTACTS FOR U.S. CITIZENS WILLING TO BUY CENTRAL AMERICAN CHILDREN.

NEWS REPORTS OUT OF THE CAPITAL OF TEGUCIGALPA SAID PINEL HAS IN TURN ACCUSED THE U.S. IMMIGRATION AND NATURALIZATION SERVICES (INS) OF FRAMING HER IN ORDER TO PROTECT A U.S. FAMILY WHICH KIDNAPPED A HONDURAN GIRL AS PART OF AN ILLEGAL ADOPTION SCAM.

PINEL HAS ALSO CHARGED HONDURAN AMBASSADOR TO WASHINGTON JOSE RAMON HERNANDEZ ALCERRO OF BEING EASILY DUPED BY A PIECE OF OFFICIAL LOOKING PAPER BEARING THE SEAL OF THE U.S. GOVERNMENT WITHOUT HAVING MADE A PROPER INQUIRY INTO THE CASE.

PINEL WAS DISMISSED FROM HER POST ON NOVEMBER 9 ON THE REQUEST OF THE U.S. STATE DEPARTMENT BECAUSE OF THE ALLEGATIONS MADE AGAINST HER.

#90318h0167 11/14/1990 ~Chinese News Agency

GABORONE (NOV. 14) XINHUA - THE AFRICAN NATIONAL CONGRESS (ANC) HAS CALLED FOR A MAJOR REDISTRIBUTION OF LAND IN SOUTH AFRICA BY NATIONALIZING THE LAND SELECTIVELY.

THE CALL WAS CONTAINED IN AN ANC LAND COMMISSION WORKSHOP REPORT RELEASED IN SOUTH AFRICA TODAY. THE WORKSHOP WAS HELD IN SOUTH AFRICA LAST MONTH.

THE REPORT SAID THAT IN THE CONTEXT OF A MIXED ECONOMY THERE WOULD ONLY BE SELECTIVE NATIONALIZATION, AND THAT THE RE-DIS- TRIBUTION OF LAND WOULD BE BASED ON THE NEEDS OF LAND USERS.

THE 20-PAGE WORKSHOP REPORT REPRESENTS THE FIRST OF A SERIES OF ANC DOCUMENTS WHICH WILL FORM THE BASIS FOR DISCUSSIONS TOWARD A DEFINITIVE ANC LAND POLICY.

STATISTICS SHOW THAT MORE THAN 80 PERCENT OF THE POPULA- TION IN SOUTH AFRICA HAS BEEN ALLOCATED ONLY 15 PERCENT OF THE LAND. RECENT INVESTIGATIONS HAVE ALSO SHOWN THAT LAND ALLOCATED TO BLACK PEOPLE IS LESS ARABLE AND HAS LOWER CAPACITIES FOR GRAZING AND CROP FARMING THAN THAT ALLOCATED TO WHITES.

Syria -- Enemy of My Enemy: A special investigation of the ''unholy alliance'' between the U.S. and Syria which has come about since the Iraqi invasion of Kuwait. Such troubling aspects of the ''friendship'' as Syria's sponsorship of terrorists and terrorist acts (the bombing of Pan Am 103), its human rights violations, aggression toward Lebanon and link with the capture of American hostages are examined. Experts comment on the fact that the U.S., by making ''the enemy of my enemy my friend,'' may be on the same dangerous road that led to Iraq's current position of strength and power in the Arab world and against the United States and its allies.

For more information, or to order transcripts, call (800) TALK- SHO. In New York City call: (212) 732-8552.

Nightline (ABC) November 13, 1990 (Transcript #2472)

Debating a Debate: Congressional support grows for a special session to explore U.S. policy in the Persian Gulf and for President Bush to lay out his specific goals for U.S. troops and military plans in the region. The White House is so far opposed to calling a special session or to an actual debate, referring only to ''consultation'' with the Congress.

Crossfire (CNN) November 13, 1990 (Transcript #181)

Let the Debate Begin: Senators John McCain (R-AZ) and Tim Wirth (D-CO) of the Armed Services Committee discuss whether President Bush should ask Congress for a declaration of war against Iraq and what Congress should decide.

Nova (WGBH) November 13, 1990 (Transcript #1716)

Killing Machines: The development of ''smart weapons,'' relying on superior technology to defeat larger, less sophisticated forces and the computer-driven high-technology weapons that could be used in the Persian Gulf.

Korea -- The Unknow War (WGBH) November 13, 1990 (Transcript #103)

These Is No Substitute for Victory: On September 15, 1950, General MacArthur's armada of 269 ships is poised off the port of Inchon, deep behind North Korean

lines. It is a risky but successful landing that within days turns the tide of the war. This program chronicles the key decision to cross the 38th Parallel and roll back communism and the failure of United States intelligence to anticipate Chinese intervention in the war. It draws to a close with the United Nations' forces being routed by the Chinese in late November.

Korea -- The Unknow War (WGBH) November 13, 1990 (Transcript #104)

An Entirely New War: By late November 1950, United Nations forces are on the verge of conquering the North and reuniting the peninsula. All this changes when the Chinese enter the war. This program examines the continuing tensions between President Harry Truman and General Douglas MacArthur that lead to the general's dismissal in April 1951. Demoralized United Nations troops are rallied by General Matthew Ridgway and a second Communist offensive ends just short of Seoul.

Good Morning America (ABC) November 13, 1990 (Transcript #1152)

Should Congress declare war?; the Noriega tapes; Mario Cuomo interview; credit life insurance; adding fuel to the ''Bonfire'' (new edition of Tom Wolfe's Bonfire of the Vanities); Mapmaker, Mapmaker (Part 2)(space-age technology for making maps); Carnal Knowledge revisited (Broadway production of movie); Julio Iglesias interview; the suitable jacket (fashion); Mel Harris interview.

Inside Corporate America (FNN) November 13, 1990 (Transcript #71)

Morton International: CEO Charles S. Locke, Bear Sterns' Associate Director Jeffery Cianci and Kathie Plourde, Vice- President of Lufkin & Jenrette discuss Morton International's present and future interests.

Larry King Live (CNN) November 13, 1990 (Transcript #169)

Suing for Psychological Damage: A debate on when people should be allowed to sue companies whose practices they claim have caused them psychological damage.

Sally Jessy Raphael November 13, 1990 (Transcript #572)

Cheat On Your Wife and Get Away With It?: A married man and his mistress share their points of view on adultery. Joe McCullough advises men on how to cheat and get away with it, while Margaret Kent advises women on how to keep their men from cheating.

Oprah Winfrey Show November 13, 1990 (Transcript #1087)

Ex-Wives Warn the New Woman: Ex-wives warn the new women in their men's lives. Dr. Sandra Kahn, author of The Ex-Wife Syndrome, explains why these ex-wives have not emotionally divorced from their ex-husbands.

Donahue November 13, 1990 (Transcript #3076)

East St. Louis, Illinois -- Can a Dying City Be Saved?: A discussion of the problems of poverty and decay in East St. Louis turns intno a public referendum on the success or failure of Mayor Carl E. Officer and his policies.

Geraldo November 13, 1990 (Transcript #824)

Committing Ferocious Crimes in the Name of the Devil: Cults and their sacrifices are discussed by parents and experts who have either been involved or had a family member involved in human or animal sacrifices. Some of these cult members are believed to be fueled in their beliefs by their use of drugs.

Wednesday's Line-Up: (To be summarized in tomorrow's Daily Report) Donahue: Condoms for Kids (Easton, MD) Sally Jessy Raphael: A Chippendale/Penthouse Lingerie Party Geraldo: Male Makeovers Oprah Winfrey: Hollywood's Legendary Ladies

TOKYO (NOV. 14) KYODO - SALES AT DEPARTMENT STORES IN TOKYO ROSE 7.1 PERCENT IN OCTOBER FROM THE SAME MONTH LAST YEAR, THE JAPAN DEPARTMENT STORES ASSOCIATION SAID WEDNESDAY.

SALES AT THE 26 OUTLETS OF 14 DEPARTMENT STORE COMPANIES TOTALED 248.9 BILLION YEN.

THE 7.1 PERCENT RISE IS THE LOWEST THIS YEAR EXCEPT MARCH WHEN SALES WERE SLOW IN REACTION TO A HIGH LEVEL AMID A BUYING RUSH IN MARCH 1989 AHEAD OF THE APRIL INTRODUCTION OF THE CONSUMPTION TAX.

OFFICIALS ATTRIBUTED THE LOW GROWTH TO THE UNUSUALLY HOT WEATHER WHICH PUSHED DOWN SALES OF CLOTHES, A MAIN COMPONENT OF TOTAL SALES.

ANOTHER REASON CITED WAS THAT THERE WAS ONE LESS SUNDAY COMPARED WITH OCTOBER LAST YEAR.

"BUT EXCLUDING THESE FACTORS, OCTOBER'S ACTUAL RISE CAN BE CALCULATED TO BE 10 PERCENT," AN OFFICIAL AT THE ASSOCIATION SAID. "CONSUMER DEMAND CAN BE CONSIDERED TO BE REMAINING BRISK," HE ADDED.

COATS AND SUITS DID NOT SELL WELL AND KEPT THE RISE IN THE CLOTHING SECTOR TO A MODEST 4.6 PERCENT. HOWEVER, SALES OF PAINTINGS AND PRECIOUS METALS WERE BRISK AND PUSHED UP THE RISE IN THE SUNDRY GOODS SECTOR TO 10.9 PERCENT.

SALES OF FURNITURE ROSE A HIGH 11.6 PERCENT, WHILE BRISK SALES OF TABLEWARE CONTRIBUTED TO A 12.2 PERCENT INCREASE IN THE HOUSEHOLD UTENSIL SECTOR.

TOKYO (NOV. 14) KYODO - TOYOTA MOTOR CORP. REPORTED TO THE TRANSPORT MINISTRY WEDNESDAY THAT IT WILL RECALL ABOUT 515,000 CARS WITH DEFECTS.

THE MAJOR JAPANESE AUTOMAKER SAID NO ACCIDENTS ATTRIBUTABLE TO THE DEFECTS HAVE BEEN REPORTED.

THE COMPANY SAID THE CARS TO BE RECALLED WILL INCLUDE 13 MODELS, INCLUDING THE CORONA 1500 AND THE CARINA 2000, WHICH WERE PRODUCED AND SOLD BETWEEN DECEMBER 1987 AND LAST FEBRUARY.

THE TRANSPORT MINISTRY SAID THE FLOOR PLATE FOR THE SIDE BRAKE IS NOT STRONG ENOUGH AND TENDS TO DEVELOP CRACKS.

THE DEFECTS WERE FIRST REPORTED BY A TOYOTA DISTRIBUTOR IN IRELAND LAST JULY, THE COMPANY SAID.

IT IS THE THIRD-LARGEST RECALL SINCE 1969. A TOTAL OF ABOUT 774,000 CARS WERE RECALLED IN 1970 AND ABOUT 528,000 UNITS IN 1969.

#90318k0114 11/14/1990 ~Japanese News Agency

JAKARTA (NOV. 14) KYODO - INDONESIA'S LEADING HUMAN RIGHTS MOVEMENT LEADER JOHANNES PRINCEN ON WEDNESDAY ANNOUNCED A PLAN TO FORM A NEW INDEPENDENT, FREE TRADE UNION IN DECEMBER.

PRINCEN SAID AT LEAST 5,000 WORKERS THROUGHOUT INDONESIA HAVE AGREED SO FAR TO JOIN THE NEW UNION.

BUT IT IS NOT KNOWN WHETHER THE GOVERNMENT HAS APPROVED THE PLAN TO ESTABLISH AN INDEPENDENT LABOR UNION.

INDONESIAN GOVERNMENT INTEGRATED 21 BIG INDUSTRIAL UNIONS INTO ONE GOVERNMENT-CONTROLLED ALL INDONESIAN LABOR FEDERATION UNION (FBSI) IN 1973. THIS ORGANIZATION WAS CHANGED INTO THE ALL INDONESIA LABOR UNION (SPSI) IN 1985 BY GOVERNMENT INTERVENTION. THE SPSI IS THE SOLE TRADE UNION IN THE COUNTRY APPROVED BY A 1985 LAW ON PUBLIC ORGANIZATION REGULATIONS.

THE PROPOSED FREE TRADE UNION, NAMED "SETIA KAWAN" (LITERALLY "SOLIDARITY OF FRIENDS"), WILL BE THE FIRST FREE TRADE UNION SINCE 1973.

PRINCEN, A NATURALIZED INDONESIAN CITIZEN AND FORMER DUTCH SOLDIER WHO FOUGHT IN THE 1945-1949 INDEPENDENCE WAR AGAINST THE DUTCH, SAID THAT THE LABOR UNION MUST BE FREE FROM THE INFLUENCE OF EMPLOYERS AND THE GOVERNMENT.

TOKYO (NOV. 14) KYODO - BENIN'S PRIME MINISTER NICEPHORE SOGLO ON WEDNESDAY SOUGHT FURTHER ECONOMIC ASSISTANCE FROM JAPAN FOR HIS WEST AFRICAN COUNTRY, FOREIGN MINISTER OFFICIALS SAID.

SOGLO, MEETING FOREIGN MINISTER TARO NAKAYAMA AT THE MINISTRY'S IIKURA GUESTHOUSE, SAID HIS COUNTRY HAS PROMOTED ITS POLICY OF ECONOMIC STRUCTURAL ADJUSTMENT SINCE IT ABOLISHED THE 17-YEAR-OLD COMMUNIST RULE LAST DECEMBER, THE OFFICIALS SAID.

SOGLO WAS QUOTED AS SAYING THAT HE EXPECTS CLOSER RELATIONS WITH JAPAN IN THE PROCESS OF ECONOMIC REFORM.

ACCORDING TO THE OFFICIALS, NAKAYAMA TOLD THE PRIME MINISTER THAT JAPAN WILL DECIDE ON HOW TO HELP THE NATION WITH ITS ECONOMIC REFORMS WHILE OBSERVING NEGOTIATIONS BETWEEN BENIN AND THE WORLD BANK.

EARLIER IN THE DAY, MADAGASCAR'S FOREIGN MINISTER JEAN BEMANANJARA MET NAKAYAMA AND TOLD HIM THAT PRESIDENT DIDIER RATSIRAKA WANTS TO VISIT JAPAN. HE ALSO ASKED NAKAYAMA TO SEND MEMBERS OF THE JAPAN OVERSEAS COOPERATION VOLUNTEERS TO HELP THE COUNTRY AS SOON AS POSSIBLE, THE OFFICIALS SAID.

NAKAYAMA WAS QUOTED AS REPLYING THAT HE WILL INSTRUCT THE MINISTRY CONCERNED TO STUDY THE REQUESTS.

-30- 1294

#90318k0124 11/14/1990 ~Japanese News Agency

TOKYO (NOV. 14) KYODO - ECUADOR AND THE DOMINICAN REPUBLIC ON WEDNESDAY EXPRESSED HOPES OF HAVING CLOSER ECONOMIC COOPERATION WITH JAPAN, FOREIGN MINISTRY OFFICIALS SAID.

ECUADORIAN VICE PRESIDENT LUIS PARODI VALVERDE AND DOMINICAN VICE PRESIDENT CALROS MORALES TRONCOSO EXPRESSED THEIR HOPES IN SEPARATE MEETINGS WITH FOREIGN MINISTER TARO NAKAYAMA AT THE IIKURA GUESTHOUSE.

MORALES SAID HIS COUNTRY WANTS TO HAVE CLOSER ECONOMIC AND CULTURAL TIES WITH JAPAN TO HELP DEVELOP THE CARIBBEAN COUNTRY.

NAKAYAMA REPLIED JAPAN WILL CONTINUE TO PROVIDE THE DOMINICAN REPUBLIC WITH FINANCIAL GRANTS AND TECHNICAL COOPERATION.

FOLLOWING A MEETING WITH MORALES, NAKAYAMA MET PARODI AND TOLD HIM THAT THE JAPANESE GOVERNMENT WILL CONSIDER EXTENDING GRANTS TO ECUADOR AFTER THE GOVERNMENT HAS FULLY STUDIED THE COUNTRY'S ECONOMIC SITUATION AND CONDITIONS.

NAKAYAMA ALSO SAID JAPAN HAS ADMIRED ECUADOR'S EFFORTS TO RECONSTRUCT ITS ECONOMY.

-30- 1125

#90318k0128 11/14/1990 ~Japanese News Agency

TOKYO (NOV. 14) KYODO - CHILE WANTS JAPANESE BANKS TO PURCHASE NATIONAL BONDS ISSUED TO HELP FINANCE ITS ECONOMY, HIT BY THE PERSIAN GULF CRISIS, CHILEAN FOREIGN MINISTER ENRIQUE SILVA CIMMA SAID WEDNESDAY.

SILVA CIMMA, IN TALKS WITH HIS JAPANESE COUNTERPART, TARO NAKAYAMA, SAID THE GULF CRISIS HAS SERIOUSLY DAMAGED THE ECONOMY, WHICH IMPORTS 75 PERCENT OF ITS OIL, JAPANESE OFFICIALS SAID.

THE CHILEAN GOVERNMENT ISSUED THE BONDS IN AN ANTIRECESSIONARY MOVE AND HAS ASKED PRIVATE BANKS IN CHILE TO BUY THEM, HE SAID. HE TOLD NAKAYAMA HE EXPECTS JAPANESE BANKS WILL ACCEPT 320 MILLION DOLLARS WORTH OF THE FIVE-YEAR BONDS.

NAKAYAMA SAID JAPAN WILL CONSIDER EXTENDING YEN LOANS TO THE SOUTH AMERICAN COUNTRY, BASED ON REPORTS MADE BY A JAPANESE RESEARCH MISSION SENT THERE IN SEPTEMBER.

SILVA CIMMA STRESSSED CHILE IS FOLLOWING AN OPEN, FREE ECONOMIC POLICY, AND ALSO AN OPEN POLICY ON INVESTMENT.

BOTH MINISTERS, PLEDGING TO TIGHTEN BILATERAL TIES, AGREED UPON A VISIT TO JAPAN IN THE NEAR FUTURE BY PRESIDENT PATRICIO AYLWIN. HE ASSUMED OFFICE IN MARCH AFTER THE FIRST DEMOCRATIC ELECTION SINCE 1973, WHEN FORMER PRESIDENT AUGOSTO PINOCHET TOOK POWER IN A BLOODY MILITARY COUP.

#90318k0133 11/14/1990 ~Japanese News Agency

TOKYO (NOV. 14) KYODO - FOREIGN MINISTER TARO NAKAYAMA ON WEDNESDAY WELCOMED THE SETTING-UP OF THE JAPAN-COLOMBIA ECONOMIC COMMITTEE TO PROMOTE TRADE AND INVESTMENT TIES BETWEEN THE TWO COUNTRIES.

NAKAYAMA WELCOMED THE ESTABLISHMENT OF THE COMMITTEE, SET UP ON TUESDAY AT THE HEADQUARTERS OF THE FEDERATION OF ECONOMIC ORGANIZATIONS (KEIDANREN), WHEN HE MET COLOMBIAN VICE PRESIDENT AND FOREIGN MINISTER LUIS FERNANDO JARAMILLO AT THE IIKURA GUESTHOUSE.

JARAMILLO SAID THE NEWLY ESTABLISHED COMMITTEE IS VERY USEFUL FOR COLOMBIA AS

BOGOTA HAS RELAXED CONTROLS ON FOREIGN INVESTMENT IN THE LATIN AMERICAN COUNTRY.

THE COLOMBIAN VICE PRESIDENT SAID COLOMBIA WILL BE CHAIRMAN OF THE SO-CALLED "RIO GROUP" OF 11 LATIN AMERICAN COUNTRIES NEXT YEAR, ADDING BOGOTA WANTS THE GROUP TO HOLD A MEETING WHICH WILL FOCUS ON ECONOMIC COOPERATION BETWEEN THE GROUP AND JAPAN.

THE GROUP, WHOSE FIRST SUMMIT MEETING WAS HELD IN ACAPULCO IN MEXICO IN 1987, COMPRISES ECUADOR, CHILE, PARAGUAY, BOLIVIA, BRAZIL, URUGUAY, PERU, ARGENTINA, VENEZUELA, COLOMBIA AND MEXICO.

TOUCHING ON PACIFIC-RIM COOPERATION, JARAMILLO SAID COLOMBIA HOPES TO BE MEMBERS OF VARIOUS ASIA-PACIFIC COMMITTEES TO STRENGTHEN ITS TIES IN THAT AREA.

NAKAYAMA SAID JAPAN AND ASIAN-PACIFIC COUNTRIES WILL CONSIDER CONDITIONS FOR COLOMBIA TO BE ALLOWED ON THE COMMITTEES, ADDING JAPAN HOPES TO VITALIZE ECONOMIC RELATIONS WITH LATIN AMERICAN COUNTRIES FACING THE PACIFIC.

REFERRING TO AN INTERNATIONAL COFFEE ACCORD, NAKAYAMA AND JARAMILLO AGREED THAT JAPAN AND COLOMBIA WOULD SHARE A COMMON POLICY IN TRYING TO RESTORE QUOTAS ON EXPORTS AND IMPORTS OF COFFEE SCRAPPED LAST SEPTEMBER.

TURNING TO ILLEGAL COCAINE PRODUCTION IN COLOMBIA, NAKAYAMA PRAISED THE COLOMBIAN GOVERNMENT WHICH HE SAID WAS MAKING EVERY EFFORT TO RESOLVE THE NARCOTICS PROBLEM.

JARAMILLO REPLIED THAT THE NEW GOVERNMENT, LED BY PRESIDENT CESAR GAVIRIA, WAS CONTINUING THE POLICIES OF FORMER PRESIDENT VIRGILIO BARCO VARGAS IN ITS ATTEMPTS TO CRACKDOWN ON COCAINE PRODUCTION.

#90318m0002 11/14/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (NOV. 14) MCS -- A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"The 1990s are going to be known as a high-interest rate era - there's nothing the Federal Reserve can do about it," says MARK SKOUSEN, author of "Economics on Trial." His says if the Fed attempts to ease to artificially lower rates, "the dollar's going to crash, and it's just going to hurt our economy." (FNN "Marketwrap", 11/13)

"To really ease, the Fed has to ... provide more reserves to the banking system," says BILL WOLMAN, chief economist at "BusinessWeek" and "CNBC."

"They have done no such thing for months now and we're really in a very dangerous situation unless" they do. "The Federal reserve is afraid to let rates come down a lot. They're afraid of the dollar, they're afraid of a lot of instability in interest rates and all kinds of things like that. ... It does create an inflationary risk over the longer run, but that is a requirement now to stabilize the economy. Otherwise, I think we could really get a fairly severe downturn. ... I think the Fed will create reserves in the banking system, but they sure haven't done it so far. It's too late to prevent a recession, but it's not too late to prevent something very serious from happening." (CNBC "Market Wrap-Up", 11/13)

"I think the Fed is going to lower interest rates," says THOMAS SYNNOTT of U.S. TRUST CO. He says the decline in capacity utilization is "concrete and broad-based evidence of weakness we've seen before." ("Nightly Business Report", 11/13)

"The Fed has a lot of power if it wants to take a risk with inflation," says ROBERT EGGERT, president of BLUE CHIP ECONOMIC INDICATORS. "It can lower interest rates and stimulate the economy and housing." But such a move would bring on the risk of "some pretty severe inflation, maybe as much as double digits," says Eggert. ("Investor's Daily", 11/14)

It's almost guaranteed, economists say, that the Fed's downward pressure on short-term rates will force banks to cut their prime rates to 9.75% or 9.5% from 10% in the next few weeks. "If the banks didn't, they'd be in for some heavy jawboning from the Fed and the media," says WAYNE GANTT, an Atlanta economist. ("USA Today", 11/14)

"The tax package last week is going to do enough to this economy for the Fed to want to counteract it pretty much immediately," says TIM SCALA of SEQUOR GROUP. "The evidence really suggests that we're in a pretty good slowdown, if not a recession now." He expects a reduction in the discount rate, which has not been changed since February of 1989. (FNN "Marketwrap", 11/13)

"We don't feel it's a good time to make long-term commitments to the bond market," says WILLIAM SULLIVAN JR., director of money market research for DEAN WITTER REYNOLDS. The reason for this, he says, is "because the federal budget deficit will remain large indefinitely and the Treasury will continue to issue huge amounts of government debt in 1991 and 1992. ... I'm fearful that over time, the constant barrage of Treasury funding will push down prices on long-term bonds." Mr. Sullivan is also concerned about the effect of the weaker dollar. "If the dollar continues to lose ground it will produce an exodus of foreign investors' money from our long-term bond market." He suggests that investors "look at intermediate Treasuries that have maturities of three to seven years." ("USA Today", 11/14)

THE ECONOMY:

"My best guess on a business slump is longer rather than shorter, deeper rather than shallower and sooner rather than later," says JAMES GRANT of GRANT'S INTEREST RATE OBSERVER. He says the current downturn is a first in the post-war years: "a spontaneous, market- driven credit contraction, as opposed to those ... induced by the Fed." ("Investor's Daily", 11/14)

"What we're saying is that the fourth quarter will be as negative as the third quarter was positive," says THOMAS CARPENTER, vice president and chief economist for ASB CAPITAL MANAGEMENT. ("The Washington Post", 11/14)

"The evidence of a recession is now unambiguous," says GORDON RICHARDS, an economist for the NATIONAL ASSOCIATION OF MANUFACTURERS. (WSJ, 11/14)

Industrial production dropped 0.8% in October. "This is another bit of evidence that should tip the Fed toward easing" interest rates, says RICHARD PEACH, an economist for the MORTGAGE BANKERS ASSOCIATION OF AMERICA. "This is one more indication that the economy has slipped into a recession." ("The Washington Post", 11/14)

"The steep decline in industrial production in October demonstrates that the economy is now entering the free-fall stage," says GORDON RICHARDS of the NATIONAL ASSOCIATION OF MANUFACTURERS. "The evidence of recession is now unambiguous." (NYT, 11/14)

BILL WOLMAN, chief economist at "BusinessWeek" and "CNBC," says the 0.8% decline in industrial production "indicates very clearly that the recession was in a recession in October. There are no ifs, ands or buts about that: It was in a recession and in a very steep recession, too." (CNBC "Market Wrap-Up", 11/13)

The industrial production figures "are rotten numbers," says JAMES ANNABLE, chief economist at FIRST NATIONAL BANK OF CHICAGO. "Basically, what's happening -- and it's showing up in spades in the industrial production numbers -- is the economy's ability to generate income and keep spending going was just dealt a body blow by higher oil prices." (WSJ, 11/14)

In this productivity report, "almost everything was negative at the same time " says NORTHERN TRUST COMPANY's ROBERT DIELI. "The breadth of this decline is what some people consider a clinching" argument that we are in a recession, according to Dieli. (NYT, 11/14)

The industrial production report means "it's now crystal clear the economy is in a recession," says economist MARK VITNER of BARNETT BANKS. "There's not even a question of whether the Fed will ease." ("USA Today", 11/14)

"The manufacturing sector is certainly battening down the hatches," says STEPHEN ROACH of MORGAN STANLEY. He says the problems are "across the board." Roach believes that businesses are "ahead of the game, taking the tough

medicine sooner rather than later." (FNN "Marketwrap", 11/13)

"Everyone has been going into a precautionary stance," says EQUITABLE LIFE INSURANCE's FRANCIS SCHOTT. "Inventory has been cut [and] personnel have been cut." (FNN "Marketwrap", 11/13)

IN WASHINGTON:

The GATT talks are "a lose-lose game then for the United States and all our trading partners," says JEFFREY SCHOTT of the INSTITUTE FOR INTERNATIONAL ECONOMICS. Disagreements over agriculture subsidies are holding up agreements on other issues. (FNN "Marketwrap", 11/13)

-30- 7087

#90318p6568 11/14/1990 ~PR Newswire

NEW YORK (NOV. 14) PR NEWSWIRE - British Airways (NYSE: BAB) today announced a net profit for the second quarter ended Sept. 30, 1990, of 116 million pounds sterling ($217 million), up 9.4 percent, and for the half year of 227 million pounds ($425 million), up 35 percent.

Revenues for the quarter were 1.4 billion pounds ($2.6 billion), up 4.6 percent and for the half year 2.7 billion pounds ($5.1 billion), up 8.7 percent from the prior year.

Chairman Lord King said the results indicated that the airline had so far been able to withstand the problems currently facing the industry.

He pointed out, however, that given current trading and expenditure levels, the airline did not expect a positive contribution in the second half of the year.

Earnings per American Depositary Share (ADS) for the second quarter rose 9.5 percent to 1.61 pounds ($3.01); and for the six months up 35.2 percent to 3.15 pounds ($5.89).

The board of British Airways has approved an interim dividend of 31.7 pence (62.5 cents) per ADS, payable on Jan. 18, 1991, to shareholders of record as of Dec. 10, 1990.

Group revenue for the half year increased 8.7 percent to 2.7 billion pounds ($5.1 billion) from 2.5 billion pounds.

The operating surplus for the quarter fell 6 percent to 158 million pounds ($296 million) and for the half 3.8 percent to 281 million pounds ($525 million), as a result of foreign exchange movements, poor performance in September due to the Gulf crisis, and acquiring aircraft on operating leases which bring the financing charges above the line.

Airline operating costs in the quarter increased 7.1 percent to 1.2 billion pounds ($2.2 billion) and in the half year by 11.4 percent to 2.4 billion pounds ($4.5 billion). Staff costs rose 3.5 percent in the quarter and 7.9 percent in the half year.

Forward cover and exchange rate benefits limited the increase in fuel costs to 7.4 percent for both the quarter and the half year. Fuel prices in the second quarter, however, increased 21 percent over the same period last year. Revenue passenger miles increased 11.5 percent for the quarter and 12.3 percent for the half year.

Capital and reserves at Sept. 30, 1990, including 320 million pounds ($598 million) convertible capital bonds issued in October 1989, amounted to 1.4 billion pounds ($2.7 billion), compared with 894 million pounds a year ago, up 60.4 percent. Net debt:total capital ratio was 24.3 percent.

Lord King said that British Airways saw no reason to be deflected from its strategy of becoming a global airline and delivering a strong and consistent financial performance.

#90318p6571 11/14/1990 ~PR Newswire

CLEVELAND (NOV. 14) PR NEWSWIRE - General Electric Company (NYSE: GE) and Thorn EMI plc announced today the signing of an agreement under which the two companies will form a new U.K. lamp company. GE will also buy Thorn Lighting's principal European light source interests outside the United Kingdom.

GE will have a 51 percent interest and take management control of the new company, GE-Thorn Lamps, Ltd. The two organizations will collaborate on lamp marketing and distribution, and after three years, Thorn EMI's minority interest will transfer to GE.

Price of the transaction to GE is $138 million, payable over three years. Thorn Lighting will enter into a contract to supply distribution and sales administration services to the new company.

Under the agreement, which is subject to certain conditions, including approval by regulatory authorities, GE will acquire the Thorn Lighting lamp manufacturing facilities at Enfield (North London) and Leicester, the Thorn EMI Lamps & Components operation at Mitcham (Surrey), and Omega Lighting at New Malden (Surrey). These will form the new company. GE will also acquire Thorn's 100 percent interest in Gluhlampenfabrik Jahn in Germany, as well as

Thorn's 51 percent investment in SIVI Illuminazione in Italy.

Thorn's incandescent lamp facilities at Merthyr (Mid-Glamorgan), Preston (Lancs) and Rodney (near Wimbledon), which Thorn Lighting had been restructuring, will be retained by Thorn. Thorn Lighting will continue to own the facilities and have responsibility for employees at these plants. GE-Thorn Lamps will provide management assistance at these facilities and source lamps from Thorn Lighting for up to four years.

GE Thorn Lamps will be responsible for marketing the products from all these U.K. facilities. It will be licensed to use the Thorn brand on lamps and will own the rights to other Thorn EMI-owned trademarks -- such as the successful Mazda brand -- relating to lamps. Marketing in Europe will be carried out through GE's existing organization.

Thorn Lighting will retain its international business in light fixtures, which will be further strengthened by its association with GE's global light source operation.

Thorn's 20 percent interest in the Australian lamp manufacturer, Elma, is not included in the agreement. Thorn is in discussion with separate purchasers regarding other peripheral interests outside the U.K.

Ge has 13 major businesses, one of which is lighting. In 1989, GE had revenues of about $55 billion, including nearly $7 billion in Europe, and net earnings of nearly $4 billion. The company's strategy is to strengthen its key businesses through internal investments, acquisitions and alliances, such as today's announcement of the GE-Thorn venture.

Thorn EMI, based in the United Kingdom, is an international company with operations in 43 countries. Its principal businesses are rental and music, as well as lighting, and it also has substantial operations in security, software electronics and recorded music retailing (HMV). Thorn EMI employs about 56,000 people. Its 1989/90 turnover was in excess of $7.4 billion.

CONTACT: John J. Betchkal of GE, 216-266-8954, or home, 216-321-4143, or Hamish Bryce, Colin Woodley, or Michael Metcalf of Thorn-EMI, 071-355-4848

#90318p6573 11/14/1990 ~PR Newswire

HUMBLE, TEXAS (NOV. 14) PR NEWSWIRE - Marin Fund Inc. (OTC) ("Marin") reported gross revenues for the quarter ended Sept. 30, 1990 of $1,630,567 representing a 58 percent increase over third quarter 1989 revenues of $1,029,196. Net income for the quarter totaled $71,568 as compared to a net loss of ($92,885) in the third quarter of 1989. Revenue for the first nine months of 1990 totaled $4,197,384 as compared to $2,582,477 for the like period in 1989. The increase was primarily associated with a 99 percent

improvement in hardware/peripheral sales (from $2,032,292 to $4,045,884). Net income for the first nine months of 1990 totaled $101,363 as compared to losses of ($226,133) for the like period in 1989.

Gross profits as a percentage of revenue totaled 21 percent compared to third quarter 1989 levels of 20 percent. General and administrative expenses totaled $272,009 in the third quarter of 1990 as compared to $228,888 in 1989 as a result of increased marketing expenses. Marketing expenses during the third quarter of 1990 increased to $90,680 from third quarter 1989 levels of $62,290. A moderate increase in marketing expenses is expected in the fourth quarter of 1990, as MBSI continues to expand its advertising campaign.

Management of the company believes that third quarter sales have softened due to the outlook of a recession and the crisis in the Persian Gulf. In August, at the start of the Persian Gulf crisis, MBSI received in excess of $120,000 of cancellations for pending business. The company believes that fourth quarter revenues will suffer from the economic climate. Furthermore, Apple Computer Inc., has revamped its product line-up, discontinuing three models and introducing three replacements in October which has affected the company's operations. Historically, when Apple has made similar adjustments, the marketplace has become confused and product sales suffer temporarily. Although, management of the company had expected significant growth in the fourth quarter of 1990 over third quarter results, the crisis in the Persian Gulf, the deteriorating economy and the product line-up changes by Apple will adversely affect the rate of growth of revenues and profits. Fourth quarter 1990 results are expected to be comparable to the third quarter 1990.

Marin Fund, through its operating subsidiary, Micro Business Solutions Inc., is engaged in the sale of computer hardware, peripherals and software for the Apple Macintosh computer and specializes in system integration under the tradename "Software and Hardware That Fits."

The common stock of Marin Fund is traded in the over-the-counter market and is listed in the "Pink Sheets" published by the National Quotation Bureau.

CONTACT: Real Provencher of Marin Fund Inc., 713-540-3200 or 713-540-2300

#90318p6577 11/14/1990 ~PR Newswire

CINCINNATI (NOV. 14) PR NEWSWIRE - The Andrew Jergens Company today announced the introducton of ActiBath, the world's first carbonated bath tablet and a revolutionary advance in the bath additive category. ActiBath tablets carbonate warm bath water providing a soothing experience similar to that of the natural carbonated springs of the great European spas.

Earlier this month, Jergens launched a $15 million marketing and advertising launch campaign -- the largest in the history of the category -- to promote

ActiBath. National print and broadcast advertising, sampling programs and coupon offers will communicate the product's unique ability to infuse bath water with carbon dioxide, creating a carbonated bath like the great spas of Europe.

In clinical studies, carbonated water, in contact with the skin, has been shown to increase blood circulation in capillaries, helping to relieve fatigue tension and minor aches and pains.

ActiBath carbonates bath water up to 120 parts per million. It also helps soften and smooth the skin without any trace of oiliness or greasiness. ActiBath turns the water into a pleasant caribbean blue color and is lightly scented. It is available in three fragrances: Blue Forest, Spring Floral and Light and Fresh. The Origins Of ActiBath

ActiBath was developed in Japan by Jergens' parent company, Kao Corporation, where it was introduced to Japanese consumers in 1983 under the brand name Bub. It quickly became the country's leading bath additive product and today it accounts for one-third of all bath additive sales in Japan.

Kao researchers determined that carbon dioxide dissolved in water is easily absorbed by the skin and helps increase circulation. The increased blood flow brings more nutrients to the skin and muscles; the bather experiences relief from aches, pains, soreness and fatigue.

ActiBath carbonates bath water. When dropped into warm bath water, a single ActiBath tablet effervesces for about six to seven minutes, "charging" the bath water with carbon dioxide. When the effervescing bubbles disappear, the bath water is carbonated. ActiBath and the Bath Additive Category

The bath additive market is large and growing. In 1989, sales were $450 million and have grown at a rate of 12 percent annually since 1983, almost doubling in that time period. Despite its growth, few new products have joined the category and those new additions have tended to be line extensions of existing products or brand extensions from well-known names associated with other sectors of the larger skin care category.

ActiBath was tested in the Minneapolis/St. Paul market beginning in 1988. According to Nielsen food audits, it has become the leading bath additive product in the Twin Cities.

ActiBath has also proven that it can renew interest and excitement in the bath additive category as a whole. Nine months after its launch in Western markets (Arizona, California, Idaho, Nevada, Oregon, Utah and Washington) in June 1989 category sales were up 14 percent. A year earlier, prior to the ActiBath launch, they had been down nearly 5 percent.

ActiBath will be available wherever health and beauty aids are sold including

supermarkets, mass merchandisers and drug stores. It will be sold at an average price of $2.99 for a five tablet box and $4.99 for a 10 tablet box. To encourage trial during the launch period, single tablet will be available at special retail displays for 59 cents.

MINNEAPOLIS (NOV. 14) PR NEWSWIRE - Alliant Techsystems (NYSE: ATK) today reported a net loss of $6.6 million for the third quarter of 1990 compared with net income of $6.7 million for the same period a year ago when the company was still part of Honeywell Inc (NYSE: HON). The loss is primarily the result of transaction costs totalling $9.1 million which were related to Alliant Techsystems' spinoff from Honeywell Inc. on Sept. 28, 1990. Alliant Techsystems consists of the former Defense and Marine Systems Business, Test Instruments Division and Signal Analysis Center of Honeywell.

"Our performance was in line with our expectations as we prepared to launch the company," said Toby G. Warson, president and chief executive officer. "We incurred a number of one-time costs directly related to our spinoff from Honeywell, and now are well-positioned to begin life as an independent company."

For the first nine months of 1990, the company said net income was $7.3 million, compared with $26.0 million the previous year.

Alliant Techsystems' sales for the third quarter 1990 were $212.2 million compared with $255.3 million a year earlier. For the first nine months of 1990, sales were $77.6 million compared with $813.5 million a year ago.

Warson said lower sales for the period primarily were the result of temporary delays on several programs, which have been corrected. "We expect a significant increase in fourth quarter 1990 revenues compared to our third quarter 1990 results," said Warson.

Alliant Techsystems' operating profit for the third quarter was $9.5 million, compared with $11.5 million a year earlier. For the first nine months of 1990 operating profit was $33.2 million, compared with $42.5 million in 1989.

Alliant Techsystems supplies high-quality precision armament, ordnance, marine and information storage systems to the United States Government and its allies. In 1989, the company had revenues of $1.3 billion and net income of $42 million. With headquarters in Minnetonka, Minn., Alliant Techsystems employs 8,000 people throughout the United States.

BOSTON (NOV. 14) PR NEWSWIRE - Baybanks, Inc. (NASDAQ: BBNK) today announced BayBank Business Banker, an easy-to-use, electronic cash management system for businesses. Customers using this new system will have convenient access to timely information about their BayBank accounts directly from a personal computer.

With this new system, customers can collect, display, and print up-to-date BayBank account data, and initiate funds transfers, directly from their office PC and eliminate a call or visit to the bank. These cash management functions and others are all found in the BayBank Business Banker package available for IBM AT(R) and XT, or compatible, PCs and Hayes(R), or compatible, modems.

"Baybanks Business Banker is a strategic tool that provides business owners with quick access, through a PC, to up-to-date BayBank account information whenever they need it, seven days a week," said Joseph V. Roller, executive vice president, BayBank Boston.

"Using BayBank Business Banker, business owners, managers, and financial officers can collect, analyze, and process the banking information needed to manage and monitor their cash flow. With a few keystrokes, customers can check their BayBank account balances instantly to determine if they should invest excess funds or borrow to meet future obligations, for example," notes Roller.

BayBank Business Banker is now available. For more information about this cash management system for businesses call the BayBank Corporate Service Center at 1-800-833-3336 or 1-800-323-3101.

BayBanks, Inc. is one of the largest bank holding companies in New England with more than $10.2 billion in total assets as of Sept. 30, 1990. With more than 215 offices located across New England, BayBanks offers a complete range of commercial banking products and services to businesses.

PORTLAND, ORE. (NOV. 14) PR NEWSWIRE - International Yogurt Co. (NASDAQ: YOCM), Portland manufacturer and wholesaler of Yo Cream(R) frozen yogurt, reported revenues of $2,278,753 for the third quarter 1990, an increase of 41 percent over the third quarter of 1989. Profits for the third quarter were $75,617, or 5 cents per share.

Terry Lusetti, marketing director for the company, said that Yo Cream is now being sold in 48 states through 166 distributors. "We also continue to expand the sales of Yo Cream to food service chains," Lusetti said. "We added three notable restaurant chains this last quarter," he reported.

John Hanna, chairman of the board and chief executive officer, announced that the company recently concluded its first major shipment to Europe. "We see profitable opportunities in international trade and will be giving it more attention in the coming year," he stated.

The company also announced that it had adjusted its results for the first and second quarters of 1990. Hanna stated that "Net income for the first and second quarters was actually $27,807 (2 cents per share) and $80,423 (5 cents per share), respectively, rather than the previously reported amounts of $84,939 (5 cents per share) and $142,943 (9 cents per share). These changes were the result of adjustments in the finished goods costing of inventory."

Hanna observed, "Our sales year-to-date represent a 57 percent growth rate over the previous year. We expect significant expansion to continue."

CALGARY, ALBERTA (NOV. 14) PR NEWSWIRE - Canada Southern Petroleum Ltd. (Toronto and Pacific Stock Exchanges: CSW) today reported a net loss of $209,000 (2 cents a share) on gross revenues of $496,000 in its fiscal first quarter ended Sept. 30.

In the prior-year period, there was a loss of $174,000 (1 cent a share) on gross revenues of $529,000, the company said.

Charles J. Horne, president, said this year's loss is attributable largely to a 6 percent reduction in operating revenue as well as a 7 percent drop in interest income.

SEATTLE (NOV. 14) PR NEWSWIRE - Immunex Corp. (NASDAQ: IMNX) announced today the election of Michael L. Kranda as president and chief operating officer. Kranda was previously executive vice president of Immunex Corp. and president of Immunex Manufacturing Corp., a subsidiary. He will continue to report to Immunex Chairman Stephen A. Duzan, who remains chief executive officer.

"Michael Kranda has built a superb manufacturing and marketing organization which has moved us quickly toward our goal of becoming a fully integrated pharmaceutical company," Duzan said.

In 1989 Immunex reacquired U.S. marketing rights to several of its proprietary products. The company recently announced plans to build a $30 million, 50,000-square foot manufacturing facility for future products such as LEUKINE(TM) GM-CSF, a white blood cell growth stimulant currently being investigated for use in bone marrow transplantation and cancer therapy.

The company's board of directors also named David L. Urdal, Ph.D., president of Immunex Manufacturing Corp., replacing and reporting to Kranda. Urdal had been vice president and director of development of Immunex Research and Development Corp., a separate subsidiary.

In addition, the board elected Steven Gillis, Ph.D., chief executive officer of Immunex Research and Development Corp. He remains its president and will continue to report to Immunex Chairman Stephen Duzan. The Immunex board also elected Scott Hallquist senior vice president of Immunex Corp., continuing as general counsel, and promoted Susan Erb to vice president, facilities and materials, Immunex Corp., Helmut Sassenfeld, Ph.D., to vice president, process development, Immunex Manufacturing Corp. and Michael Mumford to vice president pilot plant operations, Immunex Manufacturing Corp.

"These changes reflect the significant contributions of these outstanding managers and will help position Immunex as one of the world's premier biopharmaceutical companies," said Duzan.

Immunex is a leading biotechnology company focused on the research, development, manufacture and marketing of immunological therapeutic products.

NEW ORLEANS (NOV. 14) PR NEWSWIRE - Brock Exploration Corp. (PSE: BKE), headquartered in New Orleans, reported net income of $247,000, or $.06 per share on revenues of $2.8 million for the quarter ended Sept. 30.

These results compare with net income of $232,000, or $.06 per share on revenues of $2.4 million for the quarter ended Sept. 30, 1989.

Net income for the six months ending Sept. 30 was $328,000, or $.08 per share on revenues of $5.7 million as compared to last year's six month income of $441,000, or $.11 per share on revenues of $4.8 million.

Long-term debt was reduced from $6.8 million at March 31 to $6.1 million at Sept. 30. Net cash provided by operating activities was $1.3 million for the period ended Sept. 30 compared to $840,000 for period ended Sept. 30, 1989. The company's overall objective remains the acquisition of producing properties with long-life reserves and to periodically engage in drilling activities which could have a meaningful effect on the company's reserves.

#90318p6602 11/14/1990 ~PR Newswire

KANSAS CITY, MO (NOV. 14) PR NEWSWIRE - Applebee's International, Inc., (NASDAQ: APPB) today reported earnings of $457,000, or 10 cents per share, for

its third quarter ended Sept. 30, 1990. This compares with earnings of $192,000, or 6 cents per share, for the same period in 1989. Company restaurant sales and franchise income totaled $10,054,000 for the quarter, an increase of 30 percent over $7,759,000 in last year's third quarter.

Applebee's system sales were $60.7 million in the third quarter, an increase of 58 percent from $38.4 million in the comparable period in 1989. This significant increase was primarily attributable to the larger number of restaurants open during this year's third quarter. However, comparable restaurant sales figures also increased during the quarter to $31.1 million, up 2.6 percent from $30.3 million in last year's third quarter. (Comparable restaurant sales figures compare sales for units in operation during the full third quarter of 1990 to the same units open in 1989.)

The company also announced that Applebee's co-founder and chairman, John Hamra will become chairman emeritus effective Jan. 1, 1991. Abe Gustin, president, continues to run the operations of the company. Hamra will remain active on the board of directors and on board committees.

As of the date of this release, there are 152 Applebee's restaurants open in 26 states. Of these, 127 are owned and operated by franchisees and 25 by the company. Applebee's has met all of the requirements for state regulatory approval for franchising in all 50 states and currently has 12 new restaurants under construction and 21 sites approved. The company pointed out that, while site approvals do not always result in new restaurant openings, the number of sites approved is a good indicator of new restaurant potential.

Abe J. Gustin, Jr., president, said that the company's strategy to franchise its neighborhood restaurant concept throughout the country is right on target. "We were very pleased with our franchisees' enthusiasm at our convention earlier this month, and we expect to continue approving a significant number of new franchisees and restaurant sites.

"We are well aware that financing with the kind of terms we prefer may be more difficult for some of our franchisees to obtain during the next year. However many of our franchisees already have financing in place and we are aggressively working to obtain favorable financing packages for our whole system.

"With the very rapid expansion of Applebee's, it should not be surprising that we have some locations that are not performing as well as we would expect. During the third quarter we took over operation of several franchised restaurants in one market which we strongly believe can be turned around."

Applebee's International, Inc., headquartered in Kansas City, Mo., develops, franchises and operates a rapidly expanding national chain of restaurants under the trademark Applebee's Neighborhood Grill and Bar.

#90318p6604 11/14/1990 ~PR Newswire

GLENDALE, CALIF. (NOV. 14) PR NEWSWIRE - Mail Boxes Coast to Coast Inc. (NASDAQ: MBCC) reported today total revenues of $592,652 resulting in net income of $81,199 or earnings of $0.01 per share for the nine month period ending Sept. 30, 1990, compared to total revenues of $397,181 resulting in a net loss of ($517,420) or a loss of ($0.08) per share for the nine month period ending Sept. 30, 1989. The company also reported total revenues of $214,677 resulting in net income of $17,767 or earnings of $0.003 per share for the three month period ending Sept. 30, 1990 compared to total revenues of $215,291 resulting in a net loss of ($92,177) or a loss of ($0.01) per share for the period ending Sept. 30, 1989.

The net income was primarily attributable to the sale of the company's Long Island, N.Y. franchise as previously reported at June 30, 1990 and the sale of the Brooklyn, Staten Island area, with a combined gain of $346,078, plus increased revenues and a substantial reduction in the company's expenses. The combined sale price of these areas sold to Mail Boxes Etc. (MBE) was $565,651.

The company further announced that royalties increased $77,427 or 59 percent for the nine months ended Sept. 30, 1990 and $33,504 or 67 percent for the three months ended Sept. 30, 1990 as compared to the three months ended Sept. 30, 1989. The increases reflect the opening of new service centers and the maturing of established service centers in operation. The company sold 17 franchise centers for the period ended Sept. 30, 1990 as compared to 11 at Sept. 30, 1989.

Gary M. Williams, president of MBCC said, "In completing the next phase of an overall reorganization plan, this will ease the company's liquidity position and continue the company's direction of concentrating its resources in its two most productive areas, Los Angeles, Calif., and Manhattan, N.Y."

Williams went on to further explain "that of the 106 MBE Franchise Centers that were in the company's exclusive territories prior to the sale of Long Island, Brooklyn and Staten Island areas, 91 percent or 96 MBE Franchises will be retained within the company's exclusive territories of Los Angeles, Calif., and Manhattan, N.Y., which is where the company's direction and long term growth will be."

#90318p6606 11/14/1990 ~PR Newswire

NEWTON, MASS. (NOV. 14) PR NEWSWIRE - University Bank, National Association (AMEX: UBN) today announced its results for the third quarter ended Sept. 30, 1990.

The bank sustained a net loss in the third quarter of 1990 of $2,132,000 or 32 cents per share compared to net income of $175,000 or 3 cents per share in the third quarter of 1989. For the nine months ended Sept. 30, 1990, the bank sustained a net loss of $15,876,000 or $2.37 per share compared to a net loss of $197,000 or 3 cents per share in the first nine months of 1989.

Included in the third quarter 1990 loss were losses on the equity security portfolio of $781,000 and a provision for loan losses and losses on other real estate owned of $1,165,000. The bank's equity security portfolio has been reduced to $634,000 at Sept. 30, 1990.

At Sept. 30, 1990, primary capital was $13.8 million. In the first nine months of 1990, the bank's total assets have been reduced by $43 million to $368 million. The bank is continuing its discussions to sell certain assets, which, if finalized, would result in approximately a 10 percent increase in its primary capital.

University Bank, N.A. is a commercial bank founded in 1927. Headquartered in Newton, Mass., the bank operates from branch locations primarily in Middlesex County and specializes in real estate lending. In addition, one of the bank's subsidiaries operates mortgage banking offices from locations in Massachusetts.

NEW YORK (NOV. 14) PR NEWSWIRE - Forstmann & Company, Inc., today announced that it has extended until 5:00 p.m., New York City time, on Friday, Nov. 16, 1990, the expiration date of its consent solicitation of holders of its 14-3/4 percent senior subordinated notes due April 15, 1999.

The company does not plan to further extend the consent solicitation. The company is in the process of preparing a petition for bankruptcy and, if the company does not receive the consent of holders of 95 percent of the

outstanding principal amount of the notes by the expiration on 5:00 p.m. Friday, and as a result does not consummate the consent solicitation, the company intends to seek protection and reorganize under Chapter 11 of the Bankruptcy Code.

The company will deliver a supplement to the Consent Solicitation Statement to holders of notes later today.

As of Nov. 13, 1990, holders of approximately $73,000,000 in outstanding principal amount of 14-3/4 percent senior subordinated notes have furnished consents to the proposed amendments to the notes which have not been withdrawn and holders of an additional $7,750,000 principal amount have indicated they intend to furnish consents upon the extension of the consent solicitation.

#90318p6608 11/14/1990 ~PR Newswire

EAST AURORA, NY (NOV. 14) PR NEWSWIRE - G. Wayne Hawk, president and CEO of Acme Electric Corporation (NYSE: ACE) of East Aurora, announced today that the company has completed a corporate-wide overhead reduction designed to improve the profitability of the corporation. Acme previously reported a loss of 4 cents per share in its first quarter, which ended Sept. 28, 1990. Increased pricing pressure on standard products and a delivery stretch-out on a major custom power supply program were primarily responsible for this loss, according to Hawk.

Hawk stated that electronic and transformer sales for the remainder of the current fiscal year appear to be holding well, and that there has recently been considerable strengthening of sales at Acme URDC, the company's aerospace subsidiary. He further reported that Acme Advanced Energy Systems division will begin volume production of the new fiber nickel cadmium batteries in December of this year. Hawk further stated that the company expects to return to profitability in the second quarter, which ends Dec. 31, 1990, although profitability will be negatively impacted by separation pay resulting from the overhead layoff. He further stated that profitability should improve significantly in the third and fourth quarters of this fiscal year due to the impact of FNC battery sales, sales of the new standby power supply line and realization of the overhead cost savings accruing from the recent cost-reduction program.

#90318p6609 11/14/1990 ~PR Newswire

SAN DIEGO (NOV. 14) PR NEWSWIRE - Great American Bank, a Federal Savings Bank (NYSE: GTA) today reported a net loss of $34.0 million or $1.42 per share fully diluted for the quarter ended Sept. 30, 1990, compared with a net loss of $65.6 million, or $2.74 per share fully diluted, for the quarter ended Sept. 30, 1989. The net loss for the nine months ended Sept. 30, 1990 was $143.1 million or $5.96 per share on a fully diluted basis, compared with a net loss of $64.5 million or $2.70 per share on a fully diluted basis for the nine months ended Sept. 30, 1989.

At Sept. 30, 1990, stockholders' equity was $231.8 million or 1.54 percent of Great American's total assets of $15.0 billion. This compared to stockholders' equity at June 30, 1990 of $265.7 million or 1.73 percent of total assets of $15.4 billion, and at Dec. 31, 1989 of $373.5 million or 2.35 percent of $15.9 billion in assets. The decrease in assets was due to a net decrease in loans, mortgage-backed securities and investments primarily due to deposit outflows experienced during the first half of 1990.

For the quarter ended Sept. 30, 1990, Great American recorded provisions for loan and foreclosed real estate losses totalling $33.1 million. In addition to these provisions, the bank's real estate development subsidiary recorded an $11.5 million loss provision in recognition of an estimated loss on the potential sale of its portfolio of commercial properties. These provisions reflect, in part, changing market conditions in California and other real estate markets in which Great American operates.

Great American, established in 1885, is a regional savings bank which at Sept. 30, 1990 had 211 retail branches and 16 loan offices located in the western states. At Sept. 30, 1990, Great American was the nation's ninth largest savings institution, based on consolidated assets of $15.0 billion.

BERKELEY HEIGHTS, NJ (NOV. 14) PR NEWSWIRE - In support of International Paper's (NYSE: IP) Folding Carton Division automation program, AT&T's (NYSE: T) Manufacturing Systems unit has been chosen to provide a shop-floor management system at that division's factories.

The system will include AT&T's UNIX Shop Floor Management System software, AT&T computers, AT&T fiber-backbone local area networks, and Allen Bradley cell-control products.

Manufacturing Systems is a unit of AT&T Network Systems Group. The system's open architecture will enable AT&T to integrate it easily with IP's existing information systems.

Tom Geers, AT&T Bell Laboratories' project manager, noted that the system's flexibility is due to its adherence to industry standard networks, SQL and the UNIX operating system, which is steadily gaining as a defacto industry standard for manufacturing.

An integrated mix of AT&T computers and software with some third party elements, the Shop Floor Management System collects, tracks, and manages every aspect of factory operations, including machines, operators, products, quality inventory and scrap. The system generates reports at any level desired by the user. It can be tailored in both content and format to suit the varied needs and desires of its users.

Except for size, the architecture of the Shop Floor System will be the same for all of the IP factories. Data will move over AT&T's STARLAN fiber backbone network. AT&T 6386 WGS computers will serve as host machines to other AT&T computers, terminals and printers, as well as equipment provided by Allen Bradley and other vendors.

#90318p6616 11/14/1990 ~PR Newswire

SAN FRANCISCO (NOV. 14) PR NEWSWIRE - San Francisco-based PLM International Inc. (AMEX: PLM) today reported the results of its operations for the quarter and nine months ended Sept. 30, 1990.

For the three months ended Sept. 30, 1990, consolidated revenues were $20.3 million, compared to $24.7 million for the same quarter in 1989. Net income available for common shares and earnings per share were $2 million and 20 cents respectively for the quarter, compared to $3.2 million and 32 cents in 1989.

For the nine-month period, PLM International reported revenues of $63.6 million, compared to $70.8 million in 1989. Net income available for common shares and earnings per share were $8.8 million and 87 cents respectively for the nine months ended Sept. 30, 1990, compared to $9.4 million and 93 cents in 1989.

President and Chief Executive Officer of PLM International, Robert N. Tidball, said, "Third quarter results were unfavorably impacted by lower equipment placements caused by the delay in releasing PLM Equipment Growth Fund V escrowed funds. These funds were released at the beginning of the fourth quarter for equipment acquisitions. The released funds and the continued strength of PLM Equipment Growth Fund V equity sales will contribute to fourth quarter results."

The following table sets forth a summary of certain operating statistics for the three and nine months ended Sept. 30, 1990 and 1989:

PLM International is an equipment leasing company engaged in the leasing and management of transportation equipment and in operating leases domestically and internationally, as well as the syndication of capital equipment leasing investments. The company operates and manages over $1.3 billion of transportation equipment and related assets for its account and various investment partnerships and third party accounts.

CONESVILLE, OH (NOV. 14) PR NEWSWIRE - American Electric Power's (NYSE: AEP) award-winning wetlands project was recently dedicated as the first Urban Wildlife Sanctuary in Ohio. The site received an Environmental Achievement Award from Renew America earlier this year.

The man-made wetland enhances the area ecosystem as a form of reclamation and provides a natural treatment for water flowing through the former Simco No. 4 underground mine site.

Researchers at The Pennsylvania State University have been studying the site

since its creation in 1986 and have documented the wetlands' success in reducing the iron content of the water to acceptable levels.

Representatives from AEP's fuel supply department, Columbus Southern Power, Conesville Coal Preparation Company, Penn State and the Ohio Department of Natural Resources' Division of Reclamation met at the site to formally place the sign designating the area as a sanctuary. Columbus Southern and the Conesville Coal Preparation Company, subsidiaries of AEP, own and manage the property on which the wetlands are located.

The certification was received from the National Institute for Urban Wildlife upon meeting wildlife habitat and management criteria established by the institute.

The main criteria are the four basic needs of wildlife -- food, water, living space and cover, says Gomer E. Jones, president for the institute.

Since the institute began certifying projects in 1987, hundreds of applications have been received for consideration, Jones says. Besides being the first certified site in Ohio, the Simco wetlands is one of only 69 sites which have met the criteria and have received approval by the institute's review committee, he adds.

Researchers at several universities have discovered that cattails and several other species of plants survive -- and even thrive -- in areas that are considered unfit for most plant life. In fact, these particular plants seem to seek out areas with high concentrations of iron -- one of the main ingredients in acid mine drainage.

At a time when the nation's wetlands are being destroyed, the research program under way at the Simco No. 4 wetland will give the industry greater knowledge with which to develop wetlands in the future.

#90318p6621 11/14/1990 ~PR Newswire

ST. PETERSBURG, FLA. (NOV. 14) PR NEWSWIRE - Medcross, Inc. (NASDAQ: MDCR) today reported profitable operations for the second consecutive quarter. The company reported net income of $3,224 for the third quarter ended Sept. 30, 1990, following the second quarter's net income of $14,393. The 1990 third quarter's results compare with a net loss of $134,386 for the third quarter a year ago.

Robert M. Irvin, Medcross president, said that while net operating revenues for the 1990 third quarter of $856,009 were down 19 percent compared to $1,057,906 in 1989, operating profits increased from $8,000 for the 1989 third

quarter to $156,996 for the comparable 1990 period. He said the decline in revenues was due mainly to the sale on June 29, 1990, of a computerized tomography (CT) unit. Irvin added that the company had an unrealized loss of $59,430 because of a decline in the market price of securities bought during the quarter.

For the nine months ended Sept. 30, 1990, Medcross reported a net loss of $10,286 compared to a net loss of $211,859 for the 1989 nine-month period. Net operating revenues for the 1990 and 1989 nine-month periods were $2,747,730 and $3,271,135 respectively.

Medcross announced last month that it will discontinue the operation of its gallstone lithotripter at the end of this year. Irvin said Medcross is taking steps to replace the revenues from the CT and gallstone units, and is marketing a limited partnership for operating a mobile magnetic resonance imaging unit. He said the limited partnership offering is expected to close by the end of November, 1990, and will begin operations "shortly thereafter."

Medcross provides management services to health-care ventures and consulting services to hospitals, clinics, and health-care professionals. The businesses that Medcross owns and/or operates include mobile and fixed-base computerized tomography, mobile and fixed-base kidney lithotripsy, mobile gallstone lithotripsy and mobile ultrasound services.

SMITHTOWN, NY (NOV. 14) PR NEWSWIRE - Quantronix Corporation (NASDAQ: QUAN) of Smithtown today reported the results for the quarter ended Sept. 30, 1990.

Revenues for this second fiscal 1991 quarter were $8,181,000, off 2.9 percent from the corresponding quarter in the prior year. Net earnings were $357,000, down 23.9 percent from second quarter in fiscal 1990. The year-earlier period had included an unusual revenue item of approximately $500,000, related to the medical business segment.

Compared to the first fiscal 1991 quarter, revenues were down by 7.3 percent, but earnings improved 25.7 percent due to reduced operating expenses.

Commenting on the results, Donald Mitchell, president and chief executive officer of Quantronix, said, "We were pleased to see sustained, and slightly improved, earnings as we move further into fiscal 1991. Like many other capital equipment manufacturers, we are seeing some definite tightening in our markets. We are continuing to position our operations to respond quickly to the current uncertain economic climate."

PROVIDENCE, RI (NOV. 14) PR NEWSWIRE - Nestor, Inc. (NASDAQ: NEST) today announced operating results for the first quarter of fiscal year 1991, ended September 30. Revenues increased 50 percent and the operating loss was reduced by 37 percent when compared to the comparable period last year.

Dr. David Fox, president and chief executive officer of Nestor, stated, "The improvement in revenues reflected substantial progress on the DARPA contract under which we are developing, along with Intel, a neural net chip capable of functioning as a true parallel processor, combining revolutionary speed with 'learning intelligence.' A second factor in revenue improvement was our license agreement, signed in April, with the leading Japanese software firm, CSK Corporation.

"In addition to the increase in revenues, we experienced a reduction in expenses as a direct consequence of the cost-cutting efforts we initiated last Spring."

All Nestor products are based on adaptive information-processing systems that "learn" from experience. The company's products are taught to recognize complex configurations of data, and to classify input patterns.

CINCINNATI (NOV. 14) PR NEWSWIRE - The Procter & Gamble Company (NYSE: PG) today announced that its Leveraged Employee Stock Ownership Plan (LESOP), which was established in 1989, will borrow up to an additional $1.0 billion to provide partial funding for future retiree medical benefits.

The LESOP trust will borrow up to $1.0 billion for a period of 30 years, with the loan being guaranteed by The Procter & Gamble Company. The proceeds of the loan will be used to purchase a new issue of convertible preferred stock from the company. The price, terms, and conditions of the preferred stock will be determined at a later date.

In a related matter, the board of directors has authorized the company to use the proceeds from the issuance of the convertible preferred stock to repurchase shares of its common stock to offset the dilution effect of the newly issued convertible preferred stock. The company intends to repurchase this common stock from time to time at prices and terms it deems desirable.

PARAMUS, NJ (NOV. 14) PR NEWSWIRE - Toys "R" Us, Inc. (NYSE: TOY), today announced its third quarter and first nine months results.

For the quarter ended Oct. 28, 1990, the company reported that its sales increased 14.9 percent to $1,052.6 million compared to $916.2 million for the third quarter last year. Net earnings in the third quarter were $28.7 million or $.10 per share for this and last year.

For the first nine months of fiscal 1990, sales increased 20.4 percent to $2.961 billion compared to $2.459 billion for the same period last year. Net earnings in the first nine months were $88.4 million or $.30 per share, compared to net earnings in last year's first nine months of $79.3 million or $.27 per share.

All per share figures have been adjusted to reflect the three-for- two stock split effected on June 29, 1990.

Charles Lazarus, chairman of the board and chief executive officer, said, "The retailing environment became more difficult in the third quarter and our United States toy stores and Kids "R" Us stores experienced smaller sales increases than in the first half of the year."

Lazarus further stated, "Our plans for next year call for 80-85 new toy stores in the United States and internationally, including our first stores in Japan and Spain. We also expect to open 25-30 additional Kids 'R' Us stores."

Toys "R" Us is the world's largest toy specialty retailing chain and by the end of 1990 will be operating 451 toy stores in the United States, 98 international toy stores and 164 Kids "R" Us children's clothing stores.

MURFREESBORO, TENN. (NOV. 14) PR NEWSWIRE - Pricor Incorporated (NASDAQ: PRCO) today announced operating results for the second quarter and first half of fiscal 1991.

Pricor Chairman Hubert L. McCullough made the announcement saying, second quarter revenues were $6,017,255, an increase of 24 percent from revenues of

$4,840,052 reported in the second quarter of fiscal 1990. During the second quarter of fiscal 1991, the Company's operating contribution totaled $588,516, compared with a contribution of $980,400 reported during the same three month period a year earlier.

The net loss for the quarter was $618,647, or $.10 per share, as compared to a net loss of $209,310, or $.04 per share, reported in the second quarter of fiscal 1990.

Revenues for the six month period ended September 30, 1990, were $12,136,238, up 28 percent from the $9,490,039 reported in the same period last year. During the first six months of fiscal 1991, the Company's operating contribution totaled $1,663,374, compared with a contribution of $2,098,165 reported during the comparable period in fiscal 1990.

The net loss during the first six months of fiscal 1991 was $760,909, or $.12 per share, as compared to a net loss of $69,477, or $.01 per share, in the corresponding period a year earlier.

Pricor Incorporated is the nation's leading for-profit private provider of special educational and treatment services for youth. The company is also one of the oldest and largest private adult correctional services companies. Pricor has contracts in Alabama, California, Tennessee, Texas and Virginia.

The common stock of Pricor Incorporated is traded under NASDAQ symbol PRCO.

#90318p6634 11/14/1990 ~PR Newswire

LAWRENCE, MASS. (NOV. 14) PR NEWSWIRE - First Essex Bancorp, Inc. (NASDAQ: FESX) announced today a net loss for the fiscal quarter ended Sept. 30, 1990 of $11.1 million (or $1.85 per share) compared to net income of $1.0 million (or 16 cents per share) for the same period in 1989. Net interest income before the provision for possible loan losses totaled $4.2 million for the quarter, compared to $4.2 million for the same period in 1989. The net loss resulted primarily from a higher provision for possible loan losses, $10.3 million compared to $3.4 million for the same period in 1989, as well as from $3.0 million of expenses associated with the management of other real estate owned including the write down of carrying values in certain cases and $434,000 of expenses associated with the termination of the proposed merger with Andover Bancorp, Inc. Additionally, goodwill in the amount of $2.5 million which resulted from the 1989 acquisition of First Essex Savings Bank of New Hampshire (formerly Fortune Guaranty Savings Bank) was written off.

The net loss for the nine months ended Sept. 30, 1990 was $12.7 million compared to net income of $3.7 million for the same period in 1989.

At Sept. 30, 1990, non-accruing loans were $21.0 million compared to $23.7 million at June 30, 1990 and the allowance for possible loan losses was $10.9 million (or 51.9 percent of non-accruing loans) compared to $7.7 million (or 33.6 percent of non-accruing loans) at June 30, 1990. Other real estate owned at Sept. 30, 1990 totaled $21.3 million compared to $16.9 million at June 30, 1990.

Leonard A. Wilson, president and chief executive officer stated: "We continue to monitor the quality of the bank's assets, an ongoing exercise that is extremely important in light of continued deterioration of the region's economy. Based on what we have experienced and what we know today regarding the real estate environment, we believe it is prudent that we continue to add to our reserve levels. After recognizing the resulting net loss, First Essex's capital to assets ratio remains strong at 13.3 percent."

First Essex Bancorp, Inc. is the holding company of First Essex Savings Bank, Lawrence, Mass., and First Essex Bancorp of New Hampshire, Inc. and its subsidiary, First Essex Savings Bank of New Hampshire, Windham, N.H. First Essex Bancorp subsidiaries now have 10 bank offices in northern Massachusetts and two offices in southern New Hampshire. The company had total assets at Sept. 30, 1990 of $576 million.

TALLAHASSEE, FLA. (NOV. 14) PR NEWSWIRE - CMS/DATA Corporation (NASDAQ: LAWR) today reported revenues and earnings for the three month period ended Sept. 30 1990.

First quarter revenues were $3,523,700, compared to $3,584,300 for the same period of the prior fiscal year, a decrease of 1.7 percent. Earnings before income taxes increased $66,100 or 13.9 percent to $541,700 for the three months ended Sept. 30, 1990 compared to $475,600 for the same period of the prior fiscal year. Net income after tax decreased 22.1 percent to $345,700 for the three month period ended Sept. 30, 1990 compared to $475,600 for the same period of the prior fiscal year. The decline in net income after tax is attributed to the company's use of all of its net operating loss carryforward during the fiscal year ended June 30, 1990. Earnings per share for the three month period were 11 cents on 3,212,100 weighted average shares outstanding,

compared to 25 cents on 1,800,000 weighted average shares outstanding for the same period of the prior fiscal year.

The general trend towards lower hardware prices throughout the computer industry resulted in a decrease in revenues derived from system sales in the three months of fiscal year 1991 compared to the same period of fiscal year 1990. The decrease in system sales revenues was offset by the increase in miscellaneous sales, services and software support agreements. The company's gross margin increased by 10.8 percent as a result of sales of items such as PC DOCS(R) and application software and higher revenues from services in the three month period ended Sept. 30, 1990 compared to the three month period ended Sept. 30, 1989. The company is extremely pleased with the response it has received from its new network-based document management product, PC DOCS(R). The company intends to continue its investment in research and development, sales and marketing, as well as to explore possible joint ventures or acquisitions of companies engaged in the development of software products and other computer-related businesses.

CMS/DATA Corporation designs, markets, installs, supports and integrates systems for the legal profession. Recently, the company signed a reseller agreement with IBM(R) and now will be selling IBM's RS/6000 systems in addition to Data General systems. The company has also developed, and is actively marketing, PC DOCS(R) for WordPerfect(R) and Novell(R) Users. PC DOCS(R) is distributed through computer software resellers across the United States and Canada and is targeted at businesses, governmental agencies and educational institutions, as well as the legal market.

#90318p6640 11/14/1990 ~PR Newswire

CALABASAS, CALIF. (NOV. 14) PR NEWSWIRE - Players International, Inc. (NASDAQ: PLAY) today reported operating results for the second quarter and first six months of fiscal 1991, ended Sept. 30, 1990.

Revenues for the first six months increased 12 percent to $8,814,900 from the $7,853,900 reported in the first half of fiscal 1990. First half income from operations was $718,200 compared with income from operations of $1,065,000, reported in last year's first half which was before proceeds from a contract settlement. Net income for the period was $431,000, or $0.06 per share, compared to last year's net income of $3,299,000, or $0.42 per share, which included a pre-tax gain of $3,500,000 from a contract settlement.

For the second quarter, the company reported revenues of $4,510,000 an 11 percent increase over the $4,067,500 reported for the comparable period of the prior year. Net income for the quarter was $127,600, or $0.02 per share, compared with last year's second quarter net income of $423,500, or $0.05 per share.

Earnings for the second quarter were impacted by costs relating to the launching of Players 900 number telephone games, further development of the wholesale travel business, initial research into Riverboat gaming, and gaining new Players Club members. During the second quarter there was also a decrease in the number of gaming tournaments.

In addition to its 900 number Phone Jeopardy! game, the company just launched its Phone Wheel of Fortune game. In the fourth quarter of fiscal 1991 the company anticipates realizing the benefits of these games.

David Fishman, Players' vice chairman, said "Although recent operating results were affected by costs associated with the growth of our various business segments, we believe that we are well positioned for future growth opportunities. Our strategy is to develop a 900 game show network that will enable Players International to gain a dominant position in this market segment. Going forward, we expect to benefit from economies of scale as we

develop new games, based on popular television programs and board games, to the network."

Players International specializes in the marketing of numerous services and products to the gaming and entertainment industries. Players Club is a membership club with approximately 100,000 members, designed to deliver discounts and other benefits to recreational gamers; International Gaming Promotions markets gaming tournaments and special events; Players World Travel is a full-service travel agency; the company markets electronic cash advance systems; through a 50 percent owned affiliate, operates cruise ship casinos; and recently entered the 900 number call-in game industry with Phone Jeopardy! and Phone Wheel of Fortune as the first in a full network of games.

FORT WORTH, TX (NOV. 14) PR NEWSWIRE - The board of directors of TNP Enterprises, Inc. (NYSE:TNP) announced today quarterly dividends of $0.4075 per share of common stock.

Quarterly dividends will be paid on Dec. 15, 1990, to shareholders of record on Nov. 30, 1990. This will be the 220th consecutive dividend paid by TNPE or its predecessor companies.

TNP Enterprises (TNPE) is the Fort Worth-based holding company of Texas-New

Mexico Power Company, an electric utility.

Earlier this month, TNPE announced a 7.5 percent increase in revenues for the quarter ended Sept. 30, 1990, compared to the quarter ended Sept. 30, 1989. Revenues were $116,825,463 for the three-month period, compared to $108,687,955 for the same three-month period the previous year.

SECAUCUS, NJ (NOV. 14) PR NEWSWIRE - Vikonics Inc. (NASDAQ: VKSI), headquartered here, today reported a net loss of $59,000, or $.02 loss per share, on sales of $902,000 for the second quarter ended Sept. 30, 1990. This compares with net income of $94,000, or $.04 per share, on sales of $1,504,000 in the comparable year-ago quarter.

For the six months ended Sept. 30, 1990, the company reported a net loss of $156,000, or $.07 loss per share, on sales of $1,728,000, as compared with net income of $252,000, or $.12 per share, on sales of $3,213,000 in the corresponding prior year period.

Operating costs and expenses before interest were $512,000 and $988,000 for the three and six months ended Sept. 30, 1990, respectively. These amounts represent decreases of 18.9 percent and 25.6 percent, respectively, over the prior year's corresponding periods.

Vikonics' President John Kaufman said the company's decrease in sales and earnings compared to last year resulted from the lack of major contract awards to the company and longer than usual delays in the awarding of several major government contracts. "We had expected to hear results relating to a number of bids on multi-million dollar defense projects, but this has been a year of excessive delays in the finalizing of awards on those projects.

"However," added the Vikonics chief, "we remain hopeful that one to several of these projects will be awarded before the end of the fiscal year."

Vikonics, together with its corporate partner, Teledyne Brown Engineering, currently is bidding on several government and defense security projects.

Vikonics designs, manufactures, markets, installs and supports a line of sophisticated, computer-based security systems. The company markets its systems to defense contractors and government agencies as well as general commercial customers.

#90318p6646 11/14/1990 ~PR Newswire

AZUSA, CA (NOV. 14) PR NEWSWIRE - Optical Radiation Corp. (NASDAQ: ORCO) today reported continued increases in sales and income for the first fiscal quarter ended Oct. 27, 1990.

Net income for the quarter rose to $2,937,000 equal to $.44 per share, from $2,727,000, or $.42 per share, last year. Sales advanced 19 percent to $34,990,000 from $29,505,000 for the first quarter last year.

Richard D. Wood, president and chief executive officer, attributed the positive first quarter performance primarily to strong improvements in the consumer optical and ophthalmic surgical products groups, with the scientific/industrial products group posting lower results over the prior year period. Wood said that net income for the first quarter of the current fiscal year was restrained by a reserve amounting to more than $300,000 or approximately $.03 per share, for potential payments related to the outcome of an appeal on a patent litigation matter.

Wood noted that during the quarter, Optical Radiation received approval from the U.S. Food and Drug Administration to begin the second phase of clinical studies on a new IOL material that is inserted into the eye in a deformed state through a small surgical incision. He said early clinical results have been excellent for this "memory" lens, which is expected to set new standards for IOL implant materials.

"Despite the general economic environment, business conditions for our core products thus far appear to be continuing their favorable trends," said Wood. "While market conditions can change rapidly, at this time we look forward to sustaining positive growth momentum in the immediate months ahead."

Optical Radiation Corp. designs and manufactures a wide variety of precision optical components and systems for medical, industrial, and scientific applications.

#90318p6647 11/14/1990 ~PR Newswire

DEERFIELD BEACH, FLA. (NOV. 14) PR NEWSWIRE - Devcon International Corp. (NASDAQ: DEVC) today reported higher third-quarter and nine-months earnings, attributing the increase to strong results from the Caribbean and an $883,000 after-tax gain on the sale of a parcel of Florida real estate.

For the third quarter ended Sept. 30, 1990, net income increased 28 percent to $4,165,000 from $3,244,000 a year ago. Earnings per share were 93 cents on a higher number of weighted average shares outstanding compared with 78 cents last year. Revenues were $27.2 million vs. $18.6 million.

For the nine months, net income amounted to $10,221,000 compared with $9,365,000 earned a year ago. Earnings per share of $2.28, vs. $2.24 last year, also reflect the higher number of shares. Revenues totaled $68.2 million, up from $59.0 million.

Devcon Chairman and President Donald L. Smith Jr., said, "Again this quarter, increased profits from our operations in the Virgin Islands and the Netherlands Antilles offset declining results from our Florida construction activity."

He stated that the real estate sale, which generated $4.1 million in cash, not only helped push net earnings ahead of year-ago levels, but also "further strengthened our balance sheet."

Smith said that, despite the soft construction market in the United States, Devcon's Florida construction business has been positively impacted by the award of more than $20 million in new contracts including $13 million in contracts from Walt Disney World. He added, "We are also encouraged by the current level of bidding and negotiations for future contracts in both Florida and the Caribbean."

Devcon operates ready-mix concrete, aggregate, concrete block and bulk cement facilities; dredges harbors; builds golf courses and performs other heavy construction work in the Caribbean. Principal operations are on St. Thomas and St. Croix in the U.S. Virgin Islands, on the independent island nations of Antigua and Dominica, on St. Maarten, Netherlands Antilles, and on Tortola, British Virgin Islands. In Florida, where the company is headquartered, Devcon constructs golf courses and prepares sites for shopping malls, residential developments and industrial parks.

#90318p6649 11/14/1990 ~PR Newswire

JACKSON, MI (NOV. 14) PR NEWSWIRE - Consumers Power Company is inviting its largest industrial customers to participate in an "energy conservation Olympics" which could result in an incentive payment of up to $400,000 for major energy-reduction projects. The program is the largest of its kind in Michigan and is the first such program offered by Consumers Power, the largest utility in the state.

Letters announcing the program and inviting participation were sent recently to the utility's 481 largest industrial customers.

In this first solicitation, industrial companies have until Dec. 31, 1990 to submit energy conservation project descriptions to Consumers Power. Incentive payments will be considered for projects capable of saving a minimum of 20 percent in annual and peak electric consumption, 20 percent of total annual consumption of direct natural gas sales, or 30 percent of electric and/or gas consumption for a project designed for a particular industrial process.

Consumers Power's funding for energy conservation projects is limited to no more than half the installed cost of the project, or the amount necessary to reduce the project's payback period to two years, whichever is less. The utility's funding per project will not exceed $400,000. Funding for the buy-back program results from a surcharge which was implemented earlier this year on industrial customers' gas and electric bills.

The buy-back program is part of a comprehensive $24 million energy conservation project being offered by Consumers Power to residential, commercial and industrial customers.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

#90318p6655 11/14/1990 ~PR Newswire

NEW YORK (NOV. 14) PR NEWSWIRE - More than 300 Avon representatives began calling on customers in Guangzhou, China, today.

Avon is the first company -- domestic or foreign -- permitted to sell directly to consumers. The products are manufactured locally in a new cosmetics plant in Guangzhou, formerly known as Canton.

Avon Cosmetics Guangzhou is a joint venture of Avon Products Inc. (NYSE: AVP) and the Guangzhou Cosmetics Factory. Avon Products owns 60 percent of the joint venture.

While the Chinese cosmetics market is still relatively small, the company believes China will inevitably be Avon's largest market.

Although Avon has rights to sell throughout China, the joint venture will initially confine its sales to Guangdong Province. There are some 60 million people in the province, which Preston points out makes it larger than most of the 100 countries served by Avon.

Avon recognizes that Chinese consumers have limited discretionary income and has priced its products between imported cosmetics and those produced locally. The average product sells for about $3.

There are 80 products in Avon's line, which will grow as consumer purchasing power grows.

Economic growth in Asia Pacific is projected to continue growing at twice the rate of other economic blocs. Preston said that within ten years, the aggregate GNP of Asia-Pacific is expected to surpass the GNPs of North America and Europe.

The company's sales in the Pacific Region have grown by 60 percent and its pretax contributions by 70 percent in the last four years.

The company operates in nine countries in the Pacific region -- Japan, the Philippines, Thailand, Taiwan, Indonesia, Malaysia, Australia, New Zealand, and -- now China. The company plans to enter India and South Korea in the next two years.

"Asia Pacific is the most attractive investment target in the world today for a cosmetics company," Preston said. "Within ten years it will have two-thirds of the world's population.

GREAT NECK, NY (NOV. 14) PR NEWSWIRE - Hudson General Corporation (AMEX: HGC) announced today that it has received a cash distribution of $10 million from the Kohala Joint Venture, an equal joint venture between Hudson General and Oxford First Corporation which is developing approximately 4,000 acres of land in the North Kohala region on the island of Hawaii. In a related matter, Hudson General also announced that it has amended its revolving credit agreement with a group of banks and has paid the banks the $10 million it received from the joint venture to reduce its outstanding borrowings.

The cash distribution to Hudson General was made in connection with an agreement entered into between Hudson General and Oxford, which contemplates that the joint venture will sell or borrow against approximately $20 million principal balance of mortgage receivables obtained in connection with the sale of land parcels. The distribution represents a return to Hudson General of a portion of the advances made by it to the joint venture in connection with development of the venture's land.

The $10 million cash distribution consisted of the proceeds of $3.7 million of receivables sold by the joint venture to an unaffiliated third party and $6.3 million of the venture's available cash. The agreement, among other things, provides that the first $7.5 million of proceeds from any future sales of, or borrowings against, the venture's receivables will be distributed to Oxford, and thereafter any such proceeds will be distributed equally to Hudson General

and Oxford. The agreement further provides for the equalization by June 30, 1991, of advances made to the joint venture by Oxford with those previously made by Hudson General, and any subsequent distributions will be made equally to Hudson General and Oxford.

The revolving credit agreement generally provides that distributions to Hudson General from the joint venture will be used to reduce Hudson General's outstanding borrowings and the banks' total lending commitment. Pursuant to the amendment, Hudson General paid the entire $10 million distribution from the joint venture to the banks, and the banks' outstanding lending commitment was reduced from $35 million to $26 million. At the present time, Hudson General's outstanding borrowings and letters of credit under the revolving credit agreement total $9 million. In addition, the amendment provided, among other things, for a reduction in the interest rate charged on borrowings by one-quarter of a percentage point. The banks also relieved Hudson General of any obligations it may have had to continue discussions with the banks concerning the possible grant of a security interest in assets of Hudson General.

Hudson General Corporation provides various services to airlines, airport operators and the general aviation community throughout the United States and Canada, in addition to its participation in the Kohala Joint Venture.

#90318p6681 11/14/1990 ~PR Newswire

PHILADELPHIA (NOV. 14) PR NEWSWIRE - PHLCORP, Inc. (NYSE: PHX), today announced its unaudited operating results for the nine months ended Sept. 30, 1990. A summary of results for the nine- and three- month periods ended Sept. 30, 1990 and 1989 is as follows:

Periods ended	Three Months		Nine Months	
Sept. 30	1990	1989	1990	1989
Net income	$12,511,000	$5,550,000	$26,676,000	$17,333,000
Net income per common share	$.92	$.41	$1.97	$1.28

As previously reported, the results of a study of projected redemptions applicable to trading stamps issued by a subsidiary indicated that the liability for unredeemed trading stamps was in excess of required amounts by approximately $34,000,000. The company is amortizing the apparent excess over a five-year period commencing Jan. 1, 1990. As a result, after giving effect to related adjustments, results of operations for the nine- and three-month periods ended Sept. 30, 1990, reflect pre-tax income of approximately $4,200,000 related to this apparent excess. Results of operations for the periods ended in 1990 also include income of approximately $2,900,000 resulting from pension plan settlement and curtailment gains.

Results of operations for the nine month period ended Sept. 30, 1989, include a provision of $5,600,000 ($500,000 in the third quarter of 1989) related to the restructuring of the trading stamp operations.

Through its operating subsidiaries, PHLCORP is engaged primarily in the trading stamps, motivation services, and property and casualty insurance businesses.

NEW YORK (NOV. 14) PR NEWSWIRE - Jean Philippe Fragrances Inc. (NASDAQ: JEAN) reported record sales and earnings for the third quarter ended Sept. 30.

Net sales for this quarter were $3,419,972, a 133 percent increase from sales of $1,464,773 for the corresponding quarter of the prior year. Net income for the quarter ended Sept. 30 was $554,767 compared to $166,215 for the third

quarter of 1989, an increase of 233 percent.

Sales for the nine months ended Sept. 30 were $6,074,312 compared to $3,363,197 in the corresponding period of the prior year, an increase of 80 percent. Net income for the first nine months was $706,552 compared to $263,125 for the corresponding period of the prior year, an increase of 168 percent.

In announcing the results, Jean Mader, the president of Jean Philippe Fragrances, stated: "Results of our Jordache Fragrances & Cosmetics line, acquired in January 1990, exceeded our expectations for the quarter because of our new cosmetic line 'Looks' which was very well received by retailers. Our core alternative designer fragrances business also performed extremely well, with sales up 20 percent. Based upon our strong results for the first nine months, we expect that 1990 will be another record year. Due to the success of our Jordache acquisition, we are actively seeking other acquisition opportunities which will complement our product and distribution base."

#90318p6684 11/14/1990 ~PR Newswire

BAGSVAERD, DENMARK (NOV. 14) PR NEWSWIRE - Novo Nordisk A/S (NYSE: NVO) today issued the following nine months and third quarter results:

Consolidated sales for the first nine months of 1990 were Dkr. 6,011 million, an increase of 9 percent compared with sales in the first nine months of 1989.

Income before tax increased 5 percent to Dkr. 905 million from Dkr. 858 million in 1989. Net income was Dkr. 597 million versus Dkr. 618 million, 3 percent lower than in the first nine months of 1989 due to an increase in the effective tax rate to the level of 32-34 percent as a result of the 1989 changes in the corporate tax laws in Denmark.

In terms of local currencies, consolidated sales increased more than 15 percent compared with the first nine months of 1989, mainly as a result of larger sales volumes and product mix improvements. However, as the average value of Novo Nordisk's currency basket decreased 8 percent in the first nine moths of 1990 compared with the same period in 1989, the sales increase only amounted to approximately 9 percent in terms of Danish kroner.

Novo Nordisk A/S is a major force in insulin production and diabetes care and is the world's largest producer of industrial enzymes.

NEW YORK (NOV. 14) PR NEWSWIRE - Leucadia National Corporation (NYSE: LUK) today announced its unaudited operating results for the nine month period ended Sept. 30, 1990. Income from continuing operations for the nine month period ended Sept. 30, 1990 was $65,958,000 or $5.33 per common share compared to $18,414,000 or $1.37 per common share ($1.35 on a fully diluted basis) for the nine month period ended Sept. 30, 1989.

Loss from discontinued operations was $17,417,000 or $1.41 per common share for the nine month period ended Sept. 30, 1990 compared to income of $3,895,000 or 29 cents per common share (28 cents on a fully diluted basis) for the nine month period ended Sept. 30, 1989. During the second quarter of 1990, the company entered into an agreement to sell a mature block of traditional life insurance which constituted the company's traditional life insurance business. Accordingly, the loss on disposition ($16,857,000, including a provision for income taxes) and the results of operations of such business have been presented as a discontinued operation. Discontinued operations also include the company's railcar leasing and management operations and the electronic visual communications subsidiary which were sold in 1989.

Net income was $48,541,000 or $3.92 per common share for the nine month period ended Sept. 30, 1990 compared with $22,309,000 or $1.66 per common share ($1.63 on a fully diluted basis) for the nine month period ended Sept. 30, 1989.

Included in income from continuing operations for the nine month periods ended Sept. 30, 1990 and 1989 were net securities gains of $10,174,000 and $8,663,000, respectively.

#90318p6692 11/14/1990 ~PR Newswire

LAS VEGAS, NV (NOV. 14) PR NEWSWIRE - The Software Developer's Company (NASDAQ: SDEV) yesterday announced a new major addition to the product line, Sourcerer's Apprentice and an important new service for programmers, Software Now! The announcements were made by Software Developer's Company (SDC) at the Comdex convention currently taking place in Las Vegas.

Sourcerer's Apprentice

Solution Systems, a SDC division, introduced the Sourcerer's Apprentice. Sourcerer's Apprentice is a version control product which will interface with numerous editors, including a seamless interface with Brief, the Programmer's Editor. By publishing the Sourcerer's Apprentice, Solution Systems, as exclusive licensee, furthers its commitment to provide software developers with a complete programming environment.

Version control allows programmers to maintain an accurate record of each version of a document as changes are made to the work. Eliminating concern that previous work may be lost, an editor is free to experiment and concentrate on being creative. In an effort to save disk space, Sourcerer's Apprentice saves only the differences from one version to the next.

In announcing the program, Eric Wilde, director of programming tools development, said, "The greatest feature of Sourcerer's Apprentice is its seamless interface with Brief. Accessing Brief from within Sourcerer's Apprentice is a real time saver."

In addition to a locking feature, removing the potential for modification after a programmer has checked out a module, the professional version of Sourcerer's Apprentice offers branching. Branching allows the programmer to create alternate lines of development on individual modules.

Software Now!

Software Now!, introduced by SDC's Programmer's Shop division, is a new distribution technology that allows for 24-hour-a-day access to, and purchase of, software programs, demonstration programs, an electronic catalog of over 2,000 products, product literature and article reprints using both on-line services and CD-ROM.

Mark Porter, director of marketing for the Programmer's Shop, said, "It's equal to having a software store open all day in your computer. If you wish to purchase any of the programs available you can actually download the software immediately. Documentation of the sale will be shipped out the next day."

Initial customers for the product, expected to be released during the first half of 1991, will be SDC's larger corporate accounts. It is anticipated that the use of Software Now! will result in better informed decisions and savings in time and money. Software publishers also benefit as it will reduce their production costs and provide greater protection against unauthorized distribution of their software.

Software Developer's Company

The Software Developer's Company, Inc., develops, publishes and distributes software development tools for the PC programming community through three divisions: Solutions Systems, publisher of Brief and other development tools

for PC programmers; the Programmer's Shop, a retail and wholesale mail-order distributor of more than 2,000 products for PC programmers, and the SDC Communications which publishes the Programmer's Shop Catalog and utilizes SDC's substantial mailing list of programming product buyers in other marketing endeavors.

SEATTLE (NOV. 14) PR NEWSWIRE - Ackerley Communications Inc. (AMEX: AK) reported sales for the third quarter ended Sept. 30 were $41.4 million, up 8 percent from $38.2 million a year earlier. Sales for the first three quarters reached $131.1 million, up 7 percent from $122.7 million last year.

Adjusted operating profit (defined as net revenue less operating expenses plus other income before depreciation, amortization and interest) -- the "cash flow" by which the company measures its performance -- for the third quarter decreased $0.5 million to $7.2 million from $7.7 million a year earlier. Adjusted operating profit for the first nine months of 1990 also decreased $0.5 million or 2 percent to $23.9 million from $24.4 million during the same period in 1989.

The company showed a net loss applicable to common shares of $5.4 million or 35 cents per share for the quarter ended Sept. 30, compared to a net loss of $2.1 million or 14 cents per share, for the comparable quarter last year.

For the first three quarters, the company had a net loss applicable to common shares of $12.4 million, or 81 cents per share, compared to a loss during the same period a year earlier of $4.5 million or 30 cents per share. The increased net loss was primarily due to acquisitions which have increased the non-cash expenses of depreciation and amortization, as well as interest due to borrowings associated with these same acquisitions.

Ackerley Communications is a multimedia advertising business, with interests in outdoor advertising, airport displays, broadcasting and professional sports specifically the Seattle SuperSonics.

Ackerley's broadcasting properties include television stations KVOS-TV in Bellingham, Wash.; WIXT-TV in Syracuse, N.Y.; KKTV-TV in Colorado Springs, Colo.; KCBA-TV in Salinas and KGET-TV in Bakersfield, Calif. Ackerley also owns radio stations WBOS-FM in Boston; WAXY-FM in Ft. Lauderdale, Fla.; KJR-AM and KLTX-FM in Seattle; and KGON-FM and KFXX-AM in Portland, Ore.

NEW YORK (NOV. 14) PR NEWSWIRE - Columbia University and Reuters, the world news organization, today announced a new education program on international business and economic issues for both journalists and the general public, to be called "The Reuter Forum."

The university's Graduate School of Journalism will receive an initial two-year grant of $450,000 for the program from The Reuter Fund, which administers the charitable activities of Reuters Holdings PLC.

The Reuter Forum will include guest lectures and debates, led by well-known experts, on major issues in international business, economics and finance. The lectures will be part of an academic course for students of the journalism school and Columbia's graduate schools of business, law, international and public affairs and others. The debates will be open to the public.

Joan Konner, dean of the journalism school, said: "This exciting program builds on the strong curriculum in business reporting at the journalism school and taps the substantial international and economic expertise of the university and New York City. We applaud Reuters' recognition of the need to address the new public demand for better understanding of global economic forces and its generous response."

Reuters Editor-in-Chief Mark Wood, a Reuter Fund trustee, said: "The Columbia Graduate School of Journalism is world renowned, and we are delighted to be helping such a respected institution. The Reuter Forum will mark a major step forward for financial journalism in the United States."

The first 14-week program will be hold in spring 1991. The Reuter Forum will be directed by Pauline Tai, a widely experienced financial journalist who has held editorial posts at Money magazine and The Wall Street Journal and has served on the executive staff of the office of the secretary-general at the United Nations.

The Columbia Graduate School of Journalism, endowed by Joseph Pulitzer, enrolled its first class in 1912. Since then its graduates have become leaders across the media spectrum and its reputation as the premier training ground for journalists has reached around the world. It administers the most prestigious awards in the profession: The Pulitzer Prizes, the Alfred I. duPont-Columbia University Awards in broadcast journalism, the Maria Moors Cabot Prizes in inter-American journalism, and the National Magazine Awards. The journalism school offers an intensive, one-year degree program to some 200 graduates annually, including a dozen or more international division students. The school's Knight-Bagehot Fellowship Program in Economics and Business

Journalism, which Tai directs, provides an opportunity for 10 mid-career journalists a year to attend Columbia for advanced study.

The Reuter Fund was established by Reuters earlier this year as a charitable trust to implement an expanded program of corporate philanthropy for the Reuter Group, which comprises specialized financial and economic services and television interests as well as global news reporting.

Reuters Holdings PLC (NASDAQ: RTRSY) supplies the global business community and news media with a wide range of facilities, including real-time financial data and transaction services, access to numeric and textual historical databases, news and news pictures.

HOUSTON (NOV. 14) PR NEWSWIRE - DI Industries, Inc. (AMEX: DRL) announced the purchase of the drilling assets of James Bigard Drilling Company. Bigard is one of the largest drilling contractors in Michigan with a material percentage of the market share in that state. The purchased assets include 12 drilling rigs with capabilities to 18,000 feet. The purchase also included the assets of a trucking company with 26 trucks in its fleet, and certain casing tool assets.

The acquisition was for $5,019,785 cash and was effective Nov. 13, 1990. Max M. Dillard, president of DI Industries, stated that this purchase is in line with the company's acquisition objectives and is a major leap forward. The assets will be operated under the company's subsidiary, Drillers, Inc., and the new entity has obtained contracts for nine of the 12 rigs in the fleet. This is a major regional addition to the 14 states in which the company is currently operating. A portion of the proceeds from the public offering in March of this year was used to finance the acquisition.

This acquisition will bring DI's domestic rig fleet to 95 drilling rigs and DI continues to have cash for further acquisitions. DI is currently profitable, reporting its best earnings since 1982.

DI Industries, Inc., provides onshore contract drilling and well workover services to firms in the oil and gas industry, commercial drilling, oil and gas exploration and production and equipment repair and sales. The common stock of the company trades on the American Stock Exchange under the symbol, "DRL."

CALGARY, ALBERTA (NOV. 14) PR NEWSWIRE - Archer Communications Inc. (NASDAQ: QSNDF; Toronto: AAZ) has confirmed a partial list of 12 artists that have used or are scheduled to use QSound in music recordings:

PAULA ABDUL
BON JOVI
EUROPE
JULIAN LENNON
GERARDO
STEVIE NICKS
IMANA
WILSON PHILLIPS
FREDDIE JACKSON
RICHIE SAMBORA

JANET JACKSON
STING

The first QSound recording, Madonna's greatest hits compilation, "The Immaculate Collection" is now available in music stores worldwide. Madonna and producer/engineer Shep Pettibone recently returned to the studio to remix the non-QSound Album track, "Justify My Love" for single re-release in late November.

"Finally, something that compares with the little sounds in my head," stated Madonna on QSound.

In addition to further QSound single releases anticipated in December, the first all new album recording in QSound will be Sting's "The Soul Cages," produced by Sting and Hugh Padgham, and scheduled for release in January on A&M Records.

"QSound will do to stereo what stereo did to mono," stated Hugh Padgham. Archer's President and Chief Executive Officer, Lawrence G. Ryckman, stated: "We are very pleased to announce such an impressive line-up of artists that represent virtually all the major record labels worldwide. The amount of interest QSound has generated, and the acceptance it has received from artists producers and engineers has exceeded expectations. Additional artists will be announced by the end of the year."

A QSound recording provides three-dimensional imaging along with greater depth and clarity when played on conventional stereo systems, without the consumer investing in any additional hardware. QSound can be broadcast and received on FM stereo radio and stereo cable TV.

TROY, MI (NOV. 14) PR NEWSWIRE - Kmart Corporation (NYSE: KM) today announced the completion of the installation of point-of-sale (POS) scanning and satellite systems in its more than 2,200 U.S. Kmart stores.

"POS scanning and satellite communications complete the first and most important step to ensure the success of our '90s strategies," said Joseph E. Antonini, Kmart chairman of the board and chief executive officer. "These systems are integral to our retail automation program and provide the basis for centralized merchandising, expense control and customer service."

Kmart began its retail automation program in the early 1980s with the acquisition of cash registers which were easily upgraded to scanning, but the current program began in earnest only four years ago.

"Between mid-1986 and November 1990, we have installed nearly 20,000 in-store systems. That means Kmart has installed UPC scanning at a rate substantially faster than any other retailer in history," said David M. Carlson, Kmart senior vice president, corporate information systems.

Scanning registers record the sale of every item and transmit the data to Kmart's headquarters. This allows the company to respond quickly to what's new, what's in demand and what will keep customers coming back.

Live satellite broadcasts from corporate headquarters to the field allow managers to call in questions and receive immediate responses. In addition, the transmission of data via satellite results in more efficient administration, from basic accounting to instant credit authorization.

Other steps the company has taken toward its renewal include the new store expansion and modernization program, which will add approximately 40 million square feet of selling space to the Kmart division. The company will build four new distribution centers over the next three years to establish 48-hour turnaround for merchandise deliveries to Kmart stores. And, the company introduced a new retail identity symbol signaling its commitment to change and renewal.

Kmart Corporation serves America with more than 4,000 retail outlets in all 50 states in the United States and in Puerto Rico and Canada. Kmart, currently operating 2,336 Kmart stores, is also the parent company for Pay Less Drug Stores, Builders Square, Waldenbooks, PACE Membership Warehouse, Inc., and The Sports Authority.

GASTONIA, NC (NOV. 14) PR NEWSWIRE - Rauch Industries, Inc. (NASDAQ-NMS: RCHI), a NASDAQ traded company, today announced financial results for the third quarter of 1990, ended September 30, 1990. Rauch is America's oldest and best-known manufacturer of Christmas tree ornaments and related products.

Net sales were $19.2 million for the quarter, up eight percent from $17.8 million for the year earlier quarter. The company's net income for the quarter was $2.0 million, or $1.22 per share, compared to $1.8 million, or $1.12 per share, for the same quarter last year.

Inventories, accounts receivable, accounts payable, and short-term debt at September 30, 1990 were all comparable to 1989 balances on that date. Because of the seasonal nature of the company's business, the majority of its shipments occur in the third and fourth quarters of the year.

Marshall A. Rauch, chairman, president and chief executive officer of the company, reported that total orders received through the end of September were approximately $37.1 million against $37.5 million at the comparable time last year. As of this date, total orders received during the year have risen to $37.5 million, as compared to $38.1 million at the same time last year.

Sales for the first nine months of 1990 were $21.9 million, up from $21.2 million for the comparable period in 1989, an increase of three percent. Net income for the period was $1.3 million or $.79 per share compared to a net income of $.9 million or $.55 per share in the first nine months of 1989. During the second quarter of 1989, the company incurred an extraordinary charge of $.20 per share in connection with the settlement of litigation.

Rauch earned $2.5 million or $1.51 per share in 1989 on sales of $38.3 million. This was an increase of 30 percent over earnings of $1.9 million or $1.16 per share in 1988 and an increase of 17 percent over sales of $32.7 million in 1988.

HACKENSACK, NJ (NOV. 14) PR NEWSWIRE - Sterling Optical Corp. (NYSE: EYE) today reported results for the first quarter ended Sept. 30, 1990. Systemwide sales for the period were $32,798,000 compared to $32,530,000 during the first quarter ended Sept. 30, 1989. Net income for the first quarter of fiscal year 1991 was $533,000 or $.12 per share, as compared to a loss (net of losses from discontinued operations) of $223,000, or $.04 per share in the first quarter of last year.

"We are encouraged by our performance this quarter, particularly in light of the current sluggish business environment," said Richard Block, chairman and chief executive officer of Sterling Optical.

"Our results not only reflect the benefits of the actions we took this past year to improve operations and reduce debt, but also our significantly stronger competitive position in the optical retailing industry."

On Nov. 8, 1990, shareholders approved a change in the corporation's name from IPCO Corporation to Sterling Optical Corp. The company's common stock began trading under the new symbol "EYE" on the New York Stock Exchange today.

Sterling Optical is the fourth largest optical retailer in the United States. Through 244 stores, 73 of which are franchised, Sterling Optical offers a full line of prescription and non-prescription eyeglasses and sunglasses, contact lenses, optical repair services and, where permitted, optometric examinations.

LAUREL, MD. (NOV. 14) PR NEWSWIRE - F&E Resource Systems Technology, Inc. (FERST), publicly traded over-the-counter (pink sheets), today announced that it has accepted a "letter of interest" from The Fuji Bank, Limited, San Francisco Agency, to pursue terms and conditions being considered to provide both a construction loan and a direct pay letter of credit for a 700 ton-per-day recycling/composting plant FERST is developing in Baltimore.

Previously, FERST announced that it had entered into letters of intent with Browning Ferris Industries to supply the waste and Chrysler Capital Corporation to provide $7 million equity for the project.

FERST plans financial closing by year-end and to be in operation by early 1992. John Hancock Resource Development, Inc., investment banker for FERST, will manage a tax exempt bond issue by the Maryland Energy Finance Administration of approximately $33 million to be guaranteed by the direct pay letter of credit.

SAN FRANCISCO (NOV. 14) PR NEWSWIRE - Visa International and Sprint International today announced the worldwide introduction of VisaPhone, a service that will greatly facilitate business and leisure travel in the United States allowing non-U.S. cardholders to simply use their Visa cards to pay for long distance calls within and from the United States.

Under the terms of the agreement signed today between Visa International and Sprint International, all Visa member financial institutions outside the United States can begin offering the VisaPhone service as an enhancement to Visa cards in the first quarter of 1991. Cardholders who enroll in the VisaPhone service will be able to use their current Visa cards to place domestic and international long-distance calls from the United States.

Visa launched the VisaPhone service in the United States earlier this year in the first phase of its campaign to penetrate the $125 billion global telecommunications market. In the U.S. market, major financial institutions including Citibank, Security Pacific, Bank of America and Wells Fargo are marketing the service to millions of their cardholders.

With VisaPhone, an individual's account number in conjunction with a telecode serves as a calling card number. Cardholders can place calls from any phone in the United States to any phone in the United States, as well as to any phone in over 170 countries. After dialing a toll-free number, cardholders choose either to dial directly or complete the call through a Sprint operator. Operator assistance is available in English, Japanese, Spanish and French, with additional languages planned for future introduction. A detailed list of calls made through VisaPhone will appear on the cardholder's monthly Visa statement in the currency of the cardholder's home country.

Initially, overseas cardholders will use VisaPhone to place long-distance calls when traveling in the United States. But in the months ahead, as Visa develops agreements with major telecommunications carriers around the world, Visa cardholders will be able to place VisaPhone calls in other countries as well.

Ultimately, VisaPhone will allow cardholders to use their Visa cards to pay for calls to and from any phone in any country in the world.

Visa, with 240 million cards in circulation, is the world's largest consumer card payment program.

Sprint International is a unit of US Sprint, which is an operation of United Telecommunications Inc., a diversified international telecommunications company with $ 7.5 billion in revenues. US Sprint provides a comprehensive array of voice, data and video communications products and services on the

nation's only all-digital, fiber-optic network.

NEWTON, MASS. (NOV. 14) PR NEWSWIRE - University Bank, National Association (AMEX: UBN) today announced its results for the third quarter ended Sept. 30, 1990.

The bank sustained a net loss in the third quarter of 1990 of $2,132,000 or 32 cents per share compared to net income of $175,000 or 3 cents per share in the third quarter of 1989. For the nine months ended Sept. 30, 1990, the bank sustained a net loss of $15,876,000 or $2.37 per share compared to a net loss of $197,000 or 3 cents per share in the first nine months of 1989.

Included in the third quarter 1990 loss were losses on the equity security portfolio of $781,000 and a provision for loan losses and losses on other real estate owned of $1,165,000. The bank's equity security portfolio has been reduced to $634,000 at Sept. 30, 1990.

At Sept. 30, 1990, primary capital was $13.8 million. In the first nine months of 1990, the bank's total assets have been reduced by $43 million to $368 million. The bank is continuing its discussions to sell certain assets, which, if finalized, would result in approximately a 10 percent increase in its primary capital.

University Bank, N.A. is a commercial bank founded in 1927.

PHILADELPHIA (NOV. 14) PR NEWSWIRE - Conrail Mercury Inc., a wholly owned subsidiary of Consolidated Rail Corp. (NYSE: CRR), has named Kevin M. Donohue as vice president-operations.

Conrail Mercury provides customized, door-to-door intermodal service. Donohue is responsible for Conrail Mercury's truck delivery network, terminal operations and product development.

Donohue brings more than 24 years of transportation industry management experience to Conrail Mercury. Most recently, he served as vice president

and general manager of Triple Crown Services, a Norfolk Southern affiliate.

Donohue was graduated from Fordham University, New York, and holds a Master of Business Administration from Adelphi University, Garden City, N.Y.

Conrail Mercury, headquartered in the Philadelphia suburb of Plymouth Meeting, Pa., began operations in 1989. The company provides customized door-to-door service covering Conrail's premium intermodal lanes and manages a fleet of 48-foot wide-body trailers and containers operating between the Northeast and Midwest. The cornerstone of Conrail Mercury's operation is a state-of-the-art central dispatch center that manages all key elements of service, including all rail and truck carrier assignments.

NEWPORT BEACH, CA (NOV. 14) PR NEWSWIRE - American Health Services Corp. (NASDAQ: AHTS) said today that although revenues continue to be at record levels, write-downs and operating losses have resulted in a net loss for the third quarter ended Sept. 30, 1990, according to E. Larry Atkins, president and chief executive officer. Atkins noted that "factors which caused a third quarter operating loss included a significant one-time write-down totalling $2.9 million related to, among other things, severance arrangements, write-downs of property, equipment and intangible assets related to the termination of certain projects which no longer meet our strategic goals, and other operating losses of $230,000 due to increased maintenance expenses and the costs of equipment upgrades at some older centers."

For the third quarter ended Sept. 30, 1990, American Health Services had a 34 percent increase in revenues to $8,729,000 compared with $6,497,000 for the same three month period a year ago. The company reported income from center operations for the quarter of $745,000 compared with income from center operations of $1,415,000 for the third quarter last year. The company reported a net loss for the quarter of $3,097,000, or $(.35) per share, compared with net income of $247,000, or $.03 per share for the comparable three month period in 1989.

For the nine months ended Sept. 30, 1990 revenues increased 31 percent to $24,223,000 from $18,435,000 for the same nine months in 1989. The company reported income from center operations for the nine months ended Sept. 30, 1990 of $4,007,000 compared with $4,073,000 for the year ago period. The company reported a net loss for the 1990 nine month period of $2,326,000, or $(.30) per share, compared with net income of $770,000, or $.08 per share for the same period a year ago. The 1990 nine months loss was primarily due to write-downs and lower income from center operations in the third quarter.

American Health Services Corp. is one of the nation's largest operators of fixed-site magnetic resonance imaging centers.

CHICAGO (NOV. 14) PR NEWSWIRE - Midway Airlines invites travelers to "warm up the winter" with its Hot Tickets for Cold Months Sale offering travel bargains

beginning Thanksgiving Day and continuing through Feb. 28, 1991, announced John P. Tague, senior vice president of marketing and planning. Kids, students and senior citizens qualify for even greater savings.

"Now is the time to purchase tickets for that vacation or holiday travel you thought you couldn't afford," said Tague. "Effective Nov. 14 through Nov. 30, passengers can purchase tickets for as little as $24 to $139 one-way for travel between Chicago and the destinations Midway serves in the continental United States."

Midway also extends its invitation to kids. Two children, ages 2 through 17, may each travel for a special fare of $49 one-way when accompanied by an adult paying Hot Tickets prices.

Students and seniors, age 62 and older, also benefit with a savings of 10 percent off the Hot Tickets Fares. Students must be between 16 and 26 years old and must present a valid high school or college identification. This 10 percent discount does not apply to Kids Fares.

Hot Tickets Fares are valid for travel every day of the week except certain black-out dates. Tickets are non-refundable and require a seven-day advance purchase. Certain minimum stay and other restrictions may apply.

Midway Airlines general reservations toll-free number outside Chicago is 800-866-9000. Special service numbers are: telemarketing 800-866-9888; group sales 800-866-9555; French language 800-866-9010; and FlyersFirst 800-866-9070. In Chicago, the reservations number is 312-767-3400.

Midway Airlines offers coast-to-coast service from its hubs at Chicago's close-in Midway Airport and Philadelphia International Airport. Midway Airlines and its wholly owned subsidiary, the Midway Commuter, serve 60 destinations in the United States, Canada, U.S. Virgin Islands and the Bahamas.

LIVERPOOL, N.Y. (NOV. 14) PR NEWSWIRE - Fay's Incorporated (NYSE: FAY) reported earnings, before an extraordinary charge, for the third quarter ended Oct. 27, 1990, were a record $2,572,000 or $.17 per share, compared to $2,475,000 or $.16 per share in the third quarter of last year. Pretax earnings increased 15.5 percent to a record $4,244,000. The corporation's tax rate for the quarter was 39.4 percent, versus 32.6 percent for the same quarter a year ago. The unusually low tax rate last year was due to realizing the tax benefit of capital loss carryforwards. Revenues for the quarter increased 17.6 percent to a record $166.4 million from $141.5 million a year earlier. Revenues for comparable stores (stores open one year or more as of

Oct. 27, 1990) increased 11.1 percent for the quarter.

During the third quarter, Fay's called for redemption of the balance of its outstanding 13 3/4 percent Subordinated Debentures due 2005, resulting in an extraordinary charge of $664,000 or $.05 per share for the quarter. Net earnings for the third quarter, after giving effect to the extraordinary charge, were $1,908,000 or $.12 per share.

Fay's earnings for the first three quarters of the year, before extraordinary charges, were a record $7,301,000 or $.47 per share, compared to $6,848,000 or $.45 per share earned in the first nine months of last year. Revenues for the first three quarters increased 16.9 percent to $482 million from $412.4 million a year earlier. For the first three quarters of the year, revenues for comparable stores increased 9.4 percent.

In addition to the redemption of $15 million face value of its Subordinated Debentures in the third quarter, Fay's repurchased, in open market transactions, $12 million face value of its Subordinated Debentures during the first quarter of the year. The cumulative effect on earnings for the first three quarters resulting from the redemption and open market purchases of the Subordinated Debentures was an extraordinary charge of $1,238,000 or $.08 per share. Net earnings for the first three quarters of the year, after giving effect to the extraordinary charges, were $6,063,000 or $.39 per share.

TROY, MI (NOV. 14) PR NEWSWIRE - Larizza Industries, Inc. (AMEX: LII), an original equipment supplier to the automotive and defense industries, today announced an operating loss for the third quarter of 1990 of $639,000 compared to an operating loss of $3,454,000 for the third quarter of the prior year.

After interest and other non-operating expenses, the company reported a net loss in the current quarter of $5,082,000 or $0.37 per share on sales of $30,331,000 compared with a net loss of $5,815,000 or $0.42 per share on sales of $41,372,000 in the prior year's quarter. The net loss for the current third quarter includes $1,342,000 of non- operating charges related to operational and financial restructuring costs.

For the nine months, the company reported a net loss of $10,091,000 or $0.73 per share, vs. a net loss of $7,502,000 or $0.54 per share reported in the first nine months of 1989. Sales for the nine months were $109,757,000 vs. $143,218,000 in the prior year's first nine months. Results for the nine months include a non-recurring net loss of $2,147,000 related to the company's plating operation which was sold on April 6, 1990, and $2,009,000 of non-operating charges related to operational and financial restructuring costs.

Sales for the quarter and the nine months decreased primarily as a result of the disposition of the company's plating operation on April 6, 1990, and the closure of its Pulsar Plastics operation in December 1989. Sales for the periods were also down as a result of lower sales to the automotive OEMs caused by lower OEM car builds.

#90318p6740 11/14/1990 ~PR Newswire

FT. WORTH, TX (NOV. 14) PR NEWSWIRE - Wolverine Exploration Company (NASDAQ: WEXC) today announced its results for the first nine months of 1990. The company reported revenues for the first nine months of 1990 of $29.8 compared to $3.8 for the same period in 1989. The increase was due primarily to the increase in production from approximately 1,600 barrels of oil equivalency per day for the year 1989 compared to an average rate of approximately 9,100 barrels of oil equivalency per day for the first nine months of 1990.

As a result of this increased revenue, cash flow from operations for the first nine months of 1990 was $13.2 million compared to a deficit of $3 million for the first nine months of 1989. The net loss for the first nine months of 1990 was $15.9 million ($1.14 per share) as compared to a loss for the comparable period in 1989 of $8.3 million ($.66 per share). Included in the 1990 loss is

an extraordinary charge of $1.6 million ($.10 per share) relating to a loss on early retirement of exchangeable notes.

Exploration expenses increased from approximately $3 million during the first nine months of 1989 to $9.3 million for the same period in 1990 as a result of increased exploratory activity by the company primarily in the Austin Chalk trend and the exploration agreements with Oryx and Amoco. Operating expenses also increased as a result of the increased production to $3.8 million for the first nine months of 1990 compared to $399,000 for the comparable period in 1989. The largest increase in expenses was the depreciation and amortization which increased to $20.8 million for the first nine months of 1990 compared to $1.1 million for the same period in 1989.

W. T. Smith, chairman of the board of Wolverine, said that, with the exploration program with Oryx in the Austin Chalk area of South Texas and in the Sand Wash Basin of Colorado, the Amoco 1990 Gulf Coast Program and the operations both in the D. J. Basin in Wyoming and in Canada with Union Pacific Resources, we feel more optimistic than ever about the company's future.

MINNEAPOLIS/ST. PAUL (NOV. 14) PR NEWSWIRE - Angeion Corporation (NASDAQ: ANGN) will launch its ANGEDAPT(TM), a Y-adapter connector, at the American Heart Association's annual meeting in Dallas this week.

The ANGEDAPT is designed for use with a guiding catheter to control bleeding in angioplasties. The ANGEDAPT may also be used to stabilize catheters for use in atherectomy, laser therapy, valvuloplasty, coronary ultrasound and angioscopy procedures.

After the catheter is inserted into the ANGEDAPT and positioned in the artery, the ANGEDAPT's adjustable valve and rotating adapter lock the catheter into place and seal against blood loss. The ANGEDAPT is available in a large lumen size which enables it to accept catheter sizes up to and including 9 French. Each Y-Adapter is individually packaged in a sterile tray.

Additional components to the ANGEDAPT product line will be launched in early 1991. They include a double ANGEDAPT, for use in double wire/catheter angioplasty; and an ANGEDAPT with wire clip, for use in procedures where the guidewire is not coaxial with the catheter lumen (i.e., bare wire PTCAs).

The ANGEDAPT product line will be marketed in the United States and internationally under the Angeion label. The company estimates the market potential for the product line at $10 million.

This is Angeion's third proprietary product line and the second of its angioplasty accessory product lines. Its first angioplasty accessory product, the ANGESTAT(TM) product line, a hemostasis valve introducer, was released in 1990.

Minneapolis-based Angeion Corporation is a manufacturer of cardiovascular products. Under its subsidiary, AngeLase, Inc., it is currently engaged in the research and development of a catheter which would provide a nonsurgical cure for arrhythmia. Angeion's current core business target is the angioplasty accessory market. Angeion is traded on NASDAQ under the symbol ANGN and on the Boston Stock Exchange under the symbol ANI.

WALTHAM, MA (NOV. 14) PR NEWSWIRE - Tecogen Inc. (AMEX: TGN) today reported that its revenues for the 12 months ended Sept. 29, 1990, were $17,761,000, compared with $17,438,000 in 1989. Net income was $286,000, compared with $501,000 in 1989.

Dr. Ravinder K. Sakhuja, president and chief executive officer of Tecogen Inc. said, "We are making progress with our work on vehicles powered by our compressed natural gas (CNG) TecoDrive(tm) engine. Tecogen's medium-duty CNG truck recently passed driveability and performance tests at General Motors and a second CNG truck is now being road-tested at our laboratories. We have also begun to outfit 10 more school buses with our CNG engines for use in California school districts in 1991."

Tecogen Inc. manufactures, markets, and services packaged cogeneration and commercial cooling systems fueled principally by natural gas. The company also conducts research and development on low-emission natural gas engines for vehicles; pump, compressor, and electric generator drives; as well as advanced systems for clean-coal combustion and other high-efficiency gas-fueled devices. Tecogen is a public subsidiary of Thermo Electron Corporation (NYSE: TMO).

BUFFALO, NY (NOV. 14) PR NEWSWIRE - Barrister Information Systems Corporation (AMEX: BIS) today reported second quarter and first-half financial results for fiscal 1991. For the quarter ended Sept. 28, 1990, the net loss improved to $796,000 or $.26 per share compared to a net loss of $1,824,000 or $.60 per share for the comparable period last year. For the six months ended Sept. 28,

1990 the net loss was $1,061,000, compared to a loss of $3,398,000 for the prior period last year. On a per share basis the net loss for the six month period is $.35 per share, compared to a net loss of $1.11 per share for the comparable period last year.

Total revenues for the second quarter declined to $5,669,000 from $6,931,000 for the comparable quarter last year. For the six month periods ended Sept. 28, 1990 and Sept. 29, 1989 revenues were $13,093,000 and $14,427,000, respectively.

Henry P. Semmelhack, president of Barrister, stated, "While we are pleased that we have significantly reduced our net loss through major cost-cutting steps taken earlier by mangement, we were disappointed that an improved level of sales failed to materialize. We believe that purchasing decisions by law firms have been influenced by weaknesses in the general economy."

Semmelhack also noted that the company had received a large contract for its new Advanced Law Firm Mangement software during the quarter and that the company intends to continue its active marketing of this new product to its existing clients during the balance of the current fiscal year.

"The company has reorganized its national field operations into two geographic areas to achieve improved efficiency in marketing and profit and loss responsibility. Mangement also continues to tightly control expenses," Semmelhack stated.

LAWRENCE, MA (NOV. 14) PR NEWSWIRE - First Essex Bancorp, Inc. (NASDAQ: FESX) announced today a net loss for the fiscal quarter ended Sept. 30, 1990 of $11.1 million (or $1.85 per share) compared to net income of $1.0 million (or 16 cents per share) for the same period in 1989. Net interest income before the provision for possible loan losses totaled $4.2 million for the quarter, compared to $4.2 million for the same period in 1989. The net loss resulted primarily from a higher provision for possible loan losses, $10.3 million compared to $3.4 million for the same period in 1989, as well as from $3.0 million of expenses associated with the management of other real estate owned including the write down of carrying values in certain cases and $434,000 of expenses associated with the termination of the proposed merger with Andover Bancorp, Inc. Additionally, goodwill in the amount of $2.5 million which resulted from the 1989 acquisition of First Essex Savings Bank of New Hampshire (formerly Fortune Guaranty Savings Bank) was written off.

The net loss for the nine months ended Sept. 30, 1990 was $12.7 million compared to net income of $3.7 million for the same period in 1989.

At Sept. 30, 1990, non-accruing loans were $19.5 million compared to $23.7 million at June 30, 1990 and the allowance for possible loan losses was $10.9 million (or 55.9 percent of non-accruing loans) compared to $7.7 million (or 33.6 percent of non-accruing loans) at June 30, 1990. Other real estate owned at Sept. 30, 1990 totaled $21.3 million compared to $16.9 million at June 30, 1990.

Leonard A. Wilson, president and chief executive officer stated: "We continue to monitor the quality of the bank's assets, an ongoing exercise that is extremely important in light of continued deterioration of the region's economy. Based on what we have experienced and what we know today regarding the real estate environment, we believe it is prudent that we continue to add to our reserve levels. After recognizing the resulting net loss, First Essex's capital to assets ratio remains strong at 13.3 percent."

BOSTON (NOV. 14) PR NEWSWIRE - The Ares-Serono Group today reported worldwide sales of US$150.9 million for the third quarter ending Sept. 30, 1990, compared with $114.9 million for the same period last year, an increase of 31.3 percent. Net income increased by 8.9 percent to $14.8 million or $27.14 per share, compared with $13.5 million or $24.91 per share in 1989. Commenting on these results, Fabio Bertarelli, chief executive officer of The Ares-Serono Group, remarked, "Sales performance for the third quarter proves to be well above the industry average, encouraging us to pursue our strong R & D investment strategy."

Worldwide sales for the nine months ending Sept. 30, 1990 rose 24.1 percent to $453.2 million, compared with $365.3 million during the same period in 1989. Excluding favorable currency fluctuations, actual sales growth for the nine months of 1990 was 14.0 percent. Net income rose 3.6 percent to $44.8 million or $82.37 a share, compared with $43.2 million or $79.52 per share for the first nine months of 1989.

Net income shows the impact of the group's continuous investments in research and development, in marketing, as well as its keeping up with a high level of investments in the diagnostic field. In addition, it includes foreign exchange differences of $3.0 million from Latin America, and increased financial expenses.

Year-to-date prescription pharmaceutical sales worldwide increased by 27.6 percent to $376.6 million from $295.2 million during the same period last year. After adjusting for currency effects, the growth in sales of pharmaceutical products was 17.1 percent.

Sales growth for pharmaceuticals was positively impacted by the new oncological indications obtained for Serono's native beta interferon, Frone, in Italy last quarter as well as the strong market penetration of Saizen, the recombinant human growth hormone, in Italy, France, Germany and Spain.

For the first nine months of 1990, sales of the group's diagnostic products were $67.5 million, up 13.2 percent from $59.6 million. During the last quarter, the diagnostic division registered a particularly strong increase in sales on the French market as well as on its export markets.

During the first nine months of 1990, sales of over-the-counter products declined from $10.5 million to $9.1 million, due to the one-time repurchase of inventories in the first quarter resulting from a switch from an external to an internal Ares-Serono distribution network. Third quarter sales of the OTC division increased by 54.3 percent to $3.6 million.

The Ares-Serono Group is a leading multinational developer and marketer of pharmaceutical and diagnostic products with executive headquarters in Geneva,

Switzerland, and operating headquarters in Boston, USA. The Group operates subsidiaries and manufacturing facilities in more than 20 countries.

#90318p6758 11/14/1990 ~PR Newswire

SAN FRANCISCO (NOV. 14) PR NEWSWIRE - For the second time this year, Bechtel has been chosen to help develop a major international airport in Asia -- this time a $5-billion-plus facility that will be built on a man-made island in the Yellow Sea, just off the Korean capital of Seoul.

The new Yong Jong Do International Airport, destined to be one of the world's 10 largest will include commercial development areas and an accompanying ground transportation system that will link the island facility to the mainland.

Bechtel's involvement in Seoul, coupled with its announcement earlier this year that it would serve as project manager for Phase One of the massive Hong Kong Airport Works job, means the worldwide engineering and construction company is now involved in helping develop two of the world's largest airport/ground transportation projects.

In all, Bechtel has been involved in the construction of more than 60 major domestic and international airport projects around the world. Current assignments also include serving as construction manager for the redevelopment of John F. Kennedy International Airport in New York City and as project manager for the McCarran 2000 airport expansion program in Las Vegas.

"We are pleased with the confidence shown by Korean Government officials in selecting us for a project of such substantial significance to their country," said Robert L. Polvi, president of Bechtel Civil Co. "The involvement, we feel represents further proof of our broad-based and worldwide capabilities in the Aviation Services area."

In the case of Seoul, the Korean Ministry of Transportation selected a consortium made up of Bechtel International Inc. and Yooshin Engineering Corp. to develop a master plan and to carry out preliminary engineering studies for the new airport.

Yong Jong Do International will be constructed on an island located just off the coastal city of Inchon, about 30 miles west of Seoul's central business district. The 6,200-acre facility will be designed to serve as a "hub" for the growing number of international airline routes now serving or planned for Northeast Asia.

In making its announcement, the Korean Ministry said that Bechtel and Yooshin,

a Korean engineering firm, have been selected to develop a master plan and preliminary engineering for the airport itself, as well as related support facilities. Included will be the development of a connecting transportation plan that calls for the construction of a bridge to carry high-speed rail and highway traffic to the island from Seoul. The government said Bechtel and Yooshin also will produce environmental impact assessments, a comprehensive land use plan, and will be responsible for general site planning.

"This airport and its associated infrastructure is bound to play a crucial role in supporting Korea's rapidly expanding economic growth and in linking the nation to other important worldwide markets," said Michael K. Stephenson, senior vice president in charge of transportation projects. "The eventual scope of this job is enormous."

Stephenson said final contract negotiations for the Bechtel-Yooshin consortium's $4.8 million, 13-month assignment are expected to begin immediately. Bechtel's work on the project will be done in Seoul and at its offices here and in Los Angeles.

In carrying out their assignment, Bechtel and Yooshin will decide on the location and size of a number of structures and facilities associated with the new airport, including runways, taxiways, aprons and navigational aids and a passenger terminal complex. The consortium also will be responsible for preparing plans for a complex array of airport support facilities, including cargo terminals, an aircraft maintenance complex, a fuel farm, crash/fire/rescue stations, an airport maintenance complex, catering facilities, a ground support equipment maintenance base, and a variety of related structures.

The new, grass-roots airport will supplement Seoul's existing Kimpo International Airport, which is expected to begin reaching capacity sometime between 1994 and 1996. Plans are for the new facility to open in 1997.

ENGLEWOOD CLIFFS, N.J. (NOV. 14) PR NEWSWIRE - Emil Ramat, chairman of the board of American Midland Corporation (NASDAQ: AMCOC) today announced that the company has settled its lawsuit against The Travelers Indemnity Company for the sum of $2 million.

The suit arose out of a U.S. Air Force modular housing contract completed by the company in 1977. Travelers had bonded performance by one of the company's sub-contractors. An earlier judgment secured by the company against Travelers in the amount of approximately $3,600,000 had been vacated by the U.S. Court of Appeals, and a new trial ordered. The settlement was

entered into prior to commencement of the new trial.

FARMINGTON, N.M. (NOV. 14) PR NEWSWIRE - Mesa Airlines Inc. (NASDAQ: MESA) announced its year-end earnings figures today. The company has also announced that it has filed an amendment to the registration statement for public offering that it filed in June of this year.

The company reported, based on unaudited figures, net income of $3.6 million for the year, or $2.14 a share. This equals a 239.7 percent increase in earnings over last year. Operating revenues rose 104.4 percent to $45,954,000 from $22,507,000.

For the fourth quarter (July - September), the company reported net earnings of $918,000 or 55 cent a share, a 37.5 percent increase. Operating revenues for the quarter were $15,887,000 as compared to $6,845,000 last year.

Year-end traffic figures were also released with the company having experienced an 84.9 percent increase in passengers carried and a 99.6 percent increase in revenue passenger miles. Load factor climbed 1.3 percent to 48.3 percent for the year.

Mesa has filed an amendment to the registration statement with the Securities and Exchange Commission originally filed on June 22, 1990, covering the registration of 2,000,000 shares of its common stock for sale to the public. The amendment reflects an anticipated reduction in the offering to 750,000 shares. All shares are being offered by the company and the proceeds will represent new financing. The offering is to be subject to a firm underwriting managed by Oppenheimer & Co. Inc. The company anticipates that the offering will come to market the first week in December.

Mesa Airlines operates as an independent carrier out of its Albuquerque and Phoenix hubs and as a United Express carrier out of its Denver hub under a code-share agreement with United Air Lines. Skyway Airlines, a wholly owned subsidiary, operates as a code-share with Midwest Express Airlines out of its Milwaukee hub.

A registration statement relating to these securities has been filed with the Securities and Exchange Commission but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This press release shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any state in which such offer,

solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

ENGLEWOOD, N.J. (NOV. 14) PR NEWSWIRE - Graphic Scanning Corp. (NASDAQ: GSCC) announced today that it paid approximately $3 million to various respondents, in In Re Applications of A.S.D. Answer Service, Inc. et al., as reimbursement of legal expenses incurred by them in the course of this proceeding.

The A.S.D. Case was an evidentiary hearing commenced by the Federal Communications Commission in 1982 regarding the question of whether Graphic had an undisclosed interest in certain applications filed by supposedly unrelated parties for paging licenses on the 34 and 43 MHz frequencies at various locations throughout the United States. Payment was made pursuant to a settlement agreement previously approved by the Federal Communications Commission. Such settlement was previously provided for in the company's financial statements.

Graphic Scanning Corp. is a leading provider of telecommunications services in the United States and a growing provider of telecommunications services in the United Kingdom. Graphic Scanning operates one of the nation's largest radio paging businesses, is a major holder in two cellular radio telephone partnerships, and serves the corporate syndicate communications needs of the country's investment banking community. In addition, the company participates through joint ventures in wireless cable and FM broadcast operations.

PENNSAUKEN, NJ (NOV. 14) PR NEWSWIRE - J & J Snack Foods Corp. (NASDAQ: JJSF) today reported record sales for the 19th consecutive year.

However, for the first year in its history, earnings declined. Sales for the 52 weeks ended Sept. 29, 1990, increased 11 percent to $96,443,000 from $86,850,000 for the 53 weeks ended Sept. 30, 1989. Net earnings decreased 37 percent to $3,702,000 in fiscal 1990 from $5,906,000 in fiscal 1989. Earnings per share were $.44 based on 8,467,000 shares this year compared to $.75 on fully diluted shares of 8,526,000 shares last year. Without $951,000 adjustments for streamlining manufacturing operations and discontinued inventories, net earnings would have been $4,311,000 or $.51 per share.

For the 13 weeks ended Sept. 29, 1990, sales increased 6 percent to

$28,510,000 from $26,946,000 for the 14 weeks ended Sept. 30, 1989. Net earnings decreased 35 percent to $1,680,000 in the fiscal 1990 fourth quarter from $2,583,000 in last year's fourth quarter. Earnings per share were $.20 based on 8,373,000 shares compared to $.30 based on 8,576,000 shares. Without $448,000 of charges for streamlining manufacturing operations and discontinued inventories, net earnings would have been $1,967,000 or $.23 per share.

"A combination of unrelated conditions affected our financial performance in fiscal 1990," said Gerald B. Shreiber, J & J Snack Foods president and chief executive officer. "Our core businesses remain strong and fertile. We look forward to the continued expansion of our frozen carbonated beverage business and the effects or our new food service and retail supermarketing programs," Shreiber added.

J & J Snack Foods manufactures and markets nutritional snack foods to the food service and retail supermarket industries. Its principal products include SUPERPRETZEL(R) and other brand soft pretzels, ICEE(R) and FROZEN COKE frozen carbonated beverages, frozen treats and desserts, churros, cookies, muffins and baked health foods. J & J has plant facilities in Pennsauken; Scranton and Hatfield, Pa.; Vernon (Los Angeles); Santa Fe Springs, Calif., and Chicago Heights, Ill.

ROANOKE, VA (NOV. 14) PR NEWSWIRE - Littlefield, Adams & Company (AMEX: LFA), a company engaged in the business of manufacturing and imprinting leisurewear and team garments, has filed its form 10Q for the quarter ended September 30, 1990.

Revenues for the third quarter 1990 were $1,653,000 as compared with $1,846,000 for the third quarter of 1989. The net loss for the third quarter ended September 30, 1990, amounted to $38,000 as compared to a profit for the same quarter in 1989 of $4,000.

Sales volume for the quarter fell substantially below management's plan due to an overall sluggish economy. Collegiate did not receive college reorders as anticipated but believes they will come in October and November.

As a result of the settlement of litigation with the third party buyer of the publishing division, a write-down of $316,000 against a long term note was recorded in the second quarter ended June 30, 1990.

In May, 1989, a settlement was reached with a former director in litigation over a certain deferred compensation dispute. As a result of this, the company recorded a $214,000 gain on this settlement.

LITTLEFIELD, ADAMS & COMPANY CONSOLIDATED RESULTS OF OPERATIONS

	For the Three Months Ended September 30		For the Nine Months Ended September 30	
	1990	1989	1990	1989
Net Sales & Other Revenues	$1,653,000	$1,846,000	$4,768,000	$5,001,000
Net Income (Loss)	(38,000)	4,000	(430,000)	184,000
Net Income (Loss) Per Share (A)	($.04)	$.004	($.40)	$.17

(A) - Average number of shares outstanding for the nine months ended September 30, 1990 and 1989 was 1,073,820.

#90318p6782 11/14/1990 ~PR Newswire

TROY, MI (NOV. 14) PR NEWSWIRE - OIS Optical Imaging Systems, Inc. (OTC: OVON) ("OIS") today reported its unaudited operating results for the first quarter ended Sept. 30, 1990, as follows:

OIS OPTICAL IMAGING SYSTEMS, INC.

	Quarter Ended Sept. 30	
	1990	1989
	(In thousands)	
REVENUES		
Product and prototype research, development and sales	$1,514	$ 774
Licensing and royalties	279	---
Other (substantially all interest)	54	182
Total revenues	$1,847	$ 956
Total expenses	2,438	2,479
Net (loss)	($591)	($1,523)
Net (loss) per share (in dollars)	($.04)	($.11)

Total revenues for the three months ended Sept. 30, 1990, increased 93 percent as compared to the three months ended Sept. 30, 1989, while total expenses and net loss decreased 2 percent and 61 percent, respectively.

Revenues from product and prototype research, development and sales for the three months ended Sept. 30, 1990, increased 96 percent primarily due to revenues from the development and delivery of 5-inch color television prototype displays for Samsung Electron Devices Co., Ltd. and the transfer of amorphous silicon sensor technology to UNIPAC Opto-electronics Corporation.

In addition to ongoing projects, OIS continued to perform work on and complete previous and new product and prototype research, development and sales of aircraft and military prototype liquid crystal displays for existing and new customers during the quarter ended Sept. 30, 1990. Total revenues from these agreements and orders did not materially change as compared to the same quarter in the previous year.

Licensing and royalties revenues primarily consisted of revenues from a license agreement with an electronic component company based in Japan, for OIS amorphous silicon sensor technology, which was signed in July 1990.

Other revenues for the quarter decreased 70 percent primarily due to decreased interest income earned.

While the total expenses did not significantly decrease, cost of revenues from product and prototype research, development and sales decreased 40 percent, primarily due to the reversal of previously recorded costs in excess of anticipated billings. In addition, these reversals primarily resulted due to reductions in the estimated cost to complete several customer agreements and orders. The reductions are attributable to the resolution of certain ongoing technical problems related to developing and manufacturing of active matrix flat panel displays.

In addition, internal research and development expenses increased 123 percent primarily due to the efforts to resolve these certain ongoing technical problems.

OIS develops flat panel electronic displays and electronic imaging and scanning systems. Currently, OIS is focusing its proprietary display technology on avionic and military applications in order to become a leading U.S.-based manufacturer of flat panel displays.

#90318p6784 11/14/1990 ~PR Newswire

EAST HANOVER, NJ (NOV. 14) PR NEWSWIRE - The Clozaril Patient Management System (CPMS) has safely protected 139 schizophrenic patients from potentially life-threatening white blood cell disorders since the introduction of Clozaril (clozapine) in February 1990, Sandoz Pharmaceuticals Corporation announced today.

David L. Winter, M.D., vice president of scientific and external affairs, said that agranulocytosis-related reactions, which are characterized by reductions in white blood cells, are occurring in up to two percent of the patients who have begun therapy in the past seven months. Of the 139 identified cases, 39 patients had progressed into agranulocytosis, which is a life-threatening reaction, he said.

Clozaril is associated with a one to two percent incidence of agranulocytosis, a potentially fatal blood disorder that leaves a patient vulnerable to infection due to marked reductions in the white blood cell count.

CPMS was developed specifically to identify early warning signs of and prevent the development of agranulocytosis. CPMS is a nationwide drug distribution system that requires weekly blood monitoring of all patients. It provides for the timely notification of monitoring results to attending physicians and the development of a computerized patient data base.

"The information generated through the first seven months of clinical experience with Clozaril continues to confirm the high risk that is associated with this drug and the effectiveness of CPMS in protecting patients' lives," said Winter.

"Due to the weekly monitoring, patients who experience a dangerous drop in white blood cells are immediately withdrawn from therapy with no lasting adverse side effects. "To date we have had no deaths. Our experience indicates however, that at least 12 patients could have died had the system not been operating at its required effectiveness rate."

Winter cited the case of a patient who recently developed white blood cell count abnormalities while living 150 miles from her psychiatrist in Billings, Mont., as an example of the life-saving potential of a system which assures that patients will be followed no matter where they choose to live.

"The CPMS staff informed me immediately about the change in the patient's white blood cell count, and I was able to discontinue her medication and hospitalize the patient to double-check the test results and closely monitor her recovery," said the psychiatrist, David B. Carlson, M.D.

"Given Montana's widely scattered population and lack of mental illness services, I would not be able to prescribe Clozaril therapy for my patients without CPMS. As it is, CPMS is an extension of my office; it's like having my nurses run the system," said Carlson.

Clozaril is the first significant antipsychotic agent for schizophrenia in 20 years. Clozaril is indicated for severely ill schizophrenic patients who have failed to respond adequately to standard antipsychotic drug therapy.

CONTACT: David L. Winter, M.D., (201) 503-8600, or William J. O'Donnell, (201) 503-7070, both of Sandoz Pharmaceutical.

TORONTO (NOV. 14) PR NEWSWIRE - ARC International Corporation (AMEX, TSE: ATV) today announced consolidated operating results for the third quarter and nine months ended Sept. 30, 1990.

Net sales for the third quarter of 1990 were approximately $22.5 million compared to $22.45 million last year. For the nine months ended Sept. 30, sales were $66.6 million compared to $67.1 million. It should be noted that the 1989 comparative figures include sales of approximately $441,000 and $2.8 million, respectively, obtained from the microwave component manufacturing business which was sold earlier this year.

The company has incurred significant research and development costs related to both the improvement and upgrading of existing products and the development of new products. Such costs are charged to current operations as incurred, and amounted to $485,125 and $1,038,438, respectively, for the three and nine month periods ended Sept. 30, 1990, and $216,800 and $635,800, respectively, for the corresponding periods last year. Although these expenditures negatively impact current results, increased operating profits are anticipated in 1991 and future periods.

A third quarter net loss of $563,974 or $.08 per share compares to a net loss of $291,022 or $.04 per share last year. Year to date, a net loss of $394,780 or $.06 per share compares to a net loss of $370,251 or $.06 per share a year ago.

Third quarter operating cash flow (net loss plus the non-cash charges of depreciation and amortization) was negative $51,240 compared to $114,169 last year. Year to date, operating cash flow amounts to $1,014,035 or $.14 per share, compared to $825,133 or $.13 per share.

#90318p6790 11/14/1990 ~PR Newswire

NEW YORK (NOV. 14) PR NEWSWIRE - The American Stock Exchange announced that Cheshire Financial Corporation of Keene, N.H., began trading 3,479,480 outstanding common shares today. As the largest financial institution in southwestern New Hampshire, Cheshire Financial is the multi-bank holding

company for Cheshire County Savings Bank, The Monadnock Bank and The Valley Bank, which operate in Cheshire and Hillsborough counties. The company previously traded in the NASDAQ National Market System under the symbol CFNH.

Trading under ticker symbol CFX, the common stock opened on 100 shares at 6 7/8.

Cheshire Financial, with assets of $616 million as of Sept. 30, 1990, operates through its three state-chartered subsidiaries: Cheshire County Savings Bank operates in Cheshire County through its main office in Keene and seven branch offices; The Monadnock Bank operates in western Hillsborough County through its main office in Jaffrey and five branch offices; and The Valley Bank also operates in Hillsborough County through its main office in Hillsborough and one branch office.

Cheshire Financial's banking subsidiaries provide a range of banking services for individual customers, as well as professional, commercial and industrial businesses throughout southwestern New Hampshire.

Cheshire Financial reported an unaudited loss of $310,000, or a $.09 per share loss, on net interest income of $16,131,000 for the nine months ended Sept. 30 1990, compared with net income of $3,472,000, or $.96 per share, on net interest income of $13,716,000 for the comparable period in 1989.

BILLERICA, MA (NOV. 14) PR NEWSWIRE - Optrotech, Ltd. (NASDAQ: OPTKF)

announced unaudited consolidated revenues and earnings for the third quarter (July-September) of 1990. The company's revenues for the third quarter ending Sept. 30, 1990 were $20,456,190 compared with $18,104,603 for the same period in 1989, an increase of 13 percent.

Unaudited revenues for the nine months ended Sept. 30, 1990 were $59,937,524 compared with $52,924,769 for the same period in 1989. Net income after tax for the third quarter ended Sept. 30, 1990 was $105,682 or 3 cents per share, compared with net income of $1,351,079 or 25 cents per share for the same period in 1989.

Net income in the nine-month period ending Sept. 30, 1990 was $1,030,878 or 19 cents per share, compared with net income of $3,333,393 or 63 cents per share for the same period last year.

To maintain its strong position in the market and to introduce new products to related market segments, the company continued increasing research and development expenditures during the third quarter, which were financed from its own resources, to $2,107,338 compared with $1,421,124 in the corresponding quarter of 1989, an increase of 48 percent.

Despite the stiff market conditions, the company reinforced its sales force in order to ensure its future market position. This resulted in a significant increase in S.G.&A. expenses in the third quarter ending Sept. 30, 1990 to $4,566,162 compared to $3,893,045 in the same period last year.

Optrotech's management believes that the quality of its products, their capability to provide CIM (Computerized Integrated Manufacturing) solutions for the production of printed circuit boards, the professional and aggressive marketing and high standard of service, will enable the company to maintain its strong position in the printed circuit board industry, diversify into related market segments and improve margins.

WASHINGTON (NOV. 14) PR NEWSWIRE - Bresler & Reiner, Inc. (OTC) reported net income of $1,097,000, or 38 cents per share, on revenues of $10,394,000 for the three months ended Sept. 30, 1990. In the 1989 third quarter, the company earned $1,545,000, or 55 cents per share, on revenues of $10,551,000.

For the nine months ended Sept. 30, 1990, the company reported net income of $2,786,000, or 98 cents per share, on revenue of $31,248,000. In the 1989 period the company earned $4,294,000, or $1.52 per share on revenues of $30,193,000.

Charles S. Bresler, chairman of the board, said the company's home sales remained strong in 1990; however, the decrease in earnings in 1990 reflects a previously announced $800,000 ($.028 per share) net of income taxes, provision for possible loss on Washington Bancorporation commercial paper, decreased one time land sales at two of the company's joint ventures, and increased carrying costs associated with another joint venture. At Sept. 30, 1990, the company held over $8 million in cash and cash equivalents.

Bresler & Reiner, Inc. engages in residential land development and construction directly and through joint ventures; operates a motel, apartment projects and a shopping mall/office complex in the Washington metropolitan area. The company also owns two nursing homes and operates an equipment leasing business.

BRESLER & REINER, INC.

#90318p6798 11/14/1990 ~PR Newswire

PORTLAND, OR (NOV. 14) PR NEWSWIRE - NERCO Inc. (NYSE, Toronto: NER) today announced its Con gold mine in Yellowknife, Northwest Territories, Canada, has

exceeded 100,000 ounces of gold production for 1990 on Nov. 4, establishing a new single-mine annual gold production record for the natural resources company. NERCO also reported it has listed on the Toronto Stock Exchange today, trading under the symbol "NER."

NERCO Minerals Co. of Vancouver, Wash., operates the Con mine, which the company acquired in late 1986. The mine has been in operation for 52 years, and has produced more than 3 million ounces of gold over that time. Based on production, the Con mine is one of the 10 largest gold mines in Canada.

NERCO Minerals has invested more than $50 million since 1986 to modernize and expand the mining and milling rates of this large, undergound operation. The mill rate has been expanded by 25 percent to 1,000 tons per day, and is scheduled to reach 1,200 tons per day by early 1991. Cash production costs have been reduced 25 percent at the mine since 1987, and are now below the North American median for gold producers.

According to NERCO President Lawrence E. Heiner, "Reaching 100,000 ounces of production at the Con mine, while continuing to reduce operating costs at this mine, have been key objectives for our minerals business." The mine traditionally has produced approximately 75,000 to 80,000 ounces of gold per year and last year produced 95,000 ounces as modernization and expansion efforts began taking effect. At the mine's current production rate, the mine should produce approximately 115,000 ounces in 1990 and set a new production record.

Separately, NERCO listed its stock today on the Toronto Stock Exchange under the symbol "NER." "Our objective is to provide shareholders in Canada with the opportunity to invest in a premier North American natural resource company with considerable interests in Canada, as well as in the United States," Heiner noted.

NERCO is one of the leading North American producers of coal, oil and natural gas, and gold and silver. NERCO is among the 10 leading U.S. producers of coal and silver, is one of Canada's 10-largest gold producers, and is among the top 40 independent oil and gas companies in the United States.

Approximately 82 percent of NERCO's common stock is indirectly held by PacifiCorp (NYSE: PPW), a diversified electric utility also based in Portland, Ore.

ST. LOUIS (NOV. 14) PR NEWSWIRE - Southwestern Bell Telephone's (SWBT) 1991-92 White Pages directories will offer customers a new -- and welcome -- feature: ZIP codes.

Next year, 311 of SWBT's 366 directories in its five-state region will have ZIP codes. The remaining 55 phone books will add ZIP codes in 1992.

The directories will include residence and business customers' five-digit ZIP codes along with phone numbers and street addresses.

SWBT is among the first Bell operating companies to include ZIP codes in its

White Pages books.

"We're adding ZIP codes to make the directories more valuable to our customers and to make their lives easier," said David Osborn, division manager-directory products and services. "The ZIP codes give customers fewer directories to go through when addressing envelopes and another reason to refer to our White Pages for fast, reliable information."

The decision to include ZIP codes in all directories came after a successful trial last year in Lawton, Okla., and Lubbock, Waco and Wichita Falls, Texas.

Customer reaction in those cities was heavily in favor of the ZIP codes, Osborn said.

"In these test cities, customers were very, very pleased," he said. "One customer said she planned to use the phone book to make out her Christmas card list."

Southwestern Bell Telephone is a wholly owned subsidiary of Southwestern Bell Corporation and provides telecommunications service to nearly nine million customers in Kansas, Missouri, Arkansas, Oklahoma and Texas.

#90318p6813 11/14/1990 ~PR Newswire

DALLAS (NOV. 14) PR NEWSWIRE - Atmos Energy Corporation (NYSE: ATO) today reported that net income increased to $9.0 million, or $1.47 per share, on record operating revenues of $352.0 million for the fiscal year ended Sept. 30 1990. This compares with net income of $8.1 million, or $1.33 per share, on operating revenues of $342.4 million for the previous year.

The $9.0 million in net income is the company's second highest in its seven years as an independent company, despite a warm winter. The company reported record volumes of gas sold and transported with 119 billion cubic feet (Bcf), a slight increase from last year.

The company attributed the improved results for the year to strong sales to agricultural and industrial customers during the summer months, and extreme cold in December 1989. Weather conditions during the first quarter were 13.4 percent colder than normal, resulting in record revenues. However, for the rest of the heating season, weather was 21.2 percent warmer than normal, reducing sales volumes in the second quarter. Unusually hot, dry weather in West Texas during the summer months caused a surge in demand from farmers who use the gas to pump water to irrigate their crops.

Net income for the fourth quarter, which is typically unprofitable because of

the seasonal nature of gas heating sales, was a loss of $2.0 million, or $.33 per share, on operating revenues of $55.8 million. That compares with a loss of $2.4 million, or $.39 per share, on operating revenues of $57.6 million in the same quarter a year ago.

Atmos Chairman Charles Vaughan stated, "Our agricultural market in West Texas makes us unique among gas utilities, and provides us with an important source of revenues during the summer months. The increased sales to the agricultural market that uses gas to pump water to irrigate crops and success in managing expenses provided an offset to the lack of winter heating sales. These were the prime contributors to the improved results for the year."

Atmos Energy Corporation provides natural gas service to more than one-half million customers in Texas, Louisiana, and Kentucky through its operating companies - Energas Company, Trans Louisiana Gas Company and Western Kentucky Gas Company.

DANBURY, CT (NOV. 14) PR NEWSWIRE - The Linde Division of Union Carbide Industrial Gases Inc.(NYSE: UK), today announced that it is increasing its demand base and standard price schedules for bulk oxygen, nitrogen, and argon,

effective Nov. 15, 1990.

Despite ongoing efforts to control recent substantial cost increases through cost reduction projects, technology gains and restructuring, the price increases are necessary in order to achieve adequate returns on investment.

Product prices for large volume oxygen, nitrogen, and argon customers under Linde's demand schedule, which consists of a monthly demand charge plus a product price, will be 34 cents per hundred cubic feet, 31 cents per hundred cubic feet, and $2.45 per hundred cubic feet, respectively.

Prices for large volume customers under the standard price schedule will be increased to 66 cents per hundred cubic feet for oxygen, 58 cents per hundred cubic feet for nitrogen, and $3.68 per hundred cubic feet for argon. In addition, discounts on the monthly charge for installed tanks and equipment will be reduced or eliminated.

Linde is also increasing hydrogen prices through the reduction or elimination of discounts from its existing standard and demand price schedules. Increases seen by individual customers for oxygen, nitrogen, argon, and hydrogen will vary, depending upon the relationship of their current contract and prices relative to Linde's new price schedules.

#90318p6822 11/14/1990 ~PR Newswire

KING OF PRUSSIA, PA (NOV. 14) PR NEWSWIRE - International Mobile Machines Corp. (NASDAQ: IMMCC) announced today its unaudited consolidated results of operations for the third quarter ended Sept. 30, 1990.

Periods ended	Third quarter		Nine months	
Sept. 30	1990	1989	1990	1989
Revenues	$3,582,990	$1,358,021	$10,287,006	$2,633,279
Net loss	(2,978,969)	(3,887,297)	(8,451,353)	(14,285,154)
Net loss/share	($.17)	($.27)	($.52)	($1.02)

The company's improved performance in the third quarter and year-to-date vs. 1989 is due largely to increased sales and reduced operating costs.

Ultraphone sales for the third quarter of 1990 were $2,399,830 compared to $993,371 in the third quarter of 1989. This represents an increase rate of more than 140 percent. The annualized growth rate over 1989 is almost 400 percent.

In addition, the company recognized revenue of $1,183,160 in the third quarter of 1990 for certain digital cellular telephony efforts for which there was none in the third quarter of 1989.

#90318p6823 11/14/1990 ~PR Newswire

OAKBROOK TERRACE, IL (NOV. 14) PR NEWSWIRE - Telesphere Communications Inc. (AMEX: TSP) announced today earnings of $809,000 in the third quarter, an 18 percent increase over the amount earned the previous quarter. The company earned $1.3 million in the third quarter of 1989. Income was equal to $.04 per share on primary weighted average shares of 28,560,411.

Revenues in the third quarter were $68 million, a 9 percent increase over the second quarter and 27 percent ahead of last year's third quarter.

For the nine months ended Sept. 30, 1990, the company had net income of $2.8 million, versus a loss of $1.2 million last year, on revenues of $196.4 million. Net income was equal to $.14 per share on primary weighted average shares of 28,744,421, and $.11 on fully diluted weighted average shares of 51,002,478.

"Because the third quarter was a time when the company was building for future growth, we are particularly pleased to report the increase in net income," said Harry Thompson, chairman. "During the last several months our network has been upgraded and we have successfully initiated the integration of National Telephone Services. Because of the rapid consolidation of NTS, cost savings are already being felt and we expect substantial benefits next year."

Thompson noted that during the quarter, Telesphere successfully negotiated a financing agreement with Chase Manhattan Bank, Citibank and Bell Atlantic, which allowed it to complete the NTS acquisition and sustain future growth.

Telesphere expects revenues of about $100 million in the fourth quarter and $300 million for 1990, compared with $60 million in last year's fourth quarter and $192 million for all of 1989. The company said that fourth quarter profitability will be affected by decisions it may make on non-recurring adjustments related to the NTS acquisition.

Telesphere Communications Inc. operates a nationwide, state-of-the- art digital fiber optic network over which it provides long distance, operator, interactive 900 and other enhanced telecommunications services. The company's common stock is traded on the American Stock Exchange under the symbol TSP.

BURLINGTON, NC (NOV. 14) PR NEWSWIRE - Environmental Diagnostics, Inc. (NASDAQ: EDITD) announced today reduced operating losses for the quarter and nine months ended Sept. 30, 1990.

The Company's operating loss for the quarter ended Sept. 30, 1990 was $546,958 a reduction of 29 percent as compared to the operating loss of $771,723 incurred during the same period in 1989. The Company's net loss for the quarter, after a $167,804 write down of the value of stock held for investment was $714,762, or a loss of $.02 per share, compared to a net loss of $544,064 which included a gain on sale of stock of $227,659, or a loss of $.02 per share in the same quarter of the prior year. Revenues for the quarter were $554,996, a decline of 19 percent from the $688,302 reported in the third quarter of 1989.

For the nine month period ended Sept. 30, 1990, the operating loss was $1,372,836, a reduction of 48 percent from the operating loss of $2,621,867 reported for the same period in 1989. The net loss was $1,250,830, or a loss of $.03 per share, also reduced from the net loss $1,912,770, or a loss of $.05 per share, for the same nine month period in 1989. Revenues for the nine month period in 1990 were $1,903,675, a decline of 19 percent from revenues of $2,342,706 for the same period in 1989.

Environmental Diagnostics, Inc. develops and manufactures human clinical, drugs of abuse and agricultural diagnostics specifically designed for on-site testing by non-technical personnel. The Company's Conventional Biodiagnostic Products are used by government agencies, researchers, clinical testing laboratories and other companies for clinical and veterinary testing. The Company's EZ-SCREEN products provide the accuracy of laboratory results in minutes.

ATLANTA (NOV. 14) PR NEWSWIRE - Health Images Inc. (NASDAQ: HIMG) has opened its first magnetic resonance imaging center located outside the United States.

Guildford Magnetic Imaging may be the first magnetic resonance imaging center located in the United Kingdom to be owned by a U.S. company. The center is also the first project of its kind to be constructed on land leased by the National Health Service of the United Kingdom to a private U.S. company.

Robert D. Carl III, president and chairman of Health Images, stated: "Guildford Magnetic Imaging represents an important step in the evolution of Health Images. We are now the leading international provider of fixed site magnetic resonance imaging clinical services."

Guildford Magnetic Imaging is a full-service magnetic resonance imaging center

which is adjacent to the campus of the Royal Surrey County Hospital in Guildford, Surrey, England.

Magnetic resonance imaging (MRI) is a revolutionary medical imaging technology that has increasingly replaced more traditional methods of imaging including myelography, arthrography and "CAT" scans. MRI uses radiofrequency energy, magnetic field manipulations and sophisticated computers to produce vivid images of the body in multiple planes. It is a painless procedure which does not involve surgery or potentially harmful ionizing radiation. Physicians use MRI to diagnose and evaluate a variety of medical problems including brain, spinal column, knee and hip conditions. MRI is also particularly effective in detecting tumors, multiple sclerosis and other neurological and musculoskeletal disorders.

The Guildford center was made possible by an agreement between the Secretary of State for Health, the Southwest Surrey Health Authority, Health Images (U.K.) plc and Health Images Inc.

Health Images (U.K.) plc is a wholly owned subsidiary of Health Images Inc. Health Images Inc. is a publicly held corporation which owns and operates 24 MRI centers and one radiation oncology center in the United States.

MIAMI (NOV. 14) PR NEWSWIRE -Ivax Corporation (AMEX: IVX) today announced its results of operations for the three and nine months ended Sept. 30, 1990.

The results of operations are as follows:

IVAX CORPORATION

	Nine Months Ended Sept. 30,	
	1990	1989
Sales	$44,820,000	$47,139,000
Net loss	$(6,668,000)	$(5,293,000)
Net loss per share	$ (.38)	$ (.31)
Average shares outstanding	17,501,000	17,251,000
	Three Months Ended Sept. 30,	
	1990	1989
Sales	$13,556,000	$14,818,000
Net loss	$(3,718,000)	$(2,514,000)
Net loss per share	$ (.21)	$ (.14)
Average shares outstanding	17,608,000	17,342,000

The loss for the three months ended Sept. 30, 1990 was principally attributable to an increase in both marketing and merger expenses. The increase in marketing expenses was associated with the launch of Doral(R) (quazepam) tablets, a new sedative/hypnotic, marketed by Baker Cummins Pharmaceuticals, Inc. These expenses include those related to the establishment of a sales and distribution network for this product. In November 1990, Baker Cummins Pharmaceuticals granted to Carter-Wallace, Inc. an exclusive license to market Doral(R) in the United States. As a result of this license, Baker Cummins Pharmaceuticals has no present plans to incur additional material marketing costs regarding Doral(R).

The increase in merger expenses was the result of Ivax's recently announced agreement to acquire all of the outstanding shares of Harris Pharmaceuticals Limited in exchange for 6,250,000 shares of Ivax common stock. The results announced for the three and nine months ended Sept. 30, 1990 do not include the operations of Harris Pharmaceuticals Limited since the transaction is subject to the approval of Ivax's shareholders and the registration of the shares issued by Ivax with the United States Securities and Exchange Commission. Harris Pharmaceuticals, with facilities in London, England, and Waterford, Ireland, is a leading manufacturer and marketer of generic pharmaceutical products in the United Kingdom, Ireland and other countries.

IVAX Corporation is a holding company consisting of three operating groups: IVAX Industries, Inc., a chemical specialties business; Diamedix Corporation, a medical diagnostics company; and the pharmaceuticals group which includes: Baker Cummins Pharmaceuticals, Inc., a pharmaceuticals company; Baker Cummins Dermatologicals, Inc., a dermatological products company owned 50 percent by Baker Cummins Pharmaceuticals and 50 percent by Union Carbide Corporation; and Best Generics, Inc., a national distributor of generic pharmaceuticals.

#90318p6850 11/14/1990 ~PR Newswire

MIAMI (NOV. 14) PR NEWSWIRE - Ivax Corporation (AMEX: IVX) announced today that its wholly owned subsidiary, Baker Cummins Pharmaceuticals, Inc. has granted to Carter-Wallace, Inc. an exclusive license in the United States to Doral(R), a prescription sedative. Carter-Wallace has paid Baker Cummins Pharmaceuticals an up-front fee and will pay royalties based upon the sale of Doral(R).

The Wallace Laboratories division of Carter-Wallace had been promoting Doral(R) on behalf of Baker Cummins Pharmaceuticals pursuant to a Co-Promotion Agreement between Carter-Wallace and Baker Cummins Pharmaceuticals. This agreement was terminated simultaneously with the grant of license rights by Baker Cummins Pharmaceuticals. Baker Cummins Pharmaceuticals has retained its international rights to the product and is presently involved in negotiations regarding foreign distribution rights. Baker Cummins Pharmaceuticals granted a license of rights in Canada to Deprenyl Research Limited in May 1990.

Dr. Frost, the chairman of the board and chief executive officer of Ivax Corporation, stated, "We believe that this arrangement with Carter-Wallace is in the best interest of both Carter-Wallace and Baker Cummins Pharmaceuticals. Doral(R) is a product whose sales will benefit considerably from the resources that Wallace Laboratories is commited to dedicate to the project. Baker Cummins Pharmaceuticals will be able to focus its marketing efforts on its other products which can be better promoted through a smaller more focused marketing organization."

IVAX Corporation is a holding company consisting of three operating divisions: IVAX Industries, Inc., a medical specialties business; Diamedix Corporation, a medical diagnostics company; and the pharmaceuticals group which includes Baker Cummins Pharmaceuticals, Inc., a pharmaceuticals company; Baker Cummins Dermatologicals, Inc., a dermatological products company owned 50 percent by Baker Cummins Pharmaceuticals and 50 percent by Union Carbide Corporation; and Best Generics, Inc., a national distributor of generic pharmaceuticals.

HADERA, ISRAEL (NOV. 14) PR NEWSWIRE - American Israeli Paper Mills Ltd. (AMEX: AIP) today reported results for the third quarter and nine months ended Sept. 30, 1990.

Consolidated sales for the three month period were up 16 percent to $68.4 million (NIS 140.6 million), compared with sales of $59.0 million (NIS 121.3 million) in the third quarter of 1989.

Net earnings for the three month period reached $3.0 million (NIS 6.3 million) double last year's third quarter earnings of $1.5 million (NIS 3.1 million).

Consolidated sales for the nine months rose by 8.8 percent to $192.3 million (NIS 395.5 million), compared with $176.7 million (NIS 363.4 million) in the corresponding period last year.

Net earnings for the first nine months of 1990 rose by 120 percent to $7.5 million (NIS 15.4 million), compared with $3.4 million (NIS 6.9 million) for the first nine months of 1989.

Net earnings per share for the nine months amounted to $1.96 (NIS 4.04), compared with $0.88 (NIS 1.82) per share in the same period a year ago.

The significant improvement in profitability during the first nine month of 1990 resulted from an upswing in sales. Also reflected were a decrease of pulp prices, mainly in the third quarter, and a considerable drop in production costs including lower consumption of water and energy.

Furthermore, the company's successful ongoing reorganization program has expanded activities, increased output per machine, lowered work hours per ton, and reduced the percentage of broke.

Operating profit for the first nine months of 1990 rose by 83 percent, and amounted to $12.6 million (NIS 24.6 million), compared with operating profit of $6.9 million (NIS 14.2 million) for the same period last year.

CONCORD, N.H. (NOV. 14) PR NEWSWIRE - Healthsource, Inc. (NASDAQ: HLTH), a leading operator of managed health care businesses, today reported a 34.0 percent increase in total revenues and a 53.7 percent increase in net income for the third quarter ended Sept. 30, 1990.

Total revenues for the third quarter reached $16 million, compared with $12 million for the third quarter a year ago. Net income for the current quarter totaled $2.1 million vs. $1.4 million recorded in last year's comparable quarter. Earnings per share on a fully diluted basis amounted to 34 cents compared to 31 cents for 1989's third period.

For the first nine months of 1990, total revenues were $44.2 million vs. $34.8 million for the comparable period of 1989. Net income totaled $5.8 million, or 96 cents on a fully diluted per share basis for the first nine months of 1990, as compared to $4 million, or 84 cents on a fully diluted per share basis, for the first nine months of 1989. Results for 1989 included the benefit of a tax loss carryforward of $300,000.

The growth in fully diluted earnings per share was less than the increase in net income because of a 34 percent increase in weighted average shares outstanding primarily due to the company's initial public offering in November 1989.

"By concentrating our efforts in secondary markets with physician partners, we have continued to make strong earnings gains," said Norman C. Payson, M.D., Healthsource president and chief executive officer.

Healthsource is in the managed care business through its owned and managed HMOs in New Hampshire, Maine, New York, South Carolina and North Carolina.

In addition, Healthsource provides managed care and administrative services directly to other health care payors in New England including Vermont Blue Cross and appoximately 140 self-funded employers through Employee Benefit Plan Administration, Inc.

CONTACT: Thomas Congoran, or Tracey Turner, both of Healthsource, Inc. 603-225-5077; or Kerry Thalheim, 212-661-8030 or Kathy Waller, 312-266-7800, both of Financial Relations Board, Inc. for Healthsource, Inc.

#90318p6858 11/14/1990 ~PR Newswire

WALL, N.J. (NOV. 14) PR NEWSWIRE - New Jersey Natural Gas Company (NJNG) today applauded the Federal Energy Regulatory Commission's (FERC's) decision to approve the construction of a 370-mile underground natural gas pipeline from Canada to the U.S. Northeast. NJNG is the principal subsidiary of New Jersey Resources Corporation (NYSE: NJR).

The approval of the Iroquois Gas Transmission System application, which culminated more than four years of review by the FERC, clears the way for NJNG to receive the largest year-round addition to its natural gas supply portfolio in at least 20 years.

Members of the Iroquois partnership building the pipeline include NJNR Pipeline Company, a wholly owned subsidiary of NJR Energy Corporation, another New Jersey Resources Corporation subsidiary.

The Iroquois pipeline will transport 576 million cubic feet of natural gas per day from Canada to utilities and power generators in New Jersey, New York and New England. NJNG will receive 40 million cubic feet of gas per day, about 17 percent of its total firm supply.

FERC's ruling assures that pipeline construction can begin in early 1991. Gas is scheduled to begin flowing through the Iroquois pipeline in November 1991. No new construction is planned in New Jersey; instead, gas will be backfed through existing pipeline routes.

"The FERC decision to approve Iroquois is a major step forward in helping New Jersey and the rest of the Northeast meet current and future gas supply needs and reduce their dependence on foreign oil from the turmoil-plagued Middle East," said Philip H. Reardon, NJNG president and chief executive officer. "And, just as important, Iroquois adds much- needed pipeline capacity to deliver this gas into the region."

Reardon said the Iroquois project is also consistent with NJNG's long-term supply diversification strategy.

NJNG serves more than 306,000 customers in virtually all of Monmouth and Ocean

counties and parts of Morris and Middlesex counties.

#90318p6859 11/14/1990 ~PR Newswire

YORK, PA (NOV. 14) PR NEWSWIRE - Emons Holdings, Inc. (NASDAQ: EMHO) today announced a net loss of $372,785 for the first quarter of fiscal 1991 ended Sept. 30, 1990, as compared to net earnings of $93,400 for the three months ended Sept. 30, 1989, both before preferred dividend requirements. After preferred dividend requirements, the company recorded a loss applicable to common stock of $440,300, or $.09 per common share, as compared to earnings applicable to common stock of $90,440, or $.02 per common share, in the prior year's first fiscal quarter. Revenues declined to $3.1 million for fiscal 1991 first quarter from $3.3 million for the fiscal 1990 first quarter.

Robert Grossman, chairman and president, attributed the loss for the current quarter primarily to an operating loss from the company's railroad subsidiary in New England, lower than expected results from another railroad subsidiary and lower revenues from the company's Transportation Equipment Services Group. The results from the company's railroad in New England were down primarily because of weak economic conditions affecting the paper and construction industries and higher equipment and track maintenance expenses. Railcar management and marketing revenues were lower, due to the expiration of several older management and marketing agreements.

Grossman added that although economic conditions are expected to remain poor in the near-term, he expects results to show improvement for the remaining quarters of fiscal 1991 due to results from aggressive marketing activities, cost reductions, and rate negotiations on one of the company's railroads. Among its business development activities, the company is aggressively marketing its steel and lumber transload facility in York and is in the process of constructing a bulk commodities rail/truck transfer facility also in York, which is expected to commence operation by January 1991. Grossman pointed out, however, that fiscal 1991 is still expected to be a difficult and challenging year because of the economic climate.

Emons Holdings is a transportation services company headquartered in York, that has three primary business groups: the Transportation Equipment Services Group which manages, leases, brokers and repairs transportation equipment, the Railroad Group which operates short line railroads and the Logistic Services Group which assists companies with their distribution needs.

Emons Holdings' shares of common stock and convertible preferred stock are traded in the over-the-counter securities market and the common shares are listed on NASDAQ.

DALLAS (NOV. 14) PR NEWSWIRE - Transcontinental Realty Investors, Inc. (NYSE: TCI) today announced operating results for the third quarter and nine months ended Sept. 30, 1990.

For the three months ended Sept. 30, 1990, the company recorded a net loss of $5.7 million, or $1.78 per share, on revenues of $6.9 million, compared with a net loss of $793,000, or 25 cents per share, on revenues of $7.6 million in the third quarter of the prior year.

For the nine months ended Sept. 30, 1990, the company recorded a net loss of $7.8 million, or $2.43 per share, on revenues of $20.4 million, compared with net income of $703,000, or 23 cents per share, on revenues of $23.9 million in the first nine months of 1989.

Transcontinental recorded a provision for losses of $4.8 million in the first nine months of 1990 in connection with the foreclosure of a mortgage loan, the anticipated foreclosure of a mortgage loan secured by an apartment complex and a loss reserve on a first mortgage lien secured by two commercial buildings. The company's provision for losses for the first nine months of 1989 was $476,000.

During 1990's third quarter, the company acquired a 45 percent general partner's interest in a joint venture. As previously announced, this partnership purchased, for $2.7 million, a 55-unit apartment complex in Dallas with money loaned by Transcontinental. Also during the third quarter the company initiated an odd-lot repurchase program. The program expired on Oct. 31, at which time the company had acquired approximately 150,000 shares.

Transcontinental Realty Investors Inc. is a combination mortgage and equity real estate investment trust which operates nationwide.

#90318p6865 11/14/1990 ~PR Newswire

CINNAMINSON, N.J. (NOV. 14) PR NEWSWIRE - DNA Plant Technology Corporation (NASDAQ: DNAP) today reported that for the third quarter ended Sept. 30, 1990, its total revenue was $3,237,000, compared to $3,319,000 in the third quarter of 1989.

For the third quarter, the company had a net loss of $2,788,000, or $.13 per share, compared to a net loss of $744,000, or $.04 per share, in the third quarter of 1989.

For the first nine months of 1990, total revenue was $10,279,000, compared to $9,662,000 in the first nine months of 1989. The net loss for the first nine months of 1990 was $5,826,000, or $.28 per share, compared to a net loss of $1,931,000, or $.09 per share, in the first nine months of 1989.

Commenting on the company's performance, Richard Laster, DNAP chairman and chief executive officer, said: "Results for the quarter and for the year to date continue to be in line with our expectations. Year-to-year changes in revenue reflect an increase in contract revenue and a reduction in interest income. Our joint ventures are beginning to generate product revenue and our investment to support the growth of these joint ventures is the primary reason for the year-to-year increase in net losses.

"Our FreshWorld joint ventures with Du Pont has commenced sales of specially grown, superior tasting carrot and celery sticks to McDonald's restaurants in Manhattan and in the Harrisburg, Pa. area, representing a total of 145 outlets of the fast food concern, compared to 9 a year ago. Expansion of sales into other markets is anticipated in the coming months.

"Oil from our 1990 canola harvest is now being evaluated by food processors and other potential customers. InterMountain Canola, our division which is developing improved canola varieties, is now gearing up for a significant expansion of production in the 1991 growing season, which will make us one of the largest canola producers in the U.S.

"Product sales of Agri-Diagnostics Associates' turf fungal disease detection kits increased approximately 50 percent from a year ago. Market trials of fungal disease detection kits to nursery growers have been completed and commercial sales are set to begin in 1991. Initial data from validation trials of detection kits for a major pesticide residue in ground water are very encouraging and introductory sales of the product for lab use could begin in 1991."

DNAP is a leading agricultural biotechnology company, applying a spectrum of technologies to develop and commercialize plant-based products, agricultural and environmental diagnostics, and ice crystal modification products and processes for industrial and consumer markets.

TREVOSE, PENN. (NOV. 14) PR NEWSWIRE - Auto Depot Inc. (NASDAQ: AUTDU) announced today that for the period from Jan. 30, 1989, (date of incorporation) to Dec. 31, 1989, and for the period January 1990 to Sept. 30, 1990, the company had no revenues and incurred net losses of $30,000 and $842,125 respectively. Such net losses represent primarily expenditures incurred by the company for start up activities and the Initial Public Offering that was completed Sept. 17, 1990.

Auto Depot Inc. intends to sign two leases in Florida in the immediate future. The company plans to open its first warehouse stores in early 1991.

Auto Depot will offer a wide selection of quality, brand-name automotive merchandise at everyday low prices to retail and commercial customers. Auto Depot warehouse stores will average approximately in size 55,000 square feet and will carry an inventory of approximately 17,000 stock keeping units (items), including automotive accessories, batteries, maintenance and repair parts, sound systems, tires, and custom wheels. Each Auto Depot warehouse store will have a fully equipped automotive service center, staffed with certified technicians, for complete automotive service and installation.

YORK, PA. (NOV. 14) PR NEWSWIRE - Emons Holdings, Inc. (NASDAQ: EMHO) today announced that its board of directors at a meeting held today voted to omit the regular semiannual dividend of $.07 per share on its $.14 cumulative convertible preferred stock which would ordinarily be payable Jan. 2, 1991. The dividend is cumulative and, therefore, would have to be paid before any dividends on the company's common stock could be paid in the future.

Robert Grossman, chairman and president, stated that the board took this action because current economic conditions have had a negative effect on the company's financial results. Conservation of cash and its investment in revenue producing projects during these times is extremely important to the future of the company and all of its shareholders. The board will consider declaration of any dividend arrearages when business conditions and the company's results warrant such action.

Emons Holdings is a transportation services company headquartered in York that has three primary business groups: the Transportation Equipment Services Group which manages, leases, brokers and repairs transportation equipment, the Railroad Group which operates short line railroads and the Logistic Services Group which assists companies with their distribution needs.

Emons Holdings' shares of common stock and convertible preferred stock are traded in the over-the-counter securities market and the common shares are listed on NASDAQ.

HOUSTON (NOV. 14) PR NEWSWIRE - American National Petroleum Co. (NASDAQ: ANPC) reported a net loss of $1,106,000 (16 cents per common share) for the three months ended Sept. 30, 1990 as compared to a net income of $196,000 (3 cents per common share) for the three months ended Sept. 30, 1989. The net loss for the three months ended Sept. 30, 1990 was due primarily to the recognition of $1,225,000 of expenses when the company agreed to settle a securities lawsuit which had been pending against the company since 1985. The plaintiffs are limited partners of three oil and gas limited partnerships for which the company had acted as one of two general partners. The settlement, which is subject to court approval, provides for the purchasers of the limited partnership interests to be certified as a class and for the company to pay $500,000 in cash to the class members.

The company will also form a new limited partnership and contribute to the new partnership proved developed and proved undeveloped oil and gas properties which an independent petroleum engineering firm has estimated to have future net revenues, discounted at 10 percent using escalated pricing, of $1,008,271.

The settlement will not be finalized until early 1991. The net loss for the three months ended Sept. 30, 1990 was offset by: (a) a decrease in depletion cost; (b) a decrease in interest expense; and (c) an increase in crude oil prices, but these developments were partially offset by decreased sales of oil and lower gas prices.

Revenues for the third quarter of 1990 were $2,855,000 compared to $5,278,000 for the 1989 period. During the first quarter of 1990, the company changed to the equity method of accounting for its natural gas pipeline, which previously had been reported on a consolidated basis in the company's financial statements. The effects of the accounting change resulted in lower revenues and expenses being reported in the 1990 third quarter period as compared to 1989 when $2,222,000 of revenues were attributable to the pipeline. Revenues for oil and gas production in the third quarter of 1990 were $124,000 less than the third quarter of 1989.

American National Petroleum Co., a Houston, Texas based company, is engaged in the acquisition of oil and gas producing properties and other energy related transactions.

#90318p6880 11/14/1990 ~PR Newswire

CALGARY, ALBERTA (NOV. 14) PR NEWSWIRE - Construction of the Iroquois Gas Transmission System will bring substantial economic and environmental benefits

to Canada and North America, TransCanada PipeLines President and Chief Executive Officer Gerald J. Maier said today.

Maier applauded the unanimous decision of the United States Federal Energy Regulatory Commission to permit construction of the project, in which TransCanada holds a 29 percent interest.

''Natural gas demand is growing because gas is a competitively-priced, environmentally-benign, secure long-term source of energy, with wide application to electrical power, transportation, residential, commercial and industrial uses. The $1 billion per year in export sales generated by the Iroquois system will strengthen Canada's competitiveness, generate capital investments and stimulate much-needed economic growth,'' Maier said.

''Canadian gas exports to the U.S. Northeast began in the mid-Sixties, with significant increases throughout the Eighties. Growing demand for gas from our western basin will encourage exploration and development of new reserves. This activity supports service and supply jobs and manufacturing orders across the country. The gas discoveries made and produced will bestow greater security of energy supplies on Canada,'' Maier noted.

''The Iroquois system will displace 30 million barrels of foreign oil imports into the United States per year and reduce sulphur emissions into the air by 75,000 tons. Canadian natural gas has an important role to play in reaching North American clean-air objectives and mitigating cross-border acid rain.''

The U.S. $583 million pipeline will carry Western Canadian natural gas on a 575-km route from Iroquois Ontario to Long Island New York. The 575 million cubic feet per day of natural gas carried on the system will be distributed in New York, Connecticut, Massachusetts, Rhode Island, New Hampshire and New Jersey. It will provide natural gas for industrial and commercial uses, heat for some 1.5 million homes and electric power generation.

NEW YORK (NOV. 14) PR NEWSWIRE - The appointment of Herbert B. Gordon as vice president and associate general counsel of Teachers Insurance and Annuity Association-College Retirement Equities Fund (TIAA-CREF) was announced today.

Gordon will have responsibility for relationships with state regulatory agencies and legislatures on behalf of the $85 billion TIAA-CREF retirement system, according to Charles H. Stamm, executive vice president and general counsel. The appointment is effective Dec. 17, 1990.

Gordon is currently vice chancellor of the State University of New York in

charge of public and governmental affairs for the 64-campus system.

TIAA-CREF, ranked as the world's largest retirement system, serves the pension needs of 1.4 million participants in 4,400 colleges, universities, independent schools and research organizations. TIAA also is a major life and disability insurer for the education community.

Gordon joined the SUNY system at its headquarters in Albany, N.Y., in 1964 as a land acquisition attorney. He became director of the program the following year and in 1972 was named assistant vice chancellor for capital finance and administration.

In 1975, Gordon was named vice chancellor for governmental relations and assigned responsibility for liaison with New York State Executive Office and State Legislature. He also represented SUNY with state and federal agencies and the New York Congressional delegation. In 1988, university relations, covering communications, alumni relations and development, was added to his responsibilities.

Gordon received his bachelor of arts degree from New York University and his LL.B and J.D. law degrees from Albany Law School, Union University.

NEW YORK (NOV. 14) PR NEWSWIRE - Bruce J. Klatsky, president and chief operating officer of Phillips-Van Heusen Corporation (NYSE: PVH), today named Allen Sirkin chairman of a powerful new marketing entity to be called The PVH Apparel Group. The mission of the PVH Apparel Group, which already includes the dominant shirt supplier to America, is now to become the dominant tops marketer.

The PVH Apparel Group will consist of four corporate divisions, Somerset Knitting Mills, The Van Heusen Company, Pickwick Private Label and The Designer Group which markets and manufactures Geoffrey Beene, Etienne Aigner and Cezani shirts. Somerset Knitting Mills is America's largest sweater operation.

Sirkin was previously president of both The Van Heusen Company and The Designer Group. Reporting to him in his new capacity are Michael Culang, president of Somerset Knitting Mills, and Robert Crocco, president of Pickwick.

Mark Weber, who is currently corporate vice president of marketing and product development for Phillips-Van Heusen Corporation, retains this title and reassumes the presidency of The Van Heusen Company.

Weber, who will now report to Sirkin, had been president of the Van Heusen branded shirt operation for three years fro 1985 to 1988.

Also reporting to Sirkin are Elliott Sisking, senior vice president, finance, and Art Heffner, executive vice president of operations. The president of The Designer Group will be announced shortly.

Klatsky stated that the position of chairman affords the corporation a unique marketing opportunity to embark on its next stage of growth in the wholesale apparel market. "Van Heusen," he said, "is currently the leading shirt manufacturer in the U.S. We are confident that in positioning the Somerset operation under Sirkin's proven leadership we will become the dominant 'tops' marketer as well."

Sirkin will report directly to Klatsky.

WEST PALM BEACH, FL (NOV. 14) PR NEWSWIRE - CV Reit, Inc. (NYSE: CVI), a real estate investment trust, today reported results for the third quarter and nine months ended Sept. 30, 1990.

For the third quarter, the company experienced a net loss of $551,000 or $.08 per share on revenues of $5,443,000 compared to net income of $2,360,000 or $.33 per share on revenues of $6,127,000 in the like quarter last year.

Nine-month net income was $3,130,000 or $.43 per share on revenues of $17,434,000 compared with net income of $7,594,000 or $1.05 per share on revenues of $18,621,000 in the fiscal 1989 period.

Per-share results were adjusted retroactively for the 5 percent stock dividend declared May 8, 1990.

Alvin Wilensky, president and chief executive officer, stated that "the 1990 earnings decline was primarily attributable to an approximate $2 million provision for losses recorded in the current year's third quarter and reduction in interest income resulting from an increase in non-accrual loans." At Sept. 30, 1990, there were $38.5 million of non- performing loans as compared to $30.5 million at the end of last year's third quarter.

TULSA, OK. (NOV. 14) PR NEWSWIRE - T/SF Communications Corp. (AMEX: TCM) today announced operating results for the third quarter and first nine months of 1990. The company stated that it lost $408,000, or 7 cents per share of common stock, on revenues of $23,598,000 for the third quarter of 1990. This compares to earnings of $260,000, or 5 cents per share, on revenues of $18,112,000 for the third quarter of 1989. For the first nine months of 1990, the company lost $844,000, or 15 cents per share, on revenues of $66,713,000, as compared to earnings of $366,000, or 11 cents per share pro forma, on revenues of $53,751,000, for the first nine months of 1989.

The primary reasons for the decline in earnings were the depreciation and amortization associated with Marks-Roiland communications, which became part of the company in January, 1990, and continued significant losses from the company's Shopper's Guide unit, particularly its commercial printing division. These losses were partially offset by improvements in the company's information, daily newspaper and trade publishing divisions and reduced interest costs because of debt repayments.

G. Douglas Fox, chairman and chief executive officer of T/SF Communications, stated, "The problems at Shopper's Guide, which began in the second half of last year, continued and were further hurt by the softening northeastern economy which is slowing its recovery. While economic conditions are likely to hamper any recovery in the last part of this year and well into 1991, we are continuing our efforts to streamline and improve the Shopper's Guide operations. Even with lower earnings, our operating cash flow (meaning earnings before depreciation, interest and taxes) was $1,675,000 for the third quarter and $5,297,000 for the first nine months. This compares to operating cash flow of $2,376,000 for the third quarter and $6,587,000 for the first nine months of 1989."

T/SF Communications is a diversified communications company owning a daily newspaper in Tulsa, Okla., several free distribution shopper-newspapers in New Jersey, New York and Pennsylvania, five trade magazines, a specialty trade publishing company and an information services company.

#90318p6893 11/14/1990 ~PR Newswire

DENVER (NOV. 14) PR NEWSWIRE - Atlas Corp. (NYSE: AZ) today reported a net loss of $688,000, or 12 cents per share, for the first quarter ended Sept. 30, 1990, compared to a net income in the first quarter of last year of $607,000, or 10 cents per share. The 1989 quarter included $355,000 from discontinued operations and an extraordinary credit. The current quarter's results reflect a reduction in depreciation expense in the amount of $220,000, as a result of

an updated and revised estimate of the life of certain assets based on estimated ores to be processed through the company's Gold Bar Mill.

Total revenues for the first quarter of fiscal 1991 were $5,955,000, compared to revenues of $7,037,000 for the comparable quarter last year. Mining revenue was $5,489,000 in the first quarter of fiscal 1991, compared to $6,891,000 in the first quarter of fiscal 1990.

The decrease in Atlas' mining revenue for the quarter resulted from a decrease in production and a lower average gold price realized. During the quarter 14,342 ounces of gold were produced, compared to the 16,286 ounces produced last year. The average gold price realized by Atlas during the first quarter of fiscal 1991 was $383 per ounce, compared to $423 per ounce in the comparable quarter of fiscal 1990.

Operations at the Gold Bar Mill during the quarter were adversely affected by start-up problems with the new refractory ore circuit. Higher processing costs for the refractory ore, lower than anticipated recovery rates as a result of the new circuit's less than satisfactory start-up and other transitional costs increased production costs to above planned levels. However, processing stockpiled refractory ores made it possible for Atlas to continue production until ore mined from the Gold Bar satellites could be delivered to the Mill. Oxide ores from the Goldstone deposit are now being delivered to the Gold Bar Mill, and the company expects to return to satisfactory levels of production and lower cash costs.

Atlas sold forward 6,000 ounces of gold per month for October through December 1990 at an average price of $382 per ounce. For January through June 1991, Atlas has sold forward 2,000 ounces of gold per month at an average price of $415 per ounce.

Permitting efforts at the Grassy Mountain project progressed during the quarter with the completion of the scoping process and the continuation of baseline data collection. Management is currently reviewing the option of developing an underground mine, or decline, that would accelerate access to a high grade ore zone. This zone contains 100,000 tons of ore with an average grade of 1.5 ounces of gold per ton. Using the decline would improve the already attractive overall economics of the Grassy Mountain project by increasing cash flows in the early years, therefore reducing the amount of financing required and shortening the payback period. Management is pleased with the results of the preliminary studies and expects to reach a decision regarding this option in the near future.

On Oct. 1, 1990, the Supreme Court refused to hear a joint petition for appeal of a federal court ruling regarding governmental cost sharing on the clean-up of uranium tailings generated by Atomic Energy Commission contracts. Atlas had participated in this effort with regard to its Moab, Utah, uranium site. The ruling, while disappointing, does not affect Atlas' planned reclamation or

associated costs. When the facility was closed in 1987, Atlas accrued $17.4 million for 100 percent of the shut-down and clean-up expenses based on a reclamation plan submitted to the Nuclear Regulatory Commission. The Court's decision has no affect on the expected cost of the reclamation. The Nuclear Regulatory Commission is expected to review Atlas' reclamation plans by mid-1991. While the legal options regarding this issue have been exhausted, the company is hoping for equitable treatment through pending legislation.

Atlas is a mining company whose primary business is gold exploration and production. The company has exploration efforts underway in several western states, with significant gold discoveries in Nevada and Oregon. The company currently has the capacity to produce approximately 80,000 ounces of gold per year from its Gold Bar Mill in Nevada and is planning to produce approximately 100,000 additional ounces of gold per year from its Grassy Mountain deposit, beginning by mid-1993.

BOISE, IDAHO (NOV. 14) PR NEWSWIRE - Morrison Knudsen Corp. (MK) (NYSE: MRN) and Joy Technologies Inc., announced today that a joint venture of the two firms has been awarded an approximately $155-million (U.S.) contract to install a landmark flue-gas scrubbing system at an Ontario Hydro power plant.

MK and Joy will install two technologically advanced flue-gas scrubbing systems for two of four 500-megawatt coal-fired units at Ontario Hydro's Lambert Generating Station. Ontario Hydro is Canada's largest electric utlity company.

"We are pleased to be part of the MK-Joy team, utilizing state-of-the-art technology and construction techniques for this project," said William J. Agee chairman and chief executive officer of MK. "As utilities and manufacturers throughout North America implement Canadian and U.S. clean-air legislation, we anticipate MK's full participation in a vigorous and growing market."

The scrubbers will be the first installed in North America employing the advanced Bischoff wet scrubber process technology. Joy Technologies is the exclusive North American licensee for the Bischoff system, which is based on sophisticated German technology. The work is scheduled for completion in mid-1994.

It is estimated that the scrubbers will remove more than 90 percent of the sulphur dioxide emissions at the two units. Installation of the scrubbers will be the first initiative by a Canadian utility to comply with the United States and Canadian clean-air legislation and the U.S.-Canadian pact on acid rain.

Morrison Knudsen Corp. is an international design/engineering, construction, environmental, mining and rail systems company.

#90318p6898 11/14/1990 ~PR Newswire

SAN FRANCISCO, (NOV. 14) PR NEWSWIRE - Levi Strauss & Co. today announced that Peter A. Jacobi, president of the company's European division, will assume the newly created position of president -- Global Sourcing. It was also announced that Michael E. Howard, currently president of the Asia Pacific division, will assume Jacobi's European responsibilities.

In his new position, Jacobi will have primary responsibility for management of LS&Co.'s production requirements. He will become a member of the company's Executive Management Committee, and will report directly to Thomas W. Tusher, president and chief operating officer.

"Pete Jacobi's broad experience in the various aspects of our business, early career exposure to our production facilities, and proven management ability make him well-equipped to succeed in this key assignment." said Tusher. "Pete brings a global perspective to the job at a time when apparel manufacturers must carefully manage how they balance domestic and international production."

After joining LS&Co. in 1970, Jacobi worked in a variety of production and merchandising positions, which led to his becoming a Jeanswear vice president and general manager of Regular Jeans in 1980. In 1981, he was appointed president of the Youthwear division.

In 1984, he became executive vice president, The Jeans Company. Jacobi was promoted to president, Mens Jeans, The Jeans Company in 1986; and named president of the company's European division in 1987. He is a native of San Francisco and a graduate of San Jose State University.

As president of the company's European division, Howard will be responsible for the management and development of the company's largest international division. Its businesses are mainly throughout Western Europe, but also include operations in Eastern Europe, Africa and the Middle East.

"Mike Howard possesses the skills and experience to manager businesses in diverse cultures and markets," said Lee Smith, president of Levi Strauss International, to whom Howard will report. "His sensitivity to how Levi Strauss & Co.'s visions and values play out in different parts of the world will also be of particular value in his new, well-deserved position."

Howard joined LS&Co. in 1967 as a management trainee and subsequently held positions in Advertising, Sales and Merchandising. In 1970, he transferred to

Hong Kong where he became general merchandise manager. He later worked as the assistant general manager in Australia, and as the general manager in New Zealand.

Transferred to London, Howard was appointed vice president/general manager for Menswear in 1980. He assumed his current position of president, Asia Pacific Division, in August 1983. Prior to joining LS&Co., Howard graduated from Dartmouth College and served as an officer in the U.S. Navy. He will be based in Brussels, where the company maintains its European headquarters.

Levi Strauss & Co. is the world's largest apparel manufacturer. The company designs, manufactures and markets jeans and casual apparel for men, women and children. In addition to jeans, its products include slacks, shirts, jackets and skirts. With about 31,000 employees worldwide, the company has 39 plants and distribution centers in the United States and another 36 in international locations.

#90318p6901 11/14/1990 ~PR Newswire

NEW YORK (NOV. 14) PR NEWSWIRE - Paced by gains in aerospace and specialty chemicals operations, Sequa Corporation (NYSE: SQA) posted higher levels of revenues and income for the third quarter and nine months of 1990.

For the quarter ended Sept. 30, 1990, sales and revenues from continuing operations rose 14 percent to $543.3 million from $474.5 million in the 1989 quarter. After-tax income from continuing operations advanced to $16.5 million or $1.65 per primary share from $15.3 million or $1.40 per primary share in the same period of 1989. For the current quarter, discontinued operations had no effect on final net income, whereas in the 1989 quarter the results of these operations lowered net income by $0.3 million or 3 cents per primary share. Earnings per primary share are based on 9.6 million shares outstanding in 1990, down from 10.2 million shares a year ago.

Three of Sequa's six operating groups achieved higher sales and operating income for the quarter, with particularly strong results in specialty chemicals and in the company's largest group, aerospace. A 19 percent increase in aerospace sales reflects continued strength at the company's largest business unit, Gas Turbine, as well as an increase at the ARC Propulsion unit. Sales of the Kollsman division declined for the period, as higher shipments of air-combat training equipment were offset by lower avionics and medical equipment sales. Operating income for the aerospace group rose 23 percent, as both Gas Turbine and ARC Propulsion generated sharply higher profits, and the Kollsman division narrowed its loss to near breakeven.

For the machinery and metal coatings group, sales advanced modestly and operating income rose 16 percent. Within the group, the divisions serving the two-piece can industry declined for the quarter, while the auxiliary press equipment unit and the metal coating division posted sharply higher results.

The specialty chemicals unit posted a 47 percent sales gain and a 70 percent increase in operating income for the quarter. The exceptional results for the group reflect advances at both the domestic chemicals unit and the overseas detergent chemicals division. For the latter, a sustained high level of demand for its principal product, TAED, combined with favorable currency movements and the addition of a chemical trading operation to generate substantially improved results.

The financial services group generated higher revenues for the third quarter. Operating income declined sharply as a result of an increased reserve on a leasing asset of the Sequa Capital unit. The transportation and the professional services groups both recorded lower revenues and income for the quarter due to unfavorable operating conditions. For The Valley Line barge transport unit, the third quarter was a period of low demand, declining freight rates and increased fuel costs. Within the professional services and

other products group, only the automotive products unit generated improved results for the period. Nonetheless, other units in the group, notably the ARC professional services business, made important adjustments to adapt to an altered operating environment.

For the nine months of 1990, Sequa recorded sales and revenues from continuing operations of $1.6 billion, up from $1.4 billion in the same period of 1989. After-tax income from continuing operations amounted to $54.5 million or $5.36 per primary share, compared with $53.8 million or $4.94 per primary share in the nine months of 1989. Net income for the 1989 period was lowered by $0.1 million or one cent per share by the results of discontinued operations. These businesses did not affect the 1990 period.

SOUTHFIELD, MI (NOV. 14) PR NEWSWIRE - D.O.C Optics Corporation (NASDAQ: DOCO) of Southfield, announced earnings today for the third quarter and first nine months ended Sept. 30, 1990.

D.O.C Optics Corporation
(Unaudited - $000)

	3 months ended Sept. 30		9 months ended Sept. 30	
	1990	1989	1990	1989
Systemwide sales	$14,386	$12,741	$42,826	$38,290
Revenues	11,568	10,885	34,452	32,845
Net income	$ 71	(157)	411	743
Earnings per share	$ 0.03	$ (0.07)	$ 0.18	$ 0.33

Systemwide sales increased $1,645,000, or 12.9 percent, while revenues rose $683,000, or 6.3 percent during the third quarter. These increases resulted even though 19 fewer stores were in operation at the end of the third quarter this year. Company-owned comparable store sales for the quarter improved 10.5

percent over the previous year.

Net income for the quarter was up $228,000 due to higher royalties from additional franchised stores and increased gains on the sale of franchises over the same period in 1989.

Cost containment continued to be a priority during the third quarter as selling, general and administrative expenses decreased 1.1 percent from last year.

#90318p6906 11/14/1990 ~PR Newswire

TROY, MI. (NOV. 14) PR NEWSWIRE - R.P. Scherer Corporation reported sales of $83 million and operating income of $16.3 million for its second fiscal quarter ended Sept. 30, 1990. These results are an all-time record for any quarter, and 19 percent and 73 percent increases from last year's sales and operating income, respectively.

The sales increase reflects growth in the company's drug formulations and delivery systems segment, most notably in Europe and Japan, where substantial volume increases were even further enhanced by the favorable effects of higher foreign currency exchange rates, and the acquisition of Pharmaphil Corporation in October of 1989. The operating income improvements reflect the margin contributions on increased sales as well as the beneficial effects of a more favorable product mix and the company's successful cost-reduction measures.

A company spokesman stated that "These result are especially pleasing given that the company's second-quarter financial performance has historically been its lowest due to regularly scheduled plant maintenance shutdowns during the quarter."

The company's net loss after taxes of $1.2 million is substantially lower than a loss of $8.0 million in the same period last year. The losses in both periods reflect interest expense resulting from the debt incurred in connection with the acquisition of the company in June of last year. In addition, earnings in both periods were offset by provisions for foreign income taxes.

For the first six months of fiscal 1991, R.P. Scherer reported sales of $165.1 million, a 10 percent increase over the corresponding period of the prior year. This sales increase reflects a 19 percent increase in sales of the company's drug formulations and delivery systems segment, partially offset by a decline in contract research and development and other revenues in the company's contract packaging segment.

Operating income for the first half of fiscal 1991 reached $32.4 million, representing an increase of 49 percent over the same period last year before a non-recurring restructuring charge of $5.4 million in June 1989, in connection with the company's revised business plans. The operating income improvement is attributable primarily to increased sales volumes and product mix changes in the drug delivery systems segment.

The company recorded a net loss of $3.1 million for the first six months of fiscal 1991, which compares favorably to a net loss of $16.7 million for the prior-year period. The net loss for the six-month period last year included $9.6 million in investment banking and other non-operating expenses incurred prior to the acquisition. Income tax provisions for both periods consist principally of taxes on income of the company's foreign subsidiaries.

R.P. Scherer is an international company specializing in the development, manufacture and marketing of advanced drug delivery systems. Scherer's proprietary and patented drug delivery systems optimize the efficacy of drugs by regulating the dosage, rate of absorption, and place of release. In addition to being the world's largest developer and manufacturer of softgels, Scherer's drug delivery range includes the patented Scherersol(R) and Zydis(R) systems. The company operates a global network of 14 facilities in 13 countries.

Zydis and Scherersol are registered trademarks of R.P. Scherer Corporation.

R.P. Scherer is now a subsidiary of RPS Corporation (OTC: RPCPP).

TULSA, OKLA (NOV. 14) PR NEWSWIRE - T/SF Communications Corp. (AMEX: TCM) today announced that the company is offering to purchase up to 500,000 shares of its common stock from its shareholders at a price not greater than $3 nor less than $1.375 per share. The company is conducting the offer through a procedure commonly referred to as a "Dutch Auction." This procedure allows the stockholder to select the price within the $1.375 to $3 price range at which the stockholder is willing to sell its shares to the company. Based upon the number of shares tendered and the prices specified by tendering shareholders, the company will determine the single per share price within that price range (the "purchase price") that will allow it to buy 500,000 shares (or such lesser number of shares as are properly tendered at prices within that price range). All of the shares that are properly tendered at prices at or below the purchase price (and are not withdrawn) will, subject to possible proration, be purchased at the purchase price, net to the selling shareholder in cash. All shares which are tendered and not purchased will be returned to the shareholder.

T/SF Communications Corp.'s shares closed on Nov. 13, 1990, at $1.375. The company said that the offer will commence on Nov. 14, 1990, and will expire on Dec. 12, 1990.

COUDERSPORT, PA (NOV. 14) PR NEWSWIRE - John J. Rigas, president and CEO of Adelphia Communications Corp. ("Adelphia"), (NASDAQ: ADLAC), reported the results of operations for the second quarter which ended on Sept. 30, 1990.

Second quarter results saw record levels of combined revenues and other income which amounted to $66.0 million, and cash flow from operating and other income which amounted to $40.3 million. Adelphia owned or managed for affiliates, cable television systems serving approximately 1,029,000 subscribers at Sept. 30, 1990. Adelphia and its subsidiaries served at Sept. 30, 1990, approximately 750,000 subscribers in its wholly owned cable television systems and 244,000 subscribers in its joint venture cable television systems.

Combined revenues and other income for the second quarter was up 11.3 percent, compared with the same period in the prior year; and cash flow was up 21 percent, compared with the same period in the prior year.

Combined revenues and other income for the quarter ended Sept. 30, 1990, totaled $66.0 million, compared with $59.3 million for the same period in the prior year. Cash flow for the quarter ended Sept. 30, 1990, totaled $40.3 million, compared with $33.3 million for the same period in the prior year. Net loss for the quarter ended Sept. 30, 1990, totaled $33.4 million, or $2.42 per share, compared with a net loss of $37.4 million, or $2.71 per share, for the same period in the prior year.

The ratio of total long-term debt to annualized cash flow for the quarter ended Sept. 30, 1990, was 8.82, compared with 9.67 for the same period in the prior year.

The Class A common stock of Adelphia is traded under the NASDAQ symbol "ADLAC."

#90318p6914 11/14/1990 ~PR Newswire

TACOMA, WA (NOV. 14) PR NEWSWIRE - Two Tacoma solvent recycling companies have been ordered to comply with federal and state hazardous waste management regulations and were fined a total $960,500 for numerous waste violations, the Washington State Department of Ecology today announced.

Lilyblad Petroleum Inc. and Sol-Pro Inc., which are both located at 2244 Port of Tacoma Road, were issued enforcement actions following a two-year Ecology investigation. During the past few years, Ecology inspectors repeatedly informed company officials of the violations, provided technical assistance and gave the firm opportunities to comply with state regulations.

Widespread contamination of the 1.9 acre site is suspected due to improper management of hazardous waste and petroleum products.

Lilyblad was fined $903,000 and Sol-Pro $57,500. The Lilyblad fine is the largest civil penalty ever issued by Ecology.

Ecology Director Chris Gregoire said the penalties are based on the severity and number of violations, failure to comply with past enforcement actions and the need to control illegal operations at the facilities.

Gregoire said Lilyblad handles most of the 8,000 tons of waste processed at the site each year including mineral spirits, acetone, trichlorethane, methylene chloride and MEK (methylethylketone). The company illegally sold hazardous waste that was marketed as fuel for boilers.

A portion of the 1.9 acre Lilyblad site is leased to Sol-Pro Inc. As an operator on the property, Sol-Pro is considered equally responsible for the site's contamination. Lilyblad and Sol-Pro operated as one business until 1987, then separated into two businesses but continued to use the same site. Sol-Pro, acting independently as a solvent recycler, also violated state hazardous waste regulations.

Ecology's enforcement orders require the two companies to take specific immediate and long-term actions that will upgrade the facilities, bring the firms into compliance with hazardous waste management regulations and stop practices which pose environmental threats. The orders also require the companies to address soil and ground water contamination problems on the site.

CONTACT: Maria Peeler, hazardous waste specialists, 206-586-0504, or Ron Holcomb, information officer, 206-459-6149, both of the Washington State Department of Ecology

#90318p6915 11/14/1990 ~PR Newswire

TULSA, OK. (NOV. 14) PR NEWSWIRE - Tribune/Swab-Fox Companies Inc. (NASDAQ: TSFC) today announced operating results for the third quarter and first nine months of 1990. The company stated that it had a loss from continuing operations of $585,000, or 2 cents per share of common stock, on revenues of $23,967,000 for the third quarter. This compares to a loss from continuing operations of $570,000 or 2 cents per share, on revenues of $18,499,000, for the third quarter of 1989. For the first nine months, the company reported a loss from continuing operations of $1,124,000, or 4 cents per share, on revenues of $68,366,000, compared to a loss from continuing operations of $1,082,000, or 4 cents per share, on revenues of $54,679,000 for the first nine months of 1989. In the third quarter of 1989, the company had a gain on sale of a discontinued operation of $2,498,000, resulting in net income, after such gain, of $1,886,000, or 5 cents per share, and $1,438,000, or a 7 cents per share, for the third quarter and first nine months, respectively, of 1989.

On a comparative basis to 1989, the company's T/SF Communications subsidiary, which is 65 percent owned, had lower earnings for the quarter, primarily due to increased depreciation and amortization associated with its Marks-Roiland Communications unit, which became a part of T/SF Communications in January, 1990, and continued losses from its Shopper's Guide unit. Offsetting these losses were gains in T/SF Communications' information services, daily newspaper and trade publishing units and reduced interest costs because of debt reductions. Tribune/Swab-Fox's separate operations were slightly improved, attributable to increased earnings form higher short term investments and a substantial gain on a sale of real estate, partially offset by significant write-offs on several venture capital investments.

G. Douglas Fox, president and chief executive officer of Tribune/Swab-Fox, stated, "The increased losses at Shopper's Guide represent a continuation of the problems which began in the second half of 1989. The softening of the northeastern economy is hurting this unit in attempting to correct its problems. The operations of the other divisions are generally performing satisfactorily."

DENVER (NOV. 14) PR NEWSWIRE - Total Petroleum (North America) Ltd. (AMEX: TPN) announced that at the board of directors meeting held today in New York City, the board has determined to proceed with the proposed spin-off of its oil and gas operations in Canada to its shareholders in a separate public company. The board has instructed management to study the factors involved in implementing the spin-off, which is presently expected to take place sometime during 1991, and to report back to the board at its next regular meeting in February 1991. The spin-off will be subject to satisfactory resolution of a number of tax, corporate and regulatory issues in both the United States and Canada.

Total Petroleum (North America) Ltd. is a petroleum company with refining and marketing operations in the Central United States and exploration and production in Canada. Its shares are listed on the American, Toronto, Montreal and Pacific stock exchanges. TOTAL Compagnie Francaise des Petroles owns approximately 52 percent of the voting shares of Total Petroleum (North America) Ltd.

#90318p6918 11/14/1990 ~PR Newswire

PHILADELPHIA (NOV. 14) PR NEWSWIRE - Reading Co. (NASDAQ: RDGCA) today announced financial results that for the third quarter of 1990 the company had income from continuing operations of $561,000 or $.11 per share vs. a loss from continuing operations of $218,000 or $.04 per share last year. Revenues for the three-month period this year totaled $1,908,000 as compared with revenues of $1,334,000 last year.

For the three months ended Sept. 30, 1990, the company has net income of $1,098,000 equivalent to $.24 per share, as compared with a net loss of $218,000 or $.04 per share in the comparable period last year. Net income in the three months ended Sept. 30, 1990 included a $637,000 or $.13 per share gain from discontinued operations reflecting receipt by the company of a payment in settlement of claim for additional compensation from the 1988 sale of the Energy Group.

Income from continuing operations in the nine months ended Sept. 30, 1990, totaled $6,462,000 equal to $1.30 per share vs. a loss from continuing operations of $1,037,000 or $.21 per share in last year's nine- month period.

Net income for the nine months ended Sept. 30, 1990 totaled $7,099,000 equivalent to $1.43 per share as compared to net income of $17,761,000 on $3.57 per share in the corresponding period last year. Discontinued operations income in the current nine month period totaled $637,000 or $.13 per share vs. $18,798,000 or $3.78 per share last year. Last year's results of discontinued operations reflected the results of operations and the gain from the May 1989 sale of El Paso Refining Co. Ltd.

Commenting on the results, Charles M. Carter, president and chief executive officer said, "Reduced expenses, increased real estate development revenues from our Rutherford Industrial Park joint venture and the Energy Group settlement payment all contributed to the improvement in third quarter results from the corresponding period last year."

Reading recently announced that the company had received gross proceeds totaling approximately $18.4 million from the Redevelopment Authority of the City of Philadelphia and the Pennsylvania Convention Center Authority from the Nov. 9, 1990, sale of certain properties, including the historic Reading Terminal Market and Train Shed for use in the Pennsylvania Convention Center project. The financial results of these sales will be reflected in the company's results for the quarter ended Dec. 31, 1990.

TULSA, OK (NOV. 14) PR NEWSWIRE - T/SF Communications Corp. (AMEX: TCM) today announced that the company is offering to purchase up to 500,000 shares of its common stock from its shareholders at a price not greater than $3 nor less than $1.375 per share. The company is conducting the offer through a procedure commonly referred to as a "Dutch Auction." This procedure allows the stockholder to select the price within the $1.375 to $3 price range at which the stockholder is willing to sell its shares to the company. Based upon the number of shares tendered and the prices specified by tendering shareholders, the company will determine the single per share price within that price range (the "purchase price") that will allow it to buy 500,000 shares or such lesser number of shares as are properly tendered at prices within that price range. All of the shares that are properly tendered at prices at or below the purchase price and are not withdrawn will, subject to possible proration, be purchased at the purchase price, net to the selling shareholder in cash. All shares which are tendered and not purchased will be returned to the shareholder.

T/SF Communications Corp.'s shares closed on Nov. 13, 1990, at $1.375. The company said that the offer will commence on Nov. 14, 1990, and will expire on Dec. 12, 1990.

MIAMI, (NOV. 14) PR NEWSWIRE - Aero Systems, Inc. (NASDAQ: AESM) today announced the signing of an agreement to sell substantially all the assets of its accessory service subsidiary, Air Support International, Inc. ("Air Support"), to Dunlop Aviation, Inc. ("Dunlop") for a cash price in excess of $2 million. Excluded from the sale are the cash and accounts receivable of Air Support totaling $1.1 million.

Dunlop Aviation, Inc. is a subsidiary of BTR PLC, a British public company. The closing, scheduled within 30 days, is subject to a number of contingencies including approval by the board of directors of Dunlop.

Robert G. Holmes Jr., Aero's president stated, "The sale of this subsidiary, acquired in 1984, will enhance the cash position of Aero Systems in this period of worldwide economic uncertainty. For the fiscal year ended Feb. 28, 1990, Air Support produced sales of $4.2 million."

HAUPPAUGE, N.Y. (NOV. 14) PR NEWSWIRE - Graham-Field Health Products, Inc. (AMEX: GFI) and Omnicare, Inc. (NYSE: OCR) today announced the purchase by Graham-Field of the John Bunn Company's pump and compressor product line. Under the purchase agreement, Graham-Field will take over the manufacture and distribution of the John Bunn Company pump and compressor products. The terms of the purchase agreement were not disclosed. Sales of the John Bunn pumps and compressors during Omnicare's most recent fiscal year were approximately $4 million. Irwin Selinger, chairman and chief executive officer of Graham-Field, stated that he was pleased to add the John Bunn name and products to the growing list of Graham-Field proprietary products. He noted that the John Bunn products would be integrated in to Graham-Field's existing manufacturing and marketing facilities and would not be operated as a separate division.

Graham-Field manufactures, markets and distributes approximately 14,000 healthcare products for hospitals, physicians and home use to approximately 12,000 home healthcare, physician and hospital supply distributors, and drugstore retailers and wholesalers.

DALLAS (NOV. 14) PR NEWSWIRE - Comstock Resources Inc. (NASDAQ: CMRE) today announced financial results for the third quarter of 1990.

Revenues for the third quarter were approximately $1 million, compared with $2.3 million in 1989. For the third quarter, Comstock reported a net loss of $75,000 equal to 1 cent per share, compared with net income of $524,000, or 23 cents per share, for the same period last year.

For the nine months ended Sept. 30, 1990, revenues were $3.8 million, compared with $6.6 million for the same period of 1989. A net loss of $712,000, equal to 18 cents per share, was reported, compared to net income of $1,255,000 equal to 55 cents per share, for the same period last year. The net loss is attributable to a $735,000 extraordinary loss from early extinguishment of debt incurred during the second quarter. Before the extraordinary item, Comstock reported net income of $23,000.

"The decrease in revenue is attributable to production declines on the company's waterflood project on the Bryan Woodbine Unit. By year end, Comstock will have created a substantial revenue stream from its Texas Panhandle properties currently being developed which should replace the production from the Bryan Woodbine Unit in 1991," said M. Jay Allison, president and chief executive officer.

Comstock Resources Inc. owns and manages income producing assets in oil, casinghead and natural gas, precious metals and real estate, with subsidiary operations since 1865. Additional information about the company may be obtained by contacting M. Jay Allison, president and chief executive officer, at 5005 LBJ Freeway, Suite 1150, Dallas, Texas 75244, Telephone: 214-701-2100.

DETROIT (NOV. 14) PR NEWSWIRE - Detroit Edison (NYSE: DTE) today announced the highest October electricity sales in the company's history. Total sales of 3.3 billion kilowatthours (kWh) rose 4.4 percent from October 1989.

The month was marked by record October sales in both the residential and commercial customer segments. Sales to industrial customers of 1.6 billion kWh, while not setting an October record, rose 6.1 percent from October 1989.

Specifically, residential sales were 861 million kWh, up 3.3 percent from a year earlier. The October residential sales record was primarily the result of a 1.2-percent increase in customers from a year earlier, a longer billing period and slightly warmer weather.

Commercial sales were up 5 percent to 715 million kWh. The longer billing period and additional customers contributed to the record as well as slightly warmer October temperatures.

An increase in automotive and steel manufacturing sales as compared to 1989 resulted in the increase in industrial electricity sales.

On a year-to-date basis, the company's total sales are 0.4 percent above 1989. Commercial sales for the 10-month period are 2.2 percent higher, while residential sales are 0.5 percent higher and industrial sales remain the same as 1989.

TAMPA, Fla. (NOV. 14) PR NEWSWIRE - Belmac Corporation (AMEX: BLM) today reported its financial results for the quarter ended Sept. 30, 1990.

Belmac posted a net loss of $388,680 for the three months ended Sept. 30, 1990 compared to a net loss of $703,785 for the same period in 1989. This is the lowest quarterly net operating loss the company has incurred since its initial public offering in February, 1988.

Belmac's CEO, Jean-Francois Rossignol, Ph.D., commented "Apparently our efforts to create a more efficient organization have been effective. We are making significant progress, but our task is not yet complete. We need to continue our efforts to reduce expenses in some areas, and we need to begin generating revenues."

Belmac expects to receive final regulatory approval from the French Ministry of Health to market its antihemorrhoidal drug Alphanon(R) in France before the end of 1990. In addition, Belmac has recently announced plans to begin development of a new anti-malarial drug and a new red blood cell substitute.

#90318p6944 11/14/1990 ~PR Newswire

NEW YORK (NOV. 14) PR NEWSWIRE - Woolworth Corporation (NYSE: Z) said it plans to continue a high level of capital spending and a vigorous program of store expansion in 1991. The company also announced new higher financial goals at a meeting of securities analysts here today in the company's headquarters.

The large multinational retailer plans cash capital expenditures of $360 million in its financial year starting Jan. 27, 1991, principally to finance the company's continued expansion of its specialty store operations, the renovation of existing stores and upgrading of electronic checkout and inventory management systems. The funds, expected to come entirely from

internal sources, compare with an estimated $365 million in cash capital spending in 1990.

Approximately 60 percent of the company's planned cash capital spending next year will be used to open a total of 785 new stores, most of which will be in five of the company's most successful specialty formats. The new store openings will be at the rate of "almost one every 11 hours of each day," said Frederick E. Hennig, Woolworth president and chief operating officer. This number of new stores compares with the 735 new stores originally planned for 1990 that was later increased to 825 stores when the company announced an increase in its cash capital spending for 1990.

Harold E. Sells, chairman and chief executive officer, told analysts that the company, which underwent a major restructuring in 1982, is now embarked on a "Phase II" refinement of that earlier strategy which had been marked by the redeployment of assets and a strong push into specialty retailing. Under this new "continuous restructuring," he said, the company is focusing on two principal objectives: "to maximize productivity" from the company's existing store base and to "be more rapid, but also more selective," in the expansion of new store space.

Sells said the greater emphasis on maximizing productivity and more rapid but more selective store expansion was a reflection of changes in the present and prospective retailing environment, including the likelihood of slower economic growth in the early 1990s.

Steps to improve productivity, Sells said, will include more aggressive management of inventory to achieve higher turnover levels and thus obtain a greater return on company assets; a major commitment to the development of more efficient electronic systems, including terminals at specialty store checkout counters; continued cost- containment programs "necessary to compete in the 1990s"; and stepped-up action in closing unprofitable or marginally profitable stores and formats.

Hennig told analysts that in 1989 alone the company closed a total of 412 stores, the largest number in any year since 1982 when the company discontinued its Woolco discount store chain in the United States. "Although store closings probably peaked in 1989, you can expect to see a couple of hundred closings each year in the near future as leases expire or as we close loss or marginal stores that are a drain on profits," he said.

HILLSIDE, ILL. (NOV. 14) PR NEWSWIRE - Stockholders of Wallace Computer Services, Inc. (NYSE: WCS) re-elected two incumbent directors to serve for

three-year terms, at the company's annual meeting held today in its corporate headquarters.

The re-elected directors are Richard F. Doyle, 62, former senior vice president of finance and administration for Texas Oil & Gas Corp. and William E. Olsen, 62, independent consultant and former president and chief executive officer of IGA, Inc.

The third director whose term expired at this meeting, Arthur C. Nielsen Jr., has reached age 71 and was not eligible to stand for re-election under the company's by-laws. Nielsen, former chairman of the board and chief executive officer of A.C. Nielsen Co., had been a Wallace director since June 1984.

In other actions, the stockholders approved the appointment of Arthur Andersen & Co. as the company's independent public accountants for the upcoming fiscal year.

The directors of Wallace Computer Services, Inc. today increased its annual dividend payment to 50 cents per share, an 8.7 percent increase over the previous annual rate of 46 cents per share.

The first quarterly dividend of 12.5 cents per share is payable on Dec. 20, 1990 to shareholders of record on Dec. 3, 1990.

This is the 19th consecutive year that Wallace has increased its dividend and represents the 142nd consecutive quarterly dividend payment by the company.

Wallace Computer Services, Inc. is a leader in the computer services and supply industry. The company's products and services include business forms, commercial printing, computer hardware and software, computer labels and accessories, machine ribbons and other office products.

Products are distributed through Wallace's field sales force, direct mail catalogs and office products distributors. Wallace has sales offices and manufacturing and distribution facilities throughout the United States.

BINGHAMTON, N.Y. (NOV. 14) PR NEWSWIRE - Centuri, Inc. (NASDAQ: CENT), the nation's pre-eminent distributor of outdoor sporting goods and a manufacturer and distributor of modular homes and custom mobile housing, today reported record sales for the three month and nine month periods ended Sept. 30, 1990.

Milton Koffman, Centuri's chairman and chief executive officer, stated, "The company had significantly improved its operating performance in the most recent quarter and is expected to show further improvement in the final quarter of 1990."

Revenues for the third quarter, ended Sept. 30, 1990, rose 16.2 percent to $59,166,000 from $50,916,000 reported a year ago. The net loss was $486,000 or $0.04 per share, compared to net income of $7,000 reported in the same period last year. In the second quarter ended June 30, 1990, Centuri, Inc. reported a loss of $2,245,000, or $0.17 per share.

For the nine months ended Sept. 30, 1990, revenues increased 20.7 percent to $186,566,000, from $154,579,000 reported in the first nine months of 1989. The net loss was $4,114,000, or $0.31 per share, compared to a profit of $309,000, or $0.02 per share for the same period a year earlier.

Koffman commented, "While the soft retail environment resulted in Outdoor Sports Headquarters, Inc. (OSHI) third quarter sales being below what we had anticipated, OSHI returned to profitability in the third quarter. We anticipate further improvement in the subsidiary's performance as additional consolidation expenses associated with the integration of the acquisitions made by OSHI early in the year are eliminated."

Koffman also stated that during the third quarter, Poloron Homes of Pennsylvania, Inc. (Poloron Homes) operated at virtually break even, in spite of the recessionary level of housing starts in its Northeast marketing area. Koffman further explained that Poloron Homes' management has pared back operations and reduced annualized operating expenditures by approximately $2 million from the prior year's levels.

Centuri, Inc., through its wholly owned OSHI, is the pre-eminent distributor of outdoor sports equipment in the country. Poloron Products, Inc., through its wholly owned Poloron Homes of Pennsylvania, Inc. designs, manufactures and distributes modular housing and mobile homes.

BOSTON (NOV. 14) PR NEWSWIRE - Sverdrup Corporation and Goldberg- Zoino & Associates, Inc., a subsidiary of GZA GeoEnvironmental Technologies, Inc. (NASDAQ: GZEA), recently signed a teaming agreement to provide hazardous waste remediation services including U.S. Department of Defense projects throughout New England and the Mid-Atlantic States.

Sverdrup, one of the nation's leading engineering, architectural and construction management firms, offers complete services from offices throughout the target area.

Goldberg-Zoino, which has enjoyed a 20 year working relationship with Sverdrup on numerous projects, is a prominent firm offering environmental sciences and geotechnical engineering, with offices in eight states from Maine to Michigan.

"This teaming agreement is a key strategic element of Sverdrup's new Eastern Group Hazardous Waste Unit," said Sverdrup Vice President Donald N. Weisstuch, general manager of Sverdrup's Eastern Group. "Selecting Goldberg-Zoino as a partner creates a perfect blend of their scientific and geotechnical strengths with Sverdrup's expertise in engineering design and construction management."

John E. Ayres, president of Goldberg-Zoino, notes, "This arrangement creates an opportunity to employ all our engineering and environmental skills on large-scale work over a broad geographic area. We are delighted to expand our excellent working relationship with Sverdrup and provide a full complement of services for public sector clients."

Sverdrup has been remediating hazardous wastes nationally and regionally for the past decade. Under the EPA's Alternative Remediation Contracting Strategy (ARCs) program, Sverdrup is a prime contractor for Superfund remediation assignments in the 15 states between the Mississippi River and the Rocky Mountains.

Sverdrup will also be providing remedial engineering support services for the Massachusetts Department of Environmental Protection's Site Assessment and Remediation Support Services Program.

Goldberg-Zoino has also worked on many sensitive hazardous waste projects, providing efforts from initial investigations through remedial design and construction oversight. These include varied work on nearly 50 National Priority List sites. Goldberg-Zoino has also been working for more than three years on a multi-million dollar contract for environmental services with the Michigan Department of Natural Resources.

Previous Sverdrup/Goldberg-Zoino collaborations include the Massachusetts Bay Transportations Authority's JFK/University of Massachusetts station modernization in Dorchester, Mass., a project that included development of a site-specific remediation plan, obtaining state approval, preparing contract documents, and providing resident engineering services. The firms are also working together for the Massachusetts Water Resources Authority on the $225 million Sudbury Aqueduct Rehabilitation, and the $100 million Inter-Island Tunnel, a part of the Boston Harbor Clean-up.

NEW YORK (NOV. 14) PR NEWSWIRE - Corroon & Black Corporation has announced completion of mergers with three firms.

Henderson & Dreyer, Inc., a retail insurance broker based in Sacramento, Calif., has merged with Corroon & Black Insurance Services, Inc., also of Sacramento. Henderson & Dreyer writes business in a variety of areas, including manufacturing, construction, commercial real estate, auto dealerships, and retail stores. Frank A. Dreyer and Robert M. Henderson will become senior vice presidents of Corroon & Black of Sacramento.

The William Hyndman III Insurance Agency, Inc., of Rydal, Pa., has merged with Corroon & Black/Noyes Services. Both Corroon & Black/Noyes Services and the Hyndman firm are retail insurance brokerage operations specializing in coverages for contractors, environmental and pollution coverages, health care and institutional food processing, hospitality and entertainment, and malt beverage, lumber, and hardware distributors. James W. Noyes will serve as chairman and chief executive officer of both Corroon & Black/Noyes Services and Corroon & Black/Hyndman Agency. William Hyndman III will serve as vice chairman.

Lincoln-Cross Inc., a retirement plan consulting firm based in Nashville, Tenn., has joined the C&B Consulting Group. Lincoln-Cross provides actuarial plan consulting and administrative services to corporate clients across the nation. The firm, founded in 1983, employs approximately 50 people in Nashville and Knoxville, Tenn. and Orlando, Fla. Robert Cross is the chief executive officer of the new subsidiary, and Mark Lincoln is president.

Richard M. Miller, chairman and chief executive officer of Corroon & Black Corporation and chairman of Willis Corroon plc, stated in making the announcement: "We are pleased to welcome these new members of the Corroon & Black team. We are entering a new stage in our company's history, and our investment in future growth is enhanced by the presence of these firms, all of which are outstanding operations. These companies and their people will add significant value to our presence in the insurance marketplace of the 1990s."

Corroon & Black Corporation, now an operating division of Willis Corroon plc (NYSE, PSE: WCG), is headquartered in New York City. Corroon & Black is one of the world's largest full-service insurance intermediaries, providing insurance brokerage, risk management services, reinsurance brokerage, and employee benefits, compensation, and actuarial consulting to individuals, local governments, professions, business, and industry.

LANSDALE, PA (NOV. 14) PR NEWSWIRE - AEL Industries Inc. (NASDAQ-NMS: AELNA) announced today that its AEL Defense Corp. (AELDC) subsidiary has been awarded a $2.7 million contract modification by the U.S. Army Aviation Systems Command (AVSCOM), St. Louis, Mo.

This modification requires AELDC to produce six RU-21H Guardrail V avionics upgrade kits. The contract carries an option for AELDC to produce 13 additional kits which would increase the potential contract value to $8.9 million. The avionics upgrade modernizes communication, navigation and flight instrument subsystems, including cockpit lighting for Army secure lighting.

The production kits will be delivered to the government for installation on the RU-21H aircraft to improve mission performance and supportability.

AELDC's original contract provided for the design, development, modification and testing of the avionics upgrade for the prototype RU-21H aircraft. The majority of the development effort was accomplished at AELDC's Aero facility in East Alton, Ill., while the production kits will be manufactured at AELDC facilities in Lansdale and Butler, Ga.

AEL is a leading supplier of electronic defense systems and subsystems. The company designs and manufactures sophisticated countermeasures, simulation and radar warning receiver systems; installs and integrates electronic and avionic equipment in military aircraft and provides state-of-the-art antenna, microwave and integrated circuit components.

The Class A common stock of AEL Industries Inc. is traded in the over-the-counter market on the NASDAQ National Market System.

MELBOURNE, FL (NOV. 14) PR NEWSWIRE - Scientific Systems Services (SSS) has been awarded a $2.9 million contract from Japan's NKK Corporation to supply computer systems engineering services to NKK Canada for a Continuous Galvanizing Line (CGL), according to SSS President Vincent S. Lamb, Jr.

Under the terms of the contract, SSS, the industrial systems integration division of Computer Task Group (NYSE: TSK), will design and implement a Process Computer System for the continuous hot dip galvanizing line of a new plant being built in Windsor, Ontario, Canada incorporating NKK basic design. SSS will be responsible for transferring NKK process technology to the new computer system as well as for all applications software.

The new Canadian facility will be operated by the DNN Corporation, a joint venture of Dofasco Incorporated of Canada, National Steel Corporation of Pittsburgh, and NKK Corporation of Japan. It will provide high quality, corrosion-resistant steels for demanding end use applications for automotive and other manufacturers.

"The CGL project is strategically important to the three joint venture companies," said Kenzo Hikino, Director of NKK's Iron and Steel Engineering Division. "And we are looking forward to working with SSS. This is the first time that NKK has worked with a North American software company."

Walt Zipperman, SSS Vice President of Sales and Marketing, explained that the SSS Process Control System will be connected with the plant's distributed control system for furnace combustion control; the programmable logic controller for line control; and to the host computer micro computer for coating weight and galvanneal control. A backup system will be provided to perform main system functions in the event of a system failure.

"Other system features," Zipperman said, "include coil tracking and strip temperature control; man/machine interface via terminals on the plant floor and in the computer room; graphic displays and entry screens that enable

operators to monitor and control the CGL; logging and alarm functions that can be documented on plant floor printers; and a communications link to permit requests and messages from the business computer system which SSS is also developing."

According to Lamb, the DNN process control system software will be designed, developed and integrated at the SSS Pittsburgh facility located in Pittsburgh's RIDC Park. The thirty-one month project will be factory-tested in the facility's systems staging area prior to delivery and extensively tested again during and after its installation at the Canadian galvanizing plant.

In order to establish a means to maintain ongoing operations, Hytek closed down its Los Gatos, Calif., facility during the quarter ended Sept. 29, 1990, after selling the assets (including backlog) of that facility in July 1990. The company is continuing a reduced level of operations in its Carson City, Nev., military certified facility. The results reported above reflect gains and one-time costs associated with the sale of assets and consolidation of operations and the use of cash to fund a shareholder trust, which trust has been established to distribute certain proceeds from the sale of assets, including future royalties.

Founded in 1974, Hytek specializes in hybrid microelectronic circuits that are used in military, computer, communications and other OEM applications.

JERSEY CITY, NJ (NOV. 14) PR NEWSWIRE - Wilshire Oil Company of Texas (NYSE: WOC) reported an 84 percent increase in net income and a doubling of the earnings per share for the nine months ended Sept. 30, 1990.

Nine-month revenues increased from $6,438,000 to $7,065,000. Net income for the nine months increased from $363,000, or four cents per share, to $667,000, or eight cents per share.

For the quarter ended Sept. 30, 1990, revenues increased from $2,334,000 to $2,484,000. Net income for the third quarter increased from $62,000, or one

cent per share, to $296,000, or four cents per share. The increase in the third quarter's performance was due to increased production and sales of both oil and natural gas.

The energy crisis in the Middle East increased the price of oil sold by Wilshire in September and will continue to enhance Wilshire's revenues and profits from its existing oil and gas operations in the remainder of 1990.

In addition, Wilshire completed several new exploration wells this year in the United States and Canada which, together with the connection of a new gas transmission line in the Kaybob area in Canada, will result in further increased revenues and profits.

Wilshire is a North American oil and gas exploration and production company with interests in 1,585 producing wells. As part of the company's diversification plan, Wilshire now holds approximately ten percent of the outstanding shares of Jacobs Engineering Group, Inc. (NYSE: JEC).

The 1,035,000 Jacobs shares were acquired at a cost of $4.65 per share compared to the current market price of $23 per share.

#90318p6979 11/14/1990 ~PR Newswire

CHARLOTTE, NC (NOV. 14) PR NEWSWIRE - Interstate/Johnson Lane, Inc. (NYSE: IS) today reported a net loss for its fiscal year ended September 30 of $16.9 million, or $2.49 per share, on revenues of $127.3 million. These results include $10.3 million of non-recurring charges associated principally with corporate restructuring, termination or consolidation of certain fixed income offices, settlement of major litigation, and loss provisions related to several real estate investment partnerships. For the fourth quarter, the company posted a loss of $13.3 million, or $1.97 per share, on revenues of $27.1 million.

Interstate/Johnson Lane remains in a strong financial position to effectively service its customers. "In fact, at September 30 of this year our broker-dealer subsidiary had more regulatory net capital than a year ago -- and nearly $21 million more than is required by the Securities and Exchange Commission," said Parks Dalton, chairman and chief executive officer.

Exclusive of non-recurring charges, the company's quarterly loss was primarily attributable to a major decline in commission revenues from both individual and institutional investors. To address the bottom line impact of this trend, the company today announced several organizational changes designed to enhance its profit potential by increasing the focus on the broker-dealer's retail sales network, eliminating under-performing business units and trimming excess staff. These changes, elimination of substantial losses from discontinued fixed-income operations and significantly reduced costs of ongoing real estate operations are expected to produce major savings.

According to Dalton, "We have taken the dramatic steps necessary to position this firm to be profitable in the not-too-distant future and a viable player in the brokerage industry over the long term. Given the starting point of our strong capital position, all these changes ensure a much cleaner slate as we begin to fortify our valuable retail franchise. The result will be a leaner company with a more focused effort on the sales forces." He noted that, while some of the anticipated savings would be effective in December, many would not be achieved until the quarter ending March 31. "This timetable, and the continuing slowdown in the securities industry, suggest that we may well incur a loss in the current quarter ending December 31," Dalton added.

Highlights of the restructuring plan include the elimination of approximately 75 staff positions in Charlotte and Atlanta, consolidation of four retail branches into more profitable nearby locations and the elimination of the corporate bond dealer desk. Also, the research and corporate finance units of

the company's former capital markets group will be significantly downsized.

UPPER SADDLE RIVER, NJ (NOV. 14) PR NEWSWIRE - Western Union Corporation (NYSE: WU) reported today that its net loss for the quarter ended Sept. 30 was $26.6 million. This compares with a net loss of $13.1 million for the third quarter of 1989.

After giving effect to undeclared dividends on preferred shares, the 1990 third-quarter net loss amounted to 42 cents per common share (based on a weighted average of 92.6 million shares outstanding), compared with a net loss of 47 cents per share (based on a average of 54.5 million shares outstanding) in last year's third quarter. The year-to-year increase in common shares was due mainly to conversions of Western Union Class B Convertible Preferred shares into common shares during the past 12 months.

For the first nine months of 1990, the corporation had a net loss of $72.3 million, which amounted to $1.22 per common share (based on a weighted average of 87.5 million shares outstanding). The net loss reported for the first nine months of 1989 was $18.2 million, or $1.12 per common share (based on a weighted average of 47.2 million shares outstanding).

Total revenues were $145 million for the third quarter of 1990 and $436 million for the first nine months. This compares with 1989 revenue levels of $157 million and $474 million, respectively. The 1989 revenue totals included $4 million for the third quarter and $12 million for the nine months from services that are no longer provided by Western Union.

WESTERN UNION CORPORATION

#90318p6981 11/14/1990 ~PR Newswire

CITY OF INDUSTRY, CA (NOV. 14) PR NEWSWIRE - STOR Furnishings International Inc. (NASDAQ: STOR) achieved a small profit in its second quarter and sharply reduced its loss for the first six months of fiscal 1991 with increased sales in both periods, Harvey G. Knell, chairman of the executive committee, announced today.

For the 12 weeks ended Oct. 12, 1990, sales rose to $18,366,000 from $17,686,000 in the like quarter a year ago. Net income of $81,000, or one cent per share, was reported, compared to net income of $31,000, or one cent per share, in the same quarter last year.

For the 28 weeks ended Oct. 12, 1990, sales advanced to $41,079,000 from $33,950,000 in the corresponding period last year. The gain in part reflects the fact that the company's third supercenter did not begin operating until June 1989. A net loss of $1,557,000 or 26 cents per share, was sustained, as against a loss of $4,071,000 or $1.02 per share, in the first 28 weeks of fiscal 1990.

Knell commented: "We are gratified by the sales growth of all three of our supercenters. On a year-to-year basis, comparable store sales increased in both the first and second quarters, although more modestly in the latter period. Our sales performance at a time when retailers in general are feeling the impact of a sluggish economy is encouraging to us.

"The company continues to lay the foundation for a significantly larger chain of supercenters. Earlier this week, we took an important step in our growth strategy when we completed arrangements for the construction of our fourth supercenter, which will be in Houston, and is scheduled to open in the Spring of 1991."

Knell concluded: "STOR continues to move ahead in several key areas. We have narrowed our losses and strengthened our sales. We have begun our expansion drive and have identified a number of other sites in major metropolitan markets where we intend to proceed once financing can be obtained. The recently announced addition of Richard Clayton as chairman and chief executive officer will strengthen our experienced management team."

STOR Furnishings International Inc. operates high volume supercenters offering a large selection of high quality, affordable home furniture and furnishings, as well as housewares and accessories, available in-stock for customers to take home the same day. It currently operates three 150,000 square foot supercenters in Southern California.

ANNAPOLIS, MD. (NOV. 14) PR NEWSWIRE - Monday night's Second Annual Corporate Support Dinner for the Chesapeake Bay Foundation netted $21,000 for the not-for-profit environmental group. Henry A. Berliner Jr., president of Second National Federal Savings Bank (NASDAQ-NMS: SNFS), chaired the fundraiser for the second year.

"I am extremely pleased to report that in a year of economic downturn, the corporate community responded so generously," said Berliner to the 200 guests at the $150-a-plate dinner held at the Annapolis Marriott Hotel. The theme was "The Return of the Rockfish -- for Good or Just a Visit?"

Gilbert M. Grosvenor, president of the National Geographic Society, presented "The Island," an award-winning, multi-image program.

Others on the agenda included William F. Baker, president and CEO of Chesapeake Bay Foundation, and J. Randall Evans, secretary, Maryland State Department of Economic and Employment Development. The invocation was delivered by the Rev. Dr. John Price, rector, St. Anne's Episcopal Church in Annapolis.

Second National is a $1.8 billion financial institution with 41 branch offices in Maryland, Delaware, Pennsylvania, Virginia, and the District of Columbia.

#90318p6985 11/14/1990 ~PR Newswire

OKLAHOMA CITY (NOV. 14) PR NEWSWIRE - Red Eagle Resources Corp. (NASDAQ: REDX) today reported net income of 8 cents per share or $1,538,000 after provision for income taxes of $898,000 for the nine months ended Sept. 30,

1990, compared to income of only $49,000 for the like period in 1989. Total revenues for the current nine-month period were $25,688,000 compared to $16,469,000 for the like period of the previous year.

Revenues for the three-month period ended Sept. 30, 1989, were 26 percent above those of the comparable period in 1989 as a result of increased contract drilling and oil-field service activity and higher oil and gas revenues. Income from operations increased to $1,030,000 for the three-months ended Sept. 30, 1990, from a loss of $545,000 during the comparable period in 1989. The improvement was due to higher contract drilling profit margins, increased oil and gas production, and a reduction in general and administrative costs.

According to company president, Harry C. Johnson, none of the improvement in Red Eagle's earnings was attributable to higher oil prices. Red Eagle's production mix is about two-thirds natural gas and prices for natural gas were 11 percent lower for the quarter ended Sept. 30, 1990, than for the comparable quarter in 1989. "To put the kindest face on it, incompetence has to run rampant in the highest reaches of government in order for a clean, efficient, and plentiful domestic energy source to sell at one-third the cost of imported oil when that same government is ready to go to war rather than take the steps necessary in order to rectify that paradox," Johnson said.

HAMPTON, N.H. (NOV. 14) PR NEWSWIRE - Revenues of Henley Properties Inc. (NASDAQ: HENP) totaled $18.0 million in the three months ended Sept. 30, 1990, compared with $25.2 million in the July-September period of last year. There was net loss in the latest quarter of $6.3 million, or 31 cents per share, vs. a net loss of $1.2 million, or 6 cents per share, in the corresponding period of 1989.

The revenue decrease resulted primarily from lower residential sales at Coronado Cays, a 1,200-unit waterfront development in Coronado, Calif., whose final units were substantially completed and sold last year. The increased net loss reflected the June sale of Henley Properties' interest in two trash-to-energy facilities, whose income contribution had partially offset the 1989 third-quarter loss.

In the first nine months of 1990, sales increased to $89.4 million from $85.9 million in the corresponding period of 1989, and net income climbed to $71.5 million, or $3.46 per share, from $4.7 million, or 23 cents per share.

The current year's nine-month results include the previously reported $104 million pretax gain on the sale of the interest in the trash-to-energy plants, as well as the sale, in May, of a 90 percent interest in approximately 3,500

acres of land on Hawaii.

Henley Properties has 15 residential, commercial and industrial properties in Southern California, as well as real-estate interests in Hawaii, Michigan, New Hampshire and Wisconsin.

PONTIAC, MICH. (NOV. 14) PR NEWSWIRE - The board of directors for First Federal Savings Bank & Trust (FFSBT) has accepted a letter of intent to sell six branch offices to Old Kent Financial Corporation (NASDAQ-NMS: OKEN) of Grand Rapids, Mich. This action is intended to strengthen FFSBT's overall financial position.

The announcement was made by Leo D. Ottoni, president and CEO of FFSBT and its parent company, First Federal Bancorp, Inc. (FFB). FFB is traded on the American Stock Exchange under the symbol "FFS."

"This action is part of our continuing program to strengthen our financial position by tightening our operations and improving our balance sheet," Ottoni said. "By bringing in more capital, we have taken another major step in our attempt to comply with the new and tougher requirements of the Financial Institution Reform, Recovery and Enforcement Act of 1989 (FIRREA)."

The transaction between FFSBT and Old Kent is subject to regulatory approval, the execution of a definitive agreement and other conditions.

The branches to be sold, with current total deposits of $116 million, are located in: Milford, Highland Township, Plymouth, Walled Lake, Holly, and Marlette, Mich.

The transaction when completed, including the sale of branch real estate, is expected to result in the receipt of approximately $7 million in tangible capital by FFSBT, depending on branch deposit levels at the time of closing.

The branches currently employ 37 people. The sale will reduce FFSBT's work force by almost 9 percent and the number of branch offices to 20.

FFSBT, headquartered in Pontiac, is the fifth-largest thrift institution in Michigan. It currently has 26 branches in six southeastern Michigan counties and employs 394 people. Assets of FFB were $1.19 billion as of Sept. 30, 1990.

FFB also owns and operates Citizens Federal Saving Bank (CFSB) in Jacksonville Fla. CFSB has four branches and employs 40 people.

FFSBT and CFSB are members of the Federal Home Loan Bank System and their deposits are insured up to the applicable limits by the Federal Deposit Insurance Corporation (FDIC).

#90318p6997 11/14/1990 ~PR Newswire

CLEVELAND (NOV. 14) PR NEWSWIRE - Blue Cross & Blue Shield of Ohio (BCBSO) today released third-quarter financial results that support projections for a strong, successful 12 months in 1990.

"At this point, considering familiar seasonal utilization patterns, we are encouraged that the company is on track to meet year-end performance projections," said Kent W. Clapp, BCBSO senior vice president and chief financial officer.

"Specifically, the company anticipates positive net income in excess of $25 million on about $1.5 billion worth of premium and with reserves of about $120

million by year's end."

Seasonal utilization refers to health insurers' common experience of financial losses early in a year followed by improved income in subsequent quarters, largely as a result of hospital inpatient claims tapering off from peak volumes in the first half. The following third-quarter numbers are reported in accordance with Generally Accepted Accounting Principles (GAAP):

- Third-quarter net income rose 27 percent to $10.5 million from $8.2 million a year earlier.
- Premium earned during the third quarter rose three percent to $364.4 million from $355.5 million in 1989.
- For the full nine months, BCBSO had a net loss of $5.0 million on premium of $1.12 billion, compared with a net loss of $1.3 million on premium of $1.06 billion in 1989.
- Reserves for the protection of policyholders were up slightly to $94.7 million at Sept. 30, 1990, versus $94.2 million for the corresponding period in 1989.

Other company statements are filed quarterly with the Ohio Department of Insurance using an alternative accounting system (statutory), which does not recognize capital assets, such as equipment and software, and profits from subsidiaries. Company officials believe GAAP more properly reflects the current status of BCBSO as a going concern.

The company had reported a second-quarter 1990 positive net income of $8.9 million, versus a $9 million loss for the same period in 1989. The good early start was an indication that a strong finish could be projected.

"We look forward to a productive fourth quarter," Clapp said. "Most noteworthy at the outset was BCBSO's financial rescue of the failed Blue Cross of West Virginia plan, commencing Oct. 11. Besides assuring continued coverage for some 270,000 West Virginia subscribers, the affiliation agreement should yield some substantial benefits for us in Ohio as well."

#90318p7003 11/14/1990 ~PR Newswire

PRINCETON, N.J. (NOV. 14) PR NEWSWIRE - The Liposome Company, Inc. (NASDAQ: LIPO) announced today that revenues for the third quarter ended Sept. 30, 1990 were $996,000, as compared to $923,000 for the third quarter of 1989. Collaborative research and development revenues increased $223,000 or 36.4 percent and licensing and other fees increased $11,000, more than offsetting a decrease in interest income of $161,000.

Total expenses for the third quarter of 1990 were $2,886,000, an increase of $413,000 or 16.7 percent over the quarter ended Sept. 30, 1989. Higher costs associated with clinical studies, personnel and patent filings were offset by a decrease in pre-clinical study and recruitment costs. Overall, the net loss for the quarter ended Sept. 30, 1990, increased $340,000, or 21.9 percent over the quarter ended Sept. 30, 1989, to a total loss of $1,890,000. Net loss per share increased $.02 per share from $.11 to $.13 per share.

For the nine months ended Sept. 30, 1990, the company reported a total net loss of $5,549,000. The loss per share for the nine months decreased $.03 per share from $.42 to $.39 per share. Total revenues for the nine months were $3,020,000 versus $2,868,000, an increase of 5.3 percent.

The Liposome Company recently announced the commencement of Phase II clinical trials with its proprietary drug, TLC G-65, for the treatment of disseminated Mycobacterium avium-intracellulare (MAI), an opportunistic infection that eventually strikes 30 percent to 50 percent of AIDS patients. TLC G-65 received an orphan drug designation from the U.S. Food and Drug Administration in July 1990. In pre-clinical trials, TLC G-65 was highly effective against MAI infection. In Phase I studies, completed last month in healthy volunteers the drug was well tolerated. The Phase II clinical trials are designed to establish an effective dose for TLC G-65 and then test the drug in expanded, multi- center studies.

Earlier, in a joint press release with Bristol-Myers Squibb, The Liposome Company announced the initiation of Phase II clinical trials with Amphotericin B Lipid Complex (ABLC) for cryptococcal meningitis, a potentially life-threatening fungal infection that attacks AIDS and other immunocompromised patients. Bristol-Myers Squibb also has undertaken ongoing studies using ABLC against coccidioidomycosis, a serious fungal infection which occurs in both immune-suppressed and normal patients.

The company is continuing to pursue cash sources from licensing agreements for its proprietary products and technology to offset the increasing cash needs of clinical testing and clinical manufacturing, as well as to decrease the need for capital from other sources. Failure on the part of the company to complete such an agreement in the near future will negatively impact the company's ability to continue funding its primary product development activities at the current levels without an adverse near-term impact on liquidity.

The largest company dedicated exclusively to the development of liposome-based pharmaceuticals, The Liposome Company is primarily focused on developing advanced liposomal drugs for the treatment of cancer and serious infectious diseases.

MIAMI (NOV. 14) PR NEWSWIRE - Elexis Corporation (NASDAQ: ELEX) today reported a third quarter 1990 net loss of $135,928, or $.06 per share, compared with a net loss of $370,023 or $.16 per share, reported in the third quarter of 1989.

The net loss for the nine months ended Sept. 30, 1990 was $157,214 or $.07 per share, compared with a net loss of $800,301, or $.36 per share, for the corresponding months last year.

Sales for the third quarter of 1990 were $1,896,556 compared with $1,516,966 reported in the third quarter of 1989. For the first nine months of 1990, sales were $5,929,117 in comparison to $5,157,646 for the same period in 1989.

According to Frank J. Bianco, president and chief executive officer, the company continues to make significant progress toward a turnaround. "The reduction in the net loss reflects the results of cost containment measures implemented during 1989 and modest growth in sales."

The company also reported that it has postponed a common stock offering because of market conditions. The company is currently exploring alternative sources of financing to increase working capital and support future operations.

Elexis Corporation develops, manufactures and markets technologically innovative consumer electronic products for the sports/fitness and pet care markets.

#90318p7023 11/14/1990 ~PR Newswire

OKLAHOMA CITY (NOV. 14) PR NEWSWIRE - CMI Corp. (AMEX: CMX) today announced results for the third quarter and nine months ended Sept. 30, 1990.

For the quarter the company incurred a net loss of $457,000 (4 cents per share) on revenues of $15,370,000. This compares to a loss of $1,850,000 (14 cents per share) on revenues of $18,617,000 for the third quarter of 1989.

For the nine months ended Sept. 30, 1990, the company has incurred a net loss of $1,223,000 (11 cents per share) on revenues of $59,946,000. This compares to a loss of $1,515,000 (13 cents per share) on revenues of $71,946,000 for the nine months ended Sept. 30, 1989.

The losses for the quarter and the nine months are due to lower volume resulting from a soft market in the construction machinery industry during 1990. Additionally, the company has operated under a reduced revenue base since the product line was decreased following the termination of the Caterpillar Manufacturing Agreement, which also included non-compete agreements ranging from two to five years. Expenses were cut in 1989 and into 1990, which accounts for the reduction in losses in 1990 on lower revenues. With an end to most of the non-compete agreements, the product line is being expanded with the introduction of several new highly productive models which should improve the revenue base.

As previously announced on Oct. 25, 1990, the company received a final order and judgment for patent infringement damages in its lawsuit against the Barber-Greene Co. in the amount of $7,294,596. The court stayed execution of the judgment until Nov. 27, 1990 and as a result the company will recognize this judgment in the fourth quarter of this year.

#90318p7027 11/14/1990 ~PR Newswire

PORT HURON, MI (NOV. 14) PR NEWSWIRE - Robert J. Thomson, chairman, president and chief executive officer of Southeastern Michigan Gas Enterprises, Inc. (NASDAQ: SMGS), stated that the company reported a net loss of $1,990,000 for the third quarter of 1990 ($.26 per share), compared to a net loss of $2,848,000 ($.38 per share) for the same period in 1989. Losses in the third quarter are normal and expected for the company's weather-sensitive business.

The improvement in earnings for the quarter is due to increased gas utility customers, increased marketing and transportation revenues, and higher rates put in place by Michigan Gas Company in July 1990.

For the nine months ended Sept. 30, 1990, the company reported net income of $2,783,000 ($.37 per share) compared to $3,841,000 ($.52 per share) in 1989. The decline in net income is the result of recording a $900,000 provision in

June 1990 for possible 90/10 refund payments, discussed below, 5 percent warmer weather than the same period in 1989 and increased operating and maintenance expenses.

As noted above, the company recorded a provision of $900,000 in June 1990 for possible refund payments resulting from the 90/10 rule of Southeastern Michigan Gas Company (Southeastern). The principal amounts in dispute are $859,978; $638,779; and $542,162 for the 12 months ended Feb. 28, 1988, 1989 and 1990, respectively, plus interest accrued from each respective date at 14 percent per annum. Although there is no assurance that it can be accomplished Southeastern is continuing its efforts to settle all litigation in the case by proposing to refund the $900,000 to its customers.

The Michigan Public Service Commission order in June 1990 will have a positive effect on earnings by allowing Michigan Gas Company increased annual revenues of $3,244,000. These rates became effective in mid- 1990, therefore a full year's benefit will be realized in 1991.

The following is a summary of the results for the quarter, year-to- date and 12 months ended Sept. 30:

SOUTHEASTERN MICHIGAN GAS ENTERPRISES, INC.

	1990	1989
Quarter Ended Sept. 30		
Operating revenue	$ 33,481,000	$ 25,170,000
Net income (loss) for common	(1,990,000)	(2,848,000)
Earnings per share(a)	(.26)	(.38)
Dividends per share(a)	.20	.19
Average common shares outstanding(a)	7,644,000	7,482,000
Year-to-date Ended Sept. 30		
Operating revenue	$159,839,000	$152,952,000
Net income for common	2,783,000	3,841,000
Earnings per share(a)	.37	.52
Dividends per share(a)	.58	.55
Average common shares outstanding(a)	7,605,000	7,440,000
12 Months Ended Sept. 30		
Operating revenue	$233,639,000	$219,808,000
Net income for common	6,574,000	7,161,000
Earnings per share(a)	.87	.98
Dividends per share(a)	.77	.73
Average common shares outstanding(a)	7,584,000	7,338,000

(a) -- Adjusted to give retroactive effect to 5 percent stock dividends in May 1989 and May 1990 and a 4-for-3 stock split in January 1989.

Enterprises is the parent company of six wholly owned subsidiaries:

Southeastern Michigan Gas Company (Port Huron); Battle Creek Gas Company (Battle Creek, Mich.); Michigan Gas Company (Three Rivers, Mich.); Southeastern Development Company (Port Huron); Southeastern Financial Services Inc. (Port Huron); and SEMCO Energy Services, Inc. (Port Huron).

Enterprises serves natural gas to approximately 195,000 customers in 20 counties in the lower and upper peninsulas of Michigan through its subsidiaries Southeastern Michigan Gas Company, Battle Creek Gas Company, and Michigan Gas Company.

#90318p7036 11/14/1990 ~PR Newswire

LOS ANGELES (NOV. 14) PR NEWSWIRE - First Executive Corp. (NASDAQ: FEXC), a life insurance holding company, today reported net income for the three months ended Sept. 30, 1990 of $24.0 million or a profit of $.05 per common share. The results include a net realized loss on investments of $122.3 million. For the three months ended Sept. 30, 1989, the company reported net income of $53.2 million or $.47 per share.

Fred Carr, chairman and chief executive officer, said, "We are pleased to report a profit for the quarter, particularly in light of the turbulent financial markets. Reflecting these difficult markets, the value of our total assets are approximately 15 percent below carrying value as of Sept. 30. And we added approximately $75 million to strengthen our securities reserves. Importantly, our strong capital position will allow us to hold our assets to maturity."

Carr added, "The statutory capital ratios of our insurance companies remain strong. For example, the ratio of capital, surplus and MSVR to policyholder liabilities for Executive Life, our largest subsidiary, was 7.3 percent on Sept. 30 as compared to 6.7 percent for the average of the top 25 life insurance companies in the United States at the end of 1989."

Alan Snyder, president and chief operating officer said, "The level of surrender activity continued to subside, and approached historical levels. For example, total surrenders during the month of September were $119 million, an 88 percent decline from the peak month of march 1990. Accordingly, in September we invested more than $600 million of our short-term portfolio into United States treasuries with maturities longer than one year. Excluding this amount, our cash and short-term investments were $1.3 billion at the end of the quarter."

For the nine months ended Sept. 30, 1990, net income was $99.9 million, or $.47 per share. The results include a provision for losses on bonds of $179

million. For the first nine months of 1989, the company had reported net income of $60.1 million or $.40 per share, including a $150 million loss on sale of subsidiary (including tax expense of $38 million) relating to the then-proposed sale of Executive Life Insurance Company of New York, and the cumulative positive effect of a change in method of accounting for income taxes of $55.8 million.

Carr added, "efforts are continuing to improve the company's capital structure including active discussions with our senior lenders, in order to ensure the long-term benefits to all our constituents."

#90318p7038 11/14/1990 ~PR Newswire

CHICAGO (NOV. 14) PR NEWSWIRE - Resort Income Investors Inc. (AMEX: RII) today reported earnings for its third quarter ended Sept. 30, 1990. Net income for the quarter was $1,700,455, or $0.41 per share, based on 4,156,000 shares outstanding, compared to $1,311,006, or $0.32 per share, for the same period last year with the same number of shares outstanding.

Net income for the nine months ended Sept. 30, 1990, was $4,287,703, or $1.03 per share, compared to $5,038,281, or $1.21 per share, a year earlier.

Included in operating results for the third quarter and first nine months of 1990 is the receipt by the company of points and increased interest from the modification of the company's temporary investment. Included in the operating

results for the first nine months of 1989 was the receipt by the company of bonus interest of $578,450 in the second quarter from the early retirement of the company's Laguna Niguel loans made to an affiliated borrower.

The third quarter dividend of $0.375 per share was declared by the board of directors on Oct. 9, 1990, and is payable today to shareholders of record Oct. 22, 1990. Annual dividends of $1.50 per share are guaranteed through Oct. 31, 1991.

Christopher B. Hemmeter, chairman of the company, announced that the company's $14,750,000 demand loan to an affiliated borrower, Laguna Niguel Resort Associates, was repaid with all accrued interest on Nov. 13, 1990.

The company operates as a Real Estate Investment Trust (REIT) under the provisions of the Internal Revenue Code. As such, it is required to distribute to shareholders at least 95 percent of its taxable income each year to continue to qualify as a REIT.

NEW YORK (NOV. 14) PR NEWSWIRE - Health-Chem Corporation (AMEX: HCH) today reported operating results for the third quarter and nine months ended Sept. 30, 1990.

For the three months ended Sept. 30, 1990, revenues were $9,244,000 compared to $9,535,000 in the comparable quarter last year. There was a net loss of $6,580,000, or 93 cents per share, for the quarter as opposed to a net loss of $534,000, or 8 cents per share, for the same period last year. During this period, the company reevaluated its contingent liabilities in connection with certain material pending legal matters and recorded an allowance for possible future losses in the amount of $7,356,000.

For the nine months ended Sept. 30, 1990, revenues were $30,132,000 compared to $31,863,000 for the comparable period last year. There was a net loss of $7,009,000, or 99 cents per share, compared to a loss of $478,000, or 7 cents per share, in the same period of 1989.

In releasing its quarterly results today, the company noted that the recording of $7,356,000 for additional loss contingencies placed the company in violation of certain provisions of its revolving credit facility. The lender, however, has assured the company that it does not intend to accelerate payment of amounts outstanding under the facility. If accelerated, however, there could be a default called under the company's outstanding 10-3/8 percent

convertible subordinated debentures.

The company also reported that domestic sales of its transdermal nitroglycerin patch, which had accounted for 15.8 percent of the company's sales through September, had ceased in September as a result of the Federal Drug Administration's request to Bolar Pharmaceutical Company, Inc., the exclusive domestic distributor of the product, to discontinue shipments until resolution of certain questions with the FDA. It is not presently known when shipments may be resumed.

Health-Chem Corporation manufactures and distributes patented controlled release dispensers for the pharmaceutical industry, along with industrial and health care synthetic fabrics, and dental instruments and supplies.

BETHESDA, MD (NOV. 14) PR NEWSWIRE - Hanger Orthopedic Group, Inc. (NASDAQ: HNGR) today announced its results for the third quarter ended Sept. 30, 1990.

For the third quarter ended Sept. 30, 1990, net sales increased by 47 percent to $4,991,328 from $3,395,217 reported for the quarter ended Sept. 30, 1989. Income from operations for the third quarter ended Sept. 30, 1990 increased by 57 percent to $550,758 from $350,277 for the same period a year ago. As a percent of net sales, income from operations increased to 11 percent from 10 percent. Net loss for the third quarter ended Sept. 30, 1990 was $80,877, or $.01 per share, based on 9,218,370 weighted average common shares outstanding, as compared to a loss of $116,222, or $.01 per share, based on 9,107,258 weighted average common shares outstanding for the quarter ended Sept. 30, 1989. The results for the third quarter ended Sept. 30, 1990 included the results of operations of Scott Orthopedics, Inc. which was acquired by Hanger Orthopedic Group, Inc. in Feb. 1990 and also included non- recurring expenses of $25,000 associated with the payment of a fee for a bank waiver.

Net sales for the nine months ended Sept. 30, 1990 increased to $14,024,327 from $6,767,973 recorded for the seven month period ended Sept. 30, 1989. Income from operations for the nine months ended Sept. 30, 1990 increased from $1,028,662 from $661,469 for the seven month period ended Sept. 30, 1989. Net loss for the nine months ended Sept. 30, 1990 was $743,248, or $.10 per share, based on 9,201,276 weighted average common shares outstanding, compared to a loss of $422,532, or $.05 per share, based on 8,468,694 weighted average common shares outstanding for the seven month period ended Sept. 30, 1989.

On Nov. 8, 1990, Hanger Orthopedic Group, Inc. completed the purchase of substantially all of the manufacturing assets of Ralph Storrs, Inc., a company engaged in the manufacture of orthotic devices and components.

Hanger Orthopedic Group, Inc. is a Delaware corporation that is engaged in providing patient care services and products to the orthotic and prosthetic segment of the rehabilitation health care industry.

TORONTO (NOV. 15) PR NEWSWIRE - Consumer General Inc. today announced that a preliminary agreement of understanding has been reached with ADM Tronics Unlimited, Inc. of Northvale, N.J., for Consumer General to be the exclusive marketing and distribution company for ADM Tronics' new veterinary device called the Vet Sonotron, in the United States.

The Vet Sonotron is a patented electronic device that emits a combination of low frequency audio and radio waves, used in the treatment of inflammatory conditions such as arthritis, solely in veterinary applications. ADM Tronics have obtained patents for Canada and the U.S.

Studies have been conducted by the University of Wisconsin, Madison School of Veterinary Medicine, as well as other independent parties which affirm that the Vet Sonotron has a measurable effect on the treatment of inflammatory conditions with animals.

A formal agreement between Consumer General and ADM Tronics is currently being concluded. Consumer General anticipates the completion and signing of this

agreement, within the next two weeks.

#90318p7061 11/14/1990 ~PR Newswire

NEW YORK (NOV. 14) PR NEWSWIRE - TPI Enterprises, Inc. (NASDAQ-NMS: TPIE) today reported that revenues for the third quarter ended Sept. 30, 1990 rose to $101,310,000, comprising $60,466,000 from TPI Restaurants, Inc. and $40,844,000 from TPI Entertainment, Inc. Revenues for the 1989 third quarter amounted to $98,162,000, with $57,652,000 provided by restaurant operations and $40,510,000 derived from theatre operations. The net loss for the third quarter, after interest, a $750,000 charge for settlement of an Equal Employment Opportunity Commission ("EEOC") complaint and provision for taxes, amounted to $1,613,000, or $.07 per share, compared to the 1989 third quarter net loss of $895,000, or $.04 per share. The EEOC complaint against TPI Restaurants primarily related to events occurring prior to its acquisition by the company.

Revenues for the first nine months of 1990 rose approximately 14 percent above 1989 to $306,338,000, with restaurant operations accounting for $200,007,000 and theater operations providing $106,331,000. Revenues for the first nine months of 1989 amounted to $269,017,000, with $184,850,000 provided by restaurant operations and $84,167,000 derived from theater operations (acquired in February of 1989). Operating income for the first nine months of 1990 rose nearly 34 percent to $15,152,000 from the $11,319,000 reported for the same period the year before. For the first nine months of 1990 the net loss from continuing operations, after interest, settlement of the EEOC complaint, provision for taxes and minority interest amounted to $5,730,000, or $.26 per share, compared to the net loss from continuing operations of $5,288,000 or $.23 per share, for the first nine months of 1989. Including the second quarter results of discontinued operations (primarily a gain of $4,157,000 stemming from the sale of TPI Transmission Services, Inc.), the

1989 nine month net loss amounted to $1,136,000, or $.05 per share.

TPI noted that same-store sales in the company's restaurant subsidiary were up 5.7 percent for the nine month period and operating income was up about 33 percent. TPI Restaurants currently operates 167 Shoney's, 64 Captain D's and 10 other popularly priced specialty restaurants in the southeast.

TPI further noted that on Oct. 31, 1990, its wholly owned subsidiary, Maxcell Telecom Plus, Inc., completed the sale of its permit to construct a celular radio telephone system in the Tennessee 1-Lake Rural Statistical Area for $18 million in cash. Maxcell won the FCC lottery for that cellular telephone market on Oct. 18, 1989. TPI expects to recognize an after-tax gain from this transaction of approximately $.50 per share during the fourth quarter of 1990.

As of the close of the third quarter, TPI Enterprises had purchased 8,960,406 shares out of the 10 million shares authorized by the board of directors in the company's ongoing discretionary stock repurchase program, including 314,000 shares purchased in the Jan. 1-Sept. 30, 1990, period.

#90318p7063 11/14/1990 ~PR Newswire

MIAMI (NOV. 14) PR NEWSWIRE - Eastern Airlines today reported a net loss of $252.8 million for the quarter ended Sept. 30, 1990 after a gain of $212.3 million on the sale of assets and a special charge of $284.8 million as a result of a settlement with the Pension Benefit Guaranty Corporation with respect to the company's fixed benefit pension plans.

Before these two non-recurring items the loss amounted to $180.3 million. This compares with a year-earlier net loss of $185.2 million for the same period, after a gain of $100.3 million.

Eastern said 1990 figures are not directly comparable with year-earlier results due to a March, 1989 strike that drastically reduced the airline's level of operations during most of the year.

Operating revenues for the third quarter, 1990 were $518.3 million, with an operating loss of $141.5 million, vs. $305.7 million and $177.8 million, respectively, for the third quarter, 1989.

Eastern said its third quarter results reflect the dramatic increase in fuel prices and the overall leveling off in airline traffic. The company said fuel costs escalated rapidly during August and September, and by the end of the third quarter fuel had nearly doubled from second quarter levels.

Eastern also said it expects the complement of higher-yielding business vs. leisure passenger to improve substantially in the fourth quarter as a result of its new "corporate rate" product launched Oct. 1, which provides business travelers confirmed first class seats at full coach fares.

The airline said that although it expects continued losses for the remainder of 1990 due to the industry-wide impact of inflated fuel costs, the airline expects to become cash positive during the first quarter of 1991.

For the nine months ended Sept. 30, 1990, operating revenues were $1.621 billion and the airline posted a net loss of $424.9 million, after a gain of $361.3 million on the sale of assets and after the $284.8 million charge in connection with the PBGC settlement. For the same period in 1989, operating revenues were $1.016 billion, with a net loss of $569.7 million, after gains of $377.3 million.

Operating losses for the first three quarters of 1990 were $355.3 million, vs. $631.6 million for the same period in 1989.

The airline flew 4.2 billion revenue passenger miles during the third quarter, with a load factor of 62.71 percent. For the first nine months of 1990 revenue passenger miles were 13.2 billion, with loads of 61.94 percent.

During the first nine months of 1989 Eastern flew 7.7 billion revenue passenger miles with a 62.29 percent load factor.

AUSTIN, TEXAS (NOV. 14) PR NEWSWIRE - Prime Medical Services Inc. (Prime) (NASDAQ: PMSI) today announced results for the third quarter of 1990. For the three months ended Sept. 30, 1990, revenues decreased to $3,174,000 from $3,498,000 for the same period in 1989. The net profit amounted to $393,000 or 5 cents per share, versus a net loss of $1,409,000 or 17 cents per share in 1989.

For the first nine months, Prime reported revenues of $10,173,000 versus $10,413,000 in 1989. A net loss of $258,000 or 3 cents per share compares to a loss of $2,961,000 or 35 cents per share in 1989.

The profit for the third quarter, 1990, included a non-recurring gain of $1,287,000 for the sale of the stock held by Prime in Employee Pharmaceuticals Inc., partially offset by approximately $470,000 of other non-recurring expenses related to insurance and taxes.

Prime Medical Services Inc. is engaged in providing non-medical management services to 47 cardiac rehabilitation clinics and seven imaging centers in 13 states.

BOSTON (NOV. 14) PR NEWSWIRE - Chancellor Corporation (NASDAQ: CHCR) reported revenues for the three and nine months ended Sept. 30, 1990 decreased to $12.7 million and $37.1 million, respectively, as compared to $14.2 million and $43.8 million for the same periods in the prior year. Although the company reported operating income of $108,000 for the three months ended Sept. 30, 1990, as compared with operating losses of $580,000 for the same period in 1989, after reserving for portfolio losses the company recognized a net loss of $239,000 or 6 cents per share for the three months ended, and a net loss of $10.1 million or $2.67 per share for the nine months ended, Sept. 30, 1990. This compares to net losses of $199,000 or 5 cents per share, and $975,000 or 26 cents per share, for the same periods in 1989.

Stephen G. Morison, president and chief executive officer, stated that, "(d)uring this recent quarter, the company finally began to see positive results of our efforts throughout this year to reduce operating costs while we rededicate ourselves to the success of our core business of leasing transportation equipment. I am encouraged by the company's third-quarter performance and believe that, with continued progress in managing our costs and expanding our new lease origination base, the company will be very well positioned to regain and maintain profitability."

Founded in 1977, Chancellor Corporation has, in recent years, concentrated on the leasing of transportation equipment. It is also involved in the leasing of aircraft, communications, medical, agricultural and other equipment. Chancellor Corporation common stock is listed on the National Association of Securities Dealers (NASDAQ) National Market System (symbol "CHCR").

#90318p7080 11/14/1990 ~PR Newswire
RALEIGH, N.C. (NOV. 14) PR NEWSWIRE - Acton Corporation (AMEX: ATN) Common Stock, $3.75 Cumulative Preferred Stock (AMEX: ATNPR), today announced a net loss of $6,230,808 for the three months ended September 30, 1990 or $2.59 per share (both primary and fully diluted) as compared to a net income of $958,934 or $.21 per primary share ($.15 fully diluted) for the three months ended September 30, 1989. For the nine months ended September 30, 1990 the Company reported net losses of $5,812,560 or $2.73 per share (both primary and fully diluted) compared to income of $22,635,736 or $8.14 per primary share ($5.84 fully diluted) for the first nine months of 1989. All per share computations are after consideration of the Company's preferred stock dividend requirements.

The 1990 losses were primarily the result of the general decline in real estate markets, which necessitated writedowns totalling $4,297,000 of the carrying value of real estate held for development and sale, combined with a writedown of $1,500,000 to reflect what the Company believed to be other than temporary declines in the value of its fixed maturity portfolio. There were no major sales of assets in the first nine months of 1990.

The 1989 earnings were primarily atttributable to the gain of $11,910,266 from the sale in February of the Company's cable television system located in Beaufort County, South Carolina and the $11,252,223 of gain realized from the sale of its investment in Land of Lincoln Savings and Loan in conjunction with the acquisition of Land of Lincoln by Household International.

In addition to the impact of the above mentioned writedowns, the Company's reported stockholders' equity was reduced further during the third quarter of 1990 due to declines in the market value of the equity securities portfolio totalling $7,075,243. These factors, together with the declaration of $782,792 of dividends on the Company's preferred stocks and repurchases of the Company's stocks totalling $312,184, have caused the decline of reported stockholders' equity from $47,101,546 at June 30, 1990 to $32,700,519 at September 30, 1990.

Acton Corporation is primarily engaged in specialized automobile insurance underwriitng, furniture manufacturing, real estate development and the operation of a cable television system.

#90318p7086 11/14/1990 ~PR Newswire
PLAINVIEW, N.Y. (NOV. 14) PR NEWSWIRE - Astrex, Inc. (AMEX: ASI) announced today its comparative earnings for the three months and six months ended Sept.

30, 1990, and Sept. 30, 1989, which are set forth in the table below.

On Sept. 18, 1990, the company announced that Ronald S. Kass, the president and a director of the company, had caused the company's wholly owned subsidiary, Progress Electronics Co., Inc. to make certain payments to various third parties for his personal expenses. Kass has acknowledged causing such payments to be made and has agreed to make prompt and full restitution to the company. With the assistance of Deloitte & Touche and other professionals, the audit committee of the board of directors is currently in the process of determining the amount of such payments. The audit committee, with that assistance, has currently determined that the amount of such payments will probably be between $150,000 to $250,000. Kass had deposited cash and marketable securities totaling approximately $150,000 into an escrow account in the name of the company in connection with his agreement to provide restitution. The audit committee has instructed the escrow agent to release the funds to the company towards restitution and to special counsel for certain legal costs relating to this matter except for $20,000 as a reserve toward certain other expenses.

#90318p7093 11/14/1990 ~PR Newswire

DALLAS (NOV. 14) PR NEWSWIRE - MCorp today reported a net income of $510 thousand in the third quarter of 1990. Net income of $1.5 million was reported in the third quarter of 1989. MCorp's third quarter income was attributable to income from continuing operations of $1.5 million offset by a loss from discontinued operations of $1.0 million. Income from continuing operations, which reflects the operations of the combined parent companies,

was principally due to net interest income of $7.4 million and other income of $.2 million partially offset by non-interest expenses of $5.8 million. The loss from discontinued operations was primarily the result of provisions for possible loan losses at certain subsidiary banks. MCorp is currently the subject of a voluntary reorganization case under Chapter 11 of the United States Bankruptcy Code.

The results of operations of MCorp's former subsidiary, MVestment Corp., which was sold in February 1990, and the five remaining bank subsidiaries are reported in MCorp's financial statements as discontinued operations because management of MCorp has concluded that the sale of these subsidiaries was and is in the best interests of the creditors and stockholders of the company and will maximize the value of the subsidiaries to the estate of MCorp.

During the first quarter of 1990, MCorp completed the sale of MVestment Corp., a trust and investment subsidiary whose subsidiary, MTrust Corp, had statutory banking powers. MCorp realized a gain of $96.3 million on the transaction. Recognition of the gain on the sale of MVestment has been deferred pending completion of the sale of MCorp's remaining bank subsidiaries. The gain will be added to or netted against any gain or loss on the sale of those remaining banks.

Net interest income, the amount by which interest earned exceeds interest paid was favorably affected in the third quarter of 1990 by the non-accrual of interest on approximately $470 million of the company's unsecured debt for borrowed money in the bankruptcy cases. Non interest expenses of $5.8 million included professional fees of $1.7 million, expenses on assets held for sale of $.9 million and personnel expenses of $2.8 million, which included the termination of several employees under MCorp's bankruptcy court approved severance plan.

The income reported in the third quarter of 1989 principally reflected income from discontinued operations of $6.7 million partially offset by a loss of $5.2 million from continuing operations. The loss from continuing operations was primarily attributable to expenses incurred on assets held for sale of $3.9 million and professional fees of $3.6 million which were partially offset by $4.1 million of interest income.

#90318p7096 11/14/1990 ~PR Newswire

OKLAHOMA CITY (NOV. 14) PR NEWSWIRE - Devon Energy Corp. (AMEX: DVN) today reported 1990 third quarter and first nine months net earnings that were markedly above year-ago levels. The company said it expects fourth quarter results to improve even more.

Net earnings for the three months ended Sept. 30, 1990, were $757,000, up 1,065 percent from the $65,000 for the comparable 1989 quarter. On a per common share basis, the company's $0.02 profit was 200 percent better than the $0.02 loss reported for the 1989 third quarter. The difference in percentage gain for absolute versus per share earnings resulted from the payment of $343,000 more in preferred stock dividends during 1990 than in the 1989 period. Preferred stock dividends are not considered in calculating absolute earnings, but are deleted when calculating earnings per common share.

Net earnings of $1,091,000 for the nine months ended Sept. 30, 1990, were 650 percent ahead of the $198,000 loss recorded in the comparable prior year period. On a per share basis, however, the company's loss widened to $0.08 from $0.05. Again, the difference in absolute versus per share earnings resulted from the payment of $1,746,000 in preferred stock dividends in the 1990 period, versus $239,000 in the 1989 period.

A $1,016,000 rise in total revenues was the largest contributor to the improved results for the third quarter. A 24 percent gain in gas production combined with 34 percent gain in oil prices led to the revenue increase. For the nine month period, a $3,159,000 decrease in pre-tax expenses was the primary reason for the improved results.

Total assets rose 26 percent to $123,048,000 at Sept. 30, 1990, from the $97,916,000 reported at year-end 1989. Two acquisitions totalling $14,600,000 and approximately $7,200,000 in drilling and development expenditures involving the company's coal seam gas project provided most of the increase.

Devon Energy Corp. is an independent energy company engaged primarily in oil and gas property acquisitions, exploration and production activities, and oil and natural gas remarketing. The company's common and preferred stock trade on the American Stock Exchange under the symbols DVN and DVN.Pr, respectively.

DALLAS (NOV. 14) PR NEWSWIRE - Dallas-based United Medicorp, Inc. (NASDAQ: UMCI), announced today that, for the three months ended Sept. 30, 1990, expenses exceeded revenues by $2,374,173. Net revenue for the period totaled $165,735.

During the third quarter of 1990, the dollar value of medical insurance claims processed by United Medicorp increased by 167 percent when compared to the second quarter of 1990, reaching $10,448,000. The company expects that most of these claims will be collected in, and should generate fee revenue for, the

fourth quarter. The company made significant third quarter expenditures to carry out a nationwide marketing campaign which included media advertising and telemarketing. The campaign promoted both UMC's basic claims management and collection service and its backlog collection service. As a consequence of this campaign, management believes that revenues will increase during the fourth quarter of 1990.

In addition, United Medicorp devoted extensive efforts and funds towards enhancing its computer systems, claims processing, management and collection services and customer reports to better serve its clients, especially the targeted hospital market. The company intends to implement these product enhancements during the fourth quarter. During August, 1990, United Medicorp completed a public offering of its common stock which generated net proceeds to the company of $8.4 million. The proceeds have been used to pay off short-term debt, to fund the national marketing campaign, and to provide working capital to fund ongoing development of the company's computer systems and services.

Third quarter revenues were less than those of the second quarter primarily due to the completion of a substantial backlog collection contract in June. Subsequent backlog collection projects were not initiated until September, when the effects of the company's new marketing campaign began to produce positive results. According to G. Ray Miller, chairman and CEO of United Medicorp Inc., "With the completion of United Medicorp's product enhancements and the favorable results of our recent marketing efforts, the company is well-positioned to pursue its objective of profitability in early 1991."

ST. HELENA, CALIF (NOV. 14) PR NEWSWIRE - James Biggar, chairman and chief executive officer of Nestle Enterprises announced the appointment of Walter T. Klenz as president of Wine World Estates effective Nov. 13, 1990. Klenz will replace E. Michael Moone who will assume the position of president of Stouffer Foods Corp. in Solon, Ohio.

Klenz, former senior vice president of finance/operations, has been with the St. Helena-based Wine World Estates since 1976. Wine World Estates is made up of Beringer Vineyards, Chateau Souverain, Meridian Vineyards, Napa Ridge, C&B Vintage Cellars, and Los Hermanos.

The new president holds a Bachelor of Science degree in Engineering and an M.B.A. from Tulane University, and began his career in the wine industry in 1973 with Heublein as a financial and marketing manager.

At Wine World Estates Klenz first served as marketing director for Beringer

Vineyards (1976-1978), then served as general manager of C&B Imports from 1978-1980, vice president of finance and administration through 1984 before becoming senior vice president of finance/operations in 1984.

"Walt's thorough understanding of the premium wine industry is extremely well-rounded," said Jim Biggar. "Walt was influential in the development of Beringer's reserve wine program in the '70s and its current 'First Growth' status. Since 1984 Beringer, Chateau Souverain, and Meridian Vineyards (a Santa Barbara coastal wine estate) wineries have reported directly to Walt. The high quality levels of each of these premium wineries, I feel, reflect Walt's grasp of all the details involved in producing world-class wines."

E. Michael Moone will remain on the Board of Directors for Wine World Estates (with no line function), securing his interest and love of the fine wine business. "I see Wine World's direction under Walt," said Moone, "as business as usual, but strongly feel Walt's vision and broad understanding of the wine business will greatly enhance each of Wine World's estates."

Walt Klenz is currently a member of the Board of Directors of the California Wine Institute and the Napa Valley Vintners Association. He resides in Napa, Calif.

#90318p7105 11/14/1990 ~PR Newswire

OKLAHOMA CITY (NOV. 14) PR NEWSWIRE - LSB Industries Inc. (AMEX: LSB) today reported operating results for the nine months ended Sept. 30, 1990.

Third Quarter Total revenues, including interest income and sales for the three months ended Sept. 30, 1990 were $61,724,000 compared to $66,809,000 for the same period in 1989.

Net income for the quarter ended Sept. 30, 1990, was $748,000. In the comparable quarter ended Sept. 30, 1989, the company reported a net income of $1,193,000.

After adjustment for dividends on outstanding preferred stocks of the company, net income applicable to common stock was $247,000 or 4 cents per share for the 1990 quarter compared to net income applicable to common stock of $692,000 or 9 cents per share for the 1989 quarter.

Included in the results for the third quarter of 1990 was an extraordinary gain of $942,000 resulting from the settlement of a claim against a foreign vendor.

Total revenues, including interest income and sales for the nine months ended

Sept. 30, 1990 were $192,524,000 compared to $202,451,000 for the same period in 1989.

Net loss for the nine months ended Sept. 30, 1990, was $2,403,000. The loss is attributable primarily to charges against income in the first six months for a $3,200,000 provision for estimated losses on loans and real estate and a net loss of $2,035,000 realized on the sale by the Financial Services Business of certain mortgage-backed securities. In the comparable nine months ended Sept. 30, 1989, the net income was $3,960,000.

After adjustment for dividends on outstanding preferred stocks of the company, net loss applicable to common stock was $3,926,000 or 71 cents per share for the 1990 period compared to net income applicable to common stock of $2,411,000 or $.29 per share for the 1989 period.

The $3.2 million charge against the second quarter earnings was a provision for losses on loans and real estate in the company's Financial Services Business.

#90318p7109 11/14/1990 ~PR Newswire

DARIEN, CONN (NOV. 14) PR NEWSWIRE - Exxon Chemical Co. has announced plans to significantly expand its integrated Jayflex plasticizer and oxo alcohol manufacturing capability.

Exxon Chemical is evaluating Louisiana as a potential site for new ester and oxo alcohol plants. The specific site under consideration is within the fences of Exxon's Baton Rouge petrochemical complex. The siting decision and the engineering/construction contract for both plants are expected to be finalized in the coming months. Plans call for both plants to be on-stream in 1993.

According to James P. Harris, Worldwide Intermediates Division vice president, "This is a continuation of our global strategy to expand our integrated Jayflex plasticizer, oxo alcohol, specialty products, and surfactants businesses. This global strategy includes major investments in North America, Europe and the Asia-Pacific area."

Exxon Chemical previously announced the construction of a higher olefins plant in Antwerp, Belgium and the expansion of their higher olefins plant at Fawley, U.K., which will increase Exxon's worldwide higher olefins capacity to more than 950kT/yr from six plants. The construction of a phthalic anhydride plant in Rotterdam was also recently announced. These facilities strengthen Exxon Chemical's feedstock integration for oxo alcohols and plasticizers.

In the Asia-Pacific area, Exxon Chemical Co. is engaged in detailed studies which may support the need for a worldscale alcohol plant and plasticizer manufacturing facilities there.

Exxon Chemical is a major producer and marketer of plasticizers and plasticizer grade alcohols with a worldwide Jayflex plasticizer capacity of 450kT/yr and an oxo alcohol capacity of 600kT/yr. The proposed Baton Rouge projects will increase its worldwide production base to four plasticizer plants and four oxo alcohol plants and will substantially increase linear product capabilities.

#90318p7110 11/14/1990 ~PR Newswire

AUSTIN, TEXAS (NOV. 14) PR NEWSWIRE - American Physicians Service Group Inc. (APS) (NASDAQ: AMPH) today announced results for the third quarter of 1990. For the three months ended Sept. 30, 1990, revenues increased to $4,104,000 from $3,087,000 in the year-ago period. Net earnings amounted to $272,000, or 6 cents per share, versus a loss of $278,000, or 6 cents per share, in 1989.

For the first nine months, APS reported revenues of $10,219,000 versus $10,366,000 in 1989. Net income of $107,000, or 2 cents per share compares to income of $532,000, or 11 cents per share in 1989.

Ken Shifrin, APS chairman and chief executive officer, stated, "We noted last quarter that much groundwork had been done to move the company ahead in the future. Tangible evidence of that work is apparent in our insurance management and financial services businesses which improved their performances in the quarter compared to both the same quarter last year and the first and second quarters of 1990. We are also seeking opportunities to further enhance our operations through joint ventures."

APS is a financial services firm, with subsidiaries and affiliates that provide: management of medical malpractice insurance companies; third party medical and dental administration services; brokerage, financial planning and investment services to individuals and institutions; computer systems for large medical clinics and university medical schools; Hispanic yellow page directories; and management of cardiac rehabilitation and diagnostic imaging centers through its Prime Medical affiliate. Its corporate headquarters are located in Austin, Texas, with regional offices in San Antonio, Dallas and Little Rock, Ark.

#90318p7111 11/14/1990 ~PR Newswire

DALLAS (NOV. 14) PR NEWSWIRE - The Southland Corp. today reported that its earnings from continuing operations before interest, taxes, depreciation and amortization (EBITDA) for the quarter and nine months ended Sept. 30, 1990, were $75.2 million and $197.5 million, respectively. Revenues for the two periods were $2.26 billion and $6.35 billion, up 1.20 percent and .91 percent, respectively.

The company reported net losses of $122.5 million and $250 million in the quarter and nine months, respectively. Results for the nine months include the recognition of an extraordinary credit of $52 million representing the tax benefit from the utilization of net operating loss carryforwards. This benefit is available as a result of the recognition of the tax gain from the sale of the company's remaining 50 percent interest in Citgo Petroleum Corp. during the first quarter.

During the third quarter and nine months, the company's 7-Eleven and other convenience stores increased average merchandise sales per comparable store month by 1.10 percent and 2.37 percent respectively. Although merchandise gross profit margins were up substantially over the same periods last year, total merchandise gross profits declined for the quarter and increased only slightly for the nine months, due to fewer stores.

On Oct. 24, 1990, Southland filed a prepackaged reorganization plan under Chapter 11 in the U.S. Bankruptcy Court for the Northern District of Texas, Dallas Division. The Bankruptcy Court has scheduled a confirmation hearing for the prepackaged plan for Dec. 14, 1990.

In the meantime, the company has sufficient working capital to maintain normal business operations at its convenience stores, distribution and food centers due to a strong cash flow and a debtor in possession financing facility.

Southland is the world's largest convenience retailer, with approximately 6,750 7-Eleven and other convenience units supported by the five Southland Distribution Centers, as well as the Southland Foods Division's six food centers. In addition, area licensees and affiliates operate approximately 6,250 7-Eleven stores in the United States, Guam, the U.S. Virgin Islands, Puerto Rico and 19 foreign countries. Ito-Yokado Co., Ltd., and Seven-Eleven Japan Co., Ltd., own almost 4,200 of the licensed 7-Eleven stores, located in Japan and Hawaii.

(NOV. 14) UPI - President Bush met with bipartisan congressional leaders at the White House today and assured them the U-S military mission in the Persian Gulf remains defensive- NOT offensive. But Democratic leaders warned Bush he'll have to consult Congress in detail if he wants to go to war with Iraq.

In another development, 33 Democratic House members led by Representative Ronald Dellums of California are taking what is believed to be an unprecedented step. They plan to seek a federal court order to prevent Bush from taking offensive military action without asking Congress first.

British Defense Secretary Tom King says the U-S-led military buildup in the Persian Gulf should send a message to Iraq that ''time is running out'' for a peaceful settlement of the crisis. Says King- ''We aren't going to keep our troops hanging around forever doing nothing.''

The national spotlight focuses tomorrow on five senators who are accused of wielding influence on behalf of an alleged savings and loan kingpin. The Senate ethics committee begins hearings examining the activities of the the so-called Keating Five.

Senators Alan Cranston of California, Dennis DeConcini of Arizona, John Glenn of Ohio, John McCain of Arizona, and Donald Riegle of Michigan allegedly improperly exerted pressure on federal bank regulators to go easy on S-and-L

operator Charles Keating Junior.

Americans are eating more meat. A government estimate says meat consumption rates will be boosted to nearly 227 pounds a person in 1991. That's up six pounds from this year's record level, with poultry zooming in popularity while beef and pork have slipped.

#90318u0140 11/14/1990 ~United Press International
(NOV. 14) UPI - President Bush and bipartisan congressional leaders huddle Wednesday to discuss calls for a special session of Congress to debate mounting U- S involvement in the Persian Gulf. The White House insists a special session is UNnecessary right now... and that although the number of American troops is being doubled, the U-S is still pursuing a peaceful settlement.

A standoff continues in the salt marshes of New Zealand's South Island where a gunman armed with two high-powered rifles opened fire in a quiet retirement village. At least eight people were killed. And authorities say the gunman is holding about 150 heavily armed police officers at bay on the edge of town in Aramoana near Dunedin.

President Bush and the head of the 34-nation Economic Community say they'll ''make every effort'' to pump new life into global trade talks. The four-year-old General Agreement on Tariffs and Trade negotiations are in

danger of collapsing due to a stalemate over the sensitive question of agriculture reform.

NASA engineers are keeping an eye on threatening weather as preparations continue for Thursday's nighttime launch of the space shuttle Atlantis to put a secret spy satellite into orbit. Officials say work at the launch pad is on or ahead of schedule. Air Force meteorologists predict a 70 percent chance of rain and high winds at liftoff.

The government has gotten out of the brothel business. Internal Revenue Service auctioneers sold the 104-room Mustang Ranch... once Nevada's largest brothel... for one-pointMillion dollars in back taxes. Buyer Victor Perry, a Reno attorney, said only that he purchased the 400-acre facility for a client he declined to name.

A New York state Supreme Court justice Tuesday sentenced a Brooklyn man to four to eight years in prison for conning people into painting subway pillars without paying them. Prosecutors say 63-year-old Vincent Pannone offered to pay applicants 92-50 a day, but first asked applicants to pay 500 to one-thousand dollars as a deposit to cover insurance fees.

#90318u0160 11/14/1990 ~United Press International

MOSCOW (NOV. 14) UPI - A defense factory spill of a deadly cyanide compound has poisoned Latvia's main river, killing 300,000 fish and leaving one- third of the capital of Riga without water, officials said.

The chemical acetone cyanohydrin gushed from the plant in the republic of Byelorussia for 15 hours last week into the Western Dvina River in an ecologocial disaster that will have lasting effects, Janis Peters, chief of the Latvian Mission in Moscow said Tuesday. The cause of the spill was not known.

A videotape viewed by reporters at the Latvian Mission showed droves of fishleaping from the water and dying on the banks of the river in the Latvian city of Jekabpils.

''The concentration of chemicals in this region was so high that the smell of poison filled the air near the river,'' Peters said. ''People living in cities and villages along the river began to panic.''

''Residents of Jekabpils saw a terrifying picture as fish, suffocating in the poisoned water, sprang out by the hundreds onto the river bank, where they died from the disintegration of their gills,'' he said.

The Western Dvina River, called the Daugava in the Latvian language, flows northwest from Byelorussia through Latvia, where it is a main source of potable water for the Baltic republic.

The river feeds three main reservoirs in Riga, a city of nearly 1 million people. One of the reservoirs has been closed by the disaster.

Peters and other Latvian officials accused Byelorussian authorities of failing to inform them of the accident and charged the Soviet government with callousness in responding to the disaster.

Byelorussian officials say 5 tons of the chemical escaped from the Polimer defense factory in the city of Novopolotsk on Nov. 4 and 5, but Peters said that Latvian specialists believe the discharge was 10 times larger.

Latvian officials said several people who ate contaminated fish suffered food poisoning, and that the Latvian Parliament had set up an emergency commission to deal with the crisis.

Latvian health officials learned of the spill Nov. 6 when residents of Kraslava, a Latvian city near the Byelorussian border, reported that ''they were horrified to see a huge quantity of dead fish,'' Peters said.

Riga Mayor Andres Inkulis said that 70,000 kindergartners and schoolchildren are homebound because their schools do not have water.

Inkulis said the lack of potable water has also forced one-fifth of all enterprises and nearly one-third of the restaurants in the Latvian capital to shut down.

Peters said the disaster has caused $34 million in direct economic damage and as much as $510 million in indirect damage such as lost work time.

Latvian Deputy Prime Minister Arnis Kalninsh said senior Soviet officials responded with silence when he sought their help in responding to the disaster at a Nov. 9 meeting of the U.S.S.R. Council of Ministers.

Peters said that the U.S. and Swedish governments had offered to send specialists and provide humanitarian aid.

#90318u0161 11/14/1990 ~United Press International

MOSCOW (NOV. 14) UPI - Gennady Gerasimov, the glib ''voice of glasnost'' who as Foreign Ministry spokesman gave the Soviet government a human face, has been appointed ambassador to a European nation, Tass reported.

The official news agency Tuesday said Vitaly Churkin, a close aide to Foreign Minister Eduard Shevardnadze, is slated to replace Gerasimov. The boyish looking Churkin is himself no mean master of the quick comeback.

Asked in May 1986 by a congressional panel in Washington to explain ''in layman's terms'' what went wrong in the Chernoybl disaster, Churkin shot back he would do so ''if you can explain in layman's terms what went wrong with the Shuttle Challenger.''

The delay in naming the country to which Gerasimov was being posted raised speculation whether he was being rewarded and promoted or being removed from the center stage in which he has reveled.

''There will be a change, but we don't know exactly what,'' an aide said for Gerasimov, who was not immediately available for comment.

If the English-speaking Gerasimov ends up as envoy to Great Britain, the transfer could be viewed as a promotion of sorts, but the aide could not confirm Gerasimov would be the envoy to London. Some other shift would have to be interpreted as a demotion of the droll Gerasimov.

Gerasimov has perceptibly chafed recently as Mikhail Gorbachev has chosen two relatively colorless figures, Arkady Maslenikov and Vitaly Ignatenko, as presidential press spokesman, bypassing Gerasimov, whose light-heartedness hides his intense preparation for his briefings.

Asked about Gorbachev's being awarded the Nobel Peace Prize, Gerasimov said acerbically ''Well it certainly wasn't the prize for economics.''

Similarly, Gerasimov sniffed at recent persistent rumors of a pending military coup against Gorbachev.

''If you talk about a military coup d'etat in advance, it's not much of a coup '' he said.

Whatever his diplomatic destination, Gerasimov in five years transformed Foreign Ministry briefings from exercises in stonewalling to forums of imparting information with his strict protocol requiring journalists' to announce their affiliations.

''How's that again?'' Gerasimov asked when a newcomer in the burgeoning Moscow press corps presented himself.

''Village Voice,'' came the reply.

''Welcome, Village Voice,'' Gerasimov said tiredly.

He devoted part of a recent briefing to complimenting the U.S. Defense Department's annual report, ''Soviet Military Power,'' for dropping bellicose assessments of the Kremlin, but said he was ''sending ''

Plucked from the anonymity of Soviet journalism by Gorbachev, Gerasimov shot to the limelight, and he used it to push his true passion: arms control and an end to nuclear weapons.

His briefings over five years saw the Soviet Union move from the Cold War, dating from the World War II Yalta Conference, to partnership with the United States.

Gerasimov, noting the new relationship that would be cemented at the superpower summit in Malta last December, summed up an entire era. ''From Yalta to Malta,'' he announced to reporters.

Tiring of journalists asking whether Soviet tanks would intervene under the ''Brezhnev Doctrine'' to prevent Eastern European nation defections from the Soviet fold, he said those nations were simply following ''the Sinatra Doctrine.''

''They are doing it their way,'' he shrugged.

A globetrotter in heavy demand because of his entertaining and incisive comments, Gerasimov used a recent trip to Utah to assess developments in his homeland.

''You know, there is talk of changing the name of our country,'' he began.

Noting that the Soviets had ordered cigarettes from the Phillip Morris tobacco company, Gerasimov added: ''Maybe it should be called Marlboro Country.''

#90318u0164 11/14/1990 ~United Press International

RENO, NV (NOV. 14) UPI - Internal Revenue Service auctioneers sold the 104-room Mustang Ranch, once Nevada's largest brothel, for $1.49 million in back taxes while former owner Joe Conforte stood on the sidelines discussing plans to legalize prostitution in California.

Buyer Victor Perry, a Reno attorney who left immediately after a series of quick bids that started at $1.2 million, said only that he purchased the 400-acre facility for a client he declined to name. The IRS attempted to open bids Tuesday at $10 million, but there were no takers.

The buyer is the brother of Peter Perry, a Reno attorney who represented Conforte in bankruptcy proceedings. Peter Perry also was a principal in Mustang Ranch Inc., a corporation that unsuccessfully sought to acquire the brothel on three separate occasions through the sale of public stock. Victor Perry told reporters Tuesday that neither Conforte nor his brother, Peter, were involved in his bid.

About 1,000 people, including curious spectators and souvenir and antique buffs, crowded into the red and white striped auction tent. It was set up outside the two stucco buildings that housed the largest legal house of prostitution in Nevada until the IRS seized the property last September.

The IRS took possession of the Mustang Ranch after forcing the brothel into Chapter 7 bankruptcy through foreclosure proceedings when Conforte failed to make his $75,000 a month payment on back taxes. The tax agency initially toyed with the idea of keeping the Mustang Ranch open until it could be sold, but abandoned the plans within 48 hours.

The IRS said Conforte owned $13 million in back taxes. Conforte, who fled to Brazil ten years ago to avoid imprisonment on a tax conviction, returned to Nevada in 1983 after attorneys worked out a deal for him to serve less than two years in prison and make monthly payments on a reduced tax bill.

Conforte, who has operated bawdy houses in Nevada some 40 years, attended the auction accompanied by two bodyguards. "Of course there is nostalgia, but what can you do," said the small, cigar-chomping Conforte, who expressed displeasure with the carnival atmosphere created by the auction tent.

"You make a mistake in dealing with the IRS and they make you pay for it. All of this could have been avoided if the IRS had not been so vindictive," said Conforte. The bawdy house operator said when the IRS foreclosed he had investors willing to put $5 million in an escrow account to buy the Ranch.

Conforte said, from now on, he will spend his time between his home in Nevada and one in Danville, Calif., where he intends to launch an initiative to legalize prostitution in California.

"My aim is to get it legalized all over the United States, and starting with the biggest state in the union will get the ball rolling," said Conforte. He said state fees imposed on legalized prostitution should be used for drug rehabilitation programs.

The Mustang Ranch, located 12 miles east of Reno, is in Storey County, one of the rural counties where prostitution is legal. Prostitution is legal in Nevada by county option, except in counties with a population of 250,000 or more - which rules out Clark (Las Vegas) and Washoe (Reno) counties.

About three dozen legal brothels operate in remote, rural areas of the state. The Mustang Ranch, because of its proximity to Reno, historically drew the most customers. When operating to capacity, the Mustang Ranch employed about 85 prostitutes and a staff of 30 to 60 managers, maids, cooks, and maintenance men.

After the IRS seizure of the Mustang, the Storey County Commission rezoned the property so it can no longer be used as a brothel, although prostitution

remains legal in the county.

#90318u0170 11/14/1990 ~United Press International

(NOV. 14) UPI - President Bush is being pressured to call a special session of Congress to debate the escalation of U-S military activity in the Persian Gulf. Bush says he'll meet with congressional leaders Wednesday to address their requests for the special session. Senate Democratic leader George Mitchell of Maine says the shift in the U-S military mission in the gulf warrants a congressional examination.

Louisiana Assistant Attorney General Rene Salomon says he expects the state ultimately to prevail, despite the Supreme Court's decision Tuesday in the case of mentally ill death-row inmate Michael Owen Perry. The high court vacated a ruling that would have allowed Louisiana to inject Perry with antip-sychotic medication to make him legally competent to be executed for the 1983 murder of his parents and three other family members.

The nation's Roman Catholic bishops are urging that more money be spent to combat substance abuse. Stepping into the war on drugs, the bishops Tuesday considered a proposed pastoral statement urging greater prevention and treatment for alcohol and drug abuse. The bishops took a written ballot on the drug abuse statement but did NOT announce the results before adjourning for the day. The statement skirted the issue of legalizing drugs and remained silent on the Bush administration's much-touted effort to end drug abuse through harsher enforcement methods.

Researchers at the National Cancer Institute say they hope to begin gene therapy ''within four to six weeks'' on three people suffering from a deadly type of skin cancer called melanoma. The way was cleared for the pioneering experiments Tuesday when the Food and Drug Administration approved the first attempt to use gene therapy to fight cancer. About 25-thousand Americans are stricken by melanoma annually, and once the fast-spreading cancer travels beyond the skin it is considered incurable.

Greenpeace is vowing to disrupt Wednesday's nuclear weapons test in the Nevada desert. The international environmental groups says three women have infiltrated the rugged Pahute Mesa area of the Nevada Test Site in hopes of halting the test. But a Department of Energy spokesman says security forces searched the area Tuesday without finding any trace of anti-nuclear protesters. The spokesman say an air-ground search will resume at sunrise prior to the detonation.

#90318u0173 11/14/1990 ~United Press International

LONDON (NOV. 14) UPI - Former Deputy Prime Minister Sir Geoffrey Howe

delivered a scathing criticism of Margaret Thatcher, accusing the prime minister of risking the future of Britain with her ''nightmare vision'' of the implications of European unity.

Political analysts viewed Tuesday's speech as devastating for Thatcher and crucial to bolstering the prospects of Michael Heseltine, a former defense secretary who is expected to deliver a leadership challenge Wednesday.

Thatcher resists key tenets of the 12-nation European Community's moves toward political and economic union as poorly thought out and involving the ceding of too many sovereign powers. She has refused to include Britain in plans to have a single European currency by the year 2000.

Howe resigned on Nov. 1, and in keeping with parliamentary tradition, was allowed to explain on the floor without interruption his full reasons for ending his 11-year-old Cabinet career because of fundamental objections over Thatcher's stance on Europe.

The 16-minute address inspired gasps as the normally mild-mannered Howe openly questioned Thatcher, and suggested a leadership challenge was now appropriate.

''The time has come for others to consider their response to the tragic conflict of loyalty with which I myself wrestled for perhaps far too long,'' he said.

Howe disputed Thatcher's view of a united Europe being a centralized superstate, saying this was a ''nightmare image sometimes conjured up by my right honorable friend, who seems sometimes to look out from a continent that is positively teeming with ill-intentioned people, scheming, in her words, to extinguish democracy, to disolve our national identities, to lead us through a back door into a federal Europe.''

''What kind of a vision is that, for our business people who trade there each day, for our financiers who seek to make London the financial capital of Europe, for all of our young people of today?'' he asked.

He warned that the other EC nations would proceed without Britain, which risked isolation.

''The prime minister's perceived attitude towards Europe is running increasingly serious risks for the future of our nation,'' he said. ''It risks miminizing our influence and maximizing our chances of being once again shut out. We have paid heavily in the past for late starts and squandered opportunities in Europe. We dare not let that happen again.''

Howe said he and former Chancellor of the Exchequer Nigel Lawson had nearly resigned five years ago over Thatcher's refusal to join the exchange rate mechanism. Thatcher only relented in late September, linking pound sterling to

the floating basket of European currencies, but Howe said the belated entry was the cause of Britain having its current 15 percent inflation rate.

Howe also challenged Chancellor of the Exchequer John Major's plans to have a European currency gradually introduced, while national currencies remained, inferring in a cricketing analogy that Britain was destined to lose in negotiations with European countries.

#90318u0183 11/14/1990 ~United Press International

DUNEDIN, NEW ZEALAND (NOV. 14) UPI - A gunman killed 11 people and wounded three in a daylong reign of terror in a sleepy village before he was killed Wednesday by an anti-terrorist squad, ending in the worst mass slaying in the country's history.

Two children were wounded in the 23-hour rampage that ended when the squad rushed the man, fatally wounding him in the chest and head. One squad member was also wounded in the ankle, they said.

Senior Sgt. Bill O'Brien, of Dunedin police, said both were rushed to Dunedin hosptial for emergency surgery.

He identified the gunman as David Malcolm Gray, who was in his 20s and lived in the village of Aramoana, where the massacre occurred, just a few miles from Dunedin at the entrance to Otago Harbor. A domestic dispute was believed to have sparked the carnage.

The gunman played a cat and mouse game for 23 hours with a police force which rose to 140 in number, firing shots from his high powered rifle, equipped with telescopic sights, at a police helicopter and anything that moved.

The bodies of several victims lay where the fell through Tuesday night and Wednesday because gunfire made recovery impossible.

The killer moved from house to house and into sand dunes as he played a Rambo type game with his persuers, and they counted eight dead and two wounded.

Finally at 5:54 p.m. Wednesday, 22 1/2 hours after the reign of terror began, police drove the gunman from cover with tear gas and when they burst into the house were he had been holed-up found three more bodies.

They persued him to a nearby street exchanging shots and finally wounded him.

O'Brien said the dead included two young boys, one woman and eight men, one of them a police sergeant from nearby Port Chalmers which serves the area and the first police officer sent to investigate.

All the others were local residents, police said.

A four year-old boy and a nine year-old girl were wounded and were recovering after surgery in Dunedin Hospital.

The drama began around 7.30 p.m. Tuesday when a house was set alight in the South Island village, in which about 50 people, mainly retirees live.

A neighbor, Dorothy Crimp, whose husband is believed to be among the dead, said she saw the burning house and heard shots ''from all around the place.''

She said her husband had gone to help with other neighbors but were shot at and her husband had not come back.

She, along with many others spent the night and day barricaded in their homes unable to be rescued by police because they were within range of the gunman.

O'Brien said poice did not expect the death toll to rise further, but this could not be discounted until they were able to conduct a thorough search of all the houses and surrounding areas.

The previous worst mass slayings in New Zealand were during World War II, when seven people died in the Stanley Graham killings, officials said.

#90318u0184 11/14/1990 ~United Press International

LOS ANGELES (NOV. 14) UPI - New Japanese investment in U.S. real estate has slowed slightly this year, but will still reach between $10 billion and $13 billion this year alone, a report released Wednesday said.

''There is little truth to the notion that the Japanese are selling off a substantial portion of their U.S. real estate investments,'' said Jack Rodman, managing partner at Kenneth Leventhal & Co., a national consulting firm that produced the report.

Still, the cooling U.S. real estate market has cut back potential invstment. The firm had predicted in March that new Japanese investment would reach $13 billion to $16 billion this year.

During 1989, that figure reached $14.8 billion, off from the record level of $16.5 billion in 1988.

Analysts have also said that the decline in new investment is due in part to Japanese sensitivity to the backlash from acquisition of highly visible landmarks, such as last year's purchase of Rockefeller Center in New York.

The report also contains a sobering prediction of a sharp decline in new

investment next year, with the level expected to reach between $7 billion and $10 billion. Sophisticated Japanese investors are pulling back because pressure at home from regulators and a soft U.S. real estate market, Rodman said.

''More experienced Japanese investors have shifted to a wait-and-see attitude '' Rodman said.

Rodman said that ''trohpy'' properties are being shunned by the Japanese, with the exception of Cosmo World's purchase of the famed Pebble Beach golf resort in Northern California earlier this year.

Currently, much of the new investment is coming from first-time Japanese real estate investors. ''Many of these investors are customers of regional banks in areas outside Tokyo,'' Rodman said. ''This is a relatively untapped source of capital which is being mobilized towrad U.S. real estate.''

Wednesday's report estimated that Japanese investment had increased by $9.1 billion during the first eight months of this year, bringing total investment in this country to $66.7 billion.

That figure represents less than 2 percent of the total value of the American real estate market.

Of the 1990 investments, hotels and resorts are the most popular, with California and Hawaii the favorite markets. ''Resorts and residential golf developments located within two hours of cities with a concentration of Japanese investment are at the top of their shopping list,'' Rodman said.

At the same time, invstment in office properties has dropped sharply from 23 percent of all investments last year to just 13 percent this year.

''A continuing slowdown in U.S. office markets has made investors wary, particularly as many Japanese companies realize lower returns than expected from earlier office property investments,'' Rodman said.

The report also showed a slowdown in joint ventures between Japanese and American developers. More than 50 percent of all deals last year were joint ventures, while that figure has fallen to 28 percent this year.

''The Japanese clearly want to develop projects on their own with full control now that they are learning the ropes of working in this coutnry,'' Rodman said.

-30- 3440

#90318u0194 11/14/1990 ~United Press International

(NOV. 14) UPI - Gerald Wilkins drives the middle, draws a double team and then fires back to Trent Tucker - lurking behind the 3-point line. The two veteran

New York guards used the play to help the Knicks remain undefeated on their West Coast trip.

Wilkins passed to Tucker, whose 3-pointer with 57 seconds left in overtime Tuesday night put the Knicks ahead for good in a 116-110 triumph over the Seattle SuperSonics.

''Gerald's a great penetrator and when he goes to the hoop and draws people, he knows where I am and he kicks it back out for the easy shot,'' said Tucker, who had 17 points, including three 3-pointers. ''I do the same for him, but I had the shot tonight and he found me.''

The Knicks improved to 3-0 on the West Coast trip. It was their first victory in Seattle since Feb. 5, 1985 - losing five straight. Wilkins added 22 points.

''This was one more piece to a good road trip,'' Knicks Coach Stu Jackson said. ''We should have won in regulation, but we made a couple of turnovers and they cashed in. But in the overtime, our guys really went after it.''

Gary Payton hit a 10-footer to put the Sonics ahead 110-109 with 1:18 left. Wilkins then found Tucker, who put the Knicks ahead, 112-110.

Two free throws by Patrick Ewing, who lead all scorers with 28 points, and a layin by Wilkins closed the scoring.

Sedale Threatt led Seattle with 24 points, while Payton had 19, Xavier McDaniel 17 and Derrick McKey 16.

The SuperSonics rallied to send the game into overtime, outscoring the Knicks 7-1 in the final 2:17 to tie the score, 104-104.

Seattle led by 10 points during much of the third quarter, including an 85-75 lead with 1:49 remaining. But the Knicks closed the gap to 87- 85 after three quarters.

''We lost that 10-point lead quickly and really put ourselves in a hole,'' Seattle Coach K.C. Jones said. ''That's a tough position to come back from. We got caught standing and that's something we have to work on.''

In other NBA games, Milwaukee routed Boston 119-91, Golden State outscored San Antonio 128-124, Houston nipped Minnesota 90-88, Orlando topped Dallas 109-103 Philadelphia defeated Indiana 108-100, Detroit blasted Miami 118-93, Cleveland beat Atlanta 121-104, Portland outgunned Denver 155-129, Charlotte downed Washington 120-105, Chicago clipped Utah 84-82 and Phoenix outlasted the Los Angeles Lakers 112-111.

-- AROUND THE NBA --

Bucks 119, Celtics 91

At Milwaukee, Alvin Robertson scored his 10th career triple-double and Jack Sikma added 21 points, leading the Bucks. Robertson scored 15 points, pulled down 10 rebounds and had 11 assists. Boston's Larry Bird was held to five points.

Warriors 128, Spurs 124

At Oakland, Calif., Mitch Richmond scored 31 points and Chris Mullin keyed a surge late in the fourth quarter. Mullin hit two jumpers and stole the ball to spark a 7-0 run that gave Golden State a 123-113 lead. The Spurs had used a 12-4 run to pull within 116-113 with 3:29 left.

Rockets 90, Timberwolves 88

At Houston, David Wood scored 15 points, including a layup with 23 seconds left that gave the Rockets the lead. Houston played without leading scorer and rebounder Akeem Olajuwon, who has a sprained left ankle. Tyrone Corbin led Minnesota with 19 points and Tony Campbell had 15, 10 below his average.

Magic 109, Mavericks 103

At Orlando, Fla., Terry Catledge scored 30 points and Nick Anderson added 8 of his 18 in the final period for the Magic. Orlando, 1-6, had set an NBA mark with its 16th straight regular-season home loss Nov. 6. Dallas earlier learned Roy Tarpley is out for the season with a torn knee ligament.

Sixers 108, Pacers 100

At Indianapolis, Charles Barkley scored 23 points, 19 of them in the second half, and Philadelphia beat Indiana for the ninth straight time. Reggie Miller's 3-point play put Indiana ahead 86-85 with 7:03 remaining, but the Pacers did not score from the field over the next five minutes.

Pistons 118, Heat 93

At Auburn Hills, Mich., Isiah Thomas scored 23 points and Mark Aguirre added 20, powering Detroit. Miami committed 24 turnovers, which led to 29 Pistons' points. Detroit led 12-9 when it went on a 19-1 run that provided a 31-10 bulge.

Cavaliers 121, Hawks 104

At Atlanta, Gerald Paddio scored 22 points, while Larry Nance and Brad Daugherty added 21 each to help Cleveland win on the Hawks' homecourt for the first time after 11 losses. Mark Price added 19 points and 13 assists for the Cavaliers.

Blazers 155, Nuggets 129

At Portland, Ore., Clyde Drexler picked up the 13th triple-double of his career, helping the Trail Blazers leave Denver winless this season. Drexler scored 39 points to go with 11 rebounds and 12 assists. Portland, which raised its record to 6-0, remained the league's only undefeated team.

Hornets 120, Bullets 105

At Charlotte, N.C., Armon Gilliam scored a franchise-record 39 points to lead the Hornets. Gilliam shot 16 of 24 from the floor and 7 of 8 from the free-throw line, coming within two points of tying his career high. He also garnered 12 rebounds. Bernard King led Washington with 34 points.

Bulls 84, Jazz 82

At Salt Lake City, Michael Jordan sank a 20-foot jumper at the buzzer to lift the Chicago to its first victory in Utah in two years. With 16 seconds left, John Paxson passed to Jordan, who fought off a double team and hit the jumper to give Chicago its fourth straight victory.

Suns 112, Lakers 111

At Inglewood, Calif., Kevin Johnson collected 24 points and 14 assists and Phoenix escaped when James Worthy missed a foul shot with 1.1 seconds left. The Suns, who dealt the Lakers their earliest playoff exit since 1981 with a five-game upset in last season's West semifinals, improved to 4-1 with their first regular-season triumph at the Forum in 18 tries since April 1985.

-30- 6129

#90318u0198 11/14/1990 ~United Press International

(NOV. 14) UPI - John Vanbiesbrouck stopped plenty of pucks and the crossbar stopped another, allowing the New York Rangers to escape with a 1-1 tie with the Philadelphia Flyers Tuesday night.

''It was a mucky battle out there,'' said Vanbiesbrouck, who had to stop four Philadelphia shots in the extra period while the Rangers failed to test Pete Peeters. ''Bring your lunch pail and shovel and go out and scoop as much snow as you can.''

The Flyers spent most of the overtime in New York's end of the ice, but Vanbiesbrouck made the saves he needed and got a break when a backhander by Pelle Eklund bounced off the crossbar.

''I didn't even see it,'' Vanbiesbrouck said. ''There was so much traffic in front and I was looking down for something low. All of a sudden, I heard a

ping. That's why God made posts.''

Vanbiesbrouck lowered his goals-against average to 2.24. For his part, Peeters had to make a couple of tough saves in the second and third periods to preserve the tie.

New York fired eight shots on net on four power-play chances in the second period, but Peeters stopped them all.

He also made the saves on a shot by Brian Leetch on a two-on-one break and a 20-footer by Mike Gartner in the third period.

''It was a good hockey game,'' said Peeters, who improved to 3-1-1 on the season and lowered his goals-against average to 2.47. ''It was Flyers-Rangers and rock 'em, sock 'em style. We had a big test against Calgary last week (an 8-2 loss) and we knew we had to come up big tonight.

''We played well at both ends of the ice and it was nice that they didn't have any shots in the overtime.''

Peeters was not expected to be much of a factor this season but he has been pressed into service because of injuries to Ron Hextall and Ken Wregget.

''Goalies get hot,'' New York Coach Roger Neilson said. ''Now he's on a hot streak. It's always good to see a veteran goaltender have a hot streak. It's just unfortunate it came against us.''

Philadelphia's Keith Acton scored his third goal of the season at 5:30 of the second period to tie the score at 1-1.

The Rangers took a 1-0 lead on a short-handed goal by Jan Erixon, his fourth goal of the season, at 2:07 of the second period.

In other games, New Jersey blasted Montreal 6-3, Pittsburgh downed Minnesota 4-1, and St. Louis beat Quebec 4-2.

-- AROUND THE NHL --

Devils 6, Canadiens 3

At East Rutherford, N.J., David Maley, John MacLean and Laurie Boschman scored in a three-minute, 23-second span midway through the third period, helping New Jersey snap a three-game losing streak. With the game tied 3-3, Maley scored at 8:12, beating goalie Patrick Roy with a 25-footer.

Penguins 4, North Stars 1

At Bloomington, Minn., goalie Frank Pietrangelo made 42 saves and Jarimo Jagr,

Zarley Zalapski, Paul Coffey and Randy Gilhen scored for the Penguins, who were outshot 43-23, but won for the sixth time in their last nine games. Minnesota fell to 3-4-2 at home, where only 5,429 fans showed up.

Blues 4, Nordiques 2

At St. Louis, Brett Hull broke a third-period tie with his second goal of the game and his league-leading 19th of the season, helping the Blues hand quebec its 11th straight loss. The Blues are 11-1-1 in their last 13 games. St. Louis has also won its last nine games against Quebec, which has not won in St. Louis since Oct. 14, 1984.

(NOV. 14) UPI - Stocks prices closed slightly lower in light trading Wednesday on the Tokyo Stock Exchange.

The key Nikkei Average of 225 selected issues, which soared 1,041.87 points Tuesday, slipped 36.23 points to 23,937.44.

Trading remained slow as an estimated 350 million shares chnaged hands, down from 408 million shares Tuesday.

Declines topped advances 493 to 458 while 134 issues remained unchanged.

Analysts said stocks eased on profit taking following Tuesday's sharp advances

and uncertainty about the future direction of interest rates.

Speculation the U.S. Federal Reserve might ease its monetary policy at Tuesday's board meeting turned out unfounded, analysts said.

Market watchers said professional investors generally took a wait- and-see attitude as the Bank of Japan tightened its grip on cash by calling in loans and as oil prices continued to rise on global markets.

On the trading floor, interest rate-sensitive, large capital stocks were the targets of a small amount of selling.

Construction, steels, real estate and electrical companies eased.

Banking issues firmed following Tuesday's announcement of merger plans between Kyowa and Saitama banks, analysts said, which prompted expectations of further restructuring in the sector.

Elsewhere around the region, stocks closed higher on the Hong Kong Stock Exchange as local investors pushed the key index above the 3,000 resistance level.

The benchmark Hang Seng Index, which gained 49.41 points Tuesday, added another 7.85 points to 3,006.82.

Local analysts said stocks pushed higher helped by the stability of Wall Street and the easing of tensions in the Middle East.

In Singapore, stock prices closed slightly lower in light trading as the decline in Tokyo helped to dampen local enthusiam.

The closely watched Straits Times Industrial Index, which rose 13.81 points Tuesday, slipped 1.88 points to 1114.82.

Analysts said profit taking combined with the rise in global oil prices pushed prices lower.

In Taipei, stocks closed broadly higher on the Taiwan Stock Exchange.

The Taiwan Weighted Index surged 111.22 points or 2.97 percent to 3, 850.27.

Local analysts said a strong rally in the financial sector helped to boost the overall market higher.

In Seoul, stocks closed slightly lower on the Korean Stock Exchange. The Korean Composite Stock Index lost 5.17 points to 704.89.

In Manila, stocks closed slightly higher on the Manila Stock Exchange. The

Manila Composite Stock Index of 25 selected issues gained 4.39 points to 614.50.

In Australia, stock prices closed slightly lower in lackluster trading the Sydney Sharemarket.

The All Ordinaries Index, which jumped 13.2 points Tuesday, slipped 3.6 points to 1,345.2.

Meanwhile in Wellington, stock prices closed broadly lower in moderate trading on the New Zealand Stock Exchange.

The Barclays Share-Price Index fell 16.60 points to 1,274.19.

Analysts said stocks fell as the New Zealand dollar gained against its Australian counterpart on foreign currency markets, which analysts said created a scope for local investors to take profits in the light session.

#90318u0286 11/14/1990 ~United Press International

(NOV. 14) UPI - Congressional leaders are pressuring President Bush to call a special session to debate the escalation of U-S military activity in the Persian Gulf. Bush and congressional leaders meet today to discuss the requests for the special session. Senate leaders have ordered a series of hearings into the gulf crisis.

Secretary of State Baker has enlisted Canada in the movement to use military force against Iraq if necessary. Baker flew to Bermuda yesterday for a brief meeting with Canada's Minister of External Affairs Joe Clark, who was to travel to Europe to discuss the crisis and trade issues. Baker returned to Washington late yesterday.

Vice President Quayle is in Tokyo, where he launched into a stinging rebuke of Japanese policy in the Persian Gulf. Quayle scolded Japanese Prime Minister Toshiki Kaifu for private efforts to win freedom for Japanese hostages. Quayle urged Japanese authorities to send forces to the Gulf, NOT just money.

Iran's foreign minister arrived in Bagdad today for talks on bilateral relations between Iran and Iraq and the sensitive Persian Gulf situation. Tehran radio says the foreign minister made the trip UNexpectedly, two days after Iranian President Hashemi-Rafsanjani held talks with Turkish leader Turgut Ozal on the Gulf crisis.

In a ceremony lasting less than two minutes, Poland and Germany today signed a treaty that solidifies their postwar border and opens a new era of improved relations. The foreign ministers of both nations signed the document in Warsaw Poland. It recognizes the border established 45 years ago, and acknowledges

German loss of eastern territories to Poland after World War Two.

Britain's legendary broadcaster Malcolm Muggeridge died today in a nursing home, three months after suffering a stroke. He was 87. His sharp attacks on the British establishment made him a leading British journalist and social critic. Relatives say Muggeridge was a staunch defender of traditional values.

A panel of experts has told the New York Times that the death rate among people with AIDS can be cut in half by treatment with steroid hormones. But the report said after the panel made the discovery, it took the governmental agency that convened the group five months to decide to notify doctors who treat AIDS patients. A panel official said the announcement was delayed because members could not reach agreement on how to word their statement.

-30- 2611

#90318u0317 11/14/1990 ~United Press International

NEW YORK (NOV. 14) UPI - A panel of experts says steroids can cut the pneumonia death rate of AIDS sufferers in half but a government agency did not notify doctors about the treatment for five months, The New York Times said.

''It really does look like steroids will have a dramatic effect,'' said Dr. Paul Meier of the University of Chicago, a member of the panel convened by the National Institute of Allergy and Infectious Diseases.

In the United States, about 40,000 people with acquired immune deficiency syndrome are expected to develop pneumocystis carinii pneumonia this year. Five percent to 30 percent of them - 2,000 to 12, 000 people - will develop respiratory failure and most of this number will die, according to the National Institute of Allergy and Infectious Diseases.

The expert panel - 16 AIDS specialists and statisticians - was convened by the allergies and infectious diseases institute last spring to decide whether steroids would be useful in the treatment of pneumonia. The panel came to the conclusion May 15, after reviewing five unpublished studies of the treatment, some of whose authors were among the panel's members.

But, a panel official said, it delayed announcing its conclusion because its members could not reach agreement on how to word their statement. Part of the reason they could not agree was that their papers had not yet been accepted at a prestigious medical journal, the paper said.

As a result, the institute did not alert doctors to the findings until Oct. 10 when it mailed letters to 2,500 practitioners on a list obtained from Fujisawa Pharmaceuticals Company of Deerfield, Ill., a concern that makes a drug used to prevent the pneumonia.

Dr. Mathilde Krim, a leading AIDS fighter and co-founder of the American

Foundation for AIDS Research, was upset by the delay.

''When the lives of people are in the balance, it is totally unethical not to release information immediately,'' she said.

The steroid finding was discovered in a Nov. 2 issue of AIDS Treatment News, a San Francisco-based semi-monthly newsletter.

#90318u0365 11/14/1990 ~United Press International

CAPE CANAVERAL, FL (NOV. 14) UPI - The "cocaine" found in the shuttle Discovery's hangar two weeks ago turned out to be a legal chemical and not a controlled substance, NASA officials said Wednesday. "It's calcium hydrogen phosphate," said NASA spokesman Richard Young. "It is not a controlled substance."

Scott McCord, an area high school teacher, told the Florida Today newspaper the material is frequently used in high school chemistry classes and in the aerospace industry.

Whether it is used in shuttle processing was not immediately clear. But NASA managers were nonetheless relieved to learn that the Kennedy Space Center's first encounter with cocaine turned out to be a false alarm.

On Nov. 2, a small vial containing a powdery white substance was found under a desk in Orbiter Processing Facility No. 1 at Florida shuttleport where Discovery is being readied for its next flight.

Security officials initially said the substance was cocaine, touching off widespread publicity and embarrassment for NASA, which has endured a string of mishaps and setbacks in recent months at the Florida shuttleport that has raised questions about quality control.

"When the discovery was made, two field tests were done that indicated there was a cocaine content," Young said. "Based on that, we sent it to the Florida Department of Law Enforcement lab where it was tested specifically to determine if it contained a controlled substance. That report came back negative."

After the material was identified as calcium hydrogen phosphate, it was returned to the Kennedy Space Center where it underwent a NASA analysis, which confirmed the Department of Law Enforcement conclusion. "These field tests do have an accuracy problem," Young said.

NASA's investigation into the incident was carried out by a team of security officers representing the space agency, Lockheed Space Operations Co. and EG&G Florida Inc.

Lockheed is responsible for overall shuttle processing at the Kennedy Space Center under a multibillion-dollar contract while EG&G is responsible for base operations, including security services.

#90318u0371 11/14/1990 ~United Press International

(NOV. 14) UPI - Snow fell in the upper altitudes of the sodden Northwest Wednesday and more rain was expected after days of flooding that threatened drinking water supplies.

In Oregon, a strong Pacific cold front crawled over the state overnight and by Wednesday morning had moved into Idaho and Nevada, leaving behind up to two inches of rain in western Oregon. Snow fell as low as 3,000 feet in the Cascades and Siskiyous. Some partial clearing was forecast to be replaced by another band of showers across the northwest corner of the state by early evening.

In Washington, the National Weather Service said snow was falling along the western mountain slopes down to an elevation near 3,000 feet. Five inches of new snow was reported before dawn at 4,000-foot Stampede Pass in the central Cascades. Another three to four inches of snow was forecast during the day as another band of moisture swept in from the Gulf of Alaska.

In the rest of the sodden state, more rain was forecast by midday in the lower elevations. Rain also was likely to continue Thursday in the western half of the state.

State officials are warning Washington residents hit by floods of possible health problems associated with the rampaging waters. Washington Health Secretary Kristine Gebbie says standing water over well casings or soggy ground around wells may indicate drinking water is contaminated.

State health officials say those in flooded areas who use well water should boil the water for at least one minute before drinking it or place eight to 16 drops of household bleach into a gallon of water and let it stand for 30 minutes. Otherwise, well users in flooded regions should buy bottled drinking water.

Clear skies with lows in the 30s and 40s greeted Midwest residents Wednesday as a ridge of high pressure sitting over the Ohio River Valley brought in milder weather, said forecaster Don Morrison.

"It's gorgeous, that's all. There's sunny skies all over the place and going to be up near record breaking temperatures," Morrison said. "We're going to have just a great day." The warmer readings were expected to prevail through the Midwest for the rest of the week, he said.

New England was nicer, too, after recent snows and chlls. The weather service said winds have eased and skies were partly to mostly sunny with temperatures in the upper 20s in the far northern part of the region to the 40s in the south. There were some lingering snow and flurries along the Canadian border regions but the NWS said little additional accumulations are expected.

(NOV. 14) UPI - U-S lawmakers visiting Beijing say senior Chinese officials have re-affirmed support for efforts to isolate Iraq, but made no commitment on the use of armed force in the Gulf. They also ruled out any deployment of Chinese troops to the region. The five members of the House of Representatives also told reporters the officials had not linked support on the Gulf to demands that the United States ease sanctions imposed against China after its crackdown on the pro-democracy movement last year.

Economists in the Middle East say the U-N economic embargo on Iraq is causing more severe shortages, price hikes and factory closures than the Gulf war. Observers say the trade embargo has successfully prevented raw materials, machinery and spare parts from reaching Iraq, while almost completely halting the country's lucrative oil exports. One Arab banker told U-P-I that Iraq is expected to lose about 15 BILLION dollars a year in lost oil sales.

Philippine officials say 79 people are dead and 54 are missing after super Typhoon Mike devasted the central islands yesterday before moving on toward Vietnam. Almost 500-thousand people are housed in evacuation centers. President Aquino proclaimed a ''state of public calamity'' in 31 of the country's 73 provinces to allow the release of funds for relief efforts and to prevent hoarding of vital commodities.

A gunman armed with two high-powered rifles opened fire in a quiet retirement village in New Zealand last night and today, killing 11 people and wounding two children. The man held police at bay for 23 hours until a team of 140 officers rushed him and forced him out in the open. The gunman was shot twice and later died. The rampage began when a house was set on fire and the first shots were heard in the town of about 50, most of them elderly retirees.

Work is proceeding the Cape Canaveral today, leading up to a planned launch tomorow night for the space shuttle Atlantis. A gantry will be moved away from the shuttle today to clear the way for tomorrow's scheduled fueling operation. However, there is a chance that bad weather will delay the mission to carry a secret spy satellite into orbit. The shuttle crew arrived at the Kennedy Space Center yesterday.

British broadcasting legend Malcolm Muggeridge died today in a nursing home at the age of 87. He had suffered a stroke three months ago. Muggeridge gained fame for his television work but did not own a T- V set. He once said that television ''only encourages fantasy.'' Muggereidge was a journalist, an author, and during World War Two, served as a spy in Portuguese Africa, assigned to stop the plans of German and Italian efforts to sabotage British ships. He was later known as his country's leading writer and social critic.

#90318u0421 11/14/1990 ~United Press International

MANCHESTER-BY-THE-SEA, MA (NOV. 14) UPI - Plans were being made Tuesday to salvage the wreckage of a 63-foot yacht Army Gen. George S. Patton planned to sail around the world after World War II. A mooring cable broke during a storm Saturday and 60-knot winds blew the yacht onto some rocks at Manchester-by-the-Sea.

The town's harbor master, Peter Mains, said the 51-year-old two-masted schooner, named When and If, landed on a ledge. "The port side is all bashed in," said Mains. "Everybody up here is heartbroken over it."

The vessel, built in Wiscasset, Maine, in 1939, was given to the Landmark School in Beverly and Manchester-by-the-Sea in 1973 by Patton's nephew, Frederick Ayer Jr.

Patton, whose 105th birthday was Monday, had named his schooner When and If because of his plan to sail it around the world "when and if I return from the war," Patton's nephew Neil Ayer of Beverly told The Boston Globe.

However, the famed general was killed in an auto accident in Berlin in 1945 just after the war ended. Patton had lived in nearby Hamilton for awhile before the war. Family members still live in the area. Officials said town police were watching the wreckage to keep vandals away.

The headmaster of the Landmark School, Robert Broudo of Topsfield, said the school plans to make every effort to save the 53-ton boat. He said a barge and crane would be used to lift the schooner off the rocks and take it to a shipyard in Salem. He said repairs could cost up to $250,000.

The Landmark School had used the vessel as a school at sea since 1973 for dyslexic children. The program includes a full academic year on board, with breakfast and cleaning followed by classes.

George Grimes of Hamilton, the ship's present skipper, said youngsters were aboard the vessel for an average of three or four days a week during the fall. "This is obviously very sad," he said.

#90318u0451 11/14/1990 ~United Press International

BONN, GERMANY (NOV. 14) UPI - Germany's prosecutor general said Wednesday he favors amnesty for former East German spies, including legendary masterspy Markus Wolf, long known as the most successful East bloc agent ever.

Federal Prosecutor Alexander von Stahl said in an interview with German radio he did not attach ''all that much importance'' to an arrest warrant for Wolf, 67, who has disappeared.

''I am in favor of an amnesty for those who were active in the intelligence services in the GDR for the GDR (East Germany) - that is, Markus Wolf and his leading colleagues,'' von Stahl said.

Wolf, who headed East Germany's formidable foreign intelligence service until 1987, was known as the Warsaw Pact's most successful spy - depicted as ''Carla'' in several of British novelist John le Carre's espionage thrillers.

Shortly after church bells marked the unification of East and West Germany on Oct. 3, federal spycatchers knocked at Wolf's door but found he had left his East Berlin residence without leaving a forwarding address.

A few days later, von Stahl received a letter from Wolf who said he was on vacation, could be reached through his attorneys and was ''available at any time.''

#90318u0452 11/14/1990 ~United Press International

WASHINGTON (NOV. 14) UPI - U.S. retail sales inched 0.1 percent higher in October to $152.32 billion, the Commerce Department said Wednesday, an indication consumers are cutting back as unemployment rises and economic fear intensifies.

''Consumers are gloomy,'' said Allen Sinai, chief economist at the Boston Co. ''It's deadly for retail sales and suggests a bleak Christmas for retailers. We're now moving into the heart of the downturn.''

Not counting cars, trucks and vans, retail sales were unchanged in October. Not counting gasoline, which costs more because of the Middle East crisis, sales dipped 0.1 percent last month, a government spokesman said.

''Retail sales are sliding along with the consumer,'' Sinai said. ''The essentially unchanged results reflect a decidedly weakening at the retail level on very bad consumer fundmentals.

''Without higher gasoline prices, and seasonal adjustment factors that pushed up auto prices, retail sales would have fallen,'' he said.

October's overall 0.1 percent gain was generally in line with forecasts by private economists, and analyst Robert Dieli, at Northern Trust in Chicago, was cautiously optimistic.

''The consumers are hanging in by their fingernails,'' Dieli said. ''Things didn't go off a cliff. It was pretty soggy all around. But we could still have a reasonable Christmas.''

In September, retail sales climbed 1.3 percent nationwide following an advance of 1.6 percent in August, according to the data compiled by the department's Census Bureau.

Although the domestic economy appears to be in or near a recession, with both the consumer and manufacturing sectors showing weakness, retail sales were up 4.9 percent over October 1989.

But a market letter by Fuji Securities of Chicago said consumer confidence is at ''recessionary levels.''

The U.S. Chamber of Commerce, meanwhile, Wednesday forecast an economic downturn through the first half of next year and predicted unemployment would exceed 7 percent by the end of 1991. The October rate was 5.7 percent.

During October, sales of durable goods climbed 0.7 percent while sales of non-durable goods dropped 0.2 percent.

Sales were up 3.2 percent at gasoline service stations during October, reflecting the higher petroleum prices, and jumped 23.7 percent over October 1989, the Commerce Department said.

Last month's sales also advanced 1.6 percent at drug stores, climbed 1.5 percent at hardware and building supply stores, and rose 0.7 percent at automotive dealerships, the department said.

However, sales were off 1 percent at clothing stores, down 0.6 percent at department stores, off 0.5 percent at food stores, and down 0.3 percent at both restaurants and furniture stores.

The data are adjusted for seasonal factors.

Despite widespread fears, Dieli held up hope for the Christmas buying season, traditionally the most promising for the nation's retailers.

''The worst forecasters are retailers,'' Dieli said. ''Every year they say the world is going to end. These people, in general, tend to be pessimists. We could have enough strength left to carry us through this dull period.''

Sinai also sounded an upbeat note, saying, ''come next spring I would expect a brightening outlook and a return to the stores by consumers.''

''But it could be a very gray winter,'' he warned.

#90318u0455 11/14/1990 ~United Press International

DALLAS (NOV. 14) UPI - Cigarette smoking may hamper a smoker's ability to

feel the chest pains that may be an important early warning sign of heart disease, researchers reported Wednesday.

Researchers from the University of North Carolina School of Medicine in Chapel Hill, N.C., compared the pain response of 20 male smokers ages 19 to 44 with that of five male non-smokers in the same age range.

After 12 hours of no cigarettes or caffein, researchers placed a heat probe to the men's forearms and recorded the temperature at which each subject first felt pain and the temperature at which they could no longer tolerate the heat.

Then, the smokers were allowed to smoke three of their usual brand of cigarettes. The researchers found all smokers had higher pain thresholds and tolerance immediately after taking those puffs, while non-smokers showed no signficiant changes during the retests.

"This demonstrates that cigarette smokers do have temporary alterations in their ability to perceive pain, and I think this may explain why smokers have a higher prevalence of silent ischemia (painless heart disease)," said David Sheps, co-author of the study. Chest pains can be a warning sign that blood flow to the heart muscle is being cut off by blocked arteries and is not getting enough oxygen.

Past studies have shown that painless coronary heart disease is more common in smokers than in non-smokers. Animal research has also suggested that nicotine from cigarettes may act on the nervous sytem to decrease pain perception.

In addition to possibly masking early warning signs of heart disease, smoking is also known to directly boost the risk of having a heart attack - the nation's No. 1 killer.

#90318u0472 11/14/1990 ~United Press International

DETROIT (NOV. 14) UPI - An inventor who won a 12-year patent fight with Ford Motor Co. last July is expected to settle the case for $10.2 million, the Detroit News said Wednesday.

Robert Kearns, inventor of the intermittent windshield wiper system, was scheduled to meet Wednesday with Ford attorneys and U.S. District Judge Avern Cohn to review such an offer from the No. 2 automaker.

His son, Dennis Kearns, said his father was likely to agree to the settlement after Kearns's attorneys and a judge threatened to question his mental competence.

Last July a federal jury in Detroit ordered Ford to pay Kearns $5.1 million, plus interest, for violating his patent on windshield wipers. Interest costs,

which are still pending before the court, have pushed up the award to between $8.5 million and $11.5 million.

Kearns, 63, had said he would appeal the award. He had sought $141 million in damages and has rejected a $30 million out-of-court settlement.

But Ford attorneys said Tuesday they were willing to pay Kearns $10.2 million to avoid further litigation. The lump-sum payment would be made in three days, Ford attorney Malcolm E. Wheeler said.

The settlement would prevent Kearns or his heirs from future litigation against Ford regarding the patents. But it would not prevent Kearns from proceeding with his cases against 23 other automakers, including General Motors Corp., Chrysler Corp. and Toyota Motor Co., which he claims used the intermittment wiper system without permission.

Kearns's mental state is in question, according to court documents and letters by Cohn, partly because of the inventor's disappearance from the trial two weeks before it was settled July 13.

''I have serious reservations about Dr. Kearns' touch with reality,'' Cohn said during a May 24 hearing.

Kearns, a former Wayne State University professor who now lives in Gaithersburg, Md., was jailed in July after he failed to pay $700 in back alimony to his ex-wife, Phyllis. Kearns claimed he was short of cash because of trial costs.

But Ford attorney Wheeler said Kearns's mental state was never an issue with the automaker.

SAO PAULO, BRAZIL (NOV. 14) UPI - The gap between rich and poor in Brazil, estimated at the largest in the world, grew substantially between 1981 and 1989, with 1 percent of the population now earning 17.3 percent of the nation's income, the government reported Wednesday.

The report also reaffirmed that the country's wealth is concentrated in the rich commercial centers of the south, such as Sao Paulo and Rio de Janeiro, and that the widest gap between rich and poor is in the impoverished Northeast where timber tycoons and ranchers live alongside shantytowns filled with the nation's poorest people.

The average income in the northeast is 40 percent less than that in the southeast, the report said. According to World Bank statistics, the gap between rich and poor in Brazil is the world's largest.

Eduardo Guimaraes, president of the Brizilian Institute of Geographics and Statistics, which compiled the report, said Brazilians made substantial gains in the 1980s over the 1970s, when the nation was still under military rule.

President Fernando Collor de Mello, who in March became Brazil's second civilian president since military rule ended in 1985, has vowed to cut the income gap. But government officials and most observers agree that his administration has little power to affect change at the hands of a dominant industrial machine that controls South America's largest economy.

Wednesday's report showed that the 650,000 richest people in the country, who comprise 1 percent of the population, earned 17.3 percent of the income in 1989. Five percent of the 65.8 million people over the age of 10 who were economically active in 1989 accounted for 39.4 percent of the nation's income, compared with 33.4 percent in 1981.

The poorest 10 percent of the country - 6.6 million people - earned 0.6 percent of the nation's income in 1989, compared with 0.9 percent of the 1981 income.

But the report also showed that in the years between 1981 and 1989 the nation's illiteracy rate for people 7 years of age or older dropped from 24.9 percent to 20.1 percent.

The census also showed a modest gain for working women, who now earn an average of 53.1 percent as much as their male counterparts, whereas they earned only 50.7 percent in 1981. And it showed the size of the Brazilian family decreased from an average of 4.3 people in 1981 to 3.9 people.

It also showed the standard of living increased for most Brazilians: 73 percent had running water in their homes in 1989, compared with 60 percent in 1981; 63 percent had home trash collection, compared with 49 percent in 1981; 87 percent had electricity, over 75 percent in 1981; 70 percent owned refrigerators, compared with 57 percent in 1981; and 58.4 percent owned homes in 1989, compared with 56 percent in 1981.

VIENNA (NOV. 14) UPI - The International Atomic Energy Agency said Wednesday it has received approval to inspect Iraqi atomic power plants, a routine check that could shed light on Iraqi President Saddam Hussein's nuclear ambitions.

The Vienna-based agency is barred from revealing the date of the inspection, but U.S. officials familiar with the process said an IAEA team was scheduled to visit the Osirak plant on Thursday.

''We have been informed by the Iraqi ambassador that we can go ahead with the inspection,'' said IAEA spokesman Hans Meyer.

IAEA officials will examine the bomb-damaged Osirak plant as well as nuclear fuel processing laboratories and storeage sites, Meyer said, adding that the purpose of the checkup was to ensure that radioactive materials were being ''used only for peaceful purposes.'' There was no indication that the inspection was being delayed because of the crisis in the Persian Gulf.

If Baghdad had refused to allow the inspection would have been interpreted as a sign that Iraqi leader Saddam was moving ahead with an alleged campaign to build nuclear weapons, one U.S. official said earlier this week.

The Osirak plant, which contains Iraq's sole nuclear reactor, was destroyed in an Israeli bombing raid in 1981. In the wreckage of the reactor building are fuel rods containing about 25 pounds of enriched uranium, enough for one small nuclear weapon.

One of the duties of the IAEA inspectors who visit the site twice a year is to make sure that the fuel rods are still there.

Under international regulations the results of the inspection will be presented to the host country but can be released publicly only if the host approves.

The last routine IAEA inspection of the Iraqi reactor and nuclear research facilities in April turned up no evidence of irregularities.

Despite Iraqi denials, several intelligence experts have concluded that Saddam is intent on developing nuclear weapons as well as ballistic missiles that could accurately deliver them.

A recent publication by the Carnegie Endowment for Peace, ''Nuclear Ambitions '' cited a ''growing consensus, based on strong circumstantial evidence, that the hidden objective in Iraq's expansion of its nuclear sector in the 1970s was the gradual acquisition of a nuclear weapons capability.

''The capability was presumably intended to advance three primary objectives: to counter Israel's existing but unacknowledged nuclear arsenal, to advance President Saddam Hussein's claim to Arab leadership and to hedge against Iran's nuclear potential.''

In the closing days of its 8-year war with Iran, Iraq set back the Iranian nuclear project indefinitely by repeatedly bombing the main Iranian nuclear research and power-generating installations.

#90318u0503 11/14/1990 ~United Press International
WASHINGTON (NOV. 14) UPI - The U.S. Chamber of Commerce's latest economic forecast called Wednesday for a deeper recession than initially expected, lasting through the first half of 1991 and pushing the unemployment rate above seven percent by the end of next year.

The chamber, which has been extremely pessimistic about the American economy and high interest rates intended to hold inflation in check, had expected a recovery by the end of the first quarter of the new year.

Richard Rahn, the organization's chief economist, warned a downturn would harm overseas economies and threaten U.S. exports, which are expected to be an island of strength in a recession as the cheaper dollar makes American goods more attractive.

"Our increased pessimism results from the imposition of higher taxes, more regulation on the economy and an acceleration of federal spending that will crowd out private investment and keep interest rates from falling," Rahn said.

"While short-term interest rates will decline slightly due to economic weakness, long-term rates will not decline substantially until the (Federal Reserve) adopts a credible and understandable long-term anti-inflation policy and Congress reduces tax impediments to savings," Rahn said.

Rahn also noted that the United States started the last decade with weak economic growth, surging inflation, higher taxes, and more federal spending and regulation.

"Empirical evidence shows that the large proportion of (the nation's total output of goods and services) devoted to federal spending today - 23.2 percent up a full percentage point since 1980 - will keep real interest rates high," he said.

The increase in government spending and the high interest rates on Treasury bills, notes and bonds are expected to push the federal budget deficit to the $300 billion range during the new fiscal year, Rahn added. That expectation is shared by a number of other economists.

#90318u0504 11/14/1990 ~United Press International
EASTON, PA (NOV. 14) UPI - A new study has confirmed what many women have known for years - it's not socially advantageous to eat large meals in public. Researchers from Lafayette College in Easton, Pa., say that when all other things are equal, women with large appetites are not highly regarded by their peers.

In the study, a student actress was filmed eating four different meals chosen

by students who rated the menus from "very feminine" to "very masculine," said Susan Basow, associate professor of psychology at Lafayette.

"A moderately attractive, average weight female college student was hired to perform in the video," said Basow. "The lunch was scripted and the student was trained to keep gestures and expressions in all four conditions."

The student ate a "feminine" meal of a small tossed salad with diet Italian dressing and a glass of seltzer; a larger "feminine" lunch of a large Greek salad and diet soda; a "masculine" meal of half a meatball parmesan sandwich on a hoagie roll, six mozzarella sticks and a large soda; and a "man's" meal of a large meatball parmesan sandwich, cheese sticks, soda, large fries and chocolate cake.

Student volunteers who viewed one of the four meals rated the woman as being significantly more feminine and having more social appeal when eating the small meal. But when the same woman was seen eating the large hoagie, she was considered less socially appealing and as less physically attractive than the eaters of the other meals.

"The pressure on women is incredible," said Basow. "An 'unfeminine' woman is not going to be well liked, even by other women. To appear feminine, therefore she must be constantly on guard, even when she is engaged in the most ordinary of daily rituals - such as eating."

"The effects of the meal appeared to be strongest on social appeal," said Basow, "which supports previous research that women eat small meals in order to appear socially desirable."

Basow said the fact that the woman is seen eating alone strengthens the results, because she may have been rated even more negatively or positively if she had been eating with another person, particularly a male.

"This enhanced social appeal of a woman who eats 'lightly' ... may explain why women manipulate their eating behavior in the presence of others, especially others they want to impress," said Basow. Basow said the research could help researchers understand and treat eating disorders.

#90318u0532 11/14/1990 ~United Press International
(NOV. 14) UPI - President Bush meets with congressional leaders this morning amid pressure that he call a special session of Congress to debate the U-S mission in the Persian Gulf. Senate leaders already plan hearings on the Gulf crisis. The administration's recent announcement that it will send another 100-thousand combat troops to the region has prompted fears the United States-led international force may be preparing to go on the offensive.

Retail sales were up one-tenth of one percent last month, but the figures from the Commerce Department are NOT what they seem to be at first glance. Much of the increase in spending can be traced to higher gasoline prices because of the Mideast crisis. Take those sales out of the overall reading and it suddenly drops to a negative one-tenth of one percent. Clothing stores reported sales down one percent, department store sales were down six-tenths of one percent.

A challenge to British Prime Minister Margaret Thatcher. Former Defense Secretary Michael Heseltine say he'll run against Thatcher for the post of Conservative Party leader. If he wins, be would become prime minister. Haseltine is urging closer ties between Britain and the European Committee and says he has the support of more than 100 Conservative Party members in Parliament. Thatcher's popularilty has been falling in recent polls.

Police in Berlin have arrested at least 110 people in pitched battles with youths who tried to stop authorities from evicting squatters from buildings in east Berlin. The youths dug trenches, set up barricades and threw gasoline bombs at officers. The evictions follow other battles on Monday night in which more than 100 police were injured.

A state of emergency is in effect in the Philippines after powerful Typhoon Mike pounded the Pacific island nation with torrential rains and winds reaching 150 miles an hour. The death toll stands at 79 and is expected to rise. Nearly one-half-Million people are in evacuation centers and many may NOT have much to return home to. President Corazon Aquino issued a ''state of public calamity'' in 31 of the Philippines 73 provinces.

Security is tight at the Nevada Test Site today as authorities search for a group of anti-nuclear protesters. Members of the environmental group

Greenpeace say three woman hiked into the rugged Pahute Mesa yesterday in hopes to halting a scheduled underground atomic explosion. An Energy Department spokesman says security forces checked Area 19 yesterday but didN'T find a trace of the demonstrators. An air- ground search is continuing this morning.

Vice President Quayle has taken his Japanese hosts to task on their Persian Gulf policy. Quayle represented the United States at Monday's elevation of Emperor Akihito and he met today with Prime Minister Toshiki Kaifu. The vice president later told reporters that while he praised Japan for making a four-BILLION-dollar contribution to the U-S-led multi-national force, he also pressed Kaifu to send personnel instead of just money. Quayle chided Tokyo for NOT living up to its responsibilities as an economic super-power.

#90318u0537 11/14/1990 ~United Press International

PRAGUE, CZECHOSLOVAKIA (NOV. 14) UPI - Czechoslovak student leaders have expressed dismay that they will need tickets to attend a speech by President Bush on November 17, the first anniversary of the ''velvet revolution.''

But the students say they will come anyway and carry banners supporting Bush's policy on the Persian Gulf crisis.

''We will go with banners showing our full support for Mr. Bush's Persian Gulf policy because democracy and freedom for Kuwait is what is at stake now. We don't plan empty platitudes or another May Day celebration,'' said student leader Jan A. Dus, refering to the annual Communist Party tradition of parades of workers and long speeches by politicians.

Nonetheless, the students say requiring tickets violates the spirit of the revolution they are commemorating.

Bush will speak in Wenceslaus Square, a broad plaza in the heart of Prague, where last year hundreds of thousands of Czechoslovaks gathered to protest Communist Party rule.

The week of demonstrations there brought together students, workers, intellectuals and bureaucrats, all fed up with 42 years of totalitarianism, and persuaded the country's aging communist leadership to yield power.

''We have a deep respect for President Bush,'' Dus, of the Charles University Faculty of Philosophy, wrote in an open letter to several Prague newspapers.

''But we feel uncomfortable meeting him in Wenceslaus Square with an admission ticket in our hands. Demonstrations were important in November and December and we did not need admission tickets then,'' Dus said.

The letter said the students feel November 17 is ''a day of grim determination with which the students and all decent people undertook and are still waging a struggle against violence and injustice.''

An editor at the student newspaper Studenske Listy told United Press International on Wednesday authorities gave the paper 25,000 tickets for students but that only 5,000 students had requested them.

The students also object to a planned foot race to follow the route they took last November 17 from the Albertov student hostel towards Wenceslaus Square on grounds it violates the somber spirit of the day.

Arriving at Narodni Street, the students were set upon by riot police and anti-terrorist comamndoes. More than 100 were taken to hospital and the violence sparked the Wenceslaus Square demonstrations, leading to the peaceful overthrow three weeks later.

#90318u0548 11/14/1990 ~United Press International

NEW YORK (NOV. 14) UPI - The judge overseeing the Eastern Airlines bankruptcy proceedings was scheduled Wednesday to hear arguments from unsecured creditors who want the airline liquidated immediately.

The unsecured creditors Tuesday urged Judge Burton Lifland to deny the release of any more funds from the bankrupt carrier's escrow account, money the airline has said it needs to keep operating.

The creditors' committee called for a "prompt and orderly liquidation of the airline," saying that Eastern's losses had far exceeded projections by the airline's court-appointed trustee, Martin Shugrue.

"The trustee's projections have repeatedly been erroneous," the creditors' motion said. "It's time for the committee's judgment to be given deference. Eastern is not, and is not likely to become under any realistic scenario, a viable stand-alone airline." The creditors said losses for June through October totaled $370.8 million, whereas Shugrue had projected $197.1 million.

Shugrue last week asked for another $30 million this month and $40 million in mid-December from the escrow fund, which was set up from asset sales including Latin American routes and the northeast shuttle. He said Eastern was making gains in winning back business travelers but that the airline needed more money to keep operating. There is $257 million for unsecured creditors remaining in the escrow fund.

The unsecured creditors, which include The Boeing Co., Airbus Industrie, United Technologies Corp., General Electric Corp., and Citicorp, called for the liquidation despite being warned by Shugrue they might not be paid any of

the money they are owed, since simply liquidating the carrier could cost between $500 million and $600 million.

The committee said it would file a liquidation plan and would move to begin a liquidation. It added that Shugrue's turnaround plan had been stymied by an unanticipated rise in jet fuel prices. Eastern has been operating under Chapter 11 bankruptcy protection since March 9, 1989.

#90318u0584 11/14/1990 ~United Press International

HOUSTON (NOV. 14) UPI - Baker Hughes Inc. Wednesday reported a fourth-quarter net income of $48.5 million, or 35 cents a share, compared with $36.2 million, or 29 cents a share, for the same period last year.

Revenues for the quarter ended Sept. 30 were $722.8 million compared with revenues of $604.2 million. For the full fiscal year, revenues were $2.61 billion compared with $2.3 billion for 1989.

Net income for fiscal 1990 was $142.2 million, or $1.06 a share, compared with $85 million, or 66 cents a share, for 1989.

''Our improved oil field results were impacted by higher U.S. drilling activity,'' said J.D. Woods, Baker Hughes president. ''During the year several acquisitions and dispositions were accomplished with the objective of strengthening our core business.

''These acquisitions and dispositions added net increases to our profits,'' Woods said. ''In addition, our process technology business had a significantly improved year and added to our results as well.''

Baker Hughes is a major provider of products and services to the oil, gas and process industries.

#90318u0591 11/14/1990 ~United Press International

HOUSTON (NOV. 14) UPI - Attorneys representing Gulf Oil Co. employees talked Wednesday with opposing attorneys about a possible settlement in a $700 million class-action lawsuit over pension benefits.

The former Gulf employees claim they were denied pension benefits after Gulf Oil, then based in Pittsburgh, merged with Chevron Corp. - known at the time as Standard Oil Co. of California, or Socal - in 1984. The lawsuit was filed on behalf of 40,000 employees, retirees and family members.

U.S. District Judge Sim Lake ordered an interruption to the trial last week after nearly four weeks of highly complex testimony. He called for the settlement conference in hopes of resolving the dispute.

Plaintiffs' attorney H. Lee Godfrey and Chevron attorney Robert J. Maliniak were to discuss possible settlements.

Lake also ordered Kenneth T. Derr, Chevron chief executive officer, to appear ''to ensure the presence of a corporate representative with authority to speak definitively for the corporation and to commit the corporation to a particular position in this litigation.''

Former Gulf employees allege surplus money in the Gulf plan was improperly mixed in with Chevron plan funds when San Francisco-based Chevron merged the two plans into one in 1988.

They also claimed many Gulf employees who lost jobs in the merger shakeout were unjustly denied pension benefits.

Chevron denies it has used any merged pension funds for other corporate purposes, and that an ongoing pension plan cannot have excess assets. If no settlement is reached, the trial will resume Monday.

#90318u0609 11/14/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (NOV. 14) UPI - Civil-rights activists and lawyers called Wednesday for the resignation of Defense Minister Magnus Malan following the report of a judicial inquiry that found a covert military unit acted illegally against South African citizens.

''It is hard to decide whether Gen. Malan's assertion (Tuesday) that he and

his senior colleagues were unaware of the (unit's) actions is simply a blatant lie or whether it merely indicates the awesome extent of their incompetence,'' the anti-apartheid End Conscription Campaign said.

''The general should go immediately,'' an ECC spokesman said.

''The real problem here is a profound disregard for the democratic principle of accountability,'' University of Cape Town law professor Denis Davis said. ''It is traditionally abused in this country.''

Defense spokesman for the liberal Democratic Party, Gen. Bob Rogers, said, ''In this case it would appear once again that while individuals down the line have been named, no responsibility is apportioned to their supporters at the highest level.'' He said Malan should step down.

The state-appointed inquiry into police and army death squads found no firm evidence of security-force involvement in the killing of anti- apartheid activists after hearing testimony in South Africa and abroad from March to August and making its report public Tuesday.

But the one-person judicial commission of Justice Louis Harms said the army's secret and Civil Cooperation Bureau ''conspired to commit crimes'' that included attacks on the premises of anti-government groups and may have included plotting killings.

Harms said the CCB's actions and the evasiveness of its operatives before the commission ''contaminated'' the country's security arm and ''creates suspicions that they have been involved in ... crimes of violence.''

He passed on to prosecutors for investigation one unsolved killing, the bombing of a black school and media center and plans to kill two anti-apartheid lawyers and one journalist - crimes committed since 1986 and said to be linked to the CCB.

Harms said the inquiry ordered by President Frederik de Klerk on Jan. 31 did not include examining the role of politicians and declined to make a finding on the hawkish Malan's possible involvement.

But human-rights lobbies insisted Harms should have made a link between Malan, as ultimate head of the SouthAfrican Defense Force, and the shadowy CCB. Army officers described it as an ''anti-terrorist'' unit.

Malan consistently denied knowledge of illegal CCB activities and disbanded it in June in the face of widespread public pressure and news reports of perceived CCB abuses.

''In spite of the barrage of criticism to which the SADF and I have been subjected over the past months ... I am satisfied that the SADF as such has

... emerged with honor,'' Malansaid Tuesday in response to the Harms findings and following an appeal from de Klerk that the report end the matter and people not conduct ''witch-hunts'' for culprits.

But Rogers, a retired air force general, said if Malan was not aware of the CCB's activities it showed ''a woeful lack of control over activities which could affect the security of the state.''

A lawyer for the independent Human Rights Commission said the report ''has run true to form in discrediting both the value of government- appointed commissions and the independence of the judiciary.''

De Klerk appointed the commission to investigate death-squad allegations following revelations in October 1989 by former security policemen who claimed to have murdred anti-apartheid activists.

Charges that the army ran the CCB to terrorize anti-government groups arose soon afterwards and Harms' brief was to investigate 71 aparently politically motivated killings since 1977.

He found no evidence of police death squads, saying the evidence of the three former policemen was ''unreliable'' and ''self-seving.''

#90318u0611 11/14/1990 ~United Press International

LONDON (NOV. 14) UPI - Former Defense Secretary Michael Heseltine said Wednesday he will challenge Prime Minister Margaret Thatcher for the leadership of the Conservative Party, bringing to a head the political infighting that has caused the party's deepest division in 15 years.

Heseltine's bid to move into Downing Street had been widely expected amid an escalating public split within the government over Thatcher's policy on Europe which former Deputy Prime Minister Sir Geoffrey Howe called a ''nightmare vision.''

Heseltine, 57, said in a television interview that more than 100 members of the Conservative Party had urged him to challenge Thatcher for the vote to be held next Tuesday.

''I have a better chance now than Mrs. Thatcher of leading the Conservative Party into a fourth electoral victory and avoiding the ultimate calamity of a Labor government,'' he said.

Analysts said if Heseltine can get at least 120 votes, with some 40 abstentions, he would seriously undermine Thatcher's leadership mantle. There are 372 Conservative members of Parliament, and Thatcher must get at least 15 percent more than the majority, or 214 votes, to win. Otherwise a second vote

will follow one week later in which other contenders may stand.

Heseltine said if he won, he would have an "immediate and fundamental review'' of the Thatcher government's poll tax, a flat fee levied on every taxpayer regardless of income that has been widely criticized as inequitable.

The poll tax, coupled with a high inflation rate, an economic downturn and what is perceived as Thatcher's imperious leadership style are seen as the main cause of the Conservatives current 16-20 point lag in opinion polls behind the main opposition Labor Party.

Voter disillusionment with the governing party has been reflected in a string of by-election defeats, even in traditional Conservative strongholds, fueling concern among junior members about their prospects in elections that must be called by mid-1991.

Heseltine's announcement prompted many members to publicly take sides, with several senior Cabinet members pledging their loyalty to Thatcher.

''We expect her to win, we hope she will win, we hope she will remain leader of the Conservative Party. ... That would certainly be the best outcome,'' said Chancellor of the Exchequer John Major, who seconded Thatcher as a candidate for the contest.

Foreign Secretary Douglas Hurd nominated Thatcher, and is now the subject of speculation that he could forward himself as a compromise candidate agreeable to both factions of the party in second-round voting if the first is inconclusive. He did not rule out the option.

''At the moment I took the basic decision last week to nominate the prime minister for her continued leadership, and I will stick by that,'' he said in an interview with the British Broadcasting Corp. ''She is a major actor on the world stage of great importance. I think that she has to decide these things.''

Other Conservatives openly endorsed Heseltine.

''She has brought this upon herself, and perhaps to go now with what grace is left is perhaps better for all of us than prolonging the agony, '' said Peter Temple Morris.

There was no immediate comment from Thatcher. The BBC quoted Downing Street sources as saying she was prepared to fight through to a second round.

Heseltine resigned in 1986 as defense secretary in a bitter dispute with Thatcher over her demands that the military buy British-made Westland helicopters, against his recommendation that the arms deal be open to competitive bidding, particularly from European competitors.

The current division among the Conservatives, regarded as its deepest since Thatcher ousted Edward Heath as party leader in 1975, has been spawned by the internal debate over Thatcher's staunch resistance to key tenets of the 12-nation European Community's moves toward political and economic union.

She believes the EC's strategy is poorly thought out and involves ceding too many sovereign powers to EC bureaucrats in Brussels, and has refused to include Britain in plans to have a single European currency by the year 2000.

Many party members say her views are outdated and risk leaving Britain i solated and left out of the expected prosperity of the unified market.

On Tuesday, in a speech before Parliament outlining why he resigned on Nov. 8, Howe disputed Thatcher's view of a united Europe being a centralized superstate, saying this was a ''nightmare image'' of a Europe ''positively teeming with ill-intentioned people, scheming, in her words, to extinguish democracy, to disolve our national identities.''

''What kind of a vision is that, for our business people who trade there each day, for our financiers who seek to make London the financial capital of Europe, for all of our young people of today?'' Howe asked.

Heseltine told the BBC after his leadership challenge announcement that Howe's speech meant these ''fundamental issues should be resolved.''

#90318u0624 11/14/1990 ~United Press International

BRUSSELS, BELGIUM (NOV. 14) UPI - The European Community Executive Commission proposed Wednesday to forgive nearly $4 billion in debt owed by 68 developing countries.

The proposal, which must be approved by the EC Council of Ministers, would apply only to money owed the 12-nation trade bloc and not to that owed individual countries or firms.

The debt-forgiveness plan applies to the ''ACP countries'' of Africa, the Caribbean and the Pacific, with which the EC has a trade and economic-development agreement under the Lome Convention.

The nearly $4 billion involved includes $1.95 billion in loans committed but not yet provided.

''We felt the EC should take steps regarding Third World debt to demonstrate that we take a very broad view of world problems,'' said Manuel Marin, the EC commissioner for overseas development.

He said the program was ''particularly aimed at African countries that are

making economic reforms and taking efforts to rebuild their economies and social fabrics.''

Many developing countries are unable to pay their staggering debts because prices for copper, coffee, cocoa and other of their exports have fallen sharply.

Marin said there is no sign of quick recovery in commodity prices so ''this proposal holds out some hope for these countries.''

The proposal is likely to be considered next month by EC foreign ministers.

#90318u0670 11/14/1990 ~United Press International
MOSCOW (NOV. 14) UPI - Zviad Gamsakhurdia, a former dissident whose nationalist party swept Georgia's elections, was elected president Wednesday of the southern Soviet republic.

Gamsakhurdia was chosen on the first ballot by the Georgian parliament, which is now controlled by his ''Round Table-Free Georgia'' party.

The official Soviet news agency Tass did not give figures for the vote, but the Round Table, which swept the Communist Party from power last month in parliamentary elections, holds 155 of the legislature's 250 seats.

Shortly before Gamsakhurdia's election, the Communist government of Georgia resigned, and nationalists raised Georgia's crimson, black and white flag of independence atop the government building in the ancient capital of Tbilisi.

Only 11 years ago, Gamsakhurdia, founder of the Georgian branch of the Helsinki Rights Watch Group, was sentenced to five years in prison for anti-Soviet agitation. In one of his lowest moments, a broken Gamsakhurdia confessed the crimes during a court hearing shortly before going to prison.

After his release from jail, the fiercely nationalistic Gamsakhurdia, 50, steadily built the coalition that swept him to power and ousted the Communists in the first free elections in Georgia in seven decades.

Gamsakhurdia is one of the radical and colorful presidents in some of the Soviet Unions 15 republics who have come forward under perestroika reforms.

Vytautas Landsbergis, a sardonic former music professor, now leads Lithuania.

Levon Ter-Petrosyan, who founded the movement to reunite the Azerbaijani territory of Nagorno-Karabakh with Armenia, became a national hero and then head of the Transcaucasian republic that borders Georgia.

After his party came to power last month, Gamsakhurdia vowed that he would work to regain the sovereignty that Georgia briefly enjoyed from 1918 to 1921 when it was the toast of Europe as a flourishing socialist state.

In 1921, under an order by Josef Stalin, a Georgian who was to become the Soviet leader, the republic was invaded by the Red Army and annexed by the Soviet Union.

Georgia, which became a Christian state in the sixth century, is one of the most fiercely nationalistic of the Soviet republics, rivaling even the Baltic peoples' attachement to their republics of Lithuania, Estonia and Latvia.

Gamsakhurdia, a former teacher of English and son of a writer famous in Georgia, did not spell out any timetable for regaining independence.

But one of his first decisions will be whether to sign the new union treaty that Soviet President Mikhail Gorbachev is promoting to allow republics wide political and economic freedom to keep them in a reconstituted Soviet Union.

Georgia, on the Black Sea, was one of the earliest Christian nations. Georgian among the world's most ancient languages, is so beloved by Georgians that they took to the streets in 1978 when a Soviet decree threatened to make Russian the republic's official tongue.

Another famous Georgian, Eduard Shevardnadze, the Communist leader in Georgia who was to become the Soviet foreign minister, helped restore calm in that crisis, and the Kremlin eventually relented on the language issue.

Georgian economists believe that the republic of 5.3 million people can prosper on its own. The republic is an agricultural region rich in citrus fruits and tobacco, and is home to a metallurgical industry built up during the Soviet era.

#90318u0691 11/14/1990 ~United Press International

NEW YORK (NOV. 14) UPI - About a dozen men with baseball bats and sticks stopped a New York Daily News delivery truck early Wednesday and beat the driver and an assistant in the fifth strike-related act of violence this week. The driver was not seriously injured but the assistant was taken to Maimonides Hospital with a possible broken arm, police said.

As the bitter strike at the paper went into its 21st day, national union leaders planned to put their muscle behind striking News workers at an

afternoon rally Wednesday outside the newspaper's Manhattan headquarters.

Lane Kirkland, president of the National AFL-CIO, and at least a half dozen leaders of other national unions, including those representing workers in the auto, steel, garment, textile, health care and service industries, were to join pickets.

The Brooklyn attack occurred at 5:30 a.m. when a gang of about 12 men stopped a News delivery truck, police said. The mob flattened the vehicle's front tires, broke the windows and headlights and attacked the driver and his assistant, police said. News spokeswoman Lisa Robinson said the two workers were recently hired and the assistant was giving a description of his attackers to police.

Tuesday, a replacement driver needed stitches in his head after being attacked and dozens of men armed with baseball bats broke the windows of a bus in the parking lot of a Westbury hotel that was waiting to take replacement workers to the News's printing plant in Garden City, police said.

On Monday, a shot was fired at but missed a News driver and early Sunday, a replacement worker leaving the paper's downtown Brooklyn plant was attacked by several men who broke his arm, police said. No arrests have been made in any of this week's incidents.

Management has blamed union members for repeated acts of violence, while strikers have claimed security guards hired by the News have harassed and threatened them.

SAN FRANCISCO (NOV. 14) UPI - Visa International and Sprint International said Wednesday they would introduce VisaPhone, a worldwide service allowing non-U.S. Visa cardholders to use their cards to pay for long- distance calls.

Cardholders could use their current Visa cards to pay for long- distance calls within and from the United States.

Under an agreement signed Wednesday, all Visa member financial institutions outside the United States could offer the service in the first quarter of 1991.

Visa launched the VisaPhone service in the United States earlier this year. It is marketed domestically by Citibank, Security Pacific, Bank of America, Wells Fargo, and other major financial institutions.

''VisaPhone now gives our members outside the United States the ability to tap an enormous market that is growing a a rate of 15 percent annually,'' said Jean-Jacques Desbons, executive vice prsident for product market and development at Visa International. ''Not only can VisaPhone build volume among existing cardholders, but it is a value- added enhancement, which banks can use to attract new cardholders.''

With VisaPhone, cardholders dial a toll-free number, then choose to dial directly or through a Sprint operator. Operator assistance is available in Japanese, Spanish, or French as well as English.

At first, VisaPhone cardholders could use VisaPhone to place long distance calls when traveling in the United States. The system would be expanded as Visa develops agreements with telecommunications carriers around the world, Visa said.

Visa, with 240 million cards in circulation, is the world's largest consumer card payment program.

Sprint International is a unit of US Sprint of Kansas City, Mo. Sprint is the long-distance arm of United Telecommunications Inc.

#90318u0756 11/14/1990 ~United Press International
(NOV. 14) UPI - More than 700 workers at three Army depots in Pennsylvania who had faced layoff or demotion have been spared the ax, thanks to Operation Desert Shield.

The deployment to the Persian Gulf has led the Army to delay the layoff or reassignment of 187 workers at Letterkenny Army Depot, 300 at Tobyhanna Army Depot and 250 at New Cumberland Army Depot.

The three depots were among a number of Army installations across the country targeted for civilian workforce reductions because of planned defense budget cuts. The cuts were planned before the Iraqi invasion of Kuwait and the resulting U.S. buildup in the region.

All three depots were reducing their workforces through attrition and retirements, but still some workers faced layoffs until the troops were shipped out to the desert.

"As a result of work that we were doing on Desert Shield, we were authorized to keep the 187 positions that would have been separated in a reduction in force," said Letterkenny spokeswoman Linda Dura.

"It is a very ambiguous situation," Tobyhanna spokesman Kevin Toolin said of the reason the workers are being kept on the job. "We were spared laying people off because of it (Operation Desert Shield). This is why we exist - to support the Army."

Keith Beebe of the New Cumberland Army Depot said his facility, which has been running around the clock, actually needs about 95 workers but has not been authorized to fill the positions. The vacancies came about because the depot was authorized to keep 345 workers but only 250 of those who would have been affected by the layoff remained.

"Our workload's ever increasing," Beebe said. New Cumberland has been shipping spare parts for tanks, helicopters and other equipment to Army units in Saudi Arabia.

Tobyhanna and Letterkenny are working additional hours, but have been less busy because their missions center on repair and maintenance of communications equipment and vehicles.

-30- 2166
#90318u0758 11/14/1990 ~United Press International
(NOV. 14) UPI - In the absence of any supportive news from the Persian Gulf, crude oil prices resumed their downward trend in early trading Wednesday after

an industry report showed crude stocks rose for the second consecutive week.

The American benchmark West Texas Intermediate for December delivery had fallen 62 cents by midday to $32.50 a barrel on the New York Mercantile Exchange.

''In the absence of anything out of the Gulf, the market is focusing on (supply-demand) fundamentals,'' said Nauman Barakat, vice president of Merrill Lynch Futures Inc. in New York.

WTI had lost $3.66, or 10.3 percent of its value, Friday and Monday on sentiment a Middle East war had been delayed until at least next year. It staged a $1.25 a-barrel technical rebound Tuesday.

Barakat noted the American Petroleum Institute late Tuesday in its weekly inventory survey reported crude supplies rose last week for the second straight week.

They had fallen for seven consecutive weeks when Middle East imports temporarily dried up after Iraq's Aug. 2 invasion of Kuwait.

Saudi Arabia and other members of the Organization of Petroleum Exporting Countries have recently made up for all but a small portion of the 4.3 million barrels of oil lost daily from the U.N. embargo of Iraqi and Kuwaiti exports.

''The WTI market is slipping and will continue to slip,'' Barakat said. He noted Monday is the final day for trading WTI December contracts on the Merc.

Prices could plunge in the last days of trading because of the surplus of crude on world markets, the trader said.

''With so much crude available, the feeling is that there will be a significant amount of downward pressure on the December contract,'' Barakat said.

Apparently following the API report of a decline in U.S. heating oil and gasoline supplies last week, the prices of these two commodities was displaying strength relative to the crude on the Merc.

LOS ANGELES (NOV. 14) UPI - While continuing to slow, new Japanese investment in U.S. real estate will still reach between $10 billion and $13 billion this year, a report released Wednesday said.

But next year may see a marked drop in such investments, according to the report prepared by the national consulting firm Kenneth Leventhal & Co.

''There is little truth to the notion that the Japanese are selling off a substantial portion of their U.S. real estate investments,'' said Jack Rodman, managing partner at Leventhal.

Still, the cooling U.S. real estate market has cut back on potential investment from Japan. The firm had predicted in March that new Japanese investments would reach $13 billion to $16 billion this year.

During 1989, these investments reached $14.8 billion, off from the record level of $16.5 billion achieved in 1988.

Analysts have said the decline in new investment is also due in part to Japanese sensitivity to the backlash from acquisitions they have made of highly visible U.S. landmarks, such as last year's purchase of Rockefeller Center in New York.

The Leventhal report also contains a sobering prediction of a sharp decline in Japan's new investments next year - to between $7 billion and $10 billion.

Sophisticated Japanese investors are pulling back because pressure at home from regulators and a soft U.S. real estate market, Rodman explained. ''More experienced Japanese investors have shifted to a wait- and-see attitude,'' he said.

Rodman said that ''trophy'' properties are being shunned by the Japanese, with the exception of Cosmo World's purchase of the famed Pebble Beach golf resort in Northern California earlier this year. Analysts have estimated the deal, which included four golf courses and two hotels, was worth between $800 million and $1 billion.

Currently, much of the new investment is coming from first-time Japanese real estate investors, many of whom ''are customers of regional banks in areas outside Tokyo,'' Rodman said. ''This is a relatively untapped source of capital which is being mobilized toward U.S. real estate.''

#90318u0788 11/14/1990 ~United Press International

WASHINGTON (NOV. 14) UPI - Unfurling the banner of "choice," the nation's Roman Catholic bishops said Wednesday they will launch a multi-million dollar campaign to aid Catholic schools, including an increased lobbying effort to win approval for government funding of religious schools.

"This is the last civil rights struggle," said Bishop Edward Eagan, Bridgeport Conn., of the campaign to win tax support for parochial schools and parents who send their children to such schools. Eagan said he was "outraged" that "all tax money goes to (public) schools where religion is not taught."

The bishop made his comments as the 300 prelates gathered for the annual fall meeting of the National Conference of Catholic Bishops and its social policy action arm, the U.S. Catholic Conference, debated a statement in support of the church's elementary and secondary school system.

There are some 1,350 Catholic high schools with 630,000 students and 7,500 elementary parochial schools with nearly two million students in the Catholic education system.

But church officials said costs have increased 500 percent in the last 20 years, over twice the Consumer Price Index, and the number of potential Catholic students has sharply declined, putting the schools - especially in inner city urban parishes - under heavy financial pressure.

The new statement seeks to commit the bishops to ensuring that Catholic schools continue to provide a high quality education, that Catholic parents who wish will be able to send their children to Catholic schools and that "those parents receive sufficient financial assistance from both private and public sectors to exercise this right."

"Recognizing that Catholic schools are a significant part of American education, we call on all Americans to join with us in supporting federal and state legislative efforts to provide financial assistance to all parents which will ensure that they can afford to choose the type of schooling they desire for their children," the statement said.

At the heart of the effort is a $2 million program for a national office that will direct parents and schools in a lobbying effort to win federal aid for parochial schools.

"Recognizing the long-term nature of convincing the nation that parents should have not only a choice in selecting educational opportunities for their children but also financial support to exercise that choice, we are taking immediate steps to accomplish this end," the statement said.

But reflecting the mood of the public at large, which seeks services but appears reluctant to pay the taxes for them, the bishops said they would seek the $2 million "seed" money from outside the conference and rejected efforts to increase the assessment on dioceses to pay for the public education and lobbying campaign on behalf of choice.

A number of states have developed versions of the "choice" option but the choices are generally limited to freely transferring between public schools.

A "choice" plan more like what the bishops have in mind in that it would allow students to attend private schools, in Milwaukee, Wis., was ruled unconstitutional on technical grounds on Tuesday.

Most "choice" proposals seek to emulate the capitalist free market, with supporters contending that if all schools have to compete for students - and the vouchers provided by the government - the good schools would prosper and the bad ones fold.

In most urban areas, students at Catholic schools score consistently higher on most academic achievement tests than do their public school counterparts. In other actions, the bishops voted, without dissent, to take up a special collection to aid Catholic churches in Eastern and Central Europe.

EASTERN SAUDI ARABIA (NOV. 14) UPI - British Defense Secretary Tom King watched the famed ''Desert Rats'' armored brigade conduct maneuvers Wednesday and later warned that there is little time left for Iraq to withdraw from Kuwait.

''There are 30 nations involved in this exercise. We're not going to sit around forever,'' King told reporters. ''The warning is quite clear, and it would be a very foolish man indeed who thought that we were bluffing.''

The British defense secretary's remarks came on the final day of a two-day visit to Saudi Arabia. He talked Tuesday with Saudi King Fahd and also met with Prince Sultan, the second deputy premier and defense minister, to discuss the crisis sparked by the Aug. 2 Iraqi invasion of Kuwait.

After watching the 7th Armored Brigade, known as the ''Desert Rats,'' conduct maneuvers against U.S. Marines posing as Iraqi forces, King said the purpose of his visit was to determine what else the United Kingdom could do to bolster the multinational force.

He said Britain initially sent aircraft to assist in the defense of Saudi Arabia and later dispatched ships to help enforce the U.N. embargo against Iraq. The 7th Armored Brigade was sent because of a shortage of main battle tanks, he said.

''Now I'm looking to see where else we can help and fit in the most effective way,'' King said.

He and other military officials denied that Britain had sent only a token force to the region. One official said Army Gen. H. Norman Schwarzkopf, the commander of U.S. forces, had ''made it crystal clear to me that our contribution is vital to him and to any plans he has, and it's not just a blissful gesture.''

King also expressed satisfaction with command and control arrangements for

British forces in the event of hostilities. And he said the military buildup should send a message to Iraqi President Saddam Hussein that ''time is running out'' for a peaceful settlement of the conflict.

''There is not a specific time limit, but there's not limitless time, '' he added. ''We aren't going to keep our troops hanging around forever doing nothing. ... (Saddam) had better make a pretty early decision or he will have to take responsibility for the consequences.''

''The objective is to see Resolution 660 of the United Nations achieved, which is to end the aggression and the occupation of Kuwait, to see the departure of Iraqi forces and to see the restoration of the legitimate government of Kuwait '' King said.

''We want that to happen by peaceful means, we don't want to see conflict. But the warning is quite clear ... if he doesn't leave peacefully then there is a military option here,'' he added. ''Anybody who's had a chance to look at 7th Brigade's work up here knows that we're not bluffing.''

#90318u0797 11/14/1990 ~United Press International

(NOV. 14) UPI - Egypt's President Hosni Mubarak and Iraqi and Soviet envoys shuttled around Arab capitals Wednesday to discuss a call for an Arab summit on the Persian Gulf crisis, while President Bush met congressional leaders amid mounting pleas for a special session to debate growing U.S. involvement in the standoff.

In Washington, Senate leaders ordered hearings into the gulf crisis, which is drawing rising public opposition to the possibility of war.

Senate Democratic leader George Mitchell of Maine said the shift in the U.S. military mission from defensive to possibly offensive warranted Congressional approval, but the White House insisted a special session is unnecessary at this point and any talk of a declaration of war is premature.

In the Middle East, pro-Kuwaiti states such as Saudi Arabia said a new summit as proposed by Morroco's King Hassan II could only succeed if Iraq recognized resolutions passed at an Arab gathering in Cairo on Aug. 10, eight days after Iraq invaded Kuwait.

The Cairo summit sanctioned the dispatch of Arab troops from Egypt, Syria and Morocco to the gulf to deter further Iraqi aggression.

Saudi Foreign Minister Prince Saud al Faisal told reporters in Abu Dhabi, United Arab Emirates, that Iraq should accept resolutions calling on it to withdraw from Kuwait and restore exiled Kuwaiti Emir Sheikh Jaber al Ahmad al Sabah to power before a new summit could be considered.

''Only if Iraq accepts the resolutions of the Cairo summit can the summit called by King Hassan of Morrocco be fruitful and positive,'' Saud was quoted as saying.

Despite recent indications Iraq is willing to sacrifice for the sake of peace, Baghdad said it will only attend a summit if it can have a say in the agenda and that the order sanctioning the dispatch of Arab troops to the gulf is rescinded.

Mubarak last month rejected a Soviet call for a new summit, arguing that if there was no specific agenda it might evolve into a shouting match between pro-Iraqi and pro-Kuwaiti delegates.

Egypt has not officially responded to Hassan's summit call and only three members of the Arab League - the Palestine Liberation Organization, Jordan and Mauritania - have accepted.

Many Arab League members believe an Arab summit that does not call for an Iraqi troop withdrawal from Kuwait would play into Baghdad's hands by allowing Saddam to buy more time.

Mubarak arrived in the Syrian capital Damascus after talks in Sirte with Libyan leader Moammar Gadhafi, Cairo Radio said, and later met Syrian President Hafez Assad in Damascus.

Iraqi First Deputy Premier Tahar Yassin Radamadan said Wednesday after talks in Rabat with Hassan that Baghdad wants a summit to cancel the resolutions approved in Cairo that approved the sending of Arab troops to Saudi Arabia, Baghdad Radio said.

A second Iraqi envoy, Second Deputy Premier Saadoun Hammadi, held talks Wednesday with Tunisian President Ben Ali but the content of their talks was not disclosed, the Tunis Afrique Presse Agency said.

Hammadi flew to Tunisia from Libya, where he talked to Gadhafi, and was also scheduled to visit Algeria.

As the Iraqi envoys held talks with Arab leaders, Saddam issued a presidential decree appointing a prominent member of the ruling Baath party as governor of what was described as the Iraqi province of Kuwait, Baghdad Radio said. The radio said Aziz Saleh would reain his job as a member of the Baath party secretariat.

Two Soviet envoys arrived in the Middle East, Cairo Radio reported, on missions to achieve a peaceful settlement of the standoff.

On the first leg of his tour, Alexander Belonogov, a former Soviet ambassador

to Egypt and now a deputy foreign minister, was in the Yemeni capital Sanaa. Vladimir Petrovsky, another Soviet deputy foreign minister, arrived late Tuesday in Rabat for talks with Hassan. Petrovsky was also to visit Libya, Algeria and Tunisia.

Iraq's gulf war foe Iran also joined the flurry of diplomatic activity, with Iranian Foreign Minister Ali Akbar Velayati in Baghdad to discuss bilateral relations and the crisis. Tehran is concerned that war is imminent.

On the hostage front, the Voice of America broadcast a message to U.S. nationals still held in Iraq and Kuwait that a special plane will leave Kuwait and Baghdad on Sunday.

The message asked U.S. nationals, including those of Arab origin, to get in touch with U.S. missions in Baghdad and Kuwait for further details.

#90318u0804 11/14/1990 ~United Press International

WASHINGTON (NOV. 14) UPI - In the wake of a scandal involving the generic drug industry, the Food and Drug Administration Wednesday announced steps aimed at ensuring the validity of quality-control testing.

The agency said it was immediately requiring all laboratories that test generic drugs to make sure they are equivalent to brand name drugs to keep samples of all drugs they test for five years so the FDA can check the tests.

Manufacturers of generic drugs must compare their drugs to brand-name drugs to get FDA approval to sell their products. The tests can be conducted by the companies themselves or by outside laboratories.

''The requirement is one of the changes being made because of findings last year and this year that several generic drug firms submitted false information to the agency, in apparent efforts to ensure or speed approvals to market prescription generic drugs,'' the FDA said.

''In some of these cases, generic drug companies substituted the brand name drug for their own in bioequivalence tests. This meant the tests were comparing the brand-name product to itself, instead of the product to be approved, so that the tests were meaningless and fraudulent,'' it said.

The new policy ''would be a deterrent against this and other frauds, such as switching lot numbers or altering sample identifications,'' the FDA said.

In addition, ''the retained samples can be used as evidence in investigations into wrongdoing,'' the FDA said.

After discovering the false tests, the FDA analyzed more than 3,000 samples of

drugs on the market and inspections at 36 firms that make generic drugs, the agency said.

In addition, the FDA is now checking the validity of about 1,500 additional product samples involved in past studies, the FDA said.

''As a result of the analyses and various corrective actions, FDA officials believe that generic drugs on the market today are safe and effective,'' the FDA said.

About 250 products made by 27 firms were recalled and over 100 drug approvals have been or are in the process of being withdrawn, the agency said.

#90318u0816 11/14/1990 ~United Press International

BRUSSELS, BELGIUM (NOV. 14) UPI - The Soviet Union sought and won 11th-hour changes to a massive conventional arms treaty that allows more tanks to be stored in a military district bordering the Black Sea, officials said Wednesday.

Delicate diplomacy was required to approve the change in the Conventional Forces in Europe treaty, which Turkey initially opposed as a threat to its borders.

The CFE treaty, which has been negotiated since March 1989 in Vienna, is to be signed at a landmark European summit in Paris next Monday by 16 NATO and six Warsaw Pact countries.

The Soviets insisted the change was necessary to accomodate withdrawal of its forces and equipment from Eastern Europe. ''They said, 'We have no other place to put these guys,''' a NATO source said.

The last-minute request to change the treaty was kept quiet as negotiators scurried to reach a compromise, which was achieved early this week, officials said.

It allows more armament to be stored in the strategic Kiev Military District, but only up to special limits designed to reassure NATO's southern flank.

''I wouldn't say we were astonished by the Soviet request, but it was clearly an added complication that had to be resolved quickly,'' said a NATO official.

A tentative CFE agreement was reached on Oct. 3 in New York between U.S. Secretary of State James Baker and Soviet Foreign Minister Eduard Shevardnadze.

The Soviet Union later grew concerned, however, about storage limitations in the Kiev District, a huge area with a thin strip bordering the Black Sea.

''They had a look at the implications of the New York agreement and felt they would not be able to store as many battle tanks there as they'd like,'' a NATO source said.

The complex CFE pact limits NATO and the Warsaw Pact each to 20,000 tanks, 20,000 artillery pieces, 30,000 armored combat vehicles, 6,800 aircraft and 2,000 helicopters.

The pact also calls for armament ceilings in several geographic zones made up of various military districts.

This week's compromise shifts the Kiev Military District from the southern flank zone to one of the central zones, which has a larger ceiling. At the same time, however, the Kiev District received a special limitation of 2,250 battle tanks, 2,500 combat vehicles and 1,500 artillery.

''The compromise allows the Soviets to store more equipment in the Kiev District than before, but the new limits for the Kiev District address the Turks' concern that they didn't want everything in the central zone to be stacked in that district,'' a NATO official said.

#90318u0820 11/14/1990 ~United Press International

NAIROBI (NOV. 14) UPI - A teenage girl bled to death after a traditional circumcision, and the witch doctor who performed the procedure was charged with murder, local newspapers reported Wednesday.

Agnes Chepkoron, 18, was at least the fourth girl to die from circumcision this year in Kenya, although the practice is officially banned.

Chepkoron was circumcised Monday by a traditional witchdoctor in the town of Kipkelion, about 120 miles northwest of Nairobi, the newspapers said. The doctor was arrested by local police and charged with murder in the case, the news accounts said.

Female circumcision involves removing the clitoris and sometimes the labia, often using dirty or blunt knives. Victims frequently bleed profusely and suffer infection, shock and in some mass rituals run the risk of contracting the HIV virus which causes AIDS.

Female circumcision is widely practiced, often by women on women, in Kenya and Uganda, usually as an adolescence initiation rite or immediately before marriage.

#90318u0821 11/14/1990 ~United Press International
(NOV. 14) UPI - Iran's foreign minister is heading to neighboring Iraq to discuss what are called bilateral relations between two countries that fought an eight-year war against each other. Reports of the visit are carried on Tehran Radio broadcasts monitored in Athens. The trip comes amid reports that Iran is worried that war may again break out in the Persian Gulf.

President Bush is meeting with bipartisan leaders today to discuss U- S policy in the Gulf. With the U-S troop buildup continuing full steam, Congress is pressuring Bush to convene a special session to debate the escalation. Senate leaders have ordered a series of hearings on the Gulf crisis. Majority Leader George Mitchell says the shift in U-S military capability from defense to offense has the country worried about war.

The U-S Chamber of Commerce is out with a new forecast of the economy that is even more pessimistic than previous ones. The chamber says the nation is in for a recession that will be worse than originally projected. It may last through the first half of next year, pushing unemployment above seven percent. And it says the downturn will spread overseas, threatening the exports of U-S goods.

Unsecured creditors of bankrupt Eastern Airlines are going to court in New York City today to argue for Eastern's immediate liquidation. The creditors want Judge Burton Lifland to deny a request by Eastern's management for another 30-Million dollars from an escrow fund to keep the airline flying this month and 40-Million next month. The creditors say Eastern lost more than 370-Million dollars from June through October, far exceeding its projections.

A suspected Irish extremist in the 36th day of a hunger strike will be returned to Britain to face charges of being an explosives expert for the I-R-A. The Supreme Court of the Irish Republic today upheld the British extradition seeking return of Desmond Ellis. He has served most of an eight-year sentence in the republic for possession of explosives and reportedly has lost 30 pounds since beginning the hunger strike.

Unification of Germany has cooled some of the hard feelings that once existed when the country was divided. Germany's prosecutor general says he favors amnesty for spies who once served what was East Germany. This would include legendary masterspy Markus Wolf, said to be the basis for the character ''Carla'' in several espionage thrillers from British novelist John le Carre.

-30- 2632

#90318u0849 11/14/1990 ~United Press International
CAIRO (NOV. 14) UPI - Egypt is gearing up for a parliamentary election later this month that is drawing massive crowds to campaign rallies despite a boycott by major opposition parties.

A new law that allows candidates to appear on the ballot by name, rather than simply by party affiliation, is making the election a contest of personalities rather than a staid choice between the ruling party and its handful of challengers.

President Hosni Mubarak called for the elections last month after voters overwhelmingly approved a referendum dissolving the previous parliament, which a court said had been elected in violation of the country's constitution because too many candidates from the ruling party had been elected.

The government changed election laws following the court decision in an effort to ensure a fair contest, but major opposition parties are boycotting the Nov. 29 polls because they say Mubarak did not consult them on the change.

The parties also complain that Egypt's state of emergency, imposed after the 1981 assassination of President Anwar Sadat, prevents completely fair elections and say the government has tampered with election results in the past, a charge denied by officials.

Mubarak's ruling National Democratic Party has traditionally won a huge majority of seats in the People's Assembly, Egypt's parliament, and observers say it is likely they will again sweep the coming elections with or without a challenge by the major opposition parties.

Election officials say 2,897 candidates are vying for only 444 seats in the Peoples Assembly.

Three major opposition parties - the rightest el Wafd, el Ahrar parties along with the center-rightest Social Labor party el Shaab - are boycotting the elections, as is the outlawed fundamentalist group Moslem Brotherhood.

The Moslem Brotherhood, which protests the pro-Western government of Mubarak, is not allowed to field candidates as a recognized party but has backed individual candidates who did not have a party affiliation.

But smaller parties and many individuals, some of them fundamentalists, are challenging the candidates proposed by the ruling party.

Each candidate must have a campaign symbol for the benefit of illiterate voters. The symbol of one Moslem extremist candidate, Ragab Hamida, is a pistol.

''In order to make God's word the higher word, and in order to save people from the injustice of rulers, I am running for election,'' Hamida told a recent campaign rally in Cairo.

One of his aides told supporters at the rally that Hamida chose the pistol to ''demonstrate our determination to fight corruption and the abuses of power.''

Elections in Egypt traditionally have low voter turnout, despite laws that mandate that eligible citizens vote. But observers said this election may draw a relatively large turnout because the new election law has given candidates names and faces, rather than simply party affiliations.

-30- 3166

#90318u0852 11/14/1990 ~United Press International

LONDON (NOV. 14) UPI - Stock prices closed lower in light trading Wednesday on the London International Stock Exchange as weakness in the British pound diminished prospects for an early cut in interest rates.

The blue-chip Financial Times 100-stock index, which added 4.1 points Tuesday, fell 10.0 points to 2,046.0. The narrower top 30 industrial average lost 10.4 points to 1,583.2.

Volume amounted to around 356 million shares compared with 422 million shares changing hands Tuesday.

Market watchers said stocks eased as the British pound slipped on major global foreign currency markets.

Analysts said local investors reacted calmly following the formal announcement by Michael Heseltine, a former defense minister, that he planned to challenge Prime Minister Margaret Thatcher for the leadership of the Conservatives in the House of Commons.

The challenge, long expected, brings to a head growing disenchantment with Thatcher among Conservative members in Parliment, analysts said.

Analysts said Heseltine's bid was widely expected and did not surprise the markets, but warned that political turmoil could soon send sterling plummeting.

''I think the anxiety has not reached its peak,'' said Michael Saunders, an economist for the Salomon Brothers in London. ''We have the making of a sterling crisis.''

Opinion among analysts was divided on how the markets would react to Heseltine as prime minister.

Some said his pro-European approach would boost sterling, while others said he was too little known outside the country and Thatcher's defeat would unnerve foreign investors.

The challenge by Heseltine, even if unsuccessful, will hasten Thatcher's political demise, one analyst said.

''I think we're beginning to see the end of Thatcher,'' said Andy Hudson, a corporate dealer with the Bank of Tokyo Ltd's London office. ''I'll still be surprised if she lost. I'll be surprised if she's not prime minister next week.''

Among the most widely traded stocks, British Airways, Britain's largest airline, fell 16 cents to $2.47 despite repoting its latest pretax profits climbed 23 percent.

The airline's chairman Lord King said the results indicated the airline had so far been able to withstand the problems currently facing the airline industry.

He pointed out, however, that given current trading and expenditure levels, the airline did not expect a positive contribution in the second half of the year.

''To achieve our financial goal against the current background means taking rigorous action to reduce our cost levels. We had begun this process before the Gulf crisis. We are now extending the scope of this program,'' King said.

In a weak banking sector, Lloyds Bank slipped 14 cents to $5.13 and Royal Bank of Scotland lost 14 cents to $2.77.

In the insurance sector, Commercial Union fell 23 cents to 8.65 after a 75 percent profits setback and General Accident slipped 6 cents to $8.25 after reporting a $142 million loss.

Elsewhere, stock prices on the Frankfurt Stock Exchange closed slightly higher in light trading.

The closely watched German Stock Index, which added 0.67 points Tuesday, rose another 3.32 points to 1,406.23.

#90318u0863 11/14/1990 ~United Press International

NAIROBI, KENYA (NOV. 14) UPI - The Sudanese military bombed relief camps in the south of the country, rebels there said Wednesday, less than a month after the United States withheld a food aid ship because of similar bombings.

The radio station of the Sudanese People's Liberation Army, monitored in Nairobi, said planes, apparently not regulation Sudanese military aircraft, dropped bombs Monday and Tuesday on several towns. The broadcast said 12 bombs fell on Torit, 800 miles south of Khartoum, killing three children.

Torit, which houses a relief center for displaced victims of food shortages and Sudan's seven-year civil war, was also bombed in May.

''While al Bashir (Sudan''s president) made pronouncements about peace, cease-fires and vaccination of children in the area, he at the same time ordered the bombing of the very children he wanted to vaccinate,'' the radio said.

It claimed the SPLA now had the capacity to retaliate for the attacks, even as far north as Khartoum.

The otherwise well-armed SPLA is not known to have any operational military aircraft.

The fundamentalist Islamic military government of Gen. Omar al Bashir has come under heavy international fire in recent weeks for bombing refugee camps. The United States at one point diverted 90,000 tons of wheat, bound for Port Sudan to assist in food relief for millions of north Sudanese at risk of famine this year.

Western diplomats in Khartoum last week said they were seeking clear assurances from the government that such incidents, including threats to shoot down relief planes in the south, would stop before they agreed to supply famine relief food.

Roger Winter, director of the U.S. Committee for Refugees, called last week for a total economic embargo on Sudan in the light of its human rights and war record and apparent refusal to deal with a mounting food crisis.

#90318u0883 11/14/1990 ~United Press International

BOSTON (NOV. 14) UPI - Single men and women who light up a cigarette will have a hard time lighting up their lives with romance, an updated survey has found.

Three years after its survey found smoking the No. 1 obstacle to matchmaking, a local dating service's new poll of members finds that attitude intensifying.

"I know people are much less tolerant," LunchDates founder Steve Penner said Wednesday. "More and more people are saying 'Definitely, definitely not a smoker.' More and more people are saying 'Have them quit first and then I'll date them."'

The informal survey of 650 members of LunchDates, which matches up its members for lunch, drinks, or dinner, found 89 percent either prefer a nonsmoker or are adamant in their refusal to date a smoker.

A similar poll conducted in 1987 found 78 percent of 600 members surveyed had the same attitude. In the last few years, smokers have surpassed overweight women and short men as the most undesirable dates, Penner said.

"The first question we ask is 'Do you smoke?' We warn people who do smoke that while they can still join ... the number of people who will go out with them is so small," he said.

Among LunchDates members: 47.9 percent refuse to date a smoker, 41.3 percent prefer a nonsmoker but would date a light smoker if they really liked the person, and 10.8 percent have no preference, Penner said.

Eleven percent of the men surveyed have no preference, 44.9 percent prefer a nonsmoker and 44.1 percent refuse to date a smoker. Among women, 10.4 percent have no preference, 36.2 prefer a nonsmoker and 52.4 percent refuse to date a smoker.

"Women are more adamant about not meeting anybody who smokes," Penner said, "whereas men will say 'I prefer a nonsmoker, but if she's attractive or there are other things about her, I'll definitely want to meet her."'

The survey found women in their 30s the most strongly opposed to smokers, with 57.4 percent saying they "absolutely, definitely will not go out with anyone who smokes, even if they're a light smoker," Penner said.

"I have a feeling that it's because women in their 30s are most interested in marrying and having children," Penner said. "If you're looking for a longterm partner you want someone who's going to be around."

"Women in their 40s and up are a little more flexible. A lot of them are looking for companionship," Penner said. "With women in their 20s - first of all, some smoke and a lot are just looking for someone to have fun with."

LunchDates was founded in Boston in 1982 and has served nearly 10,000 people since then. Among the dating service's 1,700 members, 3.7 percent of the men and 4.1 percent of the women are smokers, Penner said. The largest group of smokers are women members in their 20s, at 6.5 percent.

#90318u0888 11/14/1990 ~United Press International

CAPE CANAVERAL, FL (NOV. 14) UPI - The Atlantis astronauts reviewed their secret flight plans and relaxed Wednesday as the shuttle's blacked-out countdown ticked smoothly toward launch Thursday night to put a spy satellite into orbit.

Air Force meteorologists, who initially predicted a 70 percent chance of a delay because of high winds and rain, revised their forecast Wednesday and called for a 60 percent chance of favorable weather at launch time Thursday.

Work at pad 39A proceeded smoothly into its final hours Wednesday with no

major problems under discussion that would delay the seventh and last fully classified shuttle flight planned by the Air Force and NASA.

"The weather has improved considerably," said NASA spokeswoman Lisa Malone. "We've only got a 40 percent chance of a 'no-go.' As far as the countdown goes it's very smooth. We don't have any issues we're tracking."

Engineers planned to roll a giant gantry away from Atlantis Wednesday afternoon, exposing the $2 billion orbiter to view and setting the stage for the start of fuel loading around 10:30 a.m. Thursday.

The exact launch time is classified - NASA will only say Atlantis is scheduled to take off between 6:30 p.m. EST and 10:30 p.m. - but reliable sources have said liftoff is planned for 6:46 p.m. and that the shuttle can be launched as late as 8:12 p.m. if necessary.

The goal of the 37th shuttle mission also is classified, but Atlantis's five-man all-military crew reportedly plans to deploy an advanced photo-reconnaissance satellite that could be used to monitor military activities in the Persian Gulf region.

Atlantis's crew - commander Richard Covey, 44, co-pilot Frank Culbertson, 41, Charles Gemar, 35, Carl Meade, 39, and Robert Springer, 48 - spent the day Wednesday reviewing their flight plans, checking out crew equipment and generally relaxing.

The five shuttle fliers, all active-duty military officers, originally were scheduled to take off in mid July, but Atlantis was grounded after a critical fueling test June 29 when a hydrogen leak was detected near a fuel line fitting.

The shuttle Columbia was grounded in May and September by at least two similar leaks, but both shuttles ultimately were repaired and cleared for flight. Assuming Atlantis gets off the ground Thursday, Columbia will follow suit in early December to kick off a long-delayed astronomy mission.

As for Atlantis, the flight plan for the year's fifth shuttle flight is classified, but the astronauts reportedly will deploy their spy satellite payload on the second or third day of the mission.

Aviation Week & Space Technology magazine reported last month the satellite is equipped with a high-resolution digital camera system and that it will be used to support U.S. troops stationed in the Persian Gulf region as part of the ongoing Desert Shield operation.

The duration of Atlantis's mission will not be revealed until well after launch. But given an on-time liftoff, sources said, Atlantis will glide to a touchdown at Edwards Air Force Base, Calif., at 3:41 p.m. PST Monday to cap a

flight lasting three days, 23 hours and 55 minutes.

Atlantis's voyage marks the seventh and last fully classified Defense Department shuttle mission, reflecting an Air Force shift away from NASA's manned spaceplane in favor of unmanned rockets like the Titan 4 booster that successfully carried a military satellite into orbit Monday.

While two more Air Force shuttle flights are planned next year, the payloads of both have been declassified. Doing away with costly security procedures for DOD shuttle flights will save the Air Force some $80 million a year.

MOSCOW (NOV. 14) UPI - The Soviet Parliament demanded Wednesday that Mikhail Gorbachev address the legislature on the country's political and economic crisis, and an influential newspaper said the president must take resolute action or resign.

Deputies, angered by what many of them described as a paralysis of power, rejected the agenda proposed by the Parliament's presidium, or executive arm, and voted overwhelmingly for Gorbachev's appearance before them Friday at an emergency session.

''We are on the brink of catastrophe,'' Boris Nikolsky, a lawmaker from Leningrad, told his colleagues. ''The government has no credibility with the people, and we must do something about it.''

The presidium suggested that the legislature begin discussing a law on currency reform, but deputies voted 362-16 against the proposed agenda.

The legislative rebellion, coming a day after Russian Federation leader Boris Yeltsin called for a coalition government embracing radical forces, confronted Gorbachev with an escalating crisis of authority.

''The deputies may be reminded that time is working against them,'' the official Tass news agency said in a stark commentary on the crumbling Soviet economy.

Deputies met behind closed doors in the afternoon to prepare for the showdown Friday.

In the bitter morning session, speaker after speaker said it is absurd for the Soviet Parliament to continue passing laws that will be ignored by the country's 15 republics or smaller jurisdictions.

Legislators also complained that Gorbachev and the government's executive branch headed by Premier Nikolai Ryzhkov do not cooperate with Parliament and

fail to understand the true state of affairs in the Soviet Union.

Some deputies accused Gorbachev in particular of being unresponsive, noting that Yeltsin had briefed his Russian Parliament on Sunday's meeting between the two leaders while they had heard nothing from the Soviet president about the crucial talks.

Col. Viktor Alksnis, who represents the Soviet army, said that Gorbachev did not indicate a full understanding of the country's problems Tuesday when he met with more than 1,000 military officers holding elective office at various levels of government.

The conference, Alksnis said, was ''a dialogue between a deaf person and the blind'' and left Gorbachev ''without an army.''

The Moscow News, a popular weekly, broke with its past support of Gorbachev in an ''open letter'' to Gorbachev under the headline, ''The country is tired of waiting.''

''On your demand additional powers were given to you,'' the letter said. ''Today you can use them either to establish a dictatorship or deepen democratic perestroika. Dictatorship will bring you and the country at large to ruin. Political maneuvering has proved its bankruptcy.

''One can no longer avoid responsibility for today's deeds by entreating about the socialist choice and communist prospects. Either prove your ability to act resolutely or resign.''

The newspaper described a six-point program it said is necessary to stave off collapse of central authority:

-''all-out glasnost'' and increased activity against official corruption;

-recognition of the 15 republics as sovereign states, saying that ''it is high time for the center to stop manipulating nationalist feelings'';

-immediate release of all land to peasants for private farming, declaring, ''There is no excuse for this (food) problem not having been solved over the last five years of perestroika'';

-a national ban on officials holding dual posts in government and in the Commmunist Party, transfer of all property from the party and Gorbachev's relinquishment of his position at the top of the party as general secretary;

-the selection of a civilian to head the Soviet Defense Ministry;

-a complete overhaul of the structure of the U.S.S.R. Council of Ministers that runs the government.

''The situation today is such that should a number of resolute urgent measures fail to be adopted, a tragedy will be inevitable,'' the newspaper warned.

#90318u0935 11/14/1990 ~United Press International

BOGOTA, COLOMBIA (NOV. 14) UPI - Colombia's military has launched an offensive against the nation's largest guerrilla group, signaling the failure of the government's efforts to bring it to the negotiating table.

Soldiers backed by helicopters were battling guerrillas of the Revolutionary Armed Forces of Colombia in the remote jungle of the department, or state, of Meta south of Bogota where the group, known by its Spanish acronym FARC, is based.

''This is part of the constitutional obligation of the armed forces to enforce the law,'' President Cesar Gaviria told the Bogota radio station RCN Wednesday. The newspaper El Tiempo said about 30 people had been killed in the offensive. Gaviria said there appeared to be a ''high number'' of deaths, but no official figures were available.

The offensive began after a recent spate of FARC attacks, including one on Monday in which six children were killed. The guerrillas attacked a truck carrying nine children who were members of a police juvenile program in a rural area in the department of Huila, 180 miles southwest of Bogota. Besides six of the children, two officers also were slain.

In the past week, the FARC and the National Liberation Army, or ELN, the other large guerrilla group operating in Colombia, have carried out a series of attacks against military patrols and installations. More than 50 people have died in the actions.

After taking office in August, Gaviria continued the campaign launche by his predecessor, Virgilio Barco, to bring the guerrilla groups operating in Colombia to the bargaining table. Barco successfully negotiated an agreement under which one of the largest of the group, the M-19, laid down its arms and rejoined the nation's legitimate political parties.

Three other groups have agreed to similar arrangements, but the attacks and the subsequent military offensive signal the failure to lure FARC and ELN, the two most important guerrilla groups, to the bargaining table.

Government Minister Julio Sanchez said the increase in violence ''makes impossible a dialogue with guerrillas who are killing children and soldiers.''

In an effort to induce guerrilla participation in the peace talks, Gaviria had been promising them representation in a constitutional reform assembly that

would meet next year.

Colombia has the oldest guerrilla organizations in Latin America. The guerrillas emerged as a result of political violence in the 1940s and '50s. The movements blossomed after 1957, when a political accord between the two major political parties, the Liberals and Conservatives, shut out all other movements from participation in government.

The FARC is believed to have about 5,000 members, while the ELN about half that number.

#90318u0968 11/14/1990 ~United Press International
(NOV. 14) UPI - Four people have been sighted at ground zero on the Nevada Test Site, where scientists are preparing to detonate a nuclear device 19-hundred feet underground. Security guards plan to arrest the Greenpeace infiltrators. A spokesman for the Energy Department says the protesters were sighted on closed circuit television minutes after the nuclear weapons test countdown was halted because of technical problems. Greenpeace organizers say three British women and a guide hiked through rugged desert terrain onto Pahute Mesain an attempt to halt today's nuclear test.

Egyptian, Iraqi and Soviet envoys are flying to various Arab capitals today to discuss a call by Moroccan King Hassan for an Arab summit on the Persian Gulf crisis. NOT much is being said about the low- key shuttle diplomacy. But Arab states that support Kuwait say a new summit would only be useful if Saddam Hussein recognizes resolutions passed at the previous Arab gathering in Cairo August 10th. That was eight days after Iraqi troops invaded Kuwait.

Economists are tearing apart the October retail sales report released by the Commerce Department this morning, trying to make some sense from the figures. Combined sales were up one-tenth of one percent in October from September to 152-point-three-BILLION dollars for the month period. That leaves sales for the month up four-point-nine percent from where they were in October of last year.

The Executive Commission of the European Community is proposing that the E-C forgive nearly four-BILLION dollars in debts owed by 68 developing countries. The issue still must be approved by the Council of Ministers at a meeting set for next month. Almost half of the money has yet to be given to the various countries. The debt cancellation would cover only money owed to the trade bloc NOT that owed to individual I-C members.

The 21-day-old Daily News strike is turning into one of New York City's bitterest labor wars. A Daily News delivery truck driver and his assistant were beaten with bats and sticks by about one dozen men in Brooklyn early today. The driver was NOT seriously hurt but his assistant was taken to a

hospital with a possible broken arm. Police say the incident is the fifth strike-related act of violence this week. Union leaders are holding a rally outside the newspaper's Manhattan headquarters building this afternoon.

#90318u0973 11/14/1990 ~United Press International

LOS ANGELES (NOV. 14) UPI - Shares of MCA Inc. jumped more than $4 Wednesday amid investors' growing belief the entertainment giant's pending buyout by Japan's Matsushita Electric Industrial Co. may close soon.

MCA stock rose $4.25 a share to $66.75 in early afternoon trading on the New York Stock Exchange following several reports MCA and Matsushita top executives will meet in New York within a week to close the deal.

Matsushita's American Depository Receipts were unchanged at $129 on the Big Board.

MCA and Matsushita have imposed a news blackout on the talks for the last six weeks. MCA spokeswoman Christine Hanson said she had no comment on the reports.

But investors clearly believe the two sides have managed to work out most of the transaction's details, entertainment analyst Steven Hill of Sutro & Co. in San Francisco said.

''I think it's quite likely that the deal will close within a week,'' Hill said. ''It appears that the companies are on the verge of final talks.''

MCA stock jumped more than $25 a share in the two days after the first disclosure that it was in discussions about a buyout. Since then, it has been trading in the $55 to $65 range, with the stock being driven down on rumors of disagreement on the deal's price.

Japanese reports have estimated that Matsushita, a huge electronics producer and retailer, wants to pay no more than $65 a share. A recent U.S. report said that MCA Chairman Lew Wasserman, who holds 5 million shares and controls another 6 million of the 92 million fully diluted shares outstanding, would not accept a price under $75 a share.

Analysts have valued MCA at about $85 a share, or close to $8 billion. its holdings include Universal Studios, large film and TV libraries, several record labels and publishers, theme parks in Florida and California, independent WWOR-TV in Secaucus, N.J., and interests in the Cineplex Odeon theater chain and the USA Network cable channel.

Hill and other analysts have been estimating the final price that Matsushita pays will probably be in the $75 to $80 a share range, placing the value of the deal at about $7 billion.

#90318u1014 11/14/1990 ~United Press International

OAK BROOK, ILL (NOV. 14) UPI - McDonald's Corp. said Wednesday it is test marketing a new, low-fat hamburger - the Lean Deluxe, a quarter pounder that contains just 310 calories, complete with trimmings and a sesame seed bun.

''The Lean Deluxe offers our customers an additional lowfat menu choice and delivers the taste our customers expect,'' McDonald's President Ed Rensi said. ''We're testing it in our restaurants in Harrisburg, Pa., as an addition to our existing hamburger line-up.''

The Harrisburg-area test began Nov. 5, a company spokesman said. Asked if plans called for expanding marketing of the Lean Deluxe, he replied, ''We'll let the customers determine that.''

McDonald's Lean Deluxe consists of a 91 percent fat-free, quarter pound beef patty served on a sesame seed bun with ketchup, mustard, pickle, onion, lettuce and tomato. It contains 310 calories and 10 grams of fat, compared with 410 calories, and 20.7 grams of fat for McDonald's standard Quarter Pounder.

''Our hamburgers are already classified 'lean' by the USDA, but when it comes to our products, we're never satisfied,'' said Rensi.

The new, 91 percent fat-free beef is the result of three years of research and development by Auburn University, funded by the Beef Industry Council with McDonald's encouragement.

''If it weren't for McDonald's, this product would never have happened,'' said

Dale Huffman of Auburn. ''McDonald's has refined our product and is the first to make it available to customers in their restaurants.''

Huffman and co-worker Russ Egbert did the initial research for the new lowfat ground beef.

The beef industry's hopes for the new, leaner ground beef extend far beyond McDonald's menu.

''A lean beef patty provides a wide range of nutrients, including iron, protein and B-vitamins. Now the consumer, if he or she desires, can have it with less fat,'' he said.

#90318u1035 11/14/1990 ~United Press International

CHICAGO (NOV. 14) UPI - Aggressive selling and liquidation pressured the grain market Wednesday on the Chicago Board of Trade.

Closing prices were lower to sharply lower with a number of contract lows in the soybean complex.

January soybeans fell to a low of $5.64 1/4 per bushel and were down 9 cents on the day. Traders said higher production and carryover estimates in the November crop report continued to pressure the market. News that Taiwan bought soybeans overnight was supportive, and there were indications that Israel and Mexico would be in the market later in the week.

Lower prices for soybean meal in Europe also weighed on the futures market.

The grains were lower on spillover from the soy complex and the lack of export business. Sell-stops were triggered as prices declined, although losses were tempered by scattered buying activity.

Wheat made contract lows just before the final bell. Favorable weather in the Wheat Belt was beneficial to the new crop.

Country movement was light and basis levels were mixed.

At the close, corn was off 5 to 6 1/4, soybeans down 5 3/4 to 10 1/2, wheat off 6 to 7 3/4 and oats down 4 to 5 1/4.

#90318u1046 11/14/1990 ~United Press International

(NOV. 14) UPI - Egypt's President Hosni Mubarak and Iraqi and Soviet envoys shuttled around Arab capitals Wednesday to discuss a call for an Arab summit on the Persian Gulf crisis, while Congress warned President Bush it expects to be consulted if he plans remove Iraqi troops from Kuwait by force.

Bush met with congressional leaders Wednesday and assured them the U.S. military position in Saudi Arabia remains defensive, not offensive, and the leaders ruled out an immediate call for a special session of Congress to debate U.S. policy in the gulf.

The leaders gave Bush a conditional yellow light to pursue his military buildup but warned that the support he enjoys could be shaken by a decision to forcibly expel Iraq from Kuwait.

Senate Democratic leader George Mitchell of Maine said there also was ''extensive discussion'' of additional moves through the United Nations, where the United States may seek a resolution authorizing the use of force against Iraq.

''The policy remains at the moment the use of forces there for defensive purposes and to enforce the embargo authorized by the United Nations,'' said House Speaker Thomas Foley, D-Wash. ''And that, of course, has very, very

strong support - bipartisan support - of the Congress."

In the Middle East, pro-Kuwaiti states such as Saudi Arabia said a new summit as proposed by Morroco's King Hassan II could only succeed if Iraq recognized resolutions passed at an Arab gathering in Cairo on Aug. 10, eight days after Iraq invaded Kuwait.

The Cairo summit sanctioned the dispatch of Arab troops from Egypt, Syria and Morocco to the gulf to deter further Iraqi aggression.

Saudi Foreign Minister Prince Saud al Faisal told reporters in Abu Dhabi, United Arab Emirates, that Iraq should accept resolutions calling on it to withdraw from Kuwait and restore exiled Kuwaiti Emir Sheikh Jaber al Ahmad al Sabah to power before a new summit could be considered.

''Only if Iraq accepts the resolutions of the Cairo summit can the summit called by King Hassan of Morrocco be fruitful and positive,'' Saud was quoted as saying.

Despite recent indications Iraq is willing to sacrifice for the sake of peace, Baghdad said it will only attend a summit if it can have a say in the agenda and that the order sanctioning the dispatch of Arab troops to the gulf is rescinded.

Mubarak last month rejected a Soviet call for a new summit, arguing that if there was no specific agenda it might evolve into a shouting match between pro-Iraqi and pro-Kuwaiti delegates.

Egypt has not officially responded to Hassan's summit call and only three members of the Arab League - the Palestine Liberation Organization, Jordan and Mauritania - have accepted.

Many Arab League members believe an Arab summit that does not call for an Iraqi troop withdrawal from Kuwait would play into Baghdad's hands by allowing Saddam to buy more time.

Mubarak arrived in the Syrian capital Damascus after talks in Sirte with Libyan leader Moammar Gadhafi, Cairo Radio said, and later met Syrian President Hafez Assad in Damascus.

Iraqi First Deputy Premier Tahar Yassin Radamadan said Wednesday after talks in Rabat with Hassan that Baghdad wants a summit to cancel the resolutions approved in Cairo that approved the sending of Arab troops to Saudi Arabia, Baghdad Radio said.

A second Iraqi envoy, Second Deputy Premier Saadoun Hammadi, held talks Wednesday with Tunisian President Ben Ali but the content of their talks was not disclosed, the Tunis Afrique Presse Agency said.

Hammadi flew to Tunisia from Libya, where he talked to Gadhafi, and was also scheduled to visit Algeria.

As the Iraqi envoys held talks with Arab leaders, Saddam issued a presidential decree appointing a prominent member of the ruling Baath party as governor of what was described as the Iraqi province of Kuwait, Baghdad Radio said. The radio said Aziz Saleh would reain his job as a member of the Baath party secretariat.

Two Soviet envoys arrived in the Middle East, Cairo Radio reported, on missions to achieve a peaceful settlement of the standoff.

On the first leg of his tour, Alexander Belonogov, a former Soviet ambassador to Egypt and now a deputy foreign minister, was in the Yemeni capital Sanaa. Vladimir Petrovsky, another Soviet deputy foreign minister, arrived late Tuesday in Rabat for talks with Hassan. Petrovsky was also to visit Libya, Algeria and Tunisia.

Iraq's gulf war foe Iran also joined the flurry of diplomatic activity, with Iranian Foreign Minister Ali Akbar Velayati in Baghdad to discuss bilateral relations and the crisis. Tehran is concerned that war is imminent.

On the hostage front, the Voice of America broadcast a message to U.S. nationals still held in Iraq and Kuwait that a special plane will leave Kuwait and Baghdad on Sunday.

The message asked U.S. nationals, including those of Arab origin, to get in touch with U.S. missions in Baghdad and Kuwait for further details.

In other developments:

- Iraq rejected a request from Yugoslavia's foreign minister to intercede in the standoff and the non-aligned state responded by recalling its ambassador from Baghdad.

- An autopsy performed on a U.S. soldier found dead in a shower last Friday showed he died of a brain aneurism. He was identified as Sgt. James Wilcher, 21, of the 118th Ordnance Detachment. His home town was not available.

- Senior Chinese officials reaffirmed Beijing's support for efforts to isolate Iraq but made no commitment on the use of military force in the gulf, visiting U.S. lawmakers said Wednesday. They also ruled out sending Chinese troops to the area.

ALBANY, NY (NOV. 14) UPI - Non-incumbents are traditionally short of money in campaigns, but this year the disparity in congressional races was worse than ever, an expert on campaign financing said Wednesday.

As of the middle of October, challengers for seats in the House of Representatives nationwide raised only 17 percent as much money as the incumbents they faced, said Michael Malbin, director of the Center for Legislative Studies at the Rockefeller Institute of Government.

"That goes a long way toward explaining how the voters can return 96 percent of the House members seeking re-election in a year when the mood was said to be anti-incumbent," Malbin said.

But he also said a challenger need not match an incumbent dollar for dollar to mount a credible challenge. In fact, 14 of the 15 incumbents who lost in last week's elections outspent the challengers who defeated them, he said.

"The crucial issue is not getting equality of resources, it's getting resources to the challengers," Malbin said. He said challengers generally have an easier time in U.S. Senate and gubernatorial races, because the press tends to pay more attention to them and, therefore, their messages get across easier and cheaper.

Malbin urged two reforms: lifting the limit on campaign contributions in the early stages of a race to enable challengers to accumulate "seed money" and allowing political parties to play a greater role in individual races.

NEW YORK (NOV. 14) UPI - With nary a coffin nail to fall back on, a crowd of celebrities Wednesday kicked off the 14th annual Great American Smokeout and urged nicotine hounds across the country to try to stay away from the weed for at least 24 hours.

The Smokeout begins at midnight Wednesday and for the 14th year, the American Cancer Society is betting it can keep a lot of folks from lighting up. A variety of events were planned around the country, along with backbone-stiffening announcements, like the results of a survey in Boston that showed smoking is the No. 1 obstacle to matchmaking.

To give them some incentive, Rapper L.L. Cool J playfully punched out a mock six-foot pack of cigarettes, and wrestler Tito Santana helped strangle a similar pack in a "tug of war."

Even New York Mayor David Dinkins, a reformed heavy smoker, got into the act, describing how he quit 28 years ago after reading about a link between butts and bronchitis.

"I have not, I am pleased to report, smoked since," he bragged, after being presented a certificate of appreciation for the city's anti-smoking efforts, namely banning cigarette ads on city owned billboards and subways and taxis.

Cancer Society spokesman David Lehman said a Gallup organization survey showed 17.9 million smokers participated last year, and about 5.2 million stayed off the entire day.

Actress Carol Channing said she was smoking three packs a day when she quit eight years ago. "I couldn't get in the bathtub without a cigarette and an ashtray," she said. "I remember how people who smoke smelled when I kissed them. Like an old sewer."

She pooh-poohed weight gain after quitting, even though she put on 12 pounds. "It came right off," she said. "My emotions came alive," she added, describing nicotine as "a suppressant for everything."

Joyce Randolph, Trixie Norton of the old "Honeymooners" show, said she brought greetings from Art Carney and Audrey Meadows. "Art stopped smoking years ago and Audrey is trying to," she said. "Of course you know we lost Jackie (Gleason) to cancer."

Rocky Aoki, owner of the Benihana chain of restaurants and a speedboat racer who "started smoking as a kid in Japan," said he quit and encourages his 2,000 employees to follow suit, because, he tells them, they will "have more energy and less absenteeism."

OTTAWA (UPI) - Business and consumer confidence in the economy registered

record lows in the third quarter, results reminiscent of the start of the last recession, the Conference Board of Canada said Wednesday.

Gilles Rheaume, the Board's director of forecasting and analysis, said 79 percent of business leaders expect worse economic conditions over the next six months, an all-time high. Only 1.5 percent of respondents felt economic conditions would improve in the near term. Those expecting their own financial position to worsen rose to 30 percent.

Rheaume said he was alarmed to find that 50 percent of respondents planned to reduce nominal investment spending over the next months. Of those, 12.4 percent planned a reduction of at least 20 percent.

Consumers also predicted worse times ahead. The index of consumer attitudes dropped to 72.5 percent from, its lowest level in 30 years with the exception of the last two quarters of 1982 when the country was in a severe recession.

''The recession and the Middle East oil crisis are reducing Canadians' spending power,'' Rheaume said. ''Consumers face an increase in the price of energy products, and with the recession in full swing, they are wary of their financial situations.''

When consumers were asked to evaluate their family's financial situation in the next six months, only 16.6 percent were positive, the lowest response since the survey began in 1960.

#90318u1090 11/14/1990 ~United Press International

(NOV. 14) UPI - Toronto art student Jeremy Lynch has discovered an unusual use for polluted rivers and lakes - developing photographs. For the better part of six months, Lynch has taken samples from Lake Ontario, Love Canal, New York Harbor, and other notoriously polluted bodies of water in search of the perfect developing agent for black-and-white negatives.

He said the idea came to him last March over a few pints of beer with some buddies at a pub. "I was doing a project at school on what man has done to the environment and that sort of stuff," the English-born student recalled. "We were in a pub and drinking a lot when the idea came to me. The truth is, it was drunken inspiration."

Lynch, 23, walked over to the Port of Toronto on Lake Ontario the next day, found an oil-stained pool and gathered some water. It took 28 hours to develop a negative in the water, but an image did materialize. Since then, he has printed a number of negatives in polluted water. But is it art?

"They look like someone in grade 5 printed them up," he said. "But you can look at it and say, 'Yeah, that's the Statue of Liberty."' "Sometimes, the

photos have grains the size of golf balls, but you can definitely make out what the things are," Lynch said.

He said he uses no filters or anything else to enhance the quality of the print. "I'm don't try to make the pictures look any better or worse. That would lose a lot of the effect," he said. Lynch said what works best is a combination of diesel fuel and paint thinner.

Meanwhile, an Eastman Kodak Co. spokesman said while it is possible to get an image from chemicals found in the water, it is not an accurate reflection on whether there is pollution.

"All you need are minor amounts of these chemicals - and some of them are really quite benign. Common sewage could probably do it," said spokesman James Blamphin.

Among Lynch's developing solutions is water from Love Canal, the Niagara Falls neighborhood that was declared an environmental disaster area in the late 1970s. A picture of a weathered basketball hoop with a lonely string dangling is titled "Love Canal Basketball Association." Those and other photographs are currently on exhibit at the Kiva II art gallery in Toronto. Three hundred people turned out for its opening.

Lynch, a student at Toronto's Ryerson Polytechnical Institute, complains some people are trying to commercialize his art. "Water purifier people are trying to use my name and trying to use my photographs," Lynch said. "At the opening, one salesman was mingling with the guests trying to sell them water filters. I threw him out."

Despite his developing medium, Lynch maintains his distance from the environmental movement. "I'm not a major environmentalist, I'm a photographer " he said. "I'm not going to shove an idea down someone's throat. But when people look at my pictures and change their habits, I feel I've done my job."

#90318u1102 11/14/1990 ~United Press International

(NOV. 14) UPI - Closed-circuit television monitors spotted four people at ground zero at the Nevada Test Site, where an underground nuclear explosion was to take place. Greenpeace organizers say three British women and their guide hiked through the desert to Pahute Mesa to prevent the nuclear test.

They were lucky. An Energy Department spokesman says the protesters weren't sighted until several minutes after the countdown was halted by technical problems. Security forces have arrested the demonstrators, but it was NOT know how long the test would be delayed.

Another mercy flight is in the works to get American citzens out of Iraq and Kuwait. The Voice of America says a special evacuation plane will leave Kuwait and Baghdad on Sunday. U-S nationals are being told to contact U-S missions in both countries.

Word of the latest evacuation flight comes as envoys from Egypt, Iraq and the Soviet Union travel to and from Arab capitals to discuss another Arab summit on the Gulf. President Bush held meetings on the crisis with congressional leaders today amid calls for him to call a special session of Congress.

One of London's biggest bookmakers is making Prime Minister Thatcher the odds-on favorite to defeat Michael Heseltine's bid to take over leadership of the ruling Conservative Party. Thatcher is expected to withstand the challenge from the former defense secretary.

The Food and Drug Administration has tightened groundrules to test generic drugs in a move to ensure the validity of quality control testing. The agency says it will require all labs that test generic drugs to keep test samples for

five years.

A leading economist calls today's reported one-tenth of one percent increase in retail sales a sign ''consumers are gloomy.'' Alan Sinai, the chief economist of Boston Company, this could produce a bleak Christmas for retailers. NOT counting motor vehicles, retail sales were unchanged from October.

In Jerusalem, Palestinians are denouncing the imprisonment without trial of three prominent Palestinians. Israel yesterday placed two Arab journalists on six-month administrative detention and sentenced a Gaza Strip doctor to one year in detention. They're accused leading the three-year-old Palestinian uprising.

The nation's Catholic bishops today announced an multi-Million dollar campaign to lobby for government funding of religious schools. Bishop Edward Eagan of Bridgeport, Connecticut, told the National Conference of Catholic Bishops meeting in Washington- ''This is the last civil rights campaign.''

The expanding U-S military buildup in the Persian Gulf is proving to be good news 700 workers facing layoff or reassignment at three Army depots in Pennsylvania. Thanks to Operation Desert Shield, the army is delaying the planned cutbacks, sparing many workers the ax.

#90318u1117 11/14/1990 ~United Press International
WASHINGTON (NOV. 14) UPI - Five senators accused of wielding influence on behalf of an alleged savings and loan kingpin step into the national spotlight Thursday as the key actors in a political drama whose plot and moral transcend the lawmakers' purported misdeeds.

When the Senate ethics committee begins hearings examining the activities of the so-called Keating Five senators accused of improperly exerting pressure on federal bank regulators to go easy on S&L operator Charles Keating Jr., the nation will get a rare peek into a largely hidden and unseemly side of politics.

Aside from the specific allegations against Sens. Alan Cranston, D- Calif., Dennis DeConcini, D-Ariz., John Glenn, D-Ohio, John McCain, R- Ariz., and Donald Riegle, D-Mich., the six-member ethics committee must confront several sensitive political questions that penetrate to the heart of the American form of democracy.

"It does give us a glimpse into the way power works and is used," said Bruce Jennings of the Hastings Center, a non-partisan ethics think tank in New York, who argues the Keating Five case points out problems with the political system more than individual wrong-doing.

"We prefer to find scapegoats," Jennings said. "We don't like to admit to ourselves that our political system gives a great deal of power and influence to a few and that democracy doesn't really work in the way that the textbooks described it to us when we were in school or that the politicians tell us in Fourth of July speeches."

Keating, who faces civil racketeering charges in California under a criminal fraud indictment stemming from the collapse of his Lincoln Savings and Loan, donated a total of $1.3 million in perfectly legal contributions to the five senators' re-election campaigns or other favorite causes.

The senators are accused of holding 1987 meetings with federal bank regulators

to blunt a long-running investigation of the Lincoln thrift, whose 1989 failure has ended up as the biggest thus far in the S&L scandal, costing taxpayers some $2 billion.

None of the senators, however, is accused of breaking the law, only breaking Senate rules governing conflict of interest and making contacts with regulators outside regular channels.

Fred Wertheimer, president of the independent citizens' lobbying group Common Cause, which lodged the complaint that led to the hearings, said, "That's not the way business should be done and the office (of senator) should be used." Jennings said the hearings give the Senate a chance to address an ethical ambiguity.

"This is a tough case because the issues involved don't seem to be good old-fashioned graft and corruption," Jennings added. "It is a more subtle issue and is something that, perhaps, the Senate has not clearly defined as an institution: where the line should be drawn between proper help to citizens versus improper interference (on behalf of a financial or political supporter). This gives the Senate a chance to draw that line."

The Keating Five senators have become the symbol of the government's failure to control one of the biggest financial scandals in U.S. history. Savings and loans across the country collapsed in the 1980s amid unsafe lending practices and risky ventures. The bailout bill to be picked up by American taxpayers will be more than half a trillion dollars.

The trial-like hearings, expected to last at least three weeks, start Thursday with opening statements by the five senators, followed by opening remarks by the committee's special counsel, Robert Bennett. Bennett and each senator will have a chance to call witnesses, with the possibility Keating himself will be called before the panel.

The committee, whose membership is evenly split between Democrats and Republicans, can recommend disciplinary action against any or all of the senators ranging from a mild form of written rebukes to censure or explusion. The panel has set a Dec. 31 deadline for its final decision.

-30- 4229

#90318u1168 11/14/1990 ~United Press International

(NOV. 14) UPI - Carl Icahn, the dissident USX shareholder, Wednesday mounted another charge at a restructuring of the company, saying he has formed a committee to give stockholders a voice in the separation of the steel and energy businesses of Pittsburgh-based USX.

In a letter to USX Chairman Charles Corry made available to news agencies by Icahn, the largest shareholder in USX said he heartily endorsed the company's

recently announced plan of separating its two main businesses. The four-member committee Icahn has formed is intended to ''assist all shareholders in having meaningful input'' on the matter, he said

Icahn wrote that if ''the USX board fails to heed shareholder wishes to accomplish a meaningful restructuring,'' he will nominate the four members of the committee to the USX board and shareholders will have an opportunity to vote for them next year.

A USX spokesman said the company had no immediate comment on the move by Icahn who holds a 13 percent stake in USX and waged an unsuccessful proxy fight last spring to spin-off the steel subsidiary.

On Oct. 30, however, USX said it would make its steel division a wholly owned subsidiary in a move that observers said paved the way for USX, formerly U.S. Steel, to move out of the steel business.

Reached by phone at his Mt. Kisco, N.Y. office, Icahn said ''for four years we have advocated the breakup of steel and this is really all about trying to make it happen. We hope it's not just lip service.''

Icahn believes that steel is a drain on the market value of USX's Marathon Oil Co. and Texas Oil & Gas Corp.

''I believe your shareholders are very restive ... especailly in light of recent surges in the stock marekt price of 'pure energy' companies that leave the price of a 'mixed' USX behind,'' Icahn wrote to Corry in the five-page letter.

''(Shareholders) want a direct voice in shaping the means of separating energy and steel (and) want it accomplished on a fast timetable.''

He urged the company to spin-off to existing stockholders shares in the company's U.S. Steel subsidiary in a tax-free transaction.

#90318u1179 11/14/1990 ~United Press International

NEW YORK (NOV. 14) UPI - Alex Fernandez, who went from college baseball to the major leagues in two months, capped his amateur career Wednesday by winning the 1990 Golden Spikes Award.

Fernandez, who compiled a 12-2 record with a 1.19 ERA last season at Miami-Dade South Community College and later pitched for the Chicago White Sox was the first junior-college player to win amateur baseball's highest honor.

''I'm very shocked,'' Fernandez said after being presented with the award by Will Clark, the San Francisco Giants first baseman and 1985 Golden Spikes

winner. ''I really didn't expect this. Everybody said I was going to win it, but I didn't believe them.''

Fernandez is only the second player to win the Golden Spikes and make his major-league debut in the same season. The other was inaugural Golden Spikes winner Bob Horner, who went straight from the Arizona State campus to the Atlanta Braves in 1978.

Fernandez transferred from the University of Miami to Dade South last January to be eligible for the baseball draft, and wound up being named National Junior College Player of the Year by the U.S. Baseball Federation.

''Every once in a while you receive a gift that you don't deserve - Alex was our gift,'' Dade South Coach Charlie Greene said. ''A Rolls- Royce arrived on campus less than a year ago and all I had to do was keep it filled with gas and oil and let it go.''

The White Sox made Fernandez the fourth pick of the June draft and assigned him to their rookie team in Sarasota, Fla. He progressed quickly through the system and made his major-league debut Aug. 2 against Milwaukee. He finished with a 5-5 record and 3.80 ERA.

''I've had a long year,'' Fernandez said. ''I never had a chance to unpack my bags. I had to be physically strong and emotionally strong to make it through the seasons.

''But the major leagues is the place to be. It's a dream come true. I've always wanted to be there. I've got a catcher (with the White Sox) named Carlton Fisk and he was in the major leagues when I was born, so I've watched him all my life.''

Fernandez showed more composure on the mound than he did in accepting the award. His voice quivered as he thanked his parents, Angel and Nellie Fernandez, for whom he bought a new house in the Miami area with his signing bonus.

''Every time I needed something while I was growing up, with or without the money they would get it there somehow,'' Fernandez said. ''I love you both.''

Also nominated for the award were: outfielder Mike Kelly of Arizona State, catchers Paul Ellis of UCLA and Dan Wilson of Minnesota, Iowa shortstop Tim Costo, and pitchers Dave Fleming of Georgia, Joey Hamilton of Georgia Southern Sam Militello of Tampa and Oscar Munoz of Miami.

The USBF presented Clark with its inaugural Alumni Award, for exceptional achievement in pro baseball. Chris Weinke of St. Paul, Minn., who spurned a football scholarship at Florida State to sign with the Toronto Blue Jays, was honored as the Amateur Junior Player of the Year.

#90318u1212 11/14/1990 ~United Press International

NEW YORK (NOV. 14) UPI - The president of the National Writers Union said Wednesday his group has called off a boycott of Simon & Schuster after the publisher began mailing to more than 30 freelancers checks worth more than $30,000 in disputed wages.

Editors, proofreaders and other freelancers have been receiving the checks in last few weeks for work done on two children's book series originally contracted from Kipling Press, a book packager, by the Silver Burdett Press, a subsidiary of Simon & Schuster, said Jonathan Tasini, the union's president.

The books included biographies of civil rights leaders and Civil War figures.

Last August, the freelancers were told Kipling Press was insolvent and they would not be paid the balance of what was owed them, Tasini said.

Silver Burdett decided to complete the books and proceed with publication, and although it agreed to pay the writers of the books to avoid copyright problems it refused to compensate the freelancers who also worked on the project, Tasini said.

The Writers Union began a letter-writing campaign to schools and librarians around the country, urging them not to buy the two series until the dispute was resolved, Tasini said.

Shortly after the campaign started, Silver Burdett reorganized within Simon & Schuster, and the head of the publisher's children's division, John Sargent, decided to begin sending checks to the freelancers, Tasini said.

Marcia Newfield, a Manhattan-based freelance writer and editor, said Sargent ''made the intelligent decision'' after months of silence from other Simon & Schuster and Silver Burdett executives.

Newfield, who edited a book on A. Philip Randolph for the civil rights series in December 1988, said she only been paid in full in the last month.

In his letter accompanying her check, Sargent praised the series and the

freelancers' work, saying of Silver Burdett, ''It's clearly their responsibility to compensate you but I do not think it's fair that you remain unpaid,'' Newfield said.

#90318u1275 11/14/1990 ~United Press International
DETROIT (NOV. 14) UPI - An inventor who won a 12-year patent fight with Ford Motor Co. last July settled the case Wednesday for nearly $10.2 million.

Robert Kearns, inventor of the intermittent windshield wiper system, met in U.S. District Court with Ford attorneys and U.S. District Judge Avern Cohn, where he agreed to settle with the No. 2 automaker.

Once the two sides had agreed, Cohn signed an order ending the case against Ford.

''We decided to end this costly and protracted matter,'' Ford spokesman Mark Miller said.

Miller said the $10.156 million settlement incorporates damages plus interest and court costs and ends the matter as far as Ford is concerned. He said the money will go into escrow and be transferred to Kearns in a lump sum payment within three days.

''Mr. Kearns has agreed not to appeal the question of intentional infringement and we agree not to have the court trying the whole thing over again,'' Miller said.

Kearns' son, Dennis Kearns, said Tuesday his father was likely to agree to the settlement after Kearns' attorneys and a judge threatened to question his mental competence.

Last July a federal jury in Detroit ordered Ford to pay Kearns $5.1 million, plus interest, for violating his patent on windshield wipers. Interest costs, still pending before the court, had pushed up the award to between $8.5 million and $11.5 million.

Kearns, 63, had said he would appeal the award. He had sought $141 million in damages and has rejected a $30 million out-of-court settlement.

But Ford attorney Malcome E. Wheeler said Tuesday Ford was willing to pay Kearns $10.2 million to avoid further litigation.

The settlement prevents Kearns or his heirs from future litigation against Ford regarding the patents. But it does not prevent Kearns from proceeding with his cases against 23 other automakers, including General Motors Corp., Chrysler Corp. and Toyota Motor Co., which he claims used the intermittment wiper system without permission.

Ford attorney Wheeler said Kearns' mental state was never an issue with the automaker.

#90318u1313 11/14/1990 ~United Press International

PAHUTE MESA, NV (NOV. 14) UPI - U.S. and British scientists triggered a nuclear weapon beneath the Nevada desert Wednesday in a test delayed by technical problems and environmentalists who infiltrated the rugged site.

The weapon, with a yield of 20 to 150 kilotons, was detonated at 11:17 a.m. and measured 5.1 on the open-ended Richter scale, swaying highrises in Las Vegas 105 miles away. It was set off shortly after four people, three British members of Greenpeace and their guide, ran onto ground zero and were arrested.

U.S. Department of Energy spokesman Jim Boyer confirmed the weapons test was conducted jointly by U.S. and British scientists. Its yield was possibly 11 times greater than the 13-kiloton atomic bomb dropped on Hiroshima during World War II and could have had a maximum equivalent of 150,000 tons of dynamite.

The weapon, possibly a thermonuclear warhead, was exploded 1,900 feet beneath Pahute Mesa, a 5,000-foot-high volcanic plateau located deep within the boundaries of the Rhode Island-sized Nevada Test Site. The subsequent ground shaking was felt distinctly at Scotty's Castle in Death Valley, Calif., 40 miles from ground zero, Boyer said.

Government observers at a number of highrise Las Vegas gambling resorts also felt the shaking, as did residents in the small communities of Rachael and Hiko, Nev.

The vertical shaft that housed the nuclear weapon was plugged with cement and grout to prevent radiation from escaping into the atmosphere. Helicopters and other aircraft circled ground zero to monitor any accidental radiation leaks but none were detected. Boyer, stationed at a "control point" about 30 miles from ground zero, said that, from all indications, "the test was a success."

The detonation was planned for 9 a.m. But it was delayed, first because of unspecified technical problems and finally when the four protesters ran onto ground zero in an attempt to halt the blast.

"They ran out of the bushes. We were on a technical hold at the time. The three women were running very close together and very fast. They were on ground zero when we sighted them on our closed circuit television," Boyer said. "They had been hiding in the pinion trees and brush."

Michael Terry of the Rocky Mountain Peace Center, who guided the women through the desolate high desert country to ground zero, attempted to flee. Security guards chased him down in their all-terrain vehicles.

The protesters, Lorna Richardson, 25, of London; Juley Howard, 23, of Bristol, England; Jane Gregory, 27, of London; and Terry were taken to Beatty, Nev., about 100 miles from Las Vegas, and booked on charges of trespassing. Greenpeace had notified the Energy Department Tuesday that the three British women and their guide had infiltrated the 1,350-square-mile test site.

Since 1962, British and American scientists have conducted 22 joint nuclear weapons tests. Prior to Wednesday, the last British nuclear weapons test in Nevada, code named "Barnwell," took place on Dec. 8, 1989. It also had a yield of 20 to 150 kilotons, meaning a maximum equivalent yield of 150,000 tons of dynamite.

Code named "Houston," the Wednesday test was the eighth announced at the Nevada Test Site this year and the 707th since the test site became operational in 1951. The test was No. 502 since the United States and the Soviets signed the Limited Test Ban Treaty in 1963 that outlaws open-air detonations.

SAN ANTONIO, TEXAS (NOV. 14) UPI - Tesoro Petroleum Corp. said Wednesday higher gross margins from refined products and increased crude production helped generate profits of $7 million in fiscal fourth quarter which raised earnings for the year to $22.7 million.

Earnings per share in the fourth quarter ended Sept. 30 totaled 34 cents and for the year 96 cents.

In the fourth quarter of last year, the company lost $14 million and for the year, the loss was $30.5 million.

Revenues during the fourth quarter totaled $307 million, up from $218 million in the same period of last year. For the year, revenues totaled $1 billion, compared to $767 million.

Last year's loss included net charges of $25.8 million.

#90318u1398 11/14/1990 ~United Press International
LOS ANGELES (NOV. 14) UPI - Financial services concern Equifax Inc. said Wednesday that it has sweetened its previously announced stock-swap acquisition of check-guarantee firm Telecredit Inc.

The revised deal, which has a price tag of about $600 million, provides for each share of Telecredit to receive 2.8625 shares of Equifax. The original transaction, announced in June, called for a 2.69- to-1 exchange ratio, but it also contained the stipulation that the 2.69 shares equal at least $50.

As a result, Telecredit called off the scheduled completion of the deal last week because Equifax stock had not been trading at the required average price of $18.60 a share in the 15 days prior to the merger. But Telecredit also said at that point that it had started talks with Equifax to revise the deal.

The merged companies will form an information services concern with annual revenues in excess of $1 billion and more than 17,000 employees.

Equifax, of Atlanta, controls about 40 percent of the nation's $1.5 billion credit-reporting business, while Los Angeles-based Telecredit guarantees about $7 billion worth of checks each year.

The amended agreement must be approved by the directors and shareholders of both companies, but analyst Joseph Stieven of Stifel, Nicholas & Co. of St.

Louis said those approvals are likely.

''This is a totally logical agreement that makes sense for both companies,'' Stieven said. ''There is a lot of potential for revenue enhancement.''

Stieven said that the revised agreement was not a surprise. ''We had estimated that Equifax could afford to pay about 3 shares for each Telecredit share,'' he said.

Equifax stock was trading in the $20 a share range at the time that the deal was announced, but has dropped over the past five months partly because of an overall decline in the market and partly because of concerns that demand for Equifax's credit reporting services may drop off in a recession.

Equifax stock fell $1.875 to close at $14.375 a share Wednesday on the New York Stock Exchange. Telecredit was up $3.25 to $39.50 a share in late afternoon cver-the-counter trading.

-30- 2358

#90318u1401 11/14/1990 ~United Press International

NEW YORK (NOV. 14) UPI - Jurors Wednesday intently watched a videotaped statement of one of two teenagers on trial for gang raping a woman jogger, listening in silence as he described how youths beat her and left her to die in Central Park woods.

Throughout the graphic, 90-minute tape, Kharey Wise, 18, slumped forward in his chair at the defense table, shielding his face from the video monitor as his recorded words filled the courtroom at state Supreme Court in Manhattan.

Wise, who made a second more damaging videotape, said in the first tape that he was watching the April 19, 1989, attack in Central Park from behind a tree. In the second tape, which the jury is expected to watch Thursday, he admitted participating in the attack and holding down the jogger's leg while others raped her.

In the tape played Wednesday morning, Wise said the gang chased down the woman as she jogged through Central Park, beat her and dragged her into a muddy gully. They raped her, used a rock to bashed her into unconsciousness and then left her to die.

''When you saw her in the woods, did you think she was going to die?'' Assistant District Attorney Elizabeth Lederer asked him on the videotape.

''Yes,'' Wise answered.

''You left her there?'' Lederer pressed.

''I didn't want to be there,'' he answered.

''You didn't call the police?'' she asked.

''I didn't want to be there, ma'am. I had enough. I was running from the police,'' Wise answered.

Wise and Kevin Richardson, 16, are on trial on 13 criminal charges, including rape and attempted murder of the 30-year-old investment banker.

Six youths have been indicted in the Central Park rampage, including three teenagers who were convicted of rape and assault in the first trial earlier this year.

In the first trial, jurors acquitted the three youths of attempted murder because they did not believe they realized how seriously they had injured the woman.

In his videotape, Wise shuddered as the prosecutor showed him photographs of the jogger's bloody body. But minutes later referred to the gang rape and beating as an ''accident.''

''You call that an accident?'' Lederer asked incredulously on the tape.

''An accident is when somebody slips and falls down. You saw people drag her down and beat her up so that she looks the way she does in these pictures. You call that an accident?''

Wise had no reply.

WASHINGTON (NOV. 14) UPI - In a Paris summit that will be one of the largest gathering of world leaders in history, President Bush and Soviet President Mikhail Gorbachev will sign three agreements designed to officially end the Cold War.

The Nov. 19-21 Paris summit of the Conference on Security and Cooperation in Europe will be a personal triumph for the two superpower leaders, but it will also be a satisfying moment for CSCE countries, who started the Cold War thaw with the Helsinki Agreement 15 years ago.

That treaty, addressing border issues in Europe and insisting on the respect for human rights was the breakthrough that led to the collapse of communism, which was symbolized by the tearing down of the Berlin Wall. The centerpiece of the Paris summit will be the signing of three documents:

- A Conventional Forces in Europe treaty, sharply reducing the numbers of tanks, troops, artillery, and aircraft in Central Europe. The treaty, to be signed by members of NATO and the Warsaw Pact, will cut most sharply into the Warsaw Pact forces, since they were most numerous to begin with and because the eastern alliance is in a state of collapse.

Bush made U.S. participation in the Paris summit contingent on the final agreement on the CFE treaty. After some final problems were resolved last month, the treaty is now being completed in Vienna.

- A non-agression pact, in which the 22 nations belonging to NATO and the Warsaw Pact, pledge "never to be the first to use force" against the other alliance or countries within the alliances.

According to U.S. officials, the agreement is mostly important to Eastern European countries, such as Hungary and Romania. That is because they have more to fear from each other from nationality disputes than they do from the western military alliance.

- A document charting the future of CSCE, setting up a small secretariat in Prague and establishing a Conflict Prevention Center in Vienna, sort of a multinational hot line, in which the 34 members states will exchange information about their military maneuvers and other actions which might trigger suspicion in the part of other states.

Briefing reporters at the White House, Baker said, "The gathering in Paris will embody in microcosm the new Europe that is still in the process of evolving - its various actors, its institutions and its concerns.

"It will be a trans-Atlantic constellation of leaders representing the established democracies, a united Germany, the newly emerging democracies of

Central and Eastern Europe, and of course, a reforming Soviet Union. For the first time in 40 years, Europe will be meeting and discussing and planning, without an artificial East-West divide to block progress."

#90318u1433 11/14/1990 ~United Press International

MIAMI (NOV. 14) UPI - Cult leader Yahweh Ben Yahweh pleaded innocent to racketeering charges in Miami federal court Wednesday while being represented by his new attorney, impeached U.S. District Judge Alcee Hastings.

Yahweh and 16 members of his sect are charged with murder and other acts of terrorism. After the hearing before U.S. Magistrate William Turnoff, Hastings - who was impeached last year for judicial misconduct in the very same courthouse - refused to comment on his new client.

"The only thing we are asking and the great hope would be that the media would not make this matter a circus. We're in a very dignified proceeding and I represent a very dignified religious leader, not withstanding judgments that others may have," said Hastings, a former candidate for governor and Florida Secretary of State.

Turnoff ordered Yahweh and three other members of his group to remain held at Metropolitan Correctional Center pending a bond hearing Tuesday. Prosecutors said they would ask that the defendants be held without bond until the trial on grounds they are a danger to the community and a risk of flight.

Yahweh, who usually dresses in a white robe and a turban, came to court handcuffed and wearing khaki prison garb. He waved and smiled at other white-robed followers who attended the hearing.

Hastings' decision to represent Yahweh followed from the withdrawal earlier in the day of Ellis Rubin, who had been representing the self-proclaimed Second Coming of Christ, his congregation and businesses for four years.

Rubin said he decided to withdraw after a meeting with Yahweh, who is also known as Hulon Mitchell Jr., Tuesday night at MCC. Yahweh was arrested Nov. 7 at a hotel in New Orleans' French Quarter and brought to Miami Tuesday afternoon.

"Although we parted amicably, we were not able to agree to the terms of our continued representation. We hope he and the others can get a fair trial," Rubin said in a statement. He declined further comment.

Rubin was first contacted by Yahweh when Robert Rozier, then a member of the order of black Hebrew Jewish sect, was charged with shooting two men to death when the Yahwehs tried to take over an Opa-Locka apartment complex they had

purchased.

Rubin's firm eventually became legal counsel for Yahweh Ben Yahweh, members of the group and the cult's Temple of Love Inc., which owns millions of dollars worth of real estate and property in Dade and Broward counties.

Like Hastings, Rubin also expressed concern about media coverage of the case. At a news conference Tuesday he said the Yahwehs may be unable to get a fair trial because of extensive media coverage that was based primarily on details released by the government.

He said the government's indictment was based solely on statements by Rozier, a man he called a "serial killer" who was "singing his head off to save his own life." The defendants are charged in 18 acts of racketeering including 14 murders, two attempted murders, arson and extortion. Three of them were still at large.

Authorities have said more than 12 witnesses are prepared to testify about the 1983 beating death of a karate expert at the cult's Temple of Love. Investigators also indicated they have linked Yahweh cosmetic bottles to homemade firebombs hurled in a Delray Beach neighborhood four years ago.

Hastings entered the governor's race last year after the U.S. Senate removed him from the federal bench. He abandoned that attempt in April after having difficulty mounting a campaign and announced in May that he would run for Secretary of State. He lost in the Democratic primary.

#90318u1441 11/14/1990 ~United Press International

WASHINGTON (NOV. 14) UPI - A congressional committee report released Wednesday on food labeling blames the Reagan administration for a proliferation of misleading health claims, but Republican panel members blasted the report as ''ideologically motivated.''

The report, based on an investigation by a subcommittee of the Democrat-dominated House Government Operations Committee, charged interference by the Reagan White House in a Food and Drug Administration rulemaking resulted in ''the proliferation of misleading health claims on foods.''

The report states pressure from the Office of Management and Budget prompted the FDA in 1987 to permit health claims on food labels, reversing a 81-year prohibition on such claims.

''Companies such as Kellogg's, Land-O-Lakes, and Quaker Oats exploited the weaknesses in the 1987 proposal by placing deceptive health claims on product labels that FDA failed to take any enforcement action against,'' according to the subcommittee report.

In an unusual move, the report - which had been approved on the subcommittee and full committee levels - was released with bitter dissenting remarks by the panel's ranking Republican and an equally divisive counterattack by the panel's Democratic chairman.

Partisan bickering is common in committee or floor debates and dissension is often noted in official congressional reports, but the bitter attack and counterattacks in a subcommittee's report is rare.

In a 13-page attachment, Rep. Richard Armey, R-Texas, called the report ''another ideologically motivated subcommittee assault on American capitalism and Republican administrations who support creating wealth through capitalism instead of imposing poverty through bureaucracy.''

Armey continued, ''While it may be chic in some quarters to incite class warfare by trashing American business entrepreneurs ... if the chic view were our national policy today, chances are we would be issuing a report on why we have no food to eat instead of fretting about what goes on a food's label.''

In response, subcommittee Chairman Ted Weiss, D-N.Y., noted the report was approved without opposition at the subcommittee and full committee levels and chastised Armey for not being present at either meeting.

''It is obvious from the bitter and abusive nature of the dissent that its author preferred diatribe to debate,'' Weiss wrote. ''The dissenting views are otherwise unworthy of reply.''

Three Republicans on the full committee countered with yet another attachment, charging ''the Human Resources Subcommittee has a long history of being this committee's most partisan and uncooperative subcommittee.''

The three, Reps. Al McCandless of California, Howard Nielson of Utah and Jon Kyl of Arizona said they opposed the committee report and approved Armey's avenue of dissent while not agreeing with it in total.

In a press release applauding the subcommittee report, Weiss said it shows ''OMB's total control over the FDA's health claims policy'' and gives the White House office credit ''for supermarket shelves being flooded with misleading health claims.''

Congress just approved the first comprehensive set of food labeling guidelines in 17 years. Lawmakers say they are stronger than FDA's proposals being considered.

#90318u1449 11/14/1990 ~United Press International

WASHINGTON (NOV. 14) UPI - Constantly testing student achievement and performance is like "pulling up a carrot to see how it's growing" and devotes time that could be better used for instruction, the head of the nation's largest educational testing service said Wednesday.

In a speech at the National Press Club, Gregory Anrig, president of Educational Testing Service, said America's educational system has room for improvement, but more tests are not the solution to ensure better student performance.

"It isn't necessary to test every child to know how children are doing," said Anrig. "We keep pulling up the carrot to see how it's growing and that kind of accountability testing cuts into valuable instruction time."

The testing service also released several reports Wednesday that indicated the nation's push for education reform in the 1980s showed some positive results but overall, "The hallmark of the decade was a move toward greater equality rather than a move toward greater excellence," said Anrig.

"What we're seeing is a lag in the effects of reform in terms of gains. You could say the bottom is coming up but we're still flying at a low altitude," he said. "The reforms of the '80s probably did all they could do."

One ETS report showed that at end of the 1980s, 42 states had raised high school graduation requirements, 47 states had begun statewide student testing programs, 39 states imposed changes in teacher standards and many states adopted accountability programs, said ETS Vice President Nancy Cole. "What we're trying to do now is understand the decade of reform and its themes and see how those themes are changing," she said.

Cole outlined how leadership in earlier education reform was largely federal and the educational targets "focused on basic skills, and the mechanism to measure those skills was by testing."

"As we near the end of the reform decade, we begin to see changes," she said. "There are many more actors and leaders in the process - teacher groups, subject matter associations, it's much more diffuse. And the new thinking on testing will play a role in the coming years to demonstrate performance."

It would appear that more time devoted to teaching and less time devoted to testing should be the course of action if educational reform is to make any more gains, said Anrig.

"Yes, you must do accountability testing because these are public schools funded by public money, but you must do it as efficiently and cost-effective as possible," he said.

However, more attention paid to assessment, "which helps improve instruction

and which is very different from standardized testing," is one key means of ensuring quality in education, said Anrig.

"The teacher must be the leader in the 1990s," he said. "What is needed now is not a national test. That will detract from the flexibility needed for education in the 1990s."

In a release, Anrig cited a parts of a letter written to administration's Education Policy Advisory Committee on educational goals for the new decade:

"The way to improve quality and productivity is by giving teachers and school officials more control at the classroom level," he wrote. "What is needed is not another test but strategies to promote higher standards, clearer expectations for schools to achieve these standards and demonstrations that these standards and expectations can be met successfully."

LIMA, PERU (NOV. 14) UPI - Strikes by government economists, tax collectors, doctors and communications workers threaten the chances for success of President Alberto Fujimori's emergency economic plan, analysts said Wednesday.

Since Fujimori took office as Peru's head of state July 28, walkouts by public- and private-sector employees have contributed to a sharp drop in productivity, signaling a deep recession, said observers.

According to official figures, workers striking for higher pay in October skipped the equivalent of 2 million man hours, meaning a fall in productivity.

Peru's gross domestic product decreased by 14.5 percent in August and by a steeper 25.6 percent in September. These compare with a drop in GDP of 1.2 percent between January and September.

By industry, the largest decreases in production were in fishing and construction, according to official statistics.

In August, Fujimori lifted controls on currency exchange and prices and raised utility rates in a plan aimed at breaking astronomical rates of inflation. Inflation soared to 397 percent in August before falling back to 13.8 percent in September and 9.8 percent in October.

Analysts have noted the dampening of inflation was accompanied by walkouts of workers demanding salary hikes - a trend they said was paralyzing the economy.

An estimated 350,000 federal workers, members of the Inter-sector Confederation of State Workers, entered the seventh day of an indefinite strike Wednesday.

Luis Iparraguirre, leader of their Inter-sector Confederation of State Workers said workers are demanding salary increases that would take effect at the beginning of December.

Iparraguirre said the union refused an offer by Juan Hurtado Miller, who serves as both prime minister and economy minister, to give workers a ''Christmas bonus'' of a minimum-wage salary immediately and wage increases starting in January.

#90318u1464 11/14/1990 ~United Press International

WASHINGTON (NOV. 14) UPI - A banker-commissioned study blamed the rival Farm Credit System with unwisely fueling the escalation of land values in the 1970s but, like land in the hard times of the 1980s, some people aren't buying it. "Just from the conclusions, I'd say the whole thing is ridiculous," Ken Auer, FCS executive vice president, said Wednesday.

Auer said the study, released at the American Bankers Association's annual meeting of agricultural bankers, ignored "a whole lot of things that happened in the period."

Farmland values spiraled an average 14 percent a year during the 1970s, a period of flush prices and dizzying growth in the export market, to peak at an average of $823 an acre in 1982. They plunged 27 percent during the 1980s farm recession to a low of $599. Values have recovered since then, reaching $693 at the start of this year.

"The villian in this boom (and) bust," according to the study by Bert Ely and Vicki Vanderhoff, was a 1971 law allowing the Farm Credit System to loan money based on the market value of a piece of land, rather than its income-producing value.

"Instead of acting as a check on borrowers' understandable exuberance, the Farm Credit System fed it with easy credit," the authors wrote. "All speculative bubbles eventually burst and farmland was no exception."

In prepared comments, Ely said the huge increase in farm subsidy spending during the 1980s was "a result of the damage caused by Farm Credit System overspending." The American Bankers Association and the Farm Credit System are long-time competitors.

Early this year, the government noted commercial banks had regained the lead as the single largest source of farm credit. The Farm Credit System was the leader for most of the 1980s.

Ely's study was released shortly after two Agriculture Department economists published a bulletin saying speculative manias "have most likely not occurred in farmland markets." As evidence, they noted that land rental rates, which would be based on likely income, were closely linked to land prices throughout the 1970s.

Economists Fred Kuchler and Abebayehu Tegene also discounted the argument that aggressive lending policies sparked the surge of the 1970s in land prices.

"That conclusion appears to be incorrect but the evidence does not rule out

the possibility that aggressive lending, reflected in lower mortgage rates or greater volumes of credit, could have caused investors to re-evaluate their expectations," Kuchler and Tegene wrote. "The lenders probably made farmland a better investment."

Kuchler and Tegene pointed to sharp changes between the 1970s and the 1980s in many key areas that could have influenced investments. In the 1970s, high inflation rates, comparatively low interest rates, strong commodity prices and burgeoning exports made land attractive. The 1980s were charactorized by high U.S. interest rates, a strong dollar, a fizzle in exports, global recession and larger farm output in other nations.

"Instead of evidence of a speculative bubble, the price changes may show that farmers actually used forecasts cautiously in their business planning," they said.

#90318u1475 11/14/1990 ~United Press International

WASHINGTON (NOV. 14) UPI - The Pentagon should be sure it is not risking too much by simultaneously developing and producing the V-22 Osprey tiltrotor aircraft, a plane that has shown a vibration problem in testing, the General Accounting Office suggested Wednesday.

In a report on the controversial plane, the investigative arm of Congress said testing has only just started and even with a two-year slip in the pilot production decision the high rate of concurrency - developing and producing the plane at the same time - it is impossible to know now if the plane will be ready for production in 1992 as planned.

The report also said the plane has an "unacceptable" problem with vibrations during flight. The report said the contractor - a team composed of Boeing's helicopter division and the Bell Helicopter unit of Textron - is working on a variety of fixes for the aircraft. "Whether these fixes prove workable for production aircraft will not be known until they are tested," said the report.

The plane is also heavier than expected and the contractors said they think they can cut back 1,600 pounds of the 2,822 overage. If the additional 1,200 pounds cannot be shaved from the airframe and engines, the manufacturers are proposing to certify the drive system to take an additional 370 horsepower to meet performance requirements. But the report noted that even that change could add weight or reduce range.

Rep. William Dickinson, R-Ala., the senior Republican on the House Armed Services Committee, released the report and said it introduced "some needed objectivity into what has been too often a tortured, incomplete debate."

The Pentagon has said it would like to buy the plane but budget constraints make that impossible. The issue has been hotly debated in Congress and it has been kept alive over the Pentagon's objections.

"Even if the Congress decides to continue the V-22 program," the report concluded, "the program's status and high concurrency make it impossible to know at this point whether it will be ready for production in fiscal yaer 1922 as the program office plans.

As a result, we recommend that prior to obligating the fiscal year 1991 long-lead funds (items that must be ordered now to be ready in 1992) the Secretary of Defense certify that the risks of concurrency are being managed and that the V-22 program schedule is being met."

One of the plane's biggest congressional boosters, Rep. Curt Weldon, R-Pa., said the report did not debate whether the plane was best for the military. He said there had been "no major showstoppers" in the flight test program and the plane has less concurrency than other major aviation programs. "Continued full scale development of the V-22 has allowed us to identify and correct minor technical problems," said Weldon.

"While our Marines are training in the sands of Saudi Arabia, we on Capitol Hill are discussing whether or not to provide them with state-of-the-art equipment," he added.

Current spending plans project making a decision on pilot production in December of next year. If approved, ten planes could be built over two years, four in 1992 and six more in 1993.

About five percent of the projected flight test hours have been flown in the

developmental aircraft. Operational testing is expected to start next May. The aircraft is intended to replace aging CH-46 helicopters to transport Marines from ship to shore.

NEW ORLEANS (NOV. 14) UPI - A law to deprive illegal drug-makers of needed chemicals has given the United States a big victory in its first year, but a major loophole remains to be closed, a top Drug Enforcement Administration official said Wednesday.

Gene Haislip, DEA deputy assistant administrator for the Office of Diversion Control, said there was a 45 percent decline in seized clandestine laboratories and a 50 percent drop in the export to Colombia of chemicals used to process cocaine.

"This represents one of the largest law enforcement victories that we have achieved in recent years," Haislip said. Despite the law, he said some distributors knowingly and intentionally have been supplying illegal drug-makers with large quantities of ephedrine. The non-prescription tablet frequently is advertised as a "body stimulant" or "energizer" but it can be used to make methamphetamines.

"This is a serious loophole in the law and we will ask the Congress to address it as soon as possible," Haislip said. He also said South American cocaine processors, cut off from U.S. chemical supplies, have increasingly gone to European sources. He called on other nations to ratify a recent United Nations treaty against illicit drug trafficking.

The federal Chemical Diversion and Trafficking Act took full effect last November. It requires chemical manufacturers and distributors to keep records for review by the DEA. The records include reports on certain orders and transactions and proof of identity of customers. The law also requires reports to the DEA of any import, export or transshipment throught the U.S. of certain chemicals.

"There is no doubt in my mind that the suppliers of these chemicals are now exercising a degree of surveillance and self-policing under this new legislation that has helped us make possible this enormous law enforcement gain," Haislip told a news conference ending a DEA-chemical industry conference on the new law.

The law has resulted in a sharp decrease in the export to South America of chemicals used to process cocaine - acetone, toluene, ethyl ether, potassium permanganate and methyl ethyl keytone or 2-butanone.

Shipments from the U.S. dropped from 7,933 metric tons in 1988 to 6,912 metric tons in 1989, and the projected total for 1990 is 3,384 metric tons. However, as the U.S. supply dried up, shipments from Europe to Colombia increased from 4,738 in 1988 to 16,632 last year.

K. James O'Connor, an associate director of the Chemical Manufacturers Association, said the problem of diverting chemicals to drug traffickers required international cooperation. "Chemicals that may be diverted to illegal drug-making are produced and traded all over the world," he said.

He urged all nations to ratify the United Nations convention against illicit traffic in narcotic drugs and psychotropic substances as an important first step in fighting the international drug problem. The United States was one of the first nations to sign the treaty, which took effect two weeks ago

#90318u1540 11/14/1990 ~United Press International
(NOV. 14) UPI - President Bush received a conditional caution light to proceed with the massive U-S military buildup in the Persian Gulf today. But Democrats made it clear that Congress must be consulted before troops go on the offensive.

Iran's foreign minister delivered a message from his president when he met with Iraq's Saddam Hussein in Baghdad today. The foreign minister is the highest-ranking Iranian diplomat to visit Iraq since the 1979 Islamic revolution.

American and British scientists exploded a nuclear weapon deep under the Nevada desert today after fixing technical problems and arresting Greenpeace infiltrators. Three British women and their guide tried to block the test by hiking to ground zero shortly before the blast.

A top U-N official has accused Western nations of trying to monopolize leadership of the Geneva-based U-N Commission for Refugees. The agency is charged with providing care for 15-Million refugees around the world.

In Moscow, deputies of the Supreme Soviet have voted overwhelmingly to demand that President Gorbachev appear before them at an emergency session Friday. Many Soviet lawmakers blame Gorbachev for the nation's economic crisis and for

what some call a paralysis of power.

Celebrities including actress Carol Channing and rapper L-L Cool Jay are kicking off the 14th Great American Smokeout in New York today to get smokers to kick the habit for at least 24 hours, and maybe forever. The smokeout, sponsored by the American Cancer Society, begins at midnight.

Three French Impressionist paintings owned by the late reclusive actress Greta Garbo sold at auction today for 16-Million dollars at Sotheby's gallery in New York City. A fourth painting by Renoir had been expected to fetch two- or three-Million dollars, but failed to sell.

#90318u1546 11/14/1990 ~United Press International

NEW YORK (NOV. 14) UPI - The stock market closed sharply higher Wednesday in active trading, boosted by falling oil prices and by another strong showing by financial issues.

The Dow Jones industrial average, which lost 4.95 Tuesday, added 24.25 to close at 2559.65.

Among broader market gauges, the New York Stock Exchange composite index rose 1.37 to 174.68 and Standard & Poor's 500-stock index gained 2.73 to 320.40. The price of an average share rose 24 cents.

Advances thumped declines 1,002-522 among the 1,991 issues traded. Big Board volume totaled 179,310,000 shares, up from 160,240,000 traded Tuesday.

Stocks opened lower but turned higher and then sharply higher when oil prices began to fall. December crude oil futures were down $1.96 to $31.16 a barrel in late trading after crude oil inventories were reported late Tuesday to have risen.

''A lot of it had to do with crude,'' said Dale Tills, manager of institutional equity trading at Charles Schwab & Co. in San Francisco. ''And when bonds started rallying, we hit our highs. But then we sold off a little on some profit taking late in the day.''

Oil prices are an inflation indicator, so Wednesday's drop in oil spurred gains in Treasury bonds, which in turn fed the rally in stocks. But a late bout of profit taking after the market's 100-point runup took the Dow down about 10 points from its highs for the day.

Tills said the cut in interest rates which the Federal Reserve is widely expected to make this week to try and shore up the economy helped financial issues lead the market higher.

''Banks were strong, there's some feeling of stability there now after they got beat up. There's just a better feeling in the market, sentiment is better '' he said.

The Fed did add funds to the banking system Wednesday, a move which has the effect of lowering short-term interest rates.

But the key rate it is designed to affect was unusually high because of technical factors, so analysts dismissed Wednesday's maneuver as being the signal of a rate cut the market has been waiting for. ''I don't think it had a lot to do with the loosening of credit, I don't think we've seen any evidence of that yet,'' Tills said.

On the trading floor, The Limited was the most active issue, off 1/4 to 15 1/8. On Tuesday, the retailer reported flat third-quarter earnings, at the low end of analysts' expectations.

Citicorp followed, up 5/8 to 14 as banks continued to benefit from the expected drop in interest rates. Schering-Plough was third, sinking 2 1/8 to 43 3/4.

IBM was also active, up 1 1/2 to 113 1/2 after the Wall Street Journal's ''Heard on the Street'' column said the stock appears to be on its way back from a recent slump.

Among the other blue chips, AT&T gained 5/8 to 33 3/4, Merck added 1 3/4 to 84 3/8 and Eastman Kodak rose 7/8 to 42 1/8. General Motors gained 7/8 to 39 7/8 after reporting higher early November car sales and USX climbed 1/2 to 32 1/4 after investor Carl Icahn said he has formed a group to push for a

restructuring.

Elsewhere, MCA surged 3 to 65 1/2 after reports that a buyout by Matsushita may be near completion. Reports said top executives will meet in New York within a week to close the deal.

And First City Bancorp soared 1 3/8 to 5 1/8. In response to an inquiry by the exchange, the bank said it knew of no reason for the unusual activity.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 214,698,420 shares, compared with 201,185,400 shares traded in the previous session.

Prices gained in moderate trading on the American Stock Exchange.

The Amex Market Value index rose 2.31 to close at 297.87. Advances led declines 326-226 among the 813 issues traded. The price of an average share rose 7 cents. Composite volume totaled 13,511,600 shares vs. 12,016,100 traded Tuesday.

Western Digital led the Amex issues, up 3/8 to 5 1/4.

The National Association of Securities Dealers composite index rose 3.98 to close at 356.85.

PROVIDENCE, RI (NOV. 14) UPI - Rhode Island's Catholic leader blasted a local TV station for its recent news series on "Love in the Rectory" and announced to parishioners he has canceled telecasts of Thanksgiving and Christmas masses on the station.

In a letter to be published in the Diocese of Providence's newspaper Thursday, Bishop Louis E. Gelineau said he was "outraged" by the "cavalier treatment given to the Catholic faith and the Catholics of Rhode Island" in the series,

which aired on WPRI-TV, East Providence, on Nov. 7, 8, and 9. About 65 percent of Rhode Island's more than 900,000 residents are Catholic - the highest percentage in the United States.

Gelineau said that as a "first step" he "must cancel all arrangements for the production and telecast" of the masses, though he recognized the inconvenience it may cause Catholic viewers. He did not say what his next steps, if any, might be.

"In conscience, I cannot ignore what has happened," said the letter, which was published in the Providence Visitor and sent last week to Robert Finke, vice president and general manager of WPRI. "It's their prerogative," Finke said. "I feel bad they canceled it. I think it served a need and I feel bad they felt a need to do that."

"Love in the Rectory" began by stating that, since 1984, several Rhode Island priests had been accused of sexual assault. It went into detail on two cases in particular.

One involved the Rev. William O'Connell, a pastor at St. Mary's in Bristol who was convicted of molesting boys in the parish and sentenced to a year in jail. The other focused on a former chaplain at Rhode Island College, the Rev. Robert Marcantonio, who is accused of sexually assaulting a young teenage boy while a graduate student at Iowa State University.

Marcantonio's alleged victim graphically recounted the sexual acts he says he and Marcantonio engaged in. The series also included a study by a psychotherapist and former priest on the frequency with which priests break their vow of celibacy.

Gelineau said he was most offended by the station showing the sacrament of the Eucharist - during which Catholics believe bread and wine are turned into the body and blood of Christ - while discussing the subjects of pedophilia and celibacy.

"Using the Eucharist as a backdrop for the distasteful commentary of this segment is an insult to faithful Catholics everywhere," the letter said. "It is little wonder then that our phones have not stopped ringing with calls from those offended by such insensitivity."

Gelineau acknowledged that some priests fail to remain celibate and that there are a few who are guilty of pedophilia. But he insisted there are "many more teachers, child care providers and parents, for example, who molest young children."

#90318u1584 11/14/1990 ~United Press International

NEW YORK (NOV. 14) UPI - Average yields for money-market mutual funds declined in the latest reporting week, while rates at competing savings and loan institutions were mixed, organizations tracking the figures said Wednesday.

The Donoghue Organization, of Holliston, Mass., said average seven- day simple yields were 7.34 percent, down from 7.38 percent the previous week, and 30-day simple yields were 7.40 percent, down from 7.42 percent.

The average maturity of fund portfolios was unchanged at 49 days.

The Bank Rate Monitor, of North Palm Beach, Fla., gave average rates as follows: money-market deposit accounts, 5.85 percent, off from 5.86 percent; Super-Now accounts, 4.96 percent, up from 4.95; six-month certificates of deposit, 7.39 percent, down from 7.41; 1-year CDs, 7.47 percent, down from 7.50 percent; 2 1/2-year CDs, 7.57 percent, down from 7.60; and five-year CDs, 7.78 percent, down from 7.79 percent last week.

The average rate for a one-year, adjustable-rate mortgage was 8.08 percent, down from 8.16 percent the previous week.

The average rate on a 15-year, fixed-rate mortgage fell in the latest week to 9.61 percent from 9.65 percent. The average rate for a 30-year, fixed-rate mortgage eased to 9.94 percent from 9.96.

The average rate for a four-year automobile loan rose to 12.23 percent from 12.22 percent last week.

RIO DE JANEIRO, BRAZIL - Brazilian President Fernando Collor de Mello said Wednesday that his government might pay some back interest on its $116 billion foreign debt, thereby ending a 17-month undeclared moratorium.

His statement, the strongest public commitment he has made on payments since taking office in March, came in an interview with Brazilian television filmed in Tokyo, where he attended the enthronement of Emperor Akihito.

The charismatic Collor, 41, also attacked Brazilian business leaders, whom he said had resisted his economic crash recovery plan.

In recent weeks the Brazilian government has floated several proposals to pay debt arrears to international institutions, creditor nations and commercial banks. But Collar had not yet made his own position clear.

The government ''is studying the possibility that Brazil may pay $2.5 billion of its foreign debt this year,'' Collor noted.

''We will see how far we can go with this counterproposal that has been made '' Collor, said, adding that he was confident Brazil will soon reach a pact with creditors on refinancing the largest Third World debt.

Last month, Brazil proposed to private bankers that the part of the debt they hold be converted into bonds on which interest would be paid over periods from 15 to 45 years, then redeemed by Brazil at market value.

But private banks have refused to discuss any proposal until Brazil pays part of the estimated $9 billion in overdue interest which has accrued since the de

facto moratorium began in June 1989. The non- receipt of Brazilian interest has contributed to the troubles of several large U.S. banks.

The absence of an agreement with the banks has hindered Brazil from receiving a $2 billion loan from the International Monetary Fund, sources said.

From Tokyo, Collor launched a broadside at Brazilian business interests which are resisting his economic plan. ''Forget about corporate interests,'' he told them, ''and think a little more about Brazil.''

''We need to have love for our homeland instead of love for our own pockets.''

Brazilian business leaders have criticized Collor's anti-inflation plan which has failed to check rising living costs. Monthly bank interest rates in Brazil have soared to 30 percent for some local currency loans.

Consumer inflation, at 13.71 percent in October, was expected to reach better than 15 percent in November. Yet that represented an improvement from the 82 percent inflation rate seen when Collor assumed power.

Collor blamed the recent inflation increase on the Persian Gulf crisis, which has dramatically increased world oil prices. Brazil imports 40 percent of the 1.1 million barrels of oil it consumes daily.

LOS ANGELES (NOV. 14) UPI - A man who pleaded guilty to poisoning his 9-year-old son with insecticides as part of a murder-suicide plan was sentenced Wednesday to 25 years to life in state prison.

Ronald E. Rennie, 38, pleaded guilty last month to first-degree murder in exchange for the dismissal of special circumstance allegations that would have qualified him for a possible life term without parole.

Rennie, who did not face a possible death penalty, was sentenced by Van Nuys Superior Court Judge Judith Ashmann.

Rennie's son, Christopher, 9, died during a 1988 Father's Day weekend visit to his father's townhouse. The boy died from a combination of prescription drugs and fumes from nine insecticide foggers stationed throughout the house, officials said.

Prosecutors said they have evidence, including three suicide notes and cremation certificates for father and son, that show that Rennie planned to kill himself after killing his son. Authorities say Rennie was driven by depression and failed finances.

Despite his guilty plea, defense attorney Susanne Greene said Rennie wanted only to kill himself. Greene said Rennie gave his son tranquilizers so the boy would sleep through his own suicide attempt.

Greene conceded that Rennie had placed the foggers throughout his residence, but said he did so to eradicate a bug problem, not kill his son.

''He adored his son - his son was the most important person in his life,'' the defense attorney said.

Before his death, Christopher lived with his mother, Punnee Rennie, who had divorced Ronald Rennie in 1983.

#90318u1679 11/14/1990 ~United Press International

NEW YORK (NOV. 14) UPI - A federal judge Wednesday sentenced former Wall Street speculator John Mulheren Jr. to a year and a day in prison for conspiring with fellow wheeler-dealer Ivan Boesky to illegally manipulate stock prices.

Mulheren also was fined $1,681,700 for his July 10 conviction on four counts of conspiracy and securities fraud that included conducting sham stock transactions and insider trading.

The burly defendant showed no emotion as he was sentenced by U.S. District Judge Miriam Goldman Cedarbaum. Behind him, his white-haired father, John Mulheren Sr., wept.

Mulheren was convicted after a seven-week trial on charges of manipulating the stock price of Gulf & Western Inc., now Paramount Communications Inc., so Boesky could get a good price for the 4.9 percent stake he held in the company after a failed takeover attempt.

Cederbaum sentenced Mulheren to a year and a day on each of the four felony counts - to be served concurrently. That would mean he could be eligible for parole in two months.

The judge also indicated previous time in custody would be taken into consideration.

Cedarbaum said she was imposing prison time because she wanted everyone to ''be aware that anyone who tampers with the stock market will be punished, will go to prison.''

The judge said she figured the fine of $1,681,700 by calculating the amount of loss by Gulf & Western stockholders between 11:04 a.m. and 11:16 a.m. on Nov. 16, 1985, when the stock was manipulated.

His lawyer, former U.S. attorney Thomas Puccio, said he would appeal the conviction. Meanwhile, Mulheren remained free on bail.

During his trial, Mulheren testified he was unaware Boesky had any holdings in Gulf & Western when Mulheren bought a large chunk - driving up the price - just before Boesky sold his stake back to the company.

Mulheren was named when Boesky turned government informant in a 1986 plea bargain to settle insider trading charges.

Tips from Boesky also led to federal charges against junk bond king Michael Milken, who reached a plea agreement with the government in April and was expected to be sentenced sometime next week.

Mulheren and Boesky once were good friends, and Mulheren was named trustee of an estate for Boesky's children.

However, Mulheren was arrested in 1988 for carrying an assault rifle in his car at his Rumson, N.J., home after allegedly threatening to shoot Boesky for informing on him.

His family blamed the incident on his failure to take the lithium he uses to control manic depression. He is on probation in connection with the gun charges.

Boesky's appearance as the government's star witness marked the first time he publicly described the insider trading scandals that rocked Wall Street in the late 1980s.

He told of a ''stock parking'' arrangement under which he sold Unocal Corp. stock to Mulheren, with agreements that any profits would be funneled back to Boesky through inflated brokerage fees and that Boesky would repurchase the stock at a later date.

Boesky's credibility on the witness stand came under sharp attack by Mulheren's defense lawyer, who forced the admitted insider trader to concede he had lied ''several times'' while under oath before the Securities and Exchange Commission and in official government documents.

The most damaging testimony against Mulheren, however, came from his former partner Edward McCarthy, who said he had several conversations with Mulheren about illegal securities trades with Boesky.

Testifying under immunity from prosecution, McCarthy said Mulheren asked him to keep separate records of the Unocal stock ''because it was Ivan's.''

#90318u1681 11/14/1990 ~United Press International

BELLEVUE, Wash. (NOV. 14) UPI - Government health experts Wednesday launched a nationwide, federally funded program to detect hepatitis B among pregnant women and immunize their infants against the serious liver infection.

Doctors from the U.S. Centers for Disease Control and the National Foundation for Infectious Diseases told public health officials at the first of a series of regional conferences that efforts to stop hepatitis B have largely failed despite the availability since 1981 of safe and effective vaccines.

The reason, they said, is that those identified in high risk catetories for the infection - intravenous drug users, sexually active heterosexuals and homosexuals, health care workers and certain ethnic groups - usually contract the disease long before the health care system reaches them for prevention.

The new program, backed by $10 million in federal money this year and $11 million in 1991, seeks to educate doctors and the public about the need for a simple blood screening for women during pre-natal care or even at the time of delivery to find carriers of the virus and then immunize their infants.

In this way, the immunization would likely protect the newborns from ever contracting the disease or spreading it to others.

Statistics gathered by the CDC show that only 40 percent of doctors were testing pregnant mothers for hepatitis in 1989, even though the test is the same as the one used to screen blood donors.

An estimated 300,000 new cases of hepatitis B are reported in the United States each year, primarily through contact with infected blood, saliva, semen or breast milk. Of those, about 10,000 require hospitalization and 350 die. Another 4,000 deaths per year are attributed to hepatitis B-related cirrhosis of the liver, as are 800 more due to hepatitis B-related liver cancer.

Efforts to combat the disease have been undermined by the fact that at least half the number of carriers - estimated at between 750,000 to 1 million people in the U.S. - display no symptoms whatsoever and thus pass on the virus undetected. Once someone becomes infected, prevention methods are useless and there is no cure.

But health experts hope that by targeting the 19,000 or so carrier mothers giving birth each year to babies who nearly always become susceptible to infection, despite displaying no symptoms at birth, a major cycle contributing to the spread of hepatitis B will be broken.

Immunization would be administered through one shot of hepatitis B immune globulin within 12 hours of birth and two shots of hepatitis B vaccine, one at birth and the second after six months.

The cost of the testing both to the public and private sectors would be about $105 million per year, versus the estimated annual cost of $360 million spent treating the effects of hepatitis down the road, said Dr. Walter Orenstein, director of immunization programs at the Atlanta-based CDC.

While doctors are being informed about the need and cost effectiveness for universal testing of pregnant women for hepatitis B, women can take charge on their own by demanding such tests as part of normal pre-natal care, he said.

''Here is where a mother can do something for her unborn child,'' Orenstein said. ''The risk is from that mother, who is a carrier, transmitting to her child and then continuing that carriage into further generations and further generations, leading to complications and death many years later in an insidious fashion.''

Orenstein stressed that parents must make sure that the doctor performing the delivery is aware of the test results, since action must be taken within the first 12 hours to prevent HBV infection in the newborn.

An effective plasma-derived hepatitis B vaccine was introduced in 1981. More

recently, recombinant DNA technology produced a non-plasma- based vaccine in 1987 and a second was introduced in 1989. The cost of one dose is about $7.50.

#90318u1684 11/14/1990 ~United Press International

WASHINGTON (NOV. 14) UPI - Defense Secretary Dick Cheney authorized the activation of up to 72,500 more members of the National Guard and Reserve Wednesday to support operations in and around Saudi Arabia.

The authorization is not a call up, but enables the military to dip further into reserve forces if necessary.

If all reservists were sent to the gulf region it could push the total American deployment to more than 500,000 troops. There are more than 230,000 U.S. forces in the region and the Bush administration announced plans last week to virtually match that commitment.

So far 35,562 personnel in the selected reserve have been activated.

The authorization for additional forces was not unexpected.

A senior Pentagon official said Tuesday more guard and reserve activations would result from the administration's decision to dramatically increase the size of the regular armed forces assigned to Saudi Arabia for Operation Desert Shield.

The new order raises the call-up ceiling to 80,000 for the Army, which previously had been authorized to activate up to 25,000 reservists. By Tuesday the Army was almost at its ceiling level.

The order boosts the Air Force authority to 20,000 positions from 14, 500. The Navy ceiling was raised last week from 6,300 to 10,000, and the Marine Corps ceiling was raised with Wednesday's order from 3,000 slots to 15,000 personnel. The ceiling of 1,250 positions for the Coast Guard reserve remained unchanged.

The selected reserve includes about 1.16 million uniformed personnel.

So far 24,524 Army personnel, 4,616 Navy, 5,278 Air Force, 1,144 Marine Corps and 511 Coast Guard personnel have been activated.

The Pentagon is allowed to activate reservists under a presidential order which limits the call up to no more than 200,000 members of the selected reserve at any one time.

Cheney noted in a statement that the U.S. military is designed with the combat support and combat service support role built into the reserve forces.

''As we increase the deployment of actice duty forces, we must also call up more members of the National Guard and Reserve to get the supporting forces we need,'' he said.

Combat units may be ordered to undergo refresher training and to validate their mission readiness before being sent overseas.

Members of the reserve, under authority given to the Pentagon by President Bush Tuesday, may be called to active duty for a total of 180 days, doubling the initial limit.

#90318u1711 11/14/1990 ~United Press International

NEW YORK (NOV. 14) UPI - Doug Drabek, who anchored the pitching staff that helped the Pittsburgh Pirates win their first division title since 1979, Wednesday won the National League Cy Young Award.

Drabek was a near unanimous choice as the league's top pitcher, receiving 23 of the 24 first-place votes cast by a committee of the Baseball Writers' Association of America.

The 28-year-old right-hander collected 118 points and was second on the remaining ballot that went to second-place finisher Ramon Martinez of the Los Angeles Dodgers.

Martinez received 21 second-place votes and 70 points. Frank Viola (19) and Dwight Gooden (8) of the Mets and Cincinnati reliever Randy Myers (1) rounded out the voting, based on 5 points for first, 3 for second and 1 for third.

Drabek went 22-6 with a 2.76 ERA and held together a mediocre starting rotation that was strengthened by the second-half acquisition of left-hander Zane Smith. Drabek was 13-2 in the second half of the season and he came within one out of pitching a no-hitter Aug. 3 against Philadelphia.

''It was just one of those seasons where everything seemed to go my way from start to finish,'' Drabek said. ''It was probably the most consistent I've had. I got a lot of run support and defensive help. The offense really helped me out this year. The bullpen, we had a lot of guys kind of in and out and in different spots, and they did a good job. I think they got overlooked a lot.''

Drabek is only second Pirate to win the Cy Young Award, following Vern Law in 1960.

In the playoffs against Cincinnati, Drabek started Games 2 and 5. The Pirates lost a tough 2-1 decision in Game 2, but Drabek kept Pittsburgh alive by pitching masterfully in Game 5. The Reds wrapped up the best- of-seven series two nights later.

The Pirates obtained Drabek in a trade with the Yankees for Rick Rhoden after the 1986 season. He moved into the rotation and went 11-12 his first NL season. He followed with two solid seasons before breaking through with a career year in 1990.

Martinez, 22, had a stellar year for the Dodgers after Orel Hershiser went down with a season-long injury. The Dominican right-hander went 20- 6 and kept Los Angeles in the pennant race.

Viola faltered badly in the second half for the Mets. He started 13- 3, but went 7-9 after the All-Star break.
